M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT—(LAND REVENUE)

NOTIFICATION—No. 4186L R

The 26th October 1896—Under the powers conferred upon him by section 101 (1) of the Bengal Tenancy Act, VIII of 1885, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to direct that a survey be made and a record of rights be prepared in respect of all lands included within the external boundaries of thanas Gopalganj, Masrakh and Basantpur, in the district of Saran, which do not fall within the parganas of Kuari, Sipa, Muhiul, Dhangesi and Bara in the same district.

The particulars to be recorded in the survey and record of rights shall be the following:—

- (a) The name of each tenant.
- (b) The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat or under-raiyat, and, if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.
- (c) The situation, quantity and boundaries of the land held by him.
- (d) The name of his landlord.
- (e) The rent payable.
- (f) The mode in which that rent has been fixed, whether by contract, by order of Court, or otherwise.
- (g) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.
- (h) The special conditions and incidents, if any, of the tenancy.
- (i) The name of each proprietor (including rent-free owner) with the character and extent of his interest, and the situation, quantity and boundaries of the land held by the proprietors.
- (j) The name of each rent-free occupant, the situation, quantity and boundaries of the land held by him, and whether he holds rent-free by the permission of the proprietor of the land, or of his predecessor in title, or independently of such permission.

Kalberer is reverted to his appointment in the Subordinate Accounts Branch, with effect from the date on which Mr. Trotter joins the office of the Examiner of Public Works Accounts, Bengal.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

The 2nd November 1896.

No. 201.—Notification.—It is hereby notified that, in exercise of the powers conferred on him by section 99 of Act III (B.O.) of 1876, the Lieutenant-Governor of Bengal is pleased to substitute the following for rules 6 and 7 of the revised water-rate rules for the Saran Canals published under Notification No. 106 in the *Calcutta Gazette*, dated 26th March 1894:—

The 23rd and 30th September and the 7th, 14th, 21st and 28th October 1896.

A draft of the alterations was published in the *Calcutta Gazette* of the dates noted in the margin, as Notification No. 177, dated 21st September, 1896.

6. Leases will be granted for the year 1896-97 for any one of the four canals to any person, approved by the canal officer, who has a beneficial interest in the use of the water. The charge for the use during the whole year, or any part of it, of each of the canals will be—

					Rs.
No. III.—The Daha	river	10,000
„ IV.— „	Gundaki	„	5,500
„ V.— „	Dhanai	„	6,500
„ VI.— „	Gangri	„	8,000
Total					30,000

The water-rate must in each case be paid in full into the Government Treasury either at Gopalganj or Chapra, before a lease will be granted; or before water will be admitted into a canal. An application for a lease for the year 1896-97 must be made in the form of Appendix I.

7. Leases will be granted for a period of three years ending on the 31st March 1899, to any person, approved by the canal officer, who has a beneficial interest in the use of the water.

The charge for the use during the period of three years of each of the canals will be—

CANALS.	PAYMENT TO BE MADE.		
	Before water is admitted in 1896-97.	Before the 15th April 1897.	Before the 15th April 1898.
1	2	3	4
	Rs.	Rs.	Rs.
No. III.—The Daha river	9,000	8,000	7,000
„ IV.— „ Gundaki „ ...	5,000	4,500	4,000
„ V.— „ Dhanai „ ..	6,000	5,500	5,000
„ VI.— „ Gangri „ ...	7,000	6,000	5,000
Total ...	27,000	24,000	21,000

Water will not be admitted into any canal during any particular year until the water-rate of that year has been paid in full into the Government Treasury, either at Gopalganj or Chapra. An application for a lease for a term of three years must be made in the form of Appendix II.

The 3rd November 1896.

REVISED WATER-RATE RULES FOR THE SARAN CANALS.

No. 209.—Notification.—In exercise of the powers conferred on him by sections 99 and 78 of Act III (B.C.) of 1876, the Hon'ble the Lieutenant-Governor proposes to make the following rules and to fix the undermentioned rates to be charged for water supplied under individual assessment from the Saran Canals during the *rab* season of 1896-97 and the hot weather season of 1897, in addition to the rules in notification No. 201, dated 2nd November 1896, published above.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt of Bengal.

In Notification No. 110 of the 9th August 1880, issued under the provision of Act III of 1876, Government reserved to itself the rights of property in the water of the river channels known as the Daha, the Dhanai, the Gandaki and the Gangri, and their appendant tributaries, including the Rupan Chap Sota.

2. The revenue administration of the Saran Canals is vested in the Superintending Engineer of the Sone Circle. The Executive Engineer of the Gandak Division is, as Canal Officer under the Irrigation Act [III (B.C.) of 1876], charged with the proper maintenance and management of the canals, and with the control of the supply of water in them. All orders passed by him, or by the Subdivisional Canal Officer, are under the terms of that Act subject to correction on appeal to the Collector of Saran.

3. The following rules will be applicable to all irrigation effected from the Saran Canals in the *rab* season (1st November to 31st March) of 1896-97, or to the hot weather season (1st April to 13th July) 1897

4. Any person who wishes to make bunds in the canals must obtain the written permission of the Canal Subdivisional Officer before doing so

5. Any person who constructs bunds in the canals, who interferes with the supply of water in them, or who takes water from them without the written permission of a duly authorised person, will render himself liable to the penalties defined in the Irrigation Act

6. Any person who requires water from the channels of the Saran Canals must apply either to (a) the Patil, (b) the Sectional Officer, or (c) the Subdivisional Canal Officer, who will take his signature on the Form A attached. If the application is approved, the Canal Subdivisional or Sectional Officer (all of whom are hereby empowered in that behalf) will grant a permit for irrigation in Form B.

7. Any person who holds a permit in Form B will be allowed to take canal water for irrigation, and he will be charged for it at the rates detailed in the following schedule.—

Schedule of rates for irrigation

Crop	Rate per Saran bigha.		
	Rs.	A.	P.
For indigo irrigated between the 1st November and 31st March ...	2	4	0
For indigo irrigated between the 1st April and 15th July ...	4	8	0
For other crops ditto ditto ...	3	0	0
For opium ...	1	8	0
For <i>rabi</i> crops irrigated between the 1st November and 31st March	0	12	0

These rates apply equally to irrigation by lift and flow.

8. Persons who take water from any of the river channels named in rule I, without a permit in Form B, and persons who waste the water, are liable to be charged water-rates, under sections 79 and 80 of the Irrigation Act, at rates which shall be fixed by the Sub-divisional Canal Officer, but which shall not be greater than three rupees a bigha in the *rabi* season (1st November to 31st March), or six rupees in the hot weather season (1st April to 15th July).

9. All water-rates assessed under rule 7 will be due on the following dates:—

For irrigation in the *rabi* season—5th April 1897.

For irrigation in the hot weather season—20th July 1897.

Water-rates assessed under rule 8 will be due as soon as the demand statement has been prepared.

10. The demand statements for water-rates due will be sent to the Collector as soon as possible after the irrigation in any village is completed, and a *parcha*, showing the area and amount assessed against each cultivator, will be sent to the rate-payer as soon as possible.

11. Any claim for remission of water-rates under section 76 of the Irrigation Act, must be presented in writing to the Sub-divisional Canal Officer at least twenty days before the crop is cut. The Sub-divisional Canal Officer shall, after such enquiry as he may consider necessary, pass orders on the application. Any application for remission presented direct to the Collector must be forwarded for the orders of the Canal Officer.

12. Objections to the demand statements must be presented within thirty days of the date on which the *parcha* is issued by the Sub-divisional Canal Officer. He will pass orders on such objections.

13. Any person who is not satisfied with an order passed by the Sub-divisional Canal Officer may appeal to the Collector under section 91 of the Irrigation Act. Such appeal must be accompanied by a copy of the order appealed against, and it must be submitted to the Collector within thirty days of the date of the order.

14. Remission statements must be signed by the Divisional Canal Officer. Any statement so signed shall be sufficient authority for a refund by the Collector.

15. No guarantee can be given either as to the volume or duration of the supply, or of the delivery of any quantity of water at any particular point of any canal.

16. The Canal Officer will regulate the water passing into, and along, any canal to the best of his ability to meet requirements. If there is any difficulty in supplying all the channels, the Canal Officer will endeavour to divide the available supply as fairly as possible. The Canal Officer shall have complete control of the distribution of water.

FORM A.

Application for water, No

Name of village

Name of channel

Date of application

We, the undersigned, hereby apply for water from the abovenamed channel for the irrigation of our fields, and we engage to pay, for the area actually found to have been irrigated, to the Canal Officer (or other person duly authorised in that behalf), the water-rates prescribed by the Lieutenant-Governor under the provisions of the Bengal Irrigation Act, and we further agree to abide by the rules issued under the Act:—

Description of crop	Approximate area in bighas	Signature of cultivators
1	2	3

III.—The applications may be for a term of seven years, or for the season only—

- (a) In the case of applications for the season only, the issue of the permit will not necessarily be delayed until the lands have been measured. The boundaries of the block must be stated in the application, which must be signed by or by authority of the cultivators of all the land included in the boundaries mentioned, and the approximate area in the occupation of each on the block must be specified. Water-rates will be charged on the areas in the block as found by actual measurement.
- (b) In the case of applications for a term of seven years, a permit will not be issued until the land has been measured and an application complete in every respect for all the land included in the block has been signed. If water is required to be supplied before the application is completely signed in the manner specified above, an application for water for the season must be made which will be cancelled on a permit for seven years being issued.
- (c) Notice that a permit for seven years is required must be given by the 1st of April, and no permit will be issued unless the application is completely signed by the 30th of November, or, with the special sanction of the Superintending Canal Officer, by the 1st of March following. An application for a permit for the season must be filed by the 1st of September.

IV.—With the special sanction of the Superintending Canal Officer—

- (a) Existing leases for terms of three years may be cancelled and included in an application for a seven-year lease under the preceding rules.
- (b) An application may be made for an addition to a seven-year lease, which, if granted, shall be considered as part of the original lease and terminate therewith.

(ii) Rule 22 to read as follows:—

22. Permits for irrigation upon leases for a term of years (Appendix VIII) or upon *khari* season leases (Appendix IX) shall be issued under the following conditions:—

- I.—The land to be irrigated must form a compact block defined by well-marked boundaries of such a nature as clearly to distinguish leased from the adjoining unleased lands, and also be so situated that unleased lands will not be ordinarily or probably irrigated by water supplied for the land included in the block. The boundaries must be mentioned in the application for a permit for the season, and in the notice referred to in Rule 16 (c), when a permit for a seven-year lease is applied for.
- II.—The Canal Officer may exclude lands included in the block not irrigable by flow or for which canal water is ordinarily not required. In the case of permits for seven years, the block must be not less than 50 bighas in area. In cases where the Divisional Canal Officer considers it advisable to grant a permit to a block of less area than that mentioned above, the previous sanction of the Superintending Canal Officer must be obtained. No permit for seven years shall be issued unless the owners of the village channel from which water is to be obtained have been registered and the channel itself is in a good state of repair such as to fit it for the conveyance of water without wastage occurring. Such leases will not be issued unless it is known from the experience of previous years' irrigation that a sufficient supply of water is always available and that the quantity required is not excessive.
- III.—A permit for a seven-years' lease may be cancelled by the Superintending Canal Officer with effect from a date to be specified in the order for good cause on the application of all the signatories thereto.
- IV.—Permits for the season will be issued under less favourable conditions as to situation, soil, and the quantity of water available; it will not be necessary that the owner of the channel should be registered, but the channel itself must be entered on the register.
- V.—Water-rates will be levied on the areas of the blocks specified in the permits, and measurement of the areas actually irrigated will not be necessary.

(iii) In Rules 3 (1), 9 (VIII), 11, 12, 24 (II), 25, 31, 39, 50, 62, omit the two words "three or."

(iv) In Rule 42 omit the words "three-years' leases."

Further, the Lieutenant-Governor proposes to make the following alterations in the rules referred to in consequence of the increase he proposes to make in certain water-rates.—

- (v) In Rule 71 (a) change the words "1st of April 1892" into "1st of April 1897"
- (vi) In Rule 71 (b) change the words "1st of April 1891" into "1st of April 1897"

(vii) Rule 72 will read as follows:—

SCHEDULE No. I.

Leases for a term of years.

For water-supplied between the 25th of June of one year and the 25th March of the next.	FLOW OR LIFT.	
	Rate per bigha.	Rate per tenth of a bigha.
1	2	3
For leases for seven years, all crops	Rs. A. P. 1 9 0	Rs. A. P. . 0 2 6

Leases having a currency of seven years will be granted at the rate defined in this Schedule until and including the year 1903.

(viii) Rule 73 will read as follows:—

SCHEDULE No. II.

Season leases (kharif).

	FLOW OR LIFT.	
	Rate per bigha.	Rate per tenth of a bigha.
1	2	3
For water supplied between the 25th of June and the 25th of October for all crops	Rs. A. P. 2 3 0	Rs. A. P. 0 3 6

(ix) In Rule 42 omit the five words "for bhadoi, &c., 1st November."

(x) Appendix IV B. to be omitted altogether.

(xi) Further, the Lieutenant-Governor proposes to alter Rule 47 by adding the following words to it:—

"All applications for compensation under section 76 (c) must be made not less than 20 days before the crop is cut."

And in Rule 46 to add the words "not less than" before the words "twenty days before the crop is cut."

(xii) In paragraph 2 of Appendix III omit the figures "1—14"

(xiii) In paragraph 2 of Appendix IV C alter the words "1st of January" into "25th of March."

RAILWAY DEPARTMENT

The 3rd November 1896.

No. 128.—Notification.—This Department Declaration No. 99 of 4th August 1896 regarding the acquisition of land for a station site at Makurda for the Howrah Amta Steam Tramway, published at page 826, Part I of the *Calcutta Gazette* of 5th idem, is hereby cancelled.

No. 129.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the station site for the Howrah-Amta Tramway in the village of Makurda, pargana Boro, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigha and 7 cottaks of standard measurement, bounded on the north,

east and south by nickings on the ground, and on the west by Jagatballavpur road, is required within the aforesaid village of Makurda.

This declaration is made, under the provisions of section 6, Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector for the Howrah-Amta Tramway at Howrah.

No. 130.—Declaration.—The 3rd November 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz, for Jamuria Station, Toposi-Kharabad Section of the Toposi extension, East Indian Railway, in the village of Jamuria, pargana Shergarh, zilla Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 bighas 5 cottahs of standard measurement (corresponding to 2 roads 39 01 poles) bounded by a nick on the ground, is required within the aforesaid village of Jamuria.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

No. 131.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the public expense for a public purpose, viz, for additions and alterations to the Azimgunge Railway Station yard in the villages of Azimgunge and Gerdogunge, pargana Muraripur, zilla Murshidabad, it is hereby declared that for the above purpose two pieces of lands measuring, more or less, 13 cottahs 14½ obitaks of standard measurement, bounded as follows, are required within the aforesaid villages of Azimgunge and Gerdogunge:—

Plot No. 1.—At Gerdogunge.—Bounded north and east by railway land, south by Taran Mandal's pucca house and Protap Roy's thatched house, and west by the public road.

Plot No. 2.—At Azimgunge.—Bounded north and east by railway land, south by the level crossing road, and west by Manilal Nahar's jute land and Protap Roy's thatched house.

This declaration is made, under the provisions of section 6, Act I of 1894, to all whom it may concern.

No. 132.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up at the public expense for a public purpose, viz, for Moghalsera-Gaya Railway in the district of Shahabad, it is hereby declared that for the above purpose a strip of land is required in the village of Umra and Umree, pargana Sasaram, zilla Shahabad, for stone and quarry sidings near mile 60 on the Maghalsera-Gaya Section of an approximate area of 57·03 acres.

Mines of coal, ironstone, slate or other minerals lying under the land or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away or use in the construction of the Railway, are not needed.

This declaration is made, under the provisions of section 6 of Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

MARINE DEPARTMENT.

The 29th October 1896.

No. 132 Marine.—Mr J C M. Skinner, Senior Master Pilot, is granted, under Article 746 (b) of the Civil Service Regulations, privilege leave on half pay from the 1st to the 4th September 1896, inclusive.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

The 29th October 1896

No. 133 Marine.—The following telegram, dated the 27th October 1896, from the Government of Bombay, is published, for general information.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

Copy of a telegram dated the 27th October 1896, from the Government of Bombay to the Government of Bengal.

Consul, Alexandria, telegraphs—All ships coming from plague-infected ports for Suakim even showing clean bills of health during voyage must disinfect first at 'Moses' wells.

The 30th October 1896.

No 134 Marine—The following Notification No. 191, dated the 21st October 1896, issued by the Administration of Burma, relative to the imposition of quarantine regulations in the Port of Rangoon, is published for general information in continuation of this Department Notification No. 181 Marine, dated the 27th October 1896, which was published in the *Calcutta Gazette* of the 28th idem

A. D. McARTHUR, Col., R.E.,
Secy. to the Govt. of Bengal.

GENERAL DEPARTMENT.

NOTIFICATION.

Dated Rangoon, the 21st October 1896.

No. 191.—In exercise of the power conferred by Act I of 1870, and with the previous sanction of the Governor-General in Council, the Chief Commissioner directs that the following rule shall be substituted for rule III of the rules published in this department Notification No. 190, dated 20th October 1896.

III—The pilot shall not take such vessel higher than Elephant Point, but shall anchor it there until the Health Officer of the Port has visited it and ascertained by enquiry from the commander whether any person on board is suffering, or has during the voyage suffered from plague. If the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, the Health Officer may, by writing under his hand to be delivered to the commander, permit such vessel to haul down the yellow flag and proceed upwards in the port and hold free communication with the shore and with vessels and boats in port. Provided that, if the vessel has undergone since leaving Bombay a quarantine, which is properly proved, for not less than eight days at Colombo, or some other British Port, the Health Officer shall grant such permission as aforesaid.

If the vessel has not undergone eight days' quarantine at Colombo or some other British port since leaving Bombay, the Health Officer may direct the commander to take the vessel to the quarantine anchorage and there to remain for a period of eight days from the date of arrival in the harbour. In such case the Health Officer shall also direct the commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for between such vessel and the shore, or other vessels and boats in the harbour.

By order,

D. H. R. TWOMEY,
Officiating Secretary.

The 31st October 1896.

No 135 Marine—The following telegram, dated the 30th October 1896, from the Government of Bombay, relative to the imposition of quarantine regulations in the Dutch colonies, is published for general information.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

Copy of a telegram dated the 30th October 1896, from the Government of Bombay to the Government of Bengal

Consul, Netherlands, writes—Bombay port declared infected and usual quarantine rules enforced from 29th instant in Dutch colonies.

The 3rd November 1896.

No. 136 Marine—Mr. H. E. Mackenzie, Junior Master Pilot, is granted, under Article 746 (a) of the Civil Service Regulations, privilege leave for 1 month and 7 days with effect from the 1st November 1896, or such subsequent date as he may avail himself of it.

A. D. McARTHUR, Col., R.E.,
Secy. to the Govt. of Bengal.

REGISTRATION DEPARTMENT.

NOTIFICATION.—No. 515P.D.

The 2nd November 1896.—Under the provisions of sections 5 and 7 of the Indian Registration Act III of 1877, the Lieutenant-Governor is pleased to sanction the opening of an office of Rural Sub-Registrar at Mahnar, having jurisdiction over the portion of thana Hajipur, in the district of Muzaffarpur, which lies east of the following mauzas :—

PART I A.

Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

The following orders issued by the Government of India in the Home Department are published for general information

C. W. BOLTON,
Offg. Chief Secy to the Govt. of Bengal.

NOTIFICATIONS.

ESTABLISHMENTS.

The 24th October 1896.

No. 802.—The services of Mr H. J. S. Cotton, C.S.I., of the Indian Civil Service, are replaced at the disposal of the Government of Bengal.

EXAMINATIONS.

The 29th October 1896.

No. 409.—With reference to Rules 5 and 10 of the Rules published with Home Department Resolution No. 2 Ex.—188-199, dated 5th June 1894, and to Rules 2 and 6 published with the Resolution of the Government of Bengal, No. 364T.-F, dated 10th October 1894, it is hereby notified that the examination prescribed for filling up vacancies in the Lower Division of the Secretariat Clerical Service of the Government of India and attached offices and in the Clerical Establishments of the offices subordinate to the Government of Bengal, will be held at Calcutta in the Senate House of the Calcutta University, and at Allahabad and Lahore at the places to be appointed by the Governments of the North-Western Provinces and Oudh, and the Panjab, respectively, in January 1897. The exact dates will be notified hereafter. The hours of examination will be from 10 A.M. to 1 P.M., and from 1-20 P.M. to 4-30 P.M. daily.

The probable number of vacancies in the Lower Division of the Secretariat Clerical Service of the Government of India and attached offices to be competed for is eighteen. Of these, nine will be reserved for candidates domiciled in the North-Western Provinces and Oudh, the Panjab, the Central Provinces, Rajputana, Central India, and Beluchistan, provided that a sufficient number of such candidates, duly qualified, appear for the examination to be held at Allahabad and Lahore. The remaining nine vacancies will be offered for competition among the candidates examined at Calcutta, and such candidates, temporarily resident but not domiciled in any of the Provinces enumerated above, as may be permitted to present themselves for examination at Allahabad and Lahore.

The probable number of vacancies in the offices subordinate to the Government of Bengal is nine. These will be reserved for candidates examined at Calcutta.

Candidates should pay the prescribed fee (Rs. 10) into the nearest Treasury and forward the Treasury receipt to the Secretary to the Board of Examiners, Calcutta. Candidates paying their fees in Calcutta should pay them into the Bank of Bengal.

Application for permission to appear at the examination should be made to the Secretary

* *Particulars and documents prescribed in Rule 9 of the Rules published with the Home Department Resolution of 5th June 1894*

(1) Evidence that the candidate at the date of making his application is not less than 18 and not more than 24 years of age. The date of the candidate's birth must be stated.

(2) In case the candidate has been educated at a school in which students' good conduct registers are kept, the candidate's register for the last year of his attendance at school when a year has not elapsed since he left school. In other cases, a certificate that the candidate is of good moral character from the head of the institution in which he has last been educated, or from some respectable householder to whom he is well known in private life, and who is himself known to a District or Sub-divisional Magistrate or to the head of some Government office—this last fact being certified by the countersignature of the officer in question.

(3) *Particulars and documents prescribed in Rule 5 of the Rules published with the Resolution of the Local Government of the 10th October 1894, as amended by Notification No. 877-T.F., dated 17th October 1896.*

(1) The candidate's certificate of the Entrance or any higher University Examination, or of standard VII prescribed by the Code for European Schools.

(2) Evidence that the candidate at the date of making his application is not less than 18 and not more than 24 years of age. The date of the candidate's birth must be stated.

(3) In case the candidate has been educated at a school in which students' good-conduct registers are kept, and in case a year has not elapsed since he left school, a copy of the candidate's register for the last year of his attendance at school, certified by the Head Master. In other cases a certificate that the candidate is of good moral character from the head of the institution in which he has last been educated, or from some respectable householder to whom he is well known in private life and who is himself known to a District or Sub-divisional Magistrate or to the head of some Government office—this last fact being certified by the countersignature of the officer in question.

as amended by Notification No. 877-T.F., dated 17th October 1896, prescribing the particulars and documents* which should accompany the application for permission to appear at the examination.

MEDICAL.

The 30th October 1896.

WEDNESDAY, NOVEMBER 4, 1896.

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION

No. 4002M.—The 28th October 1896.—In continuation of Notification No. 1037M., dated the 20th March 1893, published at page 43, Part IB of the *Calcutta Gazette* of the 22nd idem, extending the provisions of Bengal Act II of 1891 (an Act to consolidate and amend the law relating to hackney carriages and palanquins in Calcutta) to the Suri Municipality, in the district of Birbhum, and to the Railway feeder roads connecting it with Sainthia and Ahmedpur in that district, it is hereby notified, for general information, that, in exercise of the power conferred on him by clause 1, section 61 of the Act, the Lieutenant-Governor is pleased to appoint the Commissioners of the said Municipality and their Chairman to perform the duties imposed, and exercise the powers conferred by the Act on the Commissioners and the Chairman of the Commissioners of Calcutta.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION

No. 4004M.—The 28th October 1896.—In exercise of the power conferred on the Local Government by section 53, clause 3, of the Calcutta Hackney Carriage Act, II of 1891, the Lieutenant-Governor is pleased to confirm the following bye-laws which have been framed by the Commissioners of the Suri Municipality, in the district of Birbhum, under clause 1 of the said section.

H. H. RISLEY,
Secy. to the Govt. of Bengal

BYE-LAWS UNDER THE HACKNEY CARRIAGE ACT.

A.—First class.

1. First class hackney carriage licenses shall be granted only for comfortable, roomy, clean, easy running vehicles of a description superior in all respects to second class carriages. They may be of any approved pattern of the following descriptions of carriages, such as broughams, landaus, phaetons, &c. Each carriage must have a thoroughly good pair of lamps.

2. No carriage shall be licensed in the first class unless drawn by a pair of horses at least 14-2 hands high, and unless both animals are fit for their work.

B.—Second class.

1 No carriage shall receive a second class license unless it be in a thoroughly fit and proper condition.

2. If it be of the kind known as "palki gharry," it must be of the description "brownberry," and shall conform to the following dimensions:—

	Inches
Breadth of carriage, inside	36
Depth of seat	18
Width of well of carriage between cushions	24
Height of roof from seat cushions	40

3. The springs and axles must be of thoroughly sound manufacture. All the iron-work, wood-work of frames, wheels and all parts must be strongly put together, and the carriage must have a good pair of lamps.

4. The seat and back cushions must be of leather or oil-cloth, and well upholstered with springs. The back cushions must be not less than 16 inches in height. The outside of the carriage must be well painted, and the inside either properly lined with varnished wood or with good broadcloth. The lamps must be lighted with candles only.

5. No carriage drawn by a pair of horses shall be licensed in the second class unless both animals are fit for their work and at least 13 hands high, and when drawn by a single horse, that the animal is fit for its work and at least 15 hands high.

C.—Third class.

1. No carriage shall receive a third class license unless it be in a clean and safe condition, have sufficient room inside to seat four persons, and have stout axles, springs and wheels and a good pair of lamps. The iron-work and wood-work of the frames, wheels, axles and body and roof, and all parts of the carriage, must be strongly put together. The blinds, doors, and panels must be sound, and without cracks or other defects which may be likely to admit water in the rains.

2. When drawn by a pair of ponies, each pony must be in a fit condition, and at least 11-3 hands high. When drawn by a single pony, the animal must be fit and at least 13-2 hands high.

3. Every third class carriage, if a palki gharry or brownberry, must be of at least the following dimensions:—

	Inches.
Breadth of carriage, inside	34
Height of seat from well of carriage	18
Breadth of seats	16
Width of well of carriage between cushions	22
Height of roof from seat cushions	38

4. The seat and back cushions must be well stuffed and covered with either leather or oil-cloth, and strongly put together.

5. The outside and inside of the carriages must be properly painted or varnished, or the inside well covered with broadcloth lining.

6. The lamps shall have candle lights, or if any other lighting substance than a candle be used, it must be such as not to give out any smoke or smell.

D.—General.

1. No animal shall be deemed fit for its work unless it is shown in respect of height, bone, muscle and condition equal to the work of drawing the carriage.

2. The harness must be of good description and strong. No chain or rope traces unless they be covered with leather, and no string fastenings, will be allowed.

3. Under section 16 of the Act, carriages of all three classes shall each have a plate, affixed in some conspicuous part of the outside of the carriage, specifying the class, the number of such carriage in the register, and the number of persons it is licensed to carry. The plate or carriage itself must bear also the owner's name. The number must also be painted on the lamps.

4. Every hackney carriage owner shall be bound to produce for inspection all carriages and horses owned by him on receipt of a written requisition from the registering officer or Chairman. Failure of the owner to comply with such requisition, except for adequate cause, shall render his carriage license liable to be suspended for any period not exceeding a week. If after the expiry of the period of suspension the owner fails to produce the carriage and horses for inspection, the suspension shall be continued for the further period of two weeks,

and if not produced after this period, the license shall be withdrawn. Upon passing of the order for suspension, the owner shall be bound to give up the license and the plate to the registering officer.

5. It shall be the duty of the registering officer, upon receiving proper information or complaint in writing that any horse or vehicle licensed under the Hackney Carriage Act is unfit for use, to send for the same, and if after due enquiry he be satisfied of such unfitness, he shall by written order suspend the working of such horse or vehicle for a period not exceeding one month, after which period he shall again examine the horse or vehicle, and if they be still in an unfit condition, the suspension shall be continued for a further period of one month, and if then still found unfit, the license shall be withdrawn. Upon passing of the order for suspension, the license and plate shall be given up. It shall be obligatory on the owner to produce within 24 hours any horse or vehicles so sent for.

6. Every hackney carriage owner or driver shall give notice to the Registrar or Chairman whenever he conveys a dead body or a cholera or small-pox patient in his carriage, and the owner of the carriage shall be bound to disinfect such carriage in the manner ordered by the Chairman or Registrar.

7. Every person applying for a driver's license must be acquainted with the principal places and streets in and around the town of Suri, and have a thorough knowledge of the rates and fares in the schedule.

8. No driver shall be licensed unless he be acquainted with the rule of the road and be in all respects a fit person for such employment.

9. Every driver and syce when acting as such shall be properly clad.

10. The owner shall be responsible that every first and second class carriage when plying, or when on hire, shall have at least one syce and a coachman neatly dressed.

11. Every driver shall see that no hay, straw or fodder for his animal is carried in the front portion of his carriage, and that it be not so placed at the back of the carriage as to prevent a full view of the registered number of the plate.

12. Every driver when giving up service, leaving the town, or when under suspension, shall deposit his license and ticket at the registry office to be returned to him on resuming work.

13. Every place where any hackney carriage or horse is kept shall be open to the inspection of the officers of the municipality at all reasonable hours.

NOTIFICATION.

RULES FOR THE GRANT OF CERTIFICATES TO COMPOUNDERS.

No 4042 Med.—The 2nd November 1896 —In exercise of the powers conferred by section 252 of the Bengal Municipal Act (III of 1884), and section 368 of the Calcutta Municipal Consolidation Act (II of 1888), respectively, the Lieutenant-Governor is pleased to make the following rules for the grant of certificates to Compounders:—

1. The word "drugs," as used in these rules, has the same meaning as in section 252 of the said Bengal Municipal Act, or section 368 of the said Calcutta Municipal Consolidation Act, as the case may be.

2. A certificate may be granted to any person who—

Grant of certificates to Compounders without examination. (a) has passed the first M.B. or first L.M.S Examination of the Calcutta University, or

- (b) has passed the Calcutta Medical College Examination for Military Medical pupils, or

- (c) has passed the Military Medical Examination for hospital apprentices, or the Military Medical Examination for hospital assistants, or

- (d) possesses a license, granted by any Government Vernacular Medical School, to practise medicine, or

- (e) possesses a certificate, license or diploma granted by—

- (i) any Medical School, College, Corporation, University or Pharmaceutica, Society in Great Britain, Ireland or any British Possession which is recognised by the General Medical Council of Great Britain and Ireland, or

- (ii) any foreign School or Society which may from time to time be approved in this behalf by the Inspector-General of Civil Hospitals, Bengal,

declaring such person to be fit to be entrusted with the duties of compounding, mixing, preparing, dispensing and selling drugs in any shop or place registered in pursuance either of section 252 of the said Bengal Municipal Act, or of section 368 of the said Calcutta Municipal Consolidation Act.

3. A certificate may, subject to the conditions hereinafter prescribed, be granted to any person declaring him to be fit to be entrusted with the duties of compounding, mixing, preparing, dispensing and selling drugs in any shop or place as aforesaid

Candidates to pass examination.

4. No certificate shall be granted under rule 3 to any person unless he has passed an examination held under these rules.

Examinations where to be held.

5. (1) Such examinations shall be held—

- (a) at the Campbell Medical School, Calcutta,
- (b) at the Temple Medical School, Patna,
- (c) at the Dacca Medical School, Dacca,
- (d) at the Orissa Medical School, Cuttack, and
- (e) for students of the class established for apprentice compounders in the Hospital of the Church of Scotland Mission, Kalimpong, at a place at the head-quarters of the district of Darjeeling to be appointed by the Civil Surgeon of Darjeeling.

(2) Students of the class established for apprentice compounders in the hospital of the Dublin University Mission, Hazaribagh, may be examined either at the Campbell Medical School, Calcutta, or at the Temple Medical School, Patna.

6. Such examinations shall be held on such days, in the months of April and October in each year, as may be appointed by the Superintendent of the School or the Civil Surgeon of Darjeeling, as the case may be, by notification in the *Calcutta Gazette*.

Committee of Examiners.

7. Such examinations shall be conducted by a Committee constituted as follows, that is to say:—

At each of the schools mentioned in sub-clauses (a), (b), (c), and (d) of rule 5.

President.
The Superintendent of the School.
Members.
Two Teachers of the School.

At the place appointed under sub-clause (e) of rule 5.

President.
The Civil Surgeon of Darjeeling.
Members.
The Resident Medical Officer at the Eden Sanitarium.
The Civil Hospital Assistant attached to the Darjeeling Charitable Dispensary.

8. The subjects for examination shall be *Materia Medica*; Pharmacy, reading in English, and writing from dictation in English, prescriptions and labels for prescriptions; and compounding, mixing, preparing and dispensing drugs.

9. No person shall be admitted to an examination held under these rules unless he produces a certificate of training and a certificate of age and previous education to be produced

10. The certificate of training required by rule 9 must state either—
Contents of certificate of training.

- (1) that the holder thereof—
 - (a) has attended regularly for one year or more the class established for apprentice compounders in the Campbell Medical School, Calcutta, the Temple Medical School, Patna, the Dacca Medical School, Dacca, the Orissa Medical School, Cuttack, the Hospital of the Church of Scotland Mission, Kalimpong, Darjeeling, or the Hospital of the Dublin University Mission, Hazaribagh, as the case may be, and
 - (b) has received instruction in *Materia Medica*; in Practical Pharmacy; in reading in English, and writing from dictation in English, prescriptions and labels for prescriptions; and in compounding, mixing, preparing and dispensing drugs, and
 - (c) has acquired a sufficient knowledge of *Materia Medica* and Pharmacy, and can accurately dispense prescriptions in English, or
- (2) that the holder thereof—
 - (i) has served for three years as an apprentice compounder in some Chemist's or Druggist's establishment recognised for this purpose by the Inspector-General of Civil Hospitals, Bengal, or in some hospital or charitable dispensary under the management or supervision of the Government in which the said Inspector-General has authorised the reception of persons for the purpose of being trained as compounders, and
 - (ii) has acquired a sufficient knowledge of *Materia Medica* and Pharmacy, and can accurately dispense prescriptions in English.

11. The certificate of age and previous education required by rule 9 must be one granted at the time when the holder thereof was received into the school, hospital, establishment or dispensary mentioned in rule 10, and must state that he was then not less than seventeen years of age, and had a sufficient knowledge of Arithmetic and English to read and understand prescriptions and to write directions on labels.

12. Notwithstanding anything in rule 9,—

(a) any person who has, for seven years preceding the publication of these rules in the *Calcutta Gazette*, acted as Compounder in any shop or place of the kind referred to in section 252 of the said Bengal Municipal Act, or section 368 of the said Calcutta Municipal Consolidation Act, shall, on producing a satisfactory certificate to that effect, be exempted from producing any certificate either of training or of age and previous education; and

(b) any person who produces a certificate, signed by the Registrar of the Calcutta University, of having passed the University Entrance Examination, either fully or in the subject of English, or a certificate, signed by an Inspector of Schools, of having passed the Middle English Scholarship Examination, shall be exempted from producing a certificate of age and previous education.

13. The President of an Examining Committee may, before accepting any certificate of training under rule 9, refer it to the Inspector-General of Civil Hospitals, Bengal, for enquiry; and may, after such enquiry, either accept or reject the certificate at his discretion.

14. (1) Certificates granted under rule 2 shall be signed, in cases (a), (b), and (c), by the Principal of the Calcutta Medical College, in case (d) by the Superintendent of the Government Vernacular Medical School, and in case (e) by the Inspector-General of Civil Hospitals, Bengal.

(2) Every certificate granted under rule 3 shall be signed by the President and each Member of the Examining Committee mentioned in rule 7.

(3) No certificate of training shall be accepted under rule 9 unless it is signed by the Superintendent of the School, the Medical Missionary in charge of the Hospital at Kalimpong, the Manager of the Mission at Hazaribagh, a legally qualified Manager of the Chemist's or Druggist's establishment, or the Civil Surgeon of the district, as the case may be.

(4) No certificate of age and previous education shall be accepted under rule 9 unless it is signed by the person who at the time that it was granted was such Superintendent, Medical Missionary, Manager, or Civil Surgeon as aforesaid, as the case may be.

15. (1) Every certificate granted under rule 2 or rule 3 shall be in Form A or Form B, as the case may be, prescribed in the schedule to these rules.

(2) Every certificate in Form B must contain a descriptive roll of the person to whom the same is granted, showing the details mentioned in the Form; and such roll must be signed by such person and by the President of the Examining Committee mentioned in rule 7.

(3) Every certificate granted under rule 10 shall be in Form C or Form D, as the case may be, prescribed in the schedule to these rules.

16 No person who has presented himself for examination under these rules and failed to pass the examination shall be permitted to undergo a further examination unless he produces a certificate showing that he has attended and received instruction, or served, as required by rule 10, for a further period of six months.

SCHEDULE.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 4066M.—The 2nd November 1896.—It is hereby notified that, under sections 14 and 27 of the Bengal Municipal Act III of 1884, as amended by Act IV of 1894, the Lieutenant-Governor is pleased to appoint the Civil Surgeon of Dacca to be a Commissioner *ex-officio* of the Dacca Municipality, *vice* Surgeon Lieutenant-Colonel E. G. Russell, resigned.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION

No. 4096Medl.—The 3rd November 1896.—Under section 334 of the Calcutta Municipal Consolidation Act, 1888, the following regulations are published for general information

H. H. RISLEY,
Secy. to the Govt. of Bengal.

WHEREAS it is expedient to adopt special measures for preventing, checking or mitigating an outbreak of the bubonic plague in Calcutta and to pass special regulations to give effect thereto, the Commissioners in meeting, with the sanction of the Local Government, prescribe the following regulations under section 334 of the Calcutta Municipal Consolidation Act, 1888.—

1 These regulations shall come into force from the date on which the plague may be declared by the Medical Board to be prevalent in Calcutta, with the exception of regulation 8, which shall come into force from the date on which it may be published in the *Calcutta Gazette*, and they shall all remain in operation until such time as they may be countermanded by a notification in the *Calcutta Gazette*

2. Every male householder, who becomes cognisant of any case of the bubonic plague or of fever with glandular swellings in his house, shall be bound to give information of the same to the Ward Office with the least practicable delay, unless he has reason to be satisfied that information regarding the case has already reached or been communicated to the Ward Office.

3 The Commissioners may at any time, between sunrise and sunset, after giving such notice of their intention as shall, under the circumstances, appear to them to be reasonable, enter upon any premises and summarily execute any work required under section 318 of the Calcutta Municipal Consolidation Act, 1884, or with a view to abate any or all of the nuisances indicated in clauses (a), (b), (c), (d), (e) and (f) of section 385 of the said Act: provided that when an apartment is in the actual occupancy of a female who, according to the custom of the country, does not appear in public, the Commissioners shall give at least an hour's notice of their intention to enter such apartment, and shall afford her every reasonable facility for withdrawing from such part or portion of the apartment as they may desire to enter.

4. When a dwelling is so overcrowded as, in the opinion of the Medical Board, after personal inspection by at least two members of the Board, to make the inmates thereof specially liable to an attack of the bubonic plague, the Commissioners may, by a notice posted on some conspicuous part of the dwelling, require the owner or the occupier, if actually residing in the dwelling, or the tenants or the actual inmates thereof, to abate the overcrowding within 24 hours by reducing the number of lodgers, tenants, or other inmates of the said dwelling as prescribed in the notice; and in default of compliance with the requisition in the said notice, may summarily eject all the inmates, or reduce the number of inmates in such manner and to such extent as may appear necessary: provided that the Commissioners shall provide the inmates so ejected, when necessary, with suitable temporary lodgings in the neighbourhood as far as possible.

5. When a dwelling has, in the opinion of the Medical Board, after personal inspection by at least two members of the Board, been so infected with the plague as to render its further occupation a source of danger to the inmates thereof, the Commissioners may, after giving 24 hours' notice, summarily cause such dwelling to be vacated and thoroughly cleansed and disinfected; and the dwelling shall not be reoccupied until in the opinion of the Medical Board it is safe to be reoccupied: provided that the Commissioners shall make suitable arrangements for a thorough disinfection of the clothing, bedding and other articles removed from the dwelling, and shall provide the inmates thereof, when necessary, with suitable temporary lodgings.

6 If in the opinion of the Medical Board, after personal inspection by at least two members of the Board, the destruction of any hut or shed is necessary to prevent the spread of the disease, the Commissioners may, after giving reasonable notice, take measures for the destruction of such hut or shed and of the materials of which it is constructed.

7 No rag-picking shall be permitted in the streets or elsewhere, nor shall rags be transported except under such conditions as may be prescribed by the Medical Board, and any person picking rags in the streets or elsewhere shall be liable to be arrested by the Police, and the Commissioners may disinfest at their own cost, or, acting under the advice of the Medical Board, may destroy any collection of rags in rag-pickers' houses and rag stores.

8. It shall be lawful for the Commissioners to select a site and erect a hospital thereon, or convert any house or other building into a hospital, for the isolation of patients suffering from the plague in any locality which, in the opinion of the Medical Board, after personal inspection by at least two members of the Board, may be suitable for the purpose.

9. Any vacant house or other building not being a place of worship, which after personal inspection by at least two members of the Board, is in the opinion of the Board suitable and required for the purpose of an Isolation Hospital may be entered upon and occupied by the Commissioners without any notice whatsoever, and the owner or the lessee of such house or building shall not be entitled to claim from the Commissioners anything beyond a reasonable rent for the period during which the house or building may remain in their occupation: provided always that the Commissioners shall be bound to thoroughly cleanse, disinfect and limewash the house or building, both internally and externally, before vacating it.

10. The Commissioners shall provide suitable conveyances painted in a conspicuous manner for the free carriage of persons suffering, or suspected to be suffering, from the plague, and for the free transport of any clothing, bedding or other articles which have been exposed to infection; and it shall be lawful for them to drive such conveyances through any public and private thoroughfare.

11. When in any dwelling there is a patient suffering, or suspected to be suffering, from the bubonic plague, the Commissioners may enter that dwelling at any time between sunrise and sunset after giving such notice of their intention as shall, under the circumstances, appear to them to be reasonable, and may take measures for segregating and isolating the patient within such dwelling, so far as the circumstances of the case may admit, to the satisfaction of the Medical Board: provided that where a female is suspected to be suffering from the bubonic plague, the Commissioners shall depute a female doctor to examine her; and when the patient, being a male person, and not being below the age of twelve years, cannot be so isolated, and is certified by the Medical Board, after personal inspection by at least two members of the Board to be without proper lodging and accommodation, the Commissioners may direct his removal to hospital.

12 The Commissioners may provide and set apart special burial grounds and cremation grounds on the banks of the Hooghly and Adigunga for plague patients, and may declare it unlawful to burn or bury the corpse of a plague patient in any other cremation or burial ground.

13. The Commissioners may, from time to time, by public notice, prescribe the manner in which corpses of plague patients are to be conveyed to burning or burial grounds for disposal.

14. In cases of emergency it shall be lawful for the Chairman, with the consent of the General Committee, to sanction any or all such acts as under the ordinary provisions of the Calcutta Municipal Consolidation Act 1884, would require the sanction of the Commissioners in meeting: provided that the Chairman shall always convene a special meeting of the Commissioners at the earliest possible opportunity to confirm the sanction so accorded by him, and if the Commissioners in meeting do not confirm the action of the Chairman, such steps shall be taken to carry out the orders of the Commissioners in meeting as may still be practicable.

15. The Commissioners may, in their discretion, pay compensation to any person who has sustained substantial loss or damage by reason of anything done under the powers conferred by these regulations: provided, however, that no person shall be entitled as of right to claim any compensation whatsoever.

H C WILLIAMS,
Chairman

The 26th October 1896.

DECLARATION.

No. 3998M.—The 28th October 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Howrah Municipality, for a public purpose, viz., for sanitary improvements and public convenience, in village Sibpur, pargana Paikan, in the district of Hooghly, it is hereby declared that for the above purpose, a plot of land, measuring, more or less, one chitak, is required. The land is bounded on the East by the Grand Trunk road, on the West by the Municipal land; on the North by the building of Kshetra Mohan Ghose and on the South by the building of Kedar Nath Das.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal

DECLARATION.

No. 4026M.—The 30th October 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for extension of storm-water outfalls, it is hereby declared that for the above purpose pieces of land about 8,910 feet long and 370 to 500 feet broad, as shown in yellow colour on the plan, in Punchannogram, district 24-Parganas, measuring more or less, 309 bighas, are required.

The boundaries of the land are as follows:—On the North by the remaining portion of lands belonging to Ashu Tosh Muttial and others, Hurry Mohan Mundle, Subh Kristo Banerjee, Sutto Doyal Banerjee, Panchoo Dass and Rai Jotindra Nath Munshi; on the South by Municipal land as demarcated by boundary pillars; on the East by a band on Ballaghatta Canal, and on the West by Pagladanga Road.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal

DECLARATION.

No. 4044M.—The 30th October 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Cossipur-Chitpur Municipality for a public purpose, viz., for opening out a new road connecting Cossipur road with the new road made by the Port Commissioners in the village of Chitpur, zilla 24 Parganas, it is hereby declared that for the above purpose a piece of land belonging to Kumar Sarat Chandra and Kumar Satish Chandra Sing Bahadur, of Paikpara, and measuring, more or less, 7 cottahs 8 chitaks and 19 square feet of standard measurement, is required. The boundaries of the land are as follows:—

On the North—By the remaining portion of the land belonging to Kumar Sarat Chandra and Kumar Satish Chandra Sing Bahadur,

On the East—By the Cossipur road,

On the South—Partly by the Port Commissioners' land and partly by the remaining land belonging to Kumar Sarat Chandra and Kumar Satish Chandra Sing Bahadur, and

On the West—By the Port Commissioners' land.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION

No 4063M—The 2nd November 1896.—Whereas a declaration No 1135M, dated the 20th March 1895, was published at page 68, Part IB of the *Calcutta Gazette* of the 27th idem, declaring the intention of the Lieutenant-Governor to acquire certain lands at the expense of the Calcutta Municipality for a public purpose, viz, for a new road from Kalighat Bridge to Russa Road, South, in Kalighat, Dehi Panchannogram, district 24-Parganas, and whereas it now appears that a certain piece of land, viz, No 19-1, Kalidas Putitundee's Lane, was not included in the said declaration, it is hereby declared that for the above improvement the said piece of land, viz, No. 19-1, Kalidas Putitundee's Lane, measuring, more or less, 3 cottahs and 9 chitaks only, is required, the boundaries of this land being as follows:—

On the north and west, Kalidas Putitundee's Lane, on the south the remaining portion of No. 19-1, Kalidas Putitundee's Lane, and on the east land acquired by the Corporation.

H. H. RISLEY,
Secy. to the Govt. of Bengal

DECLARATION.

No. 4076M—The 3rd November 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Bhadrabar Municipality for a public purpose, viz, for erecting a poundshed in the village of Mankunda, pargana Boro, zilla Hooghly, it is hereby declared that for the above purpose, a piece of land measuring, more or less, 1 cottah and 1 chitak of standard measurement is required. The land is bounded on the north by the land of Babu Kanai Lal Khan and others, on the south by the house of Behary Lal Bairagi, on the east by the Tetooltolah Road, and on the west by the Doba of Babu Kanai Lal Khan and others.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal

DECLARATION

No 4086L S-G—The 3rd November 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by the Government at the expense of the District Board of Saran, for a public purpose, viz., for the construction of an inspection bungalow in the village of Sonpur, pargana Kusmar, zilla Saran, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigha 6 cottahs and 12 dhoores of Bihar standard measurement is required. The land is bounded on the North by the barrow pits of the protective bund made by the Bengal and North-Western Railway Company, on the East by the lands of Malika Dharam Lall Sing, late Babu Behari Sing and Balgobind Bahoo, on the South and West by the lands of the late Babu Bahari Sing and Balgobind Bahoo.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A. S. THOMSON,

Under-Secretary to the Govt of Bengal
 Calcutta, the 24th August 1896

Notification under the Treasure Trove Act

UNDER section 5 of the Treasure Trove Act VI of 1878, notice is hereby given that on the 25th August 1893, three children named Sappant, Thimunnarayan, and Thoti were grazing cattle near a hillside called Bonthakkal in the Byranatham village Uttarakarai taluk, when one of them, Sappant, found a mud pot in the bed of a "stream" within the limits of a Government Reserved forest and that when it was thrown down on the rock, gold coins or panams, as detailed below, fell scattered, which were picked up by all the three. All persons claiming the said treasure or any part thereof are hereby required to appear personally or by duly authorized agents before the Collector of Salem in his office at Salem at 12 noon on Monday 8th March 1897, that their claims may be enquired into and determined according to law —

No	Names of the individuals by whom the gold coins were produced	Residence	Number of coins produced	Approximate value
1	1	3	4	5
1	Thoti, aged 20, daughter of Kurumba Buddi	Byranatham	One gold coin bearing the emblem of Rama and Lakshmana and 18 gold coins	Rs 50
2	Krishnasappan, aged 14, son of Buddaniyachen		3 gold coins	
3	Kuppi, wife of Kullian		9 gold coins	

C. H. MOUNSEY, Acting Collector
 Salem Collector's Office, the 23rd October 1896

Road Cess Notification
DISTRICT BURDWAN

IT is hereby notified for general information that, under section 46 of the Local Self Government Act III (B C) of 1883, the District Board of Burdwan have, at a special meeting held on the 23rd October 1896, determined to levy the Road Cess in the Burdwan district for the ensuing financial year 1897-98 at the maximum rate of one half anna, or six pies in the rupee, on the annual value of lands and net profits from mines

C. FISHER, Chairman, District Board, Burdwan
 Burdwan, the 28th October 1896

Road Cess Notification.
DISTRICT 21-PARGANAS.

IT is hereby notified that, under section 46, Act III (B C) of 1883, the District Board, 21-Parganas, have, at a meeting held on the 9th October 1896, determined to levy road cess during the ensuing year 1897-98 at the maximum rate, namely, at the rate of one half anna on each rupee of the annual value of lands in the district.

M. N. BANERJEE, for Chairman
 Alipore, the 30th October 1896

In the matter of the Dunbar Cotton Mill, Limited

AT an extraordinary general meeting of the above named Company, duly convened and held at the Registered Office 4, Fairlie Place, Calcutta, on the 10th day of October 1896, the following special resolution was duly passed, and at a subsequent extraordinary general meeting of the members of the said Company, also duly convened and held at the same place on the 27th day of October 1896, the following resolution was duly confirmed, viz—

"That it is desirable to reconstruct the Company in order to provide for the extension of its operations and for the carrying into effect a scheme for the conversion of the existing share Capital of the present Company amounting to Rs 1,00,000 in 20,000 shares of Rs 50 each into a share Capital of Rs 5,00,000 divided into 50,000 shares of Rs 100 each with power to the Management of the reconstructed Company to issue such new share Capital on such terms and conditions and at such times as the Management shall determine, and to divide the same into Preference and Ordinary shares, and to allot to such Preference shares such preferential rights and privileges, both as to dividends and as to sharing in the surplus assets of the reconstructed Company in the event of the same being wound up, and as to paying off such Preference shares by drawings or otherwise as may be provided for in the Articles of Association of the reconstructed Company, and that this Company be wound up voluntarily in manner following, that is to say —

"1 That Ralph Percy Ashtabe, and he is hereby appointed Liquidator without remuneration for the purpose of such winding up

"2 That the said Liquidator be, and he is hereby authorized to consent to the Registration of a new Company to be named the 'Dunbar Mills, Limited,' with a Memorandum and Articles of Association which have already been prepared with the privacy and approval of the Directors of this Company

"3 That the draft agreement submitted to this meeting and expressed to be made between the Company therein called the old Company, and its Liquidator of the one part and the Dunbar Mills, Limited, therein called the new Company of the other part be, and the same is hereby approved, and that the said Liquidator be and he is hereby authorized, pursuant to section 204 of the Indian Companies Act, 1882 to enter into an agreement with such new Company (when incorporated) in terms of the said draft, and to carry the same into effect with such (if any) modifications as may be deemed expedient

By order of the Directors,

KILLBURN & Co., Secretaries

Dated Calcutta, the 27th October 1896 (700—1)

LOST

THE Government Promissory Note No. 61 200 of the 1st per cent of 1854-5, for 1,000 rupees, originally standing in the name of Sir Arthur Laurence Habbington, K.C.B., of the War Office, and last endorsed to Henry Michael Callaghan, 13, Chadwell Street, Islington, London, N., the proprietor, by whom it was never endorsed to any other person. Payment of the above Note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicate in favour of the Proprietor

H. M. CALLAGHAN,
 13, Chadwell Street, Islington, N.
 (756—3)

Notice

NOTICE is hereby given that the partnership lately subsisting between us, the undersigned John Radcliffe Croft, Albert Piperno, and Joseph Moses Kohn, as merchants at No. 40, Fingra Road in the suburbs of Calcutta, under the firm of John Croft & Co., was, on the 31st day of October 1896, dissolved by mutual consent, and that the said Albert Piperno and Joseph Moses Kohn on that day retired from the business, and that all debts due and owing to or by the late firm will be received and paid by the said John Radcliffe Croft.

JOHN R. CROFT
 A. PIPERNO
 J. M. KOHN

* Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

N.B.—The latest hour of posting at the General Post Office for (a) Benares, Jaunpur, Azamgarh, Fyzabad, Sultanpur, Bara Binki, Baraut, Lucknow, and other places served through the Oudh and Rohilkhand Railway between Mughalserai and Lucknow, and (b) for Darbhanga, Muzaffarpur, Motihari, and other places served through the Tirhut section of the Bengal and North-Western Railway, will stand as at present i.e., 7 P.M., without a late fee, 7 to 7.30 P.M., with a late fee of half anna, and 7.30 P.M. to 8.15 P.M. with a late fee of one anna.

The letter box for inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7.30 P.M. precisely, after which hour inland letters and papers fully prepaid and bearing an extra postage stamp of $\frac{1}{2}$ anna will be received up to 8 P.M. and up to 8.45 P.M. with a late letter fee of one anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies and the Far East via Tuticorin, the letter box for Foreign articles will be cleared for the last time for articles without the late fee at 8.10 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9.30 P.M. On other days the letter box for Foreign articles will be cleared for the last time for articles without the late fee at 7.30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is $\frac{1}{2}$ annas, which must be prepaid in stamps affixed to the articles.

The Indian Law Reports.*Published under Authority.*

THE Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1870—

Terms of subscription payable annually in advance

For the complete series including postage, Rs 22 8

	Without postage	With postage
	Rs A P	Rs A P
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)		2 0 0
" part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India)		1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit—

For town For mufassal

	Rs A P	Rs A P
For the Calcutta Series, per copy	0 8 9	0 10 3
" each of the Madras, Bombay, and Allahabad Series, per copy	0 5 3	0 5 0
" the Calcutta Series For the year	7 2 0	8 6 3
" each of the Madras, Bombay and Allahabad Series For the year	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay.

Curator of Government Books, North Western Provinces and Oudh

Officer in charge, Bengal Secretariat Book Depot.

Orders and subscriptions for 1891 should be at once registered and remitted by money order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance—

	One page	Half page	Quarter page
For one issue	Rs 20	Rs 14	Rs 9
" three issues	" 55	" 38	" 24
" six "	" 100	" 68	" 42

Bengal Law Reports for one year	20 0 0	22 8 0

Single copies, Rs 2 per copy

Full Bench Judgments, Parts I and II 20 0 0 22 8 0

Obtainable at the Bengal Secretariat Book Depot, Writers Buildings, Calcutta

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers Buildings, Calcutta

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1870 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed.

1st.—Bay of Bengal and Bengal Daily Weather Report, giving meteorological observations taken at 61 stations on or near the coast of the Bay, and in Bengal and Assam, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by post in Calcutta soon after midday. Price to subscribers in Calcutta Rs. 3 per annum, payable in advance for six months.

This report will be issued every year from 1st May to 31st October. From 1st November again the Bay of Bengal Report containing observations taken at 28 stations will be issued up to 30th April.

2nd.—A Monthly Statement of Meteorological Observations taken at 19 observing stations, and of rainfall recorded at 327 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal and Bengal Daily Weather Report, and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Report.

C LITTLE,

Offg. Meteorological Reporter to the Govt. of Bengal

Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depot except for Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices and for those forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

Requests for Acts of the Bengal Legislative Council required on the public service should be addressed to the REQUISITIONER, Office of the Legislative Department, Government of Bengal. Copies are available for purchase at the Bengal Secretariat Book Depot.

Notice.

The 20th March 1886.—The subscription to, and postage for the Calcutta Gazette will henceforth be at the following rates, payable in advance—

Ditto. Urdu version. Royal Soc., stiff boards. 6s

A Dictionary of the Economic Products of India

By DR. GAO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Vol. VI. Parts I, II, III & IV of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs 45 in India, and 3 guineas in England (exclusive of the index, for which a separate charge will be made); packing and postage, in India, 6 annas per volume; for Envelope, Rs 2-6 per volume. For copies bound in half calf or half morocco, Rs 6 and 8 halfpence, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names, habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets; &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that it is difficult need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Vol. II embraces the letter C in 639 pages; Vol. III contains the letters D, E, F and half of G; Vol. IV latter half of G to middle of J; and Vol. V contains the latter half of L to end of O. Vol. VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year, but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the vernacular and European names of the plants, animals and minerals of India, and as such will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

1884-87, 6 plates with text. Rs. 1-8 a set (4s.)

1888-89, 18 plates with text. Rs. 4-8 a set (8s.)

PART III.

Acts of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

[Second Publication.]

ACT No. II OF 1896.

THE following Act, passed by the Lieutenant-Governor of Bengal in Council, received the assent of His Honour on the 4th September, 1896, and, having been assented to by His Excellency the Governor General on the 21st October, 1896, is hereby published for general information:—

An Act to further amend the Bengal Municipal Act, 1884.

WHEREAS it is expedient to further amend the Bengal Municipal Act, 1884; It is hereby enacted as follows:—

1. This Act shall come into force on the day on which it is first published in the Calcutta Gazette with the assent of the Governor General thereto.

2. The word "section," as used in sections 3 to 18, both inclusive, of this Act, means a section of the said Bengal Municipal Act, 1884, as amended by Bengal Act IV of 1894.

3. (1) For clauses (1), (2) and (3) of the first proviso to section 15, the following shall be substituted, namely:—

"(i) has, during the year immediately preceding such election, paid in respect of any rates an aggregate amount of not less than three rupees, or

(ii) has, during the year aforesaid, paid or been assessed to the tax imposed by Act II of 1886 (*An Act for imposing a tax on income derived from sources other than agriculture*), or

(iii) being a graduate or licentiate of any University, or having passed the First Arts Examination of the Calcutta University or the corresponding standard of any other University, or holding a license, granted by any Government Vernacular Medical School, to practise medicine, or holding a certificate authorising him to practise as a pleader or as a mukhtar or as a revenue agent—occupies a holding, or part of a holding, in respect of which there has been paid, during the year aforesaid, in respect of any rates, an aggregate amount of not less than three rupees."

(2) In the definition of "rates," in the said section, the word "means" shall be substituted for the words "shall be deemed to include."

(3) To the said section the following shall be added, namely:—

"*Explanation*—Rules made under this section may reduce but not raise any of the sums mentioned in the first proviso thereto, and may declare that any persons who are not referred to in that proviso shall be entitled to vote."

4. For section 37L the following shall be substituted, namely:—

"37L. The provisions of Part VII shall, notwithstanding anything in section 86, 220, 221, 222, 223, 279 or 287, apply to every Municipality in which a water-supply is provided under section 37K."

5. To section 39 the following shall be added, namely:—

"If the Chairman or the Vice-Chairman fails to call a special meeting within thirty days after

any such requisition has been made, the meeting may be called by the persons who signed the requisition "

6. (1) After the words "or Vice-Chairman," in the first paragraph of section 42, the words "or under section 39 by persons signing a requisition" shall be inserted.

(2) For the words "Chairman or Vice Chairman," in the last paragraph of section 42, the word "President" shall be substituted.

7. For section 69 the following shall be substituted, namely:—

69 (1) After the said sums have been set apart under section 68, the Commissioners at a meeting shall, as far as the Municipal Fund permits, from time to time cause roads, bridges, tanks, ghats, wells, channels, drains and privies, being the property of the Commissioners, to be maintained and repaired and the Municipality to be cleansed;

and may, except as is otherwise provided in this Act, and subject to such rules and restrictions as the Local Government may from time to time prescribe, apply the Municipal Fund to any of the following purposes within the Municipality, that is to say,—

- (i) the construction, maintenance and improvement of roads, tramways, bridges, squares, gardens, tanks, ghats, wells, channels, drains and privies;
- (ii) the supply of water, and the lighting and watering of roads;
- (iii) the erection and maintenance of offices and other buildings required for municipal purposes;
- (iv) the construction and repair of school-houses, either wholly or by means of grants-in-aid;
- (v) the establishment and maintenance of schools, either wholly or by means of grants-in-aid;
- (vi) the establishment and maintenance of hospitals and dispensaries;
- (vii) the promotion of vaccination;
- (viii) the acquiring and keeping of open spaces for the promotion of physical exercise and education;
- (ix) the training and employment of female medical practitioners and of veterinary practitioners;
- (x) the establishment and maintenance of veterinary dispensaries for the reception and treatment of horses, cattle and other animals;
- (xi) the appointment and payment of qualified persons to prevent and treat diseases of horses, cattle and other animals;
- (xii) the improvement of the breed of horses, cattle and asses, and the breeding of mules;
- (xiii) the establishment and maintenance of free libraries;
- (xiv) the maintenance of a fire-brigade;
- (xv) other works of public utility calculated to promote the health, comfort or convenience of the inhabitants;

(xvi) the establishment and maintenance of Benches for the trial of offences under this Act or any bye-laws made thereunder; and

(xvii) generally, to carrying out the purposes of this Act:

Provided that no portion of the Municipal Fund shall be applied to any of the purposes specified in clauses (viii) to (xiii), both inclusive, unless a majority of the Commissioners present at the meeting are satisfied that the other purposes specified or referred to in this sub-section, or such of them as the majority consider it necessary to carry out, have been sufficiently provided for.

"(2) The Municipal Fund shall also be applicable to the payment, at such rates as the Local Government may from time to time direct, of travelling expenses incurred by any of the Commissioners in attending meetings convened under the rules made by the Local Government in pursuance of sub-section (4) of section 1 of the Indian Councils Act, 1892, for the purpose of recommending a person to be nominated as a member of the Lieutenant-Governor's Council.

55 & 56 Vict.,
cap 14

"(3) The Commissioners may do all things, not being inconsistent with this Act, which may be necessary to carry out the purposes of this section.

"69A. (1) The Commissioners shall cause to be kept, for each hospital and dispensary vested in them, accounts, in such form as may be prescribed by rules made by the Local Government, showing—

Receipts and expenditure on account of hospitals and dispensaries

- (a) all endowments, funds and contributions received by them,
- (b) all sums directed by them to be applied to establishment or maintenance, and
- (c) all expenditure incurred by them.

(2) No money which has been received by the Commissioners on account of any hospital or dispensary, or directed by them to be applied to the establishment or maintenance of any hospital or dispensary, shall be expended on any other object.

"69B The Local Government may from time to time make rules—

- (i) prescribing the qualifications of candidates for employment under clause (xi) of section 69; and
- (ii) generally, for the guidance of the Commissioners in all matters connected with the carrying out of the purposes of sections 69 and 69A."

8 (1) For the words "the last preceding section," in section 70, the words and figures "section 69, sub-section (1)" shall be substituted.

(2) To the said section 70 the following shall be added, namely:—

"Notwithstanding anything in this section, the Municipal Fund may be applied, by the vote of the majority referred to in the proviso to section 69, sub-section (1), and without the consent and sanction mentioned in this section, to meeting expenses incurred beyond the limits of the Municipality in the training of female medical practitioners or of veterinary practitioners."

9. (1) For the words "or habitually used" and the words "and habitually used," in section 131 and section 142, the words "or is used in the ordinary course of business" and the words "and is used in the ordinary course of business" shall respectively be substituted.

(2) For the words "habitually used" in section 147A the words "used in the ordinary course of business" shall be substituted.

(8) To section 147A the following shall be added, namely:—

"When carts not kept within any Municipality are so used in more than one Municipality, the Local Government, on the application of the Commissioners of any such Municipality, may, if it thinks fit, apportion between all such Municipalities the registration fees paid under this Act in respect of such carts.

"Where a cart is registered under this Act in more than one Municipality, the Commissioners of the Municipality within which the cart is kept shall have a right to levy the registration fee in preference to the Commissioners of any other Municipality."

(4) The words "or cantonment" in sections 141A and 147A are hereby repealed.

10. After section 141A the following shall be inserted, namely:—

"141B. A carriage, horse or other animal shall be deemed to be used in the ordinary course of business, within the meaning of section 131, if it is used on business on an average thrice a week."

11. After the said section 147A the following shall be inserted, namely:—

"147B. A cart shall be deemed to be used in the ordinary course of business, within the meaning of sections 142 and 147A, if it is used on an average twice a week"

12. In section 238, sub-section (1), the words "or without waiting for the orders of the Commissioners for six weeks from the date of his giving notice in writing under section 237" shall be inserted after the words "as aforesaid."

13. (1) After sub-section (1) of section 279, the following shall be inserted, namely:—

"(1a) With the sanction of the Local Government, the amount of the water-rate imposed under this section may vary with the distance

of houses or lands from the nearest standpipe or other source of water-supply, and the amount may be higher in the case of premises to which communication pipes are attached than in the case of other premises."

(2) In sub-section (2) of the said section the words 'or amounts' shall be inserted after the word 'amount,' in the first place in which that word occurs.

14. After clause (b) of the first proviso to Further amendment of section 279, the following shall be inserted, namely:—

"or
(c) any holding consisting only of tanks."

15. In section 321, after the words "dwelling-houses" the words "or privies" shall be inserted

16. For section 322, sub-section (3), the following shall be substituted, namely:—

"(3) The net proceeds of the said fees, after deducting a proportionate share, to be fixed by the Commissioners in meeting, of the cost of the staff employed in collecting and in supervising the collection of the fees and in keeping and auditing the accounts thereof, shall be applied to the maintenance of the establishment referred to in section 320, and generally to carrying out the provisions of this Part"

17. After clause (a) of section 350 the following shall be inserted, namely:—

"(aa) prohibiting the letting-off of fire-arms, fire-works, fire-balloons or bombs, except (i) with the permission of the Commissioners or a member of the Ward Committee or a Municipal Officer empowered by the Commissioners in this behalf, and (ii) on payment of fees at such rates as may be sanctioned by the Commissioners at a meeting."

18. For clause (f) of section 351A the following shall be substituted, namely:—

"(f) the duties, appointment, leave, fining, suspension and removal of Municipal officers and servants"

19. The following portions of Bengal Act IV of 1894 (*An Act to amend the Bengal Municipal Act, 1884*), namely, section 7, sub-section (1), from "and after clause (2)" to the end, and section 31, are hereby repealed.

CALCUTTA;

The 26th October, 1896.

F. G. WIGLEY,

Offg. Asst. Secretary to the Government of Bengal,
Legislative Department.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, NOVEMBER 4, 1896.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 218.

[First Publication.]

AUSTRALIA—TORRES STRAIT, INNER ROUTE

Positions of Tannadice rock, west extreme of Bih reef and north extreme of Lansdown reef.

THE Portmaster, Brisbane, has given notice (No. 21 of 1896) that the correct positions of the following dangers have been ascertained and are supplied by Captain Howard, R.N., H.M.S. "Dart":—

Tannadice Rock is situated at the N.W. extreme of a shoal $6\frac{1}{2}$ cables long in a N.W. and S.E. direction and 4 cables broad, the depths on which vary from 3 to 7 fathoms. The depth on the rock is 5 feet at L.W.S., and it lies in the following position, viz:—

Latitude	12° 39' 52" S.
Longitude	143° 31' 18" E.

Restoration Rock bears N 59° W., distant $4\frac{3}{4}$ miles.

The western extreme of Bih (b) Reef lies in—

Latitude	12° 38' 30" S.
Longitude	143° 32' 00" E.

and has foul ground extending half-a-mile therefrom. The reef is not safe to approach.

The north point of Lansdown Reef has a depth of 2 fathoms on it, with 9 to 10 fathoms close to the northward, and is about a mile to the northward of its position on the chart, viz:—

Latitude	12° 48' 10" S.
Longitude	143° 33' 30" E.

From the north point—

Cape Direction summit (500) bears S. $12\frac{1}{2}$ ° W., distant 4 miles;

Wye Reef Beacon, S. 85° E., distant $3\frac{1}{10}$ miles;

Chapman Island Summit, S. $37\frac{1}{2}$ ° E., distant $6\frac{1}{2}$ miles.

From the north point the reef trends S. 42° E., 6 cables; then S. 31° E., $1\frac{1}{2}$ miles. Southward of this the reef is correctly charted.

Bearings are magnetic. The latitudes and longitudes are taken from the new Chart, No. 2920, published in June 1896.

Charts affected: Nos. 2920, 2921, and 2764; and Australia Directory, volume 2.

Under-Secretary, Marine Department.

CALCUTTA, the 30th October 1896.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 216.

[Second Publication.]

JAPAN—SETO UCHI.

Aogi seto—Sunken rock north westward of Ko ne sima.

THE British Admiralty has given notice (No. 536 of 1896) of the existence of a rock, with a depth of 5 fathoms on it, situated with Ko ne sima lighthouse bearing E.S.E. (S. 68° E), distant 6½ cables; and western extreme of Ko ne sima S. ½ W. (S. 8° W.)

Approximate position, lat. 34° 20' 10" N., long. 133° 3' 40" E

(2)—*Kuruma no seto—Sunken rocks in eastern entrance.*

Also of the existence of a sunken rock with a depth of 3½ fathoms on it, situated with Hako sima summit (536) bearing E. by N. ½ N. (N. 76° E), distant nearly 1½ miles, and south-western extreme of Ma sima S.S.E. (S. 23° E.)

Approximate position, lat. 34° 13' 50" N., long. 133° 8' 15" E.

Two rocks, each with a depth of 3½ fathoms on it, lie S.S.W. ½ W. (S. 26° W.), distant respectively 2 cables and 2½ cables, from the last rock; and a rock with a depth of 2½ fathoms on it, lies midway between those two rocks and the islet northward of the northern prolongation of the east point of Hakata sima.

The track on the Admiralty Chart has been altered to pass northward and eastward of the above 3½ fathom rock, and the leading mark, south-west point of Seto da jima open of the north point of Hakata sima, bearing N. W by W., has been expunged.

[Second Publication.]

AFRICA, EAST COAST—DELAGOA BAY.

Hope shoal buoy moved to Cockburn shoal.

THE British Admiralty has given notice (No. 541 of 1896), that information has been received through the Board of Trade that, in the beginning of September 1896, the buoy (black pyramid) previously marking the southern end of Hope shoal, would be moved to mark the northern end of Cockburn shoal, and moored in a position with cape Enyack lighthouse bearing S, 20° E., distant 7½ miles; and white house on Black bluff S. 15° W.

Approximate position, lat. 25° 53' S., long 32° 54' E.

[Third Publication.]

AUSTRALIA—MORETON BAY.

Front leading light, North-West channel.

THE Portmaster, Brisbane, has given notice (No. 19 of 1896) that the northern edge of the seaward sector of white light from the front leading light on Bribe Island, bearing S. 17° W, passes about six (6) cables east of the Bray Rock. A dim light may be visible from that bearing as far in as the land, which must not be mistaken for the bright white light, and mariners are cautioned accordingly.

[Third Publication.]

AUSTRALIA—HOVELL BAR, ELLIS CHANNEL.

Eastern approach to Thursday Island Harbour.

THE Portmaster, Brisbane, has given notice (No. 20 of 1896) that, owing to changes in the depth over the Hovell Bar, the deepest water now lies to the southward of the two buoys marking the Bar hitherto painted black. These buoys are now painted red, and are to be left on the starboard-hand at a distance of 150 feet when approaching Thursday Island Harbour; after which proceed as before.

B. P. CREAGH, Comdr., R.I.M.,
Port Officer of Calcutta.

NEW ZEALAND, NORTH ISLAND—KAIPARA HARBOUR.

Bar signals at Pouto Point.

THE British Admiralty has given notice (No. 522 of 1896), that the undermentioned signals by flags of the International Code, to indicate the state of Kaipara bar, would be made at the Pilot station, Pouto Point; but probably they are only available for the information of outward bound vessels:—

1. Flag *P* indicates that the bar is workable by all vessels, steam or sailing.
2. Flag *S* indicates that the bar is workable by steam-vessels or vessels in tow of steam-vessels.
3. Flag *B* indicates that the bar is unworkable.

Approximate position, Pouto point, lat. $36^{\circ} 21\frac{1}{2}'$ S., long. $174^{\circ} 11\frac{1}{2}'$ E.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHOTA NAGPUR DIVISION FOR THE YEAR 1895-96.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 28th October 1896.

RESOLUTION—No. 557T.—G.

READ—

The Annual General Administration Report of the Chota Nagpur Division for 1895-96.

The Report is submitted by Mr. C. R. Marindin, who took over charge of the Division at the close of the year 1895-96. Mr. W. H. Grimley held charge during the whole of the year, except the last five days. Colonel A. Evans-Gordon and Messrs. H. C. Streatfeild and L. F. Morshead held charge of the districts of Lohardaga, Palamau, and Manbhum practically throughout the year, and Colonel C. H. Garbett and Mr. C. H. Bompas had charge of Hazaribagh and Singhbhum, each for nine months, so that the continuity of administration was fairly maintained. But the present Commissioner and three of the District Officers labour under the disadvantage of having joined their charges at the close of the year on which they had to report.

2. *Tours and Inspections.*—The Commissioner and the Deputy Commissioners of Hazaribagh and Lohardaga were able to spend only 88 days, 90 days, and 113 days, respectively, in camp, the prescribed period being 4 months. Three months was the standard for the tours of the other District Officers in the Division and for the Subdivisional Officers, and their tours all reached or passed the standard, except that of Mr. W. Rattray, Subdivisional Officer of Giridih, which fell short by 25 days. Mr. Streatfeild was on tour in Palamau for 126 days. The prescribed inspections of district and subdivisional offices and treasuries were made, except that the Commissioner did not inspect the offices at Ranchi, and Mr. Herald was prevented by an accident from going to Giridih in March and inspecting the offices there for the second half-year; the district offices of Lohardaga and Palamau were inspected only once by the Deputy Commissioner. The tours of the Commissioner, of which an interesting account is given in paragraph 4 of the Report, and those of the District and Subdivisional Officers, appear to have been well planned and useful.

3. *Weather and Crops; Public Health; Material Condition of the People.*—The average rainfall of the Division was 44·69 inches, 16·75 inches less than in the preceding year, and was especially deficient in Hazaribagh, Palamau, and Manbhum. The crops were consequently poor; the outturn of rice throughout the Division being estimated at 11 annas, whereas in each of the two previous years rice yielded a full crop. The average outturn of wheat, pulse, and oilseeds was also much lower than in the preceding year, and the *mahua* tree yielded only a 9-anna crop. Prices of food-grains ruled generally higher than in previous years. The condition of the labouring and cultivating classes shows, however, a tendency to improve, which is due principally to the growth of the coal and mica-mining industries and of the lac trade. The state of the zamindars and other landowners is less satisfactory. There is friction between them and their raiyats, who are withholding the customary services hitherto rendered, while their mode of living is becoming more expensive, and their expenditure on marriages and social ceremonies is increasing. Legislation is about to be introduced, which, it is hoped, will have the effect of putting the relations of landlords and raiyats in the Division on a more satisfactory footing.

The year 1895 was comparatively healthy, though not so healthy as 1893. The average death-rate in 1895 was 27·33 per mille; there was very little cholera except in Manbhum and in two thanas of Hazaribagh. In the latter district vigorous efforts to improve the registration of births and deaths have been made with some success.

4. *Emigration and Immigration.*—The number of emigrants for Assam, registered in the Division, rose from 11,984 to 15,350; of these, by far the larger proportion (10,611) were registered in Manbhum, to which district many coolies are brought from other parts for selection. Besides the registered emigrants, large numbers are recruited on the "free" labour system. Colonel Garbett, who knows Hazaribagh thoroughly, speaks in high terms of the benefits which emigration, in spite of its abuses, has brought to that district. The question of putting a stop, or at least a check, on abuses connected with emigration is receiving the careful consideration of the Lieutenant-Governor.

Labourers from Bihar and the North-West Provinces came in large numbers to work at the collieries in Manbhum, and it is said that persons from Keonjhar and other parts are settling down in Singhbhum.

5. *Manufactures; Mines; Trade and Commerce.*—Lac is the principal manufacture of the Division. There are 11 factories at work in Lohardaga and 42 in Manbhum, and they turned out 27,362 maunds of button and shell-lac, against 12,926 maunds in the previous year. In Palamau lac is largely collected for export, but not manufactured: last year's exports are estimated at 32,000 maunds. The outturn of tea was 1,236,452·5 lbs., against 298,842 lbs. in the previous year; but the season was not specially favourable, in that the young seedlings transplanted were severely injured by the uneven rainfall. The increased outturn is attributed to an improved system of pruning.

Coal-mining on a large scale is confined to the Giridih and Gōbindpur subdivisions. There has been a large increase in the number of collieries in the latter area, owing to the settlement of the Jharia fields, but the industry there has latterly received a check from a fall in the price of coal. The total output of

coal was 1,914,843 tons in 1895 against 700,049 in 1894; that of the mines in the Gobindpur subdivision being 1,281,294 tons—nearly twenty times as much as in 1893. The mica-mining industry in Hazaribagh is gradually gaining in importance: the total output was 8,019 maunds, against 4,849 in the previous year. Gold-mining in Chota Nagpur has not yet achieved success. Coal and coke make up almost the whole of the exports by rail; of these, 3,52,44,628 maunds were exported, while the exports of all kinds of goods amounted only to 3,53,70,101 maunds. 52,392 maunds of food grains were exported and 4,53,839 maunds imported, so that the net import of food-grains by rail was 4,01,447 maunds. No reliable figures are available to show the course of trade in Lohardaga, Palamau, and the greater part of Hazaribagh, which are not served by any railway.

6. *Civil Justice*.—Six thousand one hundred and forty-nine cases of all kinds were disposed of by Munsifs—155 more than in the previous year; the rent suits disposed of numbered 5,162, against 4,792 in the previous year. The number of witnesses examined in civil suits was 11,132, and in rent suits was 9,228, against 12,385 and 8,593 in the previous year. The percentages of witnesses detained for more than two days were 10·6 and 3·7 in civil and rent suits respectively.

7. *Crime; Police; Criminal Justice*.—Excluding sanitary offences (of which there were 1,789), 6,512 cognizable cases were reported in 1895, against 6,699 in 1894; 4,131 non-cognizable cases were reported, against 3,425 in the previous year. A small increase in cognizable crime is reported from Manbhum, where the number of rioting cases rose from 14 to 45, owing to disputes about the newly-settled coal-fields and about lac-bearing trees. In Lohardaga also there were three serious cases of this kind. One of them arose out of the appearance of the “prophet” Birsa Munda, of which Mr. Grimley has given an interesting account. In the same district a number of Nats were convicted of the offence of being members of a gang associated for the purposes of theft. Four hundred and fifty cases, or 7·7 of the whole number investigated, were declared false. In only 34 of these cases were the complainants prosecuted, and only 10 of these were convicted.

Six thousand four hundred and sixty three cases were disposed of by Stipendiary Magistrates during the year, as against 6,363 in 1894; and 25,425 witnesses were examined by them as against 23,735 in 1894; and the percentage of witnesses detained over two days rose from 4·5 to 5·08. The Honorary Magistrates and Benches tried 1,956 cases, against 1,458 in the previous year, and the number of witnesses examined by them rose in a rather less proportion. The percentage of witnesses detained by them for more than two days rose, however, from 3·4 in 1894 to 12·2 in 1895. There can have been no adequate reason for so large an increase. On the other hand, it is satisfactory that four Benches and two Honorary Magistrates, sitting singly, were able to dispose of their cases without detaining any witnesses more than two days. The proportion of police cases remanded six times or more to the whole number tried by Stipendiary Magistrates rose from 4·2 to 9·5. This is far from creditable to the criminal administration of the Division, and the Lieutenant-Governor trusts that the Commissioner will make every effort to secure the more prompt disposal of criminal cases. There was some improvement in the work of Honorary Magistrates in this respect, but here also there is still much to be desired.

One hundred and nine cases were tried at the Sessions Court, and 74 ended in conviction. Committals appear to have been made after careful enquiry, except in Manbhum and Lohardaga, where the results of cases committed were poor.

Fines to the extent of Rs. 36,439 were imposed during the year. Out of the total demand of Rs. 58,469, only Rs. 31,175 were realized and Rs. 6,682 were remitted. The large balance of Rs. 20,612 is still outstanding, and measures should be taken to reduce it either by recovery or by writing off sums irrecoverable.

Certain changes were made during the year in the distribution of the police, to give effect to the recommendations of the Committee which sat for the purpose in 1892. The accounts of the working of the regular police given by the district officers attribute to that force mediocrity and nothing more. The

Division as a whole is described as a country comparatively free from crime, but the expansion of coal-mining appears to be introducing new difficulties into police administration.

The provisions of Act V (B.C.) of 1887 for the organization of the village police are gradually being extended to more villages, and are now in force in the greater part of Hazaribagh, Lohardaga, and Palamau. It is reported that, especially in the north of Manbhum, the highest salary (Rs. 4) allowed by the Act is insufficient to attract to the post of *chaukidar* men who can get higher wages as labourers on railways or in mines.

8. *Land and Land Revenue.*—The current demand of land revenue in the Division rose for various causes by Rs. 19,041 to Rs. 4,05,263. The arrear demand was Rs. 11,635; and of the total demand (current and arrear), Rs. 4,91,634 were collected. In permanently-settled estates the current collections exceeded the standard percentage (99 per cent.) of the current demand in every district. In Singhbhum and Manbhum the whole of the current demand was realized.

The following table shows the proportion of current collections to current demand in temporarily-settled estates:—

Hazaribagh	99.8
Lohardaga	97.8
Palamau	86.9
Singhbhum	33.2
Manbhum	100.0

The demands in the last two districts on this account are very small: in Singhbhum the current demand is only Rs. 770. The standard of 95 per cent. was not reached there or in Palamau. In estates held direct by Government the standard of 90 per cent. was everywhere attained. Hazaribagh realized 99.5 per cent. of the current demand, Singhbhum 97.04, and Lohardaga 90.8; in the other districts there are no estates of this class. On the whole, the collections of land revenue in this Division have been excellent.

The total demand of road and public works cesses was Rs. 3,93,663; 99.9 per cent. of the arrear demand was collected, and 77.6 per cent. of the current demand. The settlement of the Palamau Government estate has been completed, except for the publication of the *jamabandis* and the hearing of objections to assessments, and the similar operations in the Kolhan estate in Singhbhum have progressed satisfactorily during the year.

9. *Wards' and Attached Estates.*—There were eight wards' and 54 encumbered estates under the management of the revenue authorities during the year. The most important of these is the Pachete estate in Manbhum, charge of which was taken during the year under Act VI of 1876. This estate has large outstanding balances, and the attention of the Manager has been mainly devoted to ascertaining the claims against it. The total current demand of all the estates is Rs. 7,28,105; and the arrear demand was Rs. 4,49,429. In Singhbhum the arrear demand was more than twice as much as the current demand. The total outstanding balance at the end of the year had risen to Rs. 5,20,992—a result chiefly due to the inclusion of the demand for the Pachete estate. The Lieutenant-Governor trusts that every effort will be made to reduce these balances. The expenditure in these estates on donations to schools and dispensaries, buildings and improvement of the land and properties amounted to Rs. 23,271, being 3.19 per cent. of the current demand.

10. *Excise; Stamps; Income-tax.*—The total excise revenue has risen by Rs. 70,830 to Rs. 10,57,436. The main part of the increase is contributed by country-spirit, under which head the revenue increased by Rs. 51,228 to Rs. 8,75,003, in spite of the fact that the year was one of bad crops and of a bad outturn of *mahua*. A revenue of Rs. 15,828 is derived from *pachwai*—nearly half of it from the Singhbhum district, where the aboriginals prefer buying their *pachwai* to brewing it at home, though they are allowed this privilege. The income derived from stamps amounted to Rs. 4,42,412, and showed an increase of Rs. 5,169 only. The gross collections on account of income-tax amounted to Rs. 99,684. The net revenue increased by Rs. 5,642 to Rs. 91,884. The tax was assessed on 4,591 persons.

11. *Communications*.—Three short branch railway lines are under construction among the coal-mines in the Gobindpur subdivision. Three new roads are being made in Lohardaga, Palamau, and Manbhum, respectively; but the income of the District Road Committees has been spent chiefly upon the repair and improvement of existing roads, and considerable attention has been given to the maintenance of roadside avenues.

12. *Education*.—There are 2,923 schools in the Division—339 more than in 1894-95. The total expenditure is Rs. 3,57,018. 77,295 pupils are now at school—6,357 more than in the previous year; but the number of boys at school is still estimated at not more than 22·3 of the total number of boys of a school-going age. The number of primary schools increased from 2,400 to 2,732; so that education, though still very backward, may be said to have made satisfactory progress during the year.

13. *Dispensaries and Hospitals*.—There were 17 dispensaries at work during the year: five of these are supported by various Missions. 57,682 patients were treated in all at an expenditure of Rs. 20,101. The zamindars of Palamau have contributed most liberally to the cost of dispensary buildings in that district. There are leper asylums at Lohardaga and Purulia also maintained by Missionary Societies. A zenana hospital has been opened at Hazaribagh, and one has been built at Ranchi, but has not been opened for want of funds.

14. *Local Self-Government Institutions*.—There are nine municipalities in the Division. Only three of them—Ranchi, Purulia, and Hazaribagh—have incomes of more than Rs. 10,000. The aggregate amount spent by the municipalities in the Division on primary education exactly reaches the standard laid down by Sir Charles Elliott, namely, 8·2 per cent. of the total income. The Municipal Committee at Hazaribagh kept their town in excellent order, but that at Ranchi is unfavourably reported on in this respect. The other municipalities appear to have done useful work, as well as the District Road Committees.

15. *Employment of Muhammadans*.—Of the ministerial appointments, 9·5 per cent. were held by Muhammadans, and 34 per cent. of the menial appointments. The percentage of Muhammadans among the population is only 5·9.

16. *Social and Political Institutions*.—The Kayastha Sabha and the Congress Committee at Hazaribagh each held two meetings during the year. There appears to be some excitement among the Mundas in the Lohardaga district, which manifested itself during the year in the incidents connected with the appearance of Birsa Bhagwan.

17. *Conduct of Zamindars*.—The Hon'ble Mr. W. H. Grimley has been able to give an excellent account of the conduct of the zamindars of this Division, especially of the Maharaja of Chota Nagpur and his brother, and of the zamindars of Palamau; and the report concludes with an interesting summary of his administration of the Division during the last seven years.

18. The Lieutenant-Governor thanks Mr. Grimley for his careful and efficient administration of the Division, and Mr. Marindin for his Report, from which extracts are published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

II.—TOURS AND INSPECTION OF OFFICES.

4. The Hon'ble Mr. Grimley has left the following account of his tour :—
I returned to Ranchi on the 16th September, and did not go out again until the 25th October, when I joined Colonel Gordon, the Deputy Commissioner of Lohardaga, who was encamped at Khunti, on the Bandgaon Road, about 23 miles from Ranchi, under very peculiar circumstances. In the month of July and August a strange movement occurred in the southern part of the district. A prophet arose in the land in the person of an infatuated youth, named Birsa Munda, who gave out that the world was shortly coming to an end, that there would be a deluge, and the only safe place would be the plot of rising ground on which he had fixed his abode. Rupees would be turned into water, as well as the bullets of any hostile force sent against him. The people flocked to him in great numbers, taking with them their sick and dying, as they were induced to believe that he possessed healing powers of a supernatural order. They approached him as their *Sing bonga*, or Sun god, the good spirit who watches over them and can do no ill. Birsa's explanations of failure to effect cures, it must be admitted, showed much smartness. Those who returned without being healed had not approached him with the proper form of reverence, and when a corpse was brought he excused himself, saying it was not a dead body, but only a lump of earth. The only real miracle he did work was to reduce to silence a half-crazy, garrulous old woman, whose never-ceasing tongue was the plague of the village. That he should be able to effect this without resorting to decapitation was counted a marvel. In the course of these proceedings the police, who were watching Birsa's actions, were violently assaulted, and it became necessary to arrest Birsa and some of his followers who had resisted the police. The sudden arrest, which was very cleverly effected at night by the District Superintendent of Police, Mr. Meares, did not seem to disconcert Birsa, for he at once gave out that only a log of wood would be found in the jail, while he himself would appear again at his home in Chalkad in three days. This announcement caused the whole countryside to flock to Chalkad on the day appointed, but when Birsa failed to appear their faith waned, and the crowds dispersed. At this time "Have you been to Chalkad?" became an ordinary form of greeting when two persons met. Later on the Deputy Commissioner, Colonel Gordon, who was conducting the enquiry, decided to hold the trial in the interior of the district at Khunti, so as to give the people who had been deluded by Birsa's pretensions an opportunity of witnessing it and of learning the absurdity of Birsa's pretensions. At midnight of the 24th October I received an alarming message from Colonel Gordon to the effect that the people who had come in to see the trial were threatening violence, and that he had found it necessary to arrest many of them, to stop the trial, and send Birsa and his fellow-accused back to Ranchi. He asked for a police force to be despatched to him at once. I accordingly sent out about 25 men, and set out myself, passing the police on the road. On arrival I collected together the people who had come in, and after making them sit down in groups, village by village, with the help of the Revd. Father Hoffman, who acted as interpreter—for the men spoke Mundari—I examined each group, and learnt the full meaning of the incident which had alarmed the Deputy Commissioner. They had come in, it appears, to see the trial in response to a general intimation which had been circulated in the villages, and when they found they were not allowed to see Birsa, their *Dhartiaba*, Father of the World, as they called him, some of them became clamorous and began to jump about and gesticulate. As they seemed, however, to have had no serious intention of resisting the authorities, but to have been merely carried away by momentary excitement, I allowed them to disperse to their homes, and those of their number who had been arrested the night before were subsequently tried by a Deputy Magistrate, Babu Krishna Kali Mukerjee, who knows their language, and acquitted them chiefly on the ground that their expressions had not been properly understood

at the time of the excitement, and that they had no intention of creating a disturbance. After making this enquiry I returned to Ranchi on the 28th October.

* * * * *

V.—MATERIAL CONDITION OF THE PEOPLE.

21. Owing to the deficient rainfall, the outturn of the crops during the past year was not a favourable one, especially in the districts of Hazaribagh, Lohardaga, Palamanu, and Manbhum, where the yield of the winter rice and other crops was much below the average of normal years.

22. In Hazaribagh Colonel Garbett, the Deputy Commissioner, reports that the bulk of the poorer classes depend to a great extent on the *mahua* and the *bhadoi* crops. The *mahua* crop was comparatively a poor one during the past year, and its outturn averaged only about eight annas. On the other hand, the *bhadoi* was a much better crop than that of the previous year, and the outturn averaged about 13 annas. The rice crop failed partially owing to deficient rainfall in September and October, and the outturn was estimated at ten annas. The *sabi* crops also partially failed on account of deficient rainfall. Sugarcane, *surso*, and *surguja* yielded fairly well. Lac yielded most abundantly in the jungle tracts of the district, and brought comparative wealth to many non-cultivators. In the neighbourhood of trade centres, such as Hazaribagh, Chattra, and Giridih, and of the large industrial centres of the coal mines and mica mines, where high wages are received, people are fairly well off, but, generally speaking, the condition of the people is poor, and the labouring classes and small cultivators had a more or less hand-to-mouth existence. The zamindars, too, are poor and in debt, and the trading and money-lending classes are the only sections of the people who can be said to be prosperous. On the basis of the agricultural results of the year, taken as a whole, the material condition of the people in this district was the same as last year.

23. In Lohardaga the Deputy Commissioner reports that the condition of the cultivating classes has steadily improved with the high price of agricultural produce that has prevailed during the past five years, and their prosperity has not been seriously affected by the short crops of the year under report. Rents as a rule are low, and Mr. Streetfield thinks that the tendency of the Revenue Courts is to reduce the actual payments hitherto made to the landlords in cash, kind, and service. The condition of the land-holding classes in this district, he says, continues very unsatisfactory, in consequence of the strained relations with their tenants, and the latter having learnt how to resist illegal demands are now refusing those which are legitimate. The zamindars, on the other hand, are clinging to their old feudal rights, and thus increasing the discord between themselves and their raiyats find it more and more difficult and expensive to collect their rents; and owing to this and the increased expenses of their more modern mode of life are in an almost universal state of indebtedness. The condition of the labouring classes is said to have remained much the same as last year.

24. In Palamanu the condition of the people is reported to have been on the whole good, in spite of the bad agricultural season. This was chiefly due to the enormous extension of the lac industry in the district, which has brought in a living to many of the poorer classes who would otherwise have suffered from bad crops. The lac crop at the commencement of the year was not a full one, but prices were then high; the cold-weather crop was a good one, though prices then ruled somewhat lower. Again, the crops of the preceding years were good, and this has served to neutralise to a certain extent the effects of the bad harvests of the past year.

25. In Manbhum Mr. Morshead, the Deputy Commissioner, reports that last year the rainfall in the district was very scanty, and consequently the outturn of the winter rice crop was much below the average, especially in the high level lands, which are held mostly by the poorer class of people. Mr. Morshead says:—

“The tendency of this effect, when not counteracted by other local circumstances, is to swell the labour market, which, in the absence of sufficient employment, is liable to cause

local distress, especially in this district in the southern and south-eastern portions of it. Fortunately, however, a good crop of cereals reaped in August and September and an abundant crop of lac in several places in the district not only counterbalanced the deficiency of the rice crop, but also caused a rise in wages in some localities. Moreover, there was no want of employment on roads, railways, and coal mines for the greater part of the district, and especially in the Gobindpur subdivision. From these sources means of livelihood were amply available, and the surplus stock of grain from the preceding years prevented any serious rise in prices. Thus, although the inhabitants have been a little pinched in places, there was nothing bordering on distress."

Further, emigration, notwithstanding its abuse, is reported to have done a good deal for the district by taking off the surplus population.

26. In Singhbhum the Deputy Commissioner, Mr. Bompas, reports that though the people are poor, their lot is not unenviable, and he makes the following remarks on their condition:—

"The rise in prices which has occurred of late years necessarily benefits those agriculturists who have surplus grain to dispose of without injuring those who merely grow enough for their own consumption, while the railway and its attendant industries have provided well-paid work for the able-bodied labourer. The Kol, however, is not the man to work unless he is compelled by necessity, and has not yet been greatly seized with the civilised desire to accumulate wealth. Some of the larger agriculturists, however, are not without savings, which they frequently spend generously on tanks and other works of utility. In the Kolhan the regular mahajan is unknown, and there is no such thing as general indebtedness. In pargana Dhalbhum the people were not so well off, but there is still plenty of waste land; and so long as this is the case, the lower classes can exist in a state of freedom, and in this part of the country the construction of the Sini-Midnapore line is now placing every able-bodied man beyond the reach of want."

27. The Division seems to be fast emerging from the state of things when its population were almost solely dependent upon agriculture for their well-being.

28. On the whole, the year has not been an unfavourable one. The excellence of the lac crop, with good sugarcane and *bhadoi* crop, compensated to a great extent for the bad rice and *rabi*. The better class of cultivators, who have a surplus produce to sell, benefited by the high prices of grain; and though the labouring classes must have suffered to some extent from this cause, the rise in wages in many localities, which has occurred in the vicinity of large works and industries, has no doubt helped them to meet the difficulty caused by the higher prices of food.

29. The position of the cultivating classes generally seems to show a tendency to improve as they become more acquainted with their rights, and it is a matter for regret that they show such a strong disposition to claim more than their rights. The opening out of the districts in various directions by the coal and mica-mining and other industries, and the rapid growth of the lac trade is doing much to improve the condition of the smaller cultivators and labouring classes, and, as remarked elsewhere, there is a wholesome tendency for the wages of labour to rise in those localities which are coming into contact with commercial enterprises and industries. The mahajans and traders are generally well off and prosperous, and the only class which seems to be deteriorating are the zamindars and landlords. There is friction between them and their raiyats, so that they find it difficult to collect their rents, and are at the same time losing a good many of the voluntary services and payments they used to receive. Their mode of living, too, is changing and becoming more expensive, so as to suit modern ideas, and to meet such increased expenditure and the rise in prices generally, there has been no corresponding increase in their rent-rolls. From these causes, added to the usual extravagance in marriage and social ceremonies, which pervades the class, many of the zamindars and landholders are becoming every year more impoverished, and are sinking into a state of indebtedness, from which they can only extricate themselves by the sale of their lands or by seeking the protection of the Encumbered Estates Act. No permanent improvement in their condition can be expected without a settlement of the land question, with a determination of the disputes over feudal rights and services between them and their raiyats, and the reduction of the chaotic state of things regarding the areas of holdings so as to enable adjustments of rent to be made, which will be fair both to landlord and tenant.

VI.--EMIGRATION AND IMMIGRATION.

30. Recruiting of emigrants under Act I of 1882 was carried on during the year in the four districts of Hazaribagh, Lohardaga, Manbhum, and Singhbhum, and the following statement compares the number of emigrants recruited and registered under the Act during the past three years:—

DISTRICTS	1893-94.	1894-95	1895-96.
1	2	3	4
Hazaribagh ...	1,962	1,893	2,282
Lohardaga .	3,072	2,864	2,422
Manbhum	7,046	7,075 (3,982)†	10,611*
Singhbhum	212	35
Total ..	12,080	11,984	15,350

* These figures are for the calendar year 1895

† The figures in brackets in column 3 against Manbhum are for the calendar year 1894.

The increase in the number of emigrants in Hazaribagh is due to the partial failure of some of the principal crops on which the bulk of the labouring classes mainly depend. In Lohardaga the continued falling off is said to be principally due to the drain of previous years on the emigrating classes, and also to the growing distrust on the part of the people of recruiters and *arkatis* as a class. In Manbhum the increase is very large, and is due to the fact that Purulia being an important centre for recruiting coolies for the tea districts, emigrants from other districts are brought there for selection by garden agents and then sent to the labour districts, or forwarded to other recruiting centres, such as Raniganj, Calcutta, &c. The number of emigrants who were residents of the district was 1,254. In Singhbhum the figures only represent the number of coolies who pass through Chaibassa, those nearer the railway line and those recruited in Dhalbhum going direct to Purulia.

31. Besides the coolies recruited and registered under Act I of 1882, a large number of coolies was recruited under the free-labour system. The exact number of free emigrants from each district cannot be ascertained, as no record is kept, but from reports received from some of the agents stationed in the districts, it appears that 1,770 free emigrants were recruited from Hazaribagh, 884 from Lohardaga, 8,000 from Manbhum, and 502 from Singhbhum, against 1,185, 965, 9,889, and 1,025, respectively, in the previous year.

32. All the cooly-depôts and rest-houses in the districts were regularly inspected by the officers concerned, and proper steps taken to improve their sanitary condition. Proper arrangements for treatment of sick coolies and for the supply of food, clothing, &c., were made in all the depôts. The general health of the coolies was on the whole good all round the year. There were only a few cases of cholera in certain depôts in Manbhum.

33. In Hazaribagh four emigrants were prosecuted and convicted during the year, under section 162 of Act I of 1882, for desertion after registration. There were also two cases under section 342 and one each under sections 346, 363, and 365, Indian Penal Code. The cases under sections 363 and 346 resulted in the acquittal of the accused, the former on account of the persons said to have been kidnapped having been proved to have attained majority, and the latter for want of conclusive evidence against the accused. In this district a few complaints were made from time to time regarding the disappearance of members of families, but in most of them the missing persons could not be traced, while in the few cases in which they were traced, it was ascertained that they were adults and free agents.

34. In Lohardaga there were many complaints of unlawful and fraudulent recruitment, especially of women, but only one case ended in conviction, this being a case in which one Jagarnath Panda and his servant were decoyed into

a depôt and actually carried to Purulia against their will before they obtained a chance of escape. Many other enquiries were made, but all these are reported to be very tedious and unsatisfactory, having to be carried on by correspondence with officers in Assam and elsewhere, and being complicated by the fact that coolies improperly recruited are almost always registered under a false name.

Mr. Streatfeild writes:—

"It usually happens that by the time a cooly so recruited is traced, he or she has got accustomed to Assam, and has no wish to return to Chota Nagpur or to prosecute. On the other hand, a large number of complaints come from relatives of persons where recruitment has been perfectly regular, though it may be inconvenient to the emigrant's family."

In this district there was one case during the year of cancellation of contract under section 11A of Act I of 1882 as amended by Act VII of 1893 in the case of a girl named Jambhi.

35. In Manbhum there were altogether 112 cases in which emigrants and recruiters were the accused. Among these, 52 cases were against emigrants for committing offences under section 162 of Act I of 1882, and the remaining 60 cases for offences committed by recruiters under sections 341, 342, 363, &c., of the Indian Penal Code. Of the total number of 112 cases, 79 were tried during the year, 20 were disposed of without trial, and 13 cases were pending at the close of the year. In the cases tried, 22 emigrants and 21 recruiters were convicted, and 12 emigrants and 45 recruiters acquitted. In Singhbhum there were 22 cases of malpractices in connection with recruiting during the year.

* * * * *

VII—PRICES OF FOOD AND LABOUR.

38. As might be expected, the generally deficient harvests of the past year have been attended by a corresponding rise in prices in all parts of the Division except Singhbhum, where the outturn of the crops was much better than in the rest of the Division. In Hazaribagh the price of common rice, the chief food staple for the people, in the last fortnight of March 1896 was only 14 seers and $13\frac{1}{2}$ chitaks per rupee, against 16 seers $10\frac{1}{2}$ chitaks and 15 seers, respectively, in the corresponding periods of the two preceding years. Wheat was sold at 11 seers $5\frac{1}{2}$ chitaks per rupee, against 12 seers $5\frac{1}{2}$ chitaks in March 1895 and 13 seers in March 1894, and gram at 16 seers per rupee, against 16 seers $5\frac{1}{2}$ chitaks in March 1895 and 17 seers $5\frac{1}{2}$ chitaks in March 1894. Salt alone was sold at a cheaper rate, viz., at 9 seers $13\frac{1}{2}$ chitaks per rupee, against 9 seers $9\frac{1}{2}$ chitaks and $9\frac{1}{2}$ seers, respectively, in the two previous years. In Lohardaga the price of common rice was only 14 seers per rupee, against $18\frac{1}{2}$ seers in 1894-95 and 17 seers in 1893-94. The prices of salt and wheat remained almost unchanged, while that of gram was slightly lower than in 1894-95, but higher than in 1893-94. Most of the wheat and gram consumed in the district is imported, and their prices, therefore, depend on outside circumstances. In Palamanu the prices of wheat, common rice, and gram during the last fortnight of March 1896 were higher than those in the corresponding fortnight of the previous year, these latter being higher, again, than those for the same period of 1893-94. The price of salt alone remained almost unchanged. In Manbhum the prices of wheat and common rice were much higher than in either of the two preceding years, the price of gram was slightly lower than that of 1894-95, while that of salt was slightly lower than that of the two preceding years. In Singhbhum wheat and common rice were cheaper than in either of the two preceding years, while the price of gram was the same as in 1894-95, but dearer than that in 1893-94. Salt was dearer than in either of the two preceding years.

39. The following statement gives the average prices of wheat, common rice, gram, and salt during the last fortnight of March of the past three years —

DISTRICT	1893-94				1904-05				1905-06			
	Wheat	Common rice	Gram	Salt	Wheat	Common rice	Gram	Salt	Wheat	Common rice	Gram	Salt
1	2	3	4	5	6	7	8	9	10	11	12	13
	S CH	S CH	S CH	S CH	S CH	S CH	S CH	S CH	S CH	S CH	S CH	S CH
Hazaribagh	13 0	15 0	17 5½	9 8	12 5½	10 10½	16 5½	9 0½	11 5½	14 1½	16 0	9 13½
Lohardaga	11 0	17 0	14 0 to 15 0	9 0	11 0	18 8	12 0 to 11 0	9 0	11 8	14 0	13 0 to 14 0	9 0
Palamau	16 14	15 12	21 15	8 6½	15 3	13 3	18 9	8 7	12 15	14 10	10 14	8 7
Manbhum	13 0	15½ 0	15 0	10½ 0	12½ 0	21 ½	14 8	10 0	11 0	15 0	15 0	10 ½
Singhbhum	12 0	13 0	14 0	9 0	13 0	14 0	13 0	8 0	13 6	16 8	12 0	7 14

40. Wages of labour exhibit some fluctuations. In Palamau there has been a decline in wages of most kinds of labour in consequence of the importation of artisans by contractors. In Hazaribagh, in Chattra, the wages of common masons and coolies came down from 3½ annas and 3 annas to 3 annas and 2 annas respectively per diem, while common carpenters, boys, *gharamies*, superior blacksmiths, and common blacksmiths were not available at less than 3 annas, 1 anna, 3 annas, 5 annas, and 4 annas per diem, against 2½ annas, 9 pies, 2 annas, 4 annas, and 3 annas, respectively, in the preceding year. In Manbhum there has been a general rise in the wages of unskilled labour during the past five years, and ordinary coolies are said to be not available in many places for less than 3 annas per diem. This is chiefly due to the demand for labour in the newly opened coal mines and for the tea districts, the construction of the Bengal-Nagpur Railway and the Jharia extension line having facilitated transit to new fields of employment. It is also attributed in part to the excellence of the lac season, which rendered it unnecessary for many who would otherwise have to work to do so. In Singhbhum towards the close of the past year the commencement of work on the railway on the Sini-Howrah line sent the wages of day-labourers up from 2 annas to 4 annas per diem, and wages are still high near the railway at Monoharpur and Gailkera, where the supply of labour is short. In Lohardaga the wages of labour remained the same, as there was no abnormal demand for labour on account of any large public work or railway. On the whole the tendency seems to be towards a healthy increase in the wages of labour in those parts of the Division which are being opened out by railway or commercial industry.

VIII.—MANUFACTURES AND MINES.

42. The principal industries of this Division are—

- (1) Collection of jungle products, viz., lac, catechu, saboi grass, and tussur cocoons.
- (2) Collection of hides.
- (3) Manufacture of shellac.
- (4) Cultivation and manufacture of tea.
- (5) Manufacture of tussur cloths, coarse cloths, and brass and bell-metal utensils and ornaments.
- (6) Coal and mica mining.

Lac, catechu, saboi grass, and tussur cocoons are abundant in the jungles, and are largely exported to other districts. Hides are also collected all over the Division, and are exported in large numbers without being thoroughly cured.

43. Lac factories exist only at Bundu in Lohardaga and at Jhalda, Ilu, Raghunathpur, Chas, Balarampur, Topchanchi, Jharra, Chandil, and Nusha in Manbhum.

(a) Manufactures

In Bundu there were 11 factories at work during the past year, against 10 in 1894-95. The quantity of shellac manufactured was 9,000 maunds, against 6,000 maunds in the previous year. The value of the manufactured article in 1895-96 was Rs. 1,40,080, against Rs. 1,32,000 in the previous year. In Manbhum there were altogether 42 factories at work in the places mentioned above, and the quantity of button and shellac manufactured in them was 18,362 maunds, against 6,926 maunds in 1894-95. The lac trade is a growing one, and the cultivation of the lac insect on suitable trees is extensively carried on by the raiyat, and is found to furnish a substantial addition to his ordinary resources. Disputes over the possession of lac-bearing trees are a frequent cause of complaint in the Criminal Courts, so profitable has the industry become, and a good lac season will generally furnish the raiyat with the money to pay his rent. The zamindar also derives a substantial revenue from this source by leasing out to the raiyat the trees on which the lac insect is cultivated.

44. The manufacture of indigo, which used to be carried on by Messrs. Robert Watson and Company in Barabhum and the Patkum Trading Company at Patkum, has been discontinued. Tea-plantations exist in Hazaribagh and Lohardaga. In the former district 6 gardens were at work during the past year, against 4 in 1894. The quantity of tea manufactured was 126,140 lbs., against only 76,795 lbs. in the preceding year. In Lohardaga out of 23 gardens 22 only have furnished returns, which show that the outturn during the past year was 1,110,312.5 lbs., against 222,047 lbs. in the previous year. The uneven rainfall of the year, heavy downpours followed by several days of bright sunshine, was very favourable for the development of the leaves and for plucking, but very fatal to the young seedlings transplanted for the filling up of gaps, so that on the whole the season was not an abnormally good one, the increased outturn being due rather to an improved system of pruning than to any increased fecundity of the bushes. The prospect of the tea industry in Chota Nagpur is not very hopeful. The climate is dry, and the soil is not sufficiently deep or rich, while the tea produced is not of a very superior quality. Tussur cloths are manufactured at Raghunathpur in Manbhum, but the quantity of the manufactured article is by no means large. There are only a few families of weavers who bring cocoons and tussur silk from Singhbhum and weave them into cloths. Brass and bell-metal utensils and ornaments used by the common people are manufactured at Chattra in Hazaribagh, at Lohardaga, Palkote, Ramjora, and Jaria in Lohardaga, and at Purulia in Manbhum. Soapstone plates and bowls are manufactured within the jurisdictions of the thana of Chandil and outpost of Ichagarh, and at Madondri in thana Nusha in Manbhum and in pargana Dhalbhum in Singhbhum. Some of the stone quarries in this last-named pargana are worked with shafts. Coarse cloths are manufactured by the village *Jolahas* in all parts of the Division. They are very strong and durable, and as such are preferred by the common people. Guns are manufactured at Katras and Jhalda in Manbhum, but their number is by no means large. At Jhalda swords and sword-sticks are turned out. These are exported to many places, both in and outside the district.

45. Coal-mining is a very important industry in the Division, and is confined chiefly to the Giridih and Gobindpur subdivisions of the Hazaribagh and Manbhum districts.

(b) Mines—

Coal mines.

In Giridih there are four collieries, three of which are worked by European Agencies and one by a native firm. The three collieries belonging to the East Indian Railway, the Bengal Coal Company, and the Raniganj Coal Association have been working since 1871, 1869, and 1876, respectively. The Oriental Coal Company started work in 1887. In the Gobindpur subdivision the number of collieries has largely increased, owing to the settlement of a large portion of the Jharra coal-fields. But the industry has latterly received a check, owing to the fall in the price of coal. This is said to be due partly to the inferior quality of the coal produced, partly to the unbusinesslike terms of the settlements made, and partly to the wasteful system of working.

Most of the concessions have been made in small areas, whence coal is extracted by quarrying. The quarry pits fill with water in the rains, and become unworkable, and in some cases the seams are spoiled for future working by percolation of the water thus let in; coal-pits also exist in the Sadar subdivision of Hazaribagh in the basin of the Damodar, principally at Ramgarh, Mandu, and along the banks of the Bokaro river. These are only superficially worked, and the coal dug out of them are used only for brick-burning and such like purposes. Some of this coal finds its way to the Lohardaga district.

46. The following table compares the output in tons and the number of workpeople employed in the coal mines of Giridih and Gobindpur during the past three years:—

	Output in—			Average number of work-people employed in—		
	1893	1894	1895	1893	1894	1895
	2	3	4	5	6	7
Giridih	Tons 562,037	Tons 671,363	Tons 693,549	7,613	8,263	9,510
Gobindpur	65,226	128,186	1,281,294	2,207	4,822	13,246

In the Gobindpur subdivision the output in 1895 has been nearly ten times that of 1894. During a portion of the past year, Dr. Walter Suise was employed in experimenting at Kajaru in Palamau on behalf of the East Indian Railway Company, and is expected shortly to submit a report on the coal-fields there. A diamond drill was received by him at the close of the year, but it did not work during the year.

47. This industry is confined to the Hazaribagh district, and is gradually gaining in importance. Most of these mines are situate in the Koderma Government reserved forests, and the rest are scattered over portions of Galis Gawan, Domchanch, Khosmi, Mushnudih Byria, Dorunda and Satgawan. The mica mines in the Government estates and in the Dorunda and Satgawan estates, which are under Government management, have been let out in accordance with the rules framed by the Government. The greater number of the mines situated in private estates are worked by Messrs. Christion and Company. During the past year in the Government estates, 25 new mines were leased out on an aggregate annual rental of Rs. 885. The total current demand of rent of the Government mines amounted to Rs. 11,001 the whole of which, with the exception of Rs. 140-8, was realised during the year. The total output of all mica mines worked in the district is reported to be 8,019 maunds, against 4,849 maunds, in the previous year, and the total number of workmen employed in the mines 5,409, against 3,718 in 1894.

48. In Lohardaga at Rugudih, mentioned in paragraph 57 of last year's report, gold was found in ferruginous decomposed rocks at a depth of 20 feet. The ore yielded about a pennyweight of gold to a ton of ore, and hopes were at one time entertained that at a greater depth better results would be obtained. A shaft was accordingly sunk to a depth of 40 feet, but it was found that the ore in the lower strata was not as rich in gold as at the higher level. The Rugudih Syndicate have since transferred their works to Gutuhatu, where visible gold was found in December last in a quartz reef. In February a Director and an expert visited Gutuhatu, and it has now been decided by the Syndicate that before commencing mining works on the reef, a tunnel should be driven at dead level with the valley to meet a shaft sunk from the top of the hill. These works are now reported to be in progress, and it is believed that if no obstacles intervene, they will be completed in three months' time. Sanguine hopes are entertained that this reef will repay working. At Thurumba prospecting works have been carried on for upwards of two years, and trial pits and shafts have been sunk and tunnels driven in various localities, but up to this time no hopeful results have been obtained.

In Singhbhum the Bengal Gold and Silver Mining Syndicate were at work at Samij for some months of the year, but the works have been abandoned since December 1895. During the past year a mining concession was granted to Messrs. Jardine, Skinner and Company in the Porahat-estate, but they appear to have yet done nothing beyond making a superficial inspection.

Stone lime is raised in Manbhum near the Ramkanali Station on the Bengal-Nagpur Railway. It is said to be made use of locally, and also exported to other places. No statistics are available. There are now no copper or tin mines at work in any part of the Division.

* * * * *

XXIII—RAILWAYS AND OTHER PUBLIC WORKS

124. The branch line to Patlabani *via* Laikdi and Chanch near Barakar, referred to in paragraph 115 of the previous report, was nearly completed and opened up to Chanch. There were no other new constructions during the year excepting the siding line from a point a little to the west of the Dhanbad Station and a short branch line to the mines in and near Kusunda. The construction of the Simi extension has been commenced in the latter part of the year.

* * * * *

XXVII—DISPENSARIES AND HOSPITALS

152. As regards the dispensary at Ranchi, Mr. Streatfeild reports that the difficulty here as elsewhere is the dearth of subscriptions to the support of the dispensary, and that its upkeep is a serious drain on the resources of the Municipality. The retention of the Assistant Surgeon, who is now in charge of the Dispensary, has been sanctioned by my predecessor, on condition that at least Rs. 900 per annum is raised by private subscriptions. The collection of subscriptions has been undertaken by the Civil Surgeon of the station, and an improvement will no doubt be effected, but it is doubtful whether the sum named will be reached. The Deputy Commissioner is therefore of opinion that, in view of the considerable amount of Government work done by the Assistant Surgeon, and also of the fact that Government owns a considerable part of the town, viz., the village of Konka, the contribution of Government to the funds of the institution might reasonably be increased. The outstanding subscriptions due to the Lohardaga Dispensary are still heavy, but a large portion of them is reported to be irrecoverable, and must be written off the accounts. The financial condition of the Barabazar Dispensary in Manbhum much improved during the year, as there was a surplus cash balance of Rs. 200 at the close of the year after paying up all working expenses.

152 (a). The Lohardaga Leper Asylum is managed by the German Evangelical Lutheran Mission. There were 21 patients, 6 of whom were new admissions. One patient died of pneumonia, and the others were in good health throughout the year. There are two other houses in connection with this Asylum—one for incurables and the other for the untainted children of lepers or syphilitic parents. The cost of maintaining the Leper Asylum and children's home, which was met by the Society of the Mission to Lepers in India and the East at Dublin, amounted to Rs. 1,640. The cost of maintaining the Asylum for other incurables and the Ranchi Mission Dispensary, which was defrayed by the German Evangelical Lutheran Mission, amounted to Rs. 2,000. The Purulia Leper Asylum, which is in charge of the Rev. Mr. Uffman, of the Lutheran Mission, is reported to be in a flourishing condition. Several new houses on the original premises have been completed, and a substantial pukka building erected not far off for the healthy children of some of the inmates.

153 In Hazaribagh the Zanana Hospital in connection with the Lady Dufferin Association, which was opened towards the end of 1894, was brought into working order during

the year, and has afforded much outdoor relief to the classes for which it is intended. No indoor patients have yet been admitted. The hospital is under the charge of a qualified lady-doctor, and 1,273 out-patients, on a daily average attendance of 16·58, were treated during the year. The construction of a zanana hospital at Ranchi on the standard plan approved by the Government was taken in hand and finished with a small bungalow for the accommodation of a lady-doctor at a total cost of Rs. 4,185. The hospital has not yet been opened to the public for want of funds. As in previous years, the Committee here entertained the services of a trained midwife and nurse on a fixed monthly salary of Rs. 30 and house-rent at Rs. 3 per mensem. She was also allowed half the fees earned by her. During the past year the midwife attended 29 cases, out of which 17 were cases of accouchment and 12 cases of sick nursing. Of the former, one was a transverse case. The midwife discharged her duties satisfactorily. The institution at Daltonganj is still regarded by the general public with apathy. The present midwife, Maasi Jayi, attended during the year 9 confinements, against 14 in the preceding year. The Civil Medical Officer of Palamau reports that she does not know much about her work, but carries out his orders properly, and to that extent acquits herself tolerably well.

* * * * *

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS AND PUBLIC FEELING

174. Colonel Garbutt, the late Deputy Commissioner of Hazaribagh, has left the following note in regard to the state of public feeling—

(i) State of public feeling

“Except in places like Giridih, Hazaribagh, and Chattra, where there are always a number of educated men who take in newspapers and keep themselves acquainted with current topics, &c., there is no public opinion in this district as we understand it. The inhabitants of the rural tracts, the bulk of the population of the district, care nothing for matters occurring beyond the narrow limits of their villages and the immediate neighbourhood. Outside events find but a faint echo in these remote and jungle-surrounded tracts. General interest is only excited and attention awakened when something occurs affecting the people themselves. Nothing of the sort occurred during the year under report. The discontent which existed last year in the Government estates in connection with the village forests being proclaimed protected has died out, as the rules on the subject of supplying villages with timber, &c., for domestic purposes have been framed in a most liberal spirit, and the villagers have no doubt come to recognize that the forests have really been protected in their own interests. The discontent among the Sonthals in connection with pachwai-brewing has also died out, as the privilege of brewing pachwai for home consumption has been conceded them. There has been no revival of the cow-protection movement, and all interest in the matter seems to be dying out. Efforts are occasionally made here and there to collect subscriptions to keep up the movement, but with very poor success.”

175. In Lohardaga there was nothing calling for special notice, beyond the excitement connected with Birsu Bhagwan, which has been fully dealt with by the Hon'ble Mr. Grunley in his tour account. There is still in the district a good deal of fermentation among the Mundas, and there are at the present moment rumours of a new Bhagwan, but nothing definite is said to have occurred calling for remark. The relations of landlords and tenants in the district continued unsatisfactory. The Deputy Commissioner, Mr. Streatfield, says—

“The relations are not likely to improve until all claims to feudal services are finally converted into cash rents. This is one of those matters on which there is much to be said on both sides. The zamindars justly say that cash rents in this district are very low, and contend that they were fixed when services really constituted by far the most important part of the raiyat's obligations. On the other hand, when landlords exact services with no regard to moderation or fairness, perhaps taking raiyats from their villages for weeks at a time, it is inevitable that the raiyats should rebel against the old order of things and, as a necessary consequence, attempt to rid themselves of service obligations altogether.”

In the districts of Palamau and Singhbhum the state of public feeling is said to have been satisfactory throughout the year. The Deputy Commissioner of Manbhum does not say anything on the subject. Two very important settlements of Government estates—one in the Kolhan, in the district of Singhbhum, and another in Palamau—have been in progress during the year. The raiyats on both these large estates have exhibited a very strong interest in these settlements and the different questions that have arisen in connection with them, but so far the work has progressed without any friction.

176. The only paper published in this Division is the *Gharbandhu*, printed by the German Lutheran Mission at Ranchi. It is a religious paper, having for its aim the religious and moral instruction of the Christian converts belonging to the Mission.

* * * * *

XXXVII.—GENERAL REMARKS

181. The Hon'ble Mr. Grimley again writes:—

"Now that I am taking leave of a Division whose affairs I have administered for the last seven years, and a people whose interests I have watched over with much solicitude during the same period, it may not be inappropriate to take a retrospect of the principal measures I have been called upon to deal with during my tenure of office. Compared with the rest of Bengal, as I once wrote, Chota Nagpur occupies a unique position. The circumstances which differentiate it from other parts of the Lower Provinces are its comparative inaccessibility, its vast extent, comprising as it does, with the political and tributary states, an area of 45,000 square miles, its climate, its wild and picturesque scenery, its mineral wealth, its beautiful forests, the peculiar nature of its land tenures, and in many parts its primitive inhabitants, with their curious history and traditions. This brief reference to the country, its people, and products supplies an index to many interesting and difficult problems which have from time to time presented themselves for solution. Primitive people are by nature singularly tenacious of purpose and cling to old traditions, and this feeling among the Kols led up to the agrarian agitation of 1889, when they made an effort to free themselves from the yoke of middlemen, the thralldom of *bethbegari*, and other unpleasant incidents connected with the cultivation of land. This was the first important event of my administration, and the outcome of measures taken to suppress the disturbance and to ascertain its causes was the preparation of a Bill for the commutation of predial services in Chota Nagpur. An account of the mineral wealth of the country is given in the memoirs of the Geological Survey, but its potentialities had not attracted much attention from the commercial world until 1890, when the construction of the Bengal-Nagpur Railway through a distant corner of Chota Nagpur brought them prominently into notice, and caused a rush of applications for prospecting and mining concessions, chiefly in respect of gold, copper, and iron. This introduced me to an entirely novel sphere of work, and enlarged my vocabulary by sundry geological terms and expressions, the true import of which, I fear, was not always understood by those improvised mining experts from whose tongue they fell so glibly. To 'ring out the false, ring in the true,' to distinguish between the honest prospector and the plausible land-grabber was a task of considerable delicacy. The determination of rates of royalty, the fixing of the amounts of *salam*, as well as the terms of leases, the consideration of conditions, safeguarding the interests of both parties to the concession, and the preparation of the leases themselves were details requiring much thought and attention, if not the skill of an expert, to deal with them properly. Another result of the railway was to render accessible large tracts of forests to timber contractors, whose sole object was to clear away all saleable trees, regardless of future needs, but this reckless denudation could not be permitted, and it became necessary in forest leases to restrict cutting to trees of a particular girth. This measure was followed by the rules for protected forests, which also had for their object the prevention of the wanton destruction of valuable trees on Government lands. These timber transactions enhanced the value of forest lands and produced a crop of boundary disputes in uninhabited jungly tracts, the settlement of which, in the absence of accurate maps, and with uncertain landmarks, was a most difficult operation. Disputes of this nature are likely to increase as the country gets opened out. Among other administrative measures which have engaged attention, the following may be mentioned — the determination of the status of the Palamu jagirdars, the commutation of ghatwali tenures, and the management of ghatwali jungles in Manbhum, the improvement of the rural police, the amalgamation of the process-serving establishment, the development of the mica industry in Hazaribagh, the revenue from which has received a substantial increase in recent years, and the formation of the Chota Nagpur Mounted Rifle Corps. In 1890 I made an enquiry into the system of cooly-recruitment for labour in tea-gardens, and submitted an exhaustive report on the subject, in which the abuses connected with that system were fully exposed. I suggested a number of remedies for these abuses, the most important of which was registration in the district of recruitment, enabling each person to declare his wish to emigrate before some constituted authority. The carrying out of these proposals has been long delayed, though with the appointment of the Labour Enquiry Commission I no longer despair of seeing them brought into operation, as the only sound method of preventing malpractices, and at the same time of cheapening the cost of recruitment. Two important settlements are now being carried out, viz, that of the Palamu Government estate in the district of Palamu and that of the Kolhan in Singhbhum. Owing to the peculiar nature of the tenures, the mode of survey and details of settlement in each case required careful pre-arrangement. These have all been discussed and determined in consultation with Government, and the settlement work is now in progress. The settlement of Kotalpal and Mahta in the Manbhum district, though of minor importance, also required careful attention. The restoration of Porahat to Kumar Narpat Singh,

the son of the ex-Raja or Chief, has been a troublesome but interesting subject of correspondence for some time, going back to the mutiny of 1857, but it has been finally accomplished, and one of my last official acts was to deliver to the Kumar the *sanad* bestowing on him this property with a samindari title. This enumeration of some of the chief events of my administration will not be complete without a reference to the long miles of road connecting Ranchi with Purulia and Chhalbassa. Both these roads have been completed, the former being bridged throughout and the latter at all difficult places. The Hazaribagh-Ranchi Road has also been re-aligned, and the roads in the Palamau district have been extended and improved. But the construction of these roads is not sufficient for the proper development of the industrial resources of the country. The great need is a liberal extension of the railway system. The Bengal-Nagpur line only serves a very limited portion of Chota Nagpur. It has attracted attention to the mineral wealth of the country and has encouraged a trade in timber, but this trade will die out as soon as the forests near the line are exhausted. The line traverses a very small corner of Chota Nagpur, and is of comparatively little use to the more distant places. The cultivated lands on the plateaus of Lohardaga and Hazaribagh do not come within its sphere, while the extensive coal-fields of Karanpura, Aurunga, Hutur, and Daltonganj are entirely neglected. Chota Nagpur does not begin at Asansol and end at Chakradharpur, as was once seriously propounded to me by one who ought to have known better. It is a vast territory, stretching from the Damoodar near Asansol on the east and extending to the Central Provinces and the Rewah State beyond Allahabad on the west, and from the confines of Orissa on the south to the districts of Mirzapur, Shahabad, and Gaya on the north. It consists, as I have said elsewhere, of an ascending series of plateaus rising in successive terraces from 800 to over 3,500 feet, and separated from each other by ranges of hills or mountains, which serve as a natural barrier or defence. These terraces are undulating, and in some parts extremely fertile and well-cultivated, while the surrounding hills are covered with dense forests abounding in *sal* and other valuable timber; the whole appearance of the country in its varied aspects of hills, plains, and valleys making a beautiful picture, especially the waterfalls in the Lohardaga district, the Chandwa ghat in Palamau, the Saranda forests in Singhbhum, and the high table-lands in the distant Native States of Jashpur and Sirguja. The cultivated lands yield rice, wheat, barley, oilseeds, Indian-corn, and other cereals, while, besides timber, the miscellaneous forest products possessing a merchantable value are lac, tussur cocoons, catechu, resin, myrabolams, bee's-wax, and fibre grasses convertible into rope or paper. There is also a large export trade in hides and horns. The minerals consist of coal, which is distributed over an area of 6,000 square miles, iron, which is found in several districts, traces of gold and silver, copper, lead, mica, manganese, soap-stone, lime-stone, and China clay. Whether the opening up of this fine country with its immense possibilities is to be consigned to the waters of oblivion, or is to be brought immediately within the sphere of political and commercial enterprise by the extension of the railway system of communication, is a problem which I leave for the consideration of Government, the capitalist, and the mercantile community."

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT
OF THE BHAGALPUR DIVISION FOR THE YEAR 1895-96.

GENERAL DEPARTMENT—MISCELLANEOUS

Darjeeling, the 2nd November 1896.

R SOLUTION—No. 563T—G.

READ—

The Annual General Administration Report of the Bhagalpur Division for the year 1895-96.

The report is submitted by Mr. W. B. Oldham, C.I.E., and was delayed by the late receipt of the District reports. Mr. G. Toynbee held charge of the Division throughout the year. There were changes of District Officers in all the districts except Malda, of which Mr. J. C. Price held charge the whole year; there were also changes of charge in 6 out of the 13 subdivisions.

2. *Tours and Inspections.*—The Collectors of Purnea and Malda accomplished the prescribed amount of touring. Mr. Price's tours in Malda were particularly complete and useful. The tours of the Commissioner and of the District Officers of Monghyr, Bhagalpur, and the Sonthal Parganas each fell short of the standard by some days. All the Subdivisional Officers spent the prescribed periods or more in camp, except the Deputy Magistrate of Araria, who obtained permission to shorten his tour, as he had been in charge of that Subdivision for nearly six years and knows it thoroughly. All the prescribed inspections were made, except that three of the subdivisional offices in the Sonthal Parganas were inspected only once by the Deputy Commissioner.

3. *Weather and Crops: Material Condition of the People: Public Health.*—The average rainfall of the Division was 43·17 inches, or 15·41 inches less than the mean of the last ten years. The crops generally gave only a moderate outturn, but the *bhados* crops were fair; they were best in the district of Purnea, where early paddy, jute, and indigo did very well. On the whole, prices were much the same as in the previous year, nor were the wages of labour appreciably higher, though they have a gradual tendency to rise, except apparently in Monghyr. With the people generally the year was one of prosperity. The condition of the labouring classes in the Sonthal Parganas appears to be improving steadily with the increase of the demand for labour both within and without the district. Emigration to Assam is becoming more popular there, even amongst the Paharia tribes; and plenty of work is to be found on the railways and in neighbouring quarries and coal mines throughout the Division.

The year appears to have been a comparatively healthy one; but the statistics upon which birth and death rates are calculated are admittedly defective, though registration is believed to be advancing. In Purnea and Malda there were as usual numerous deaths directly or indirectly due to malarial fever. Cholera visited Bhagalpur with some severity.

4. *Manufactures and Mines. Trade and Commerce.*—Poppy is grown in Monghyr, where the last season was a good one, the outturn amounting to 2,815 maunds. Indigo is grown and manufactured in all the districts of the Division, and in respect of this crop also the season was good except in Bhagalpur, where the value of the outturn was only half that of the previous year. The silk factories in Malda produced 31,587 lbs. of silk, as against 41,810 lbs. in 1894-95. The only important coal mine in the Sonthal Parganas was worked out and closed in December last.

The imports of food-grains of all kinds amounted to only 1,33,318 maunds; the exports of these stuffs were very large, the total being as much as 58,09,482 maunds, namely, wheat 8,22,267 maunds, gram and pulses 16,75,914 maunds, husked rice 17,97,209 maunds, paddy 3,92,839 maunds, and other food-grains 11,21,253 maunds. 18,18,245 maunds of food-grains were exported by rail to the districts of Daibhanga, Muzaffarpur and Saran. Nearly 11,72,540 maunds were exported to the North-Western Provinces and Oudh by rail, and over 14,38,204 maunds to Calcutta by rail and country boat.

5. *Civil Justice.*—The number of civil suits disposed of in the Division rose by 903 cases to 51,799. The ratio per cent. of witnesses detained over

two days to the total number examined fell from 13·6 to 11·2; the best results in this respect were obtained in the Sonthal Parganas, where the ratio was 1·5. Of the witnesses examined by Munsifs in that district, only 1·3 per cent. were detained more than two days. This year separate figures have not been given for rent-suits in the Sonthal Parganas.

6. *Crime: Police: Criminal Justice.*—Twelve thousand three hundred and eighty-five cognizable cases were reported against 13,342 cases in the previous year; and the non-cognizable cases reported were 12,908 as against 12,713 in 1894. The percentage of cases declared intentionally false rose from 4·7 per cent. to 5·4 per cent. The percentage of these cases in which prosecutions were instituted decreased, by how much is not stated; but it is clear that more attention should be given to the necessity of prosecution and of awarding compensation in these cases throughout the Division, and especially in the Bhagalpur district. Enquiry was refused in an excessive proportion of the house-breaking cases reported.

Ten thousand eight hundred and sixty-seven cases were tried by Stipendiary Magistrates during the year, or 1,242 less than in 1894. The number of witnesses examined decreased by 3,099 to 44,048, but the percentage detained more than two days rose from 3·5 to 5·3 for the whole Division, while in Malda it was as high as 9 per cent. and in Monghyr 8·1. These facts seriously reflect upon the working of the criminal courts of these districts.

Again, 5·5 per cent. of police cases were remanded six times or more, against 4·2 per cent. in 1894. More than half of the cases were, however, disposed of in two hearings, and more than one-third on the first day.

The Honorary Magistrates and Benchers disposed of 3,824 cases, 385 more than in the previous year; except in Monghyr and Bhagalpur the witnesses examined before them were promptly discharged. In the first named district, however, as many as 1·3 per cent. of the witnesses were detained for two days or more. The attendance of Honorary Magistrates was generally good.

The cases disposed of in Sessions Courts numbered 125, in 72·0 per cent. of these cases convictions were obtained. This result is satisfactory; but the Deputy Commissioner of the Sonthal Parganas remarks that some unnecessary commitments were made to him in his capacity of Sessions Judge. The Commissioner agrees with him and points out that the Deputy Commissioner has power to control the commitments made.

Rupees 86,264 were imposed in fines during the year, and there was a balance of Rs. 39,635 from the previous year. Of the total demand Rs. 78,916 were collected, and Rs. 20,558-13-7 were written off. The outstanding balance is now Rs. 26,691, less by one-third than that of the preceding year.

The working of the police is reported to have been, on the whole, satisfactory. As regards the rural police, considerable progress was made in introducing the provisions of Act VI of 1870; in Bhagalpur and Purnea there are now only a very few of the old Regulation *chaufidars* left. Care has been taken to reward *chaufidars* for good service wherever possible.

7. *Land and Land Revenue.*—The total current demand of land revenue is Rs. 33,71,024; the decrease of Rs. 3,993 since the previous year is mainly due to dilution in Government estates. Rupees 32,90,611 or 97·6 per cent. of the current demand were collected. The arrear demand amounted to Rs. 74,451, of which sum Rs. 67,294 were collected. The following table shows the percentages of current collections on the current demand attained in each district and the standard percentages:—

	In permanently-settled estates	In temporarily-settled estates	In estates under direct management.
Standard percentage	99	95	90
Percentage attained in districts—			
Monghyr	99 38	98 47	63 91
Bhagalpur	98 58	85 42	83 05
Purnea	97 57	92 92	55 5
Malda	99 86	99 65	76 18
Sonthal Parganas	99 99	98 88	96 91

In Bhagalpur and Purnea the prescribed standard was not attained in respect of any class of estates, and no district, except the Sonthal Parganas, reached the standard of collections in Government estates. The collections in the Sonthal Parganas were throughout excellent. In Purnea by far the greater part of the outstanding balance on account of permanently-settled estates is due from one defaulter whose estate is to be sold. In Bhagalpur the falling off in collections from estates in class III is said to be nominal rather than real, the tauzi ledger being incorrect. This matter should be thoroughly investigated. The short collection in Government estates in Monghyr is attributed to the destruction of crops by floods. On the whole the collection of rent in Government estates was nowhere satisfactory except in the Sonthal Parganas.

The total current demand of Road and Public Works Cesses was Rs. 9,30,677; of this sum Rs. 7,88,636 were collected. Nearly 10 per cent. of the whole number of estates in the Division (14,650) fell into arrears, but only 97 estates were actually sold.

A new forest division was created during the year for the purpose of managing the protected forests in the Sonthal Parganas.

8. *Wards' Estates.*—There were 7 estates under the charge of the Court of Wards as in the previous year, and no attached estates; the chief Ward's estate is that of Khagra in Purnea. The total demand was Rs. 6,01,343, of which Rs. 4,17,398 or 69·41 per cent. were collected. The total outstanding balance amounts to Rs. 1,57,011; of this sum Rs. 1,23,881 are due to the Khagra Estate, which has not yet had time to recover from the effects of its former proprietor's unsystematic management. Rupees 10,876 were spent on improvements of all descriptions.

9. *Excise: Stamps: Income-Tax.*—The excise revenue rose by Rs. 68,150 to Rs. 14,70,894, an increase of nearly five per cent., mainly under the heads of Country-spirit and Ganja. The incidence per head of population was 2 annas and 9 pies per head against 2 annas and 7 pies in the previous year. The total stamp revenue of the Division was Rs. 11,48,339, less by Rs. 10,486 than in the previous year; 539 persons were convicted of breaches of the stamp law. Eleven thousand three hundred and sixty-two persons are assessed to income-tax. The total proceeds of the tax amounted to Rs. 2,59,949, or 97·9 per cent. of the gross demand.

10. *Education.*—There are now 5,326 schools in the Division, 247 more than in the previous year; there are 7,373 more pupils at school, bringing the total up to 106,940. Still the proportion of the number of pupils to the whole estimated number of boys of a school-going age in the Division is very low, being only 14·7 against 46·1 per cent. in the Chittagong and 31·1 per cent. in the Presidency Division. Primary schools number 3,763. The number of pupils of aboriginal races is increasing steadily though slowly. There was a satisfactory increase in the number of Muhammadan pupils at school, the percentage of such pupils to all pupils being 22·2, while the Muhammadan male population forms only 19·71 per cent. of the whole male population. The total expenditure on education was Rs. 4,16,112, exclusive of inspection charges, scholarships and miscellaneous charges.

11. *Hospitals and Dispensaries.*—There are 37 public and private dispensaries in the Division; at those institutions for which statistics are available 179,477 patients were treated. There are also two leper asylums. The large district of Purnea, nearly 5,000 square miles in extent, where education is also extremely backward, has only three dispensaries.

12. *Local Self-Government Institutions.*—There are ten Municipalities in the Division; that at Jamui was abolished in the previous year. The Commissioner has suggested the formation of a Union Committee at this place as well as at Kishanganj, where the Municipality now includes rural areas unsuited to this form of self-government. The accounts of the Bhagalpur Municipality are reported to be in a confused state. Little is said as regards improvements in sanitation; but Municipalities appear on the whole to have worked without friction. So indeed did the District Boards, if the incidents connected with the election of a member to the Legislative Council be left out of account. These bodies kept the existing roads in fair repair as far as their funds allowed, but were not able to undertake much new work.

13. *The number of Muhammadans employed by Government* now bears a greater proportion to the whole number of officers than does the number of Muhammadans in the Division to the whole population. Of a total number of 789 ministerial officers employed, 164 or 20·78 per cent. are Muhammadans, while the total Muhammadan population forms 19·78 per cent. of the whole population.

14. *Social and Political Institutions.*—There are nine social and political societies, clubs or committees in the Division, seven of which are in the districts of Bhagalpur and Monghyr. Some of these Societies support widows and orphans; and the Muhammadan Association at Bhagalpur keeps up a school.

15. *The conduct of Zamindars* is reported with a few exceptions to have been generally peaceful and loyal.

16. The Lieutenant-Governor thanks Mr. Toynbee for his careful administration of the Division and Mr. Oldham for his clear and concise report, from which extracts are published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

*Extracts from the Annual General Administration Report of the Bhagalpur Division
for the year 1895-96.*

III.—WEATHER AND CROPS.

21. Mr. Toynbee left the following note on the weather and crops:—

"The main feature of the year's weather was the unusual drought which prevailed during the latter part of the year. From 1st October to 31st March hardly a drop of rain fell. What would have been an unusually fine rice crop was, where no means of irrigation exist, almost entirely spoiled for the want of one or two heavy showers in October. The rabi crop was similarly affected. Though to outward appearance a fair crop, the ears of wheat, &c., did not fill, and the outturn was considerably below the average. Owing to the good harvests of preceding years no distress was occasioned by the partial failure of crops above alluded to beyond that generally occasioned by want of water and grazing. The southern parts of Monghyr and Bhagalpur districts and those parts of the Sonthal Parganas which border thereon were the tracts chiefly affected. In both of these railway surveys are now in progress, and if any pinch is felt during the coming year, there will be no difficulty in finding plenty of work for those who require it. A great deal depends on the outturn of the bhadoi, and the tracts most affected will require careful watching until the outturn of the next rice crop is known."

22. The statement given last year is subjoined:—

DISTRICT.	RAINFALL.		OUTTURN OF CROPS TAKING 16 ANNAS AS THE AVERAGE OUTTURN.			REMARKS.
	Average of 10 years	In 1895-96.	Bhadoi.	Winter rice.	Rabi.	
1	2	3	4	5	6	7
Monghyr ...	49.48	33.64	12½	7½	11½	The figures in column 2 are taken from the Bengal Administration Reports. Those in column 3 are from the District Annual Administration Report. Those in columns 4 to 6 are taken from the Director of Land Records and Agriculture's final reports.
Bhagalpur .	53.35	44.86	14½	11½	10	
Purnea ...	72.57	64.82	16	12	12½	
Malda ...	58.04	33.72	12	12	14	
Sonthal Parganas	59.48	38.82	13½	10	10	
Divisional average	58.58	43.17	13½	10½	11½	

23. Any special circumstances in each district noticed by the District Officers are detailed below:—

In the district of Monghyr, the unirrigated rice, wheat and several of the rabi crops gave a poor outturn. Janera, maize and mustard seed, on the other hand, were good crops, and paddy lands having dried early, pulses were extensively cultivated.

In the district of Bhagalpur the distribution of rain throughout most of the district was fairly level and the bhadoi crops were good.

In the district of Purnea the rainfall in the beginning of the year was fairly distributed, and good bhadoi and jute crops were gathered in the Sadar and Araria subdivisions. The Collector writes:—

"Bhadoi paddy is very extensively grown in Purnea as being the safest and surest of all crops. The area under this crop is yearly increasing."

The cultivation of the other bhadoi grain crops is limited. Taking each crop separately, the winter rice which is the most important crop of the district

was only a 12-anna crop; the rabi, mustard seed and other oil seeds were below the average; tobacco and sugarcane were 14-anna crops, jute was a 15-anna crop, but indigo, owing to favourable weather, was a bumper crop.

The average rainfall of the district of Malda was 33·72 against 60·42. Not only was the rainfall scanty; but the rainy season was limited. But the Collector adds:—

“The year on the whole was seasonable in spite of unusually protracted drought. The general health of the people was fairly good, and no disease appeared in an epidemic form.”

The season was favourable for the bhadoi crops, which yielded a fairly good outturn. The outturn of kalai, wheat, barley, peas and mustard seed was, owing to the drought, reduced to 10 annas in places; to 8 annas in others. Mulberry, indigo and jute gave a fair outturn. The Collector has noticed two peculiar phenomena in connection with the season. The rivers did not rise sufficiently to inundate the country and fertilise the soil, and the local storms called “nor-westers” were conspicuous by their absence. The average rainfall of the Southal Paiganas was 38·82, which is not much more than half the normal quantity. Fortunately one important crop, Indian-corn, was a bumper one everywhere. Bajra was also good, but the winter rice all round was under 10 annas, and both the rabi crops and the bhadoi crops (except Indian-corn) were defective. These reports received after Mr. Toynbee wrote his note show that, however bad the season was, it was not disastrous.

It is worth mentioning that both in my last division and here I have been unable to dispense with the district and subdivisional crop and weather reports which Sir George Campbell instituted in 1872, and which, except for selected centres, were done away with in 1894. Some of the District Officers have found themselves in the same position.

V.—MATERIAL CONDITION OF THE PEOPLE

35. The opinions of the District Officers are given. The Collector of Monghyr begins his report on the material condition of the people in his district during the past year by saying that on the whole their condition was better than in the preceding year. The people of the Jamui subdivision, where there are no *deara* lands, were, however, less fortunate than their brethren in the other two subdivisions. Mr. Marriott pities the middle classes, who, having acquired a smattering of education, have forsaken the calling of their forefathers and imbibed a hankering for Government service, and have thus made themselves miserable. The condition of the artizan classes remained almost unchanged. Their wages appear even to have fallen.

36. The Collector of Bhagalpur reports that the material condition of the people in his district has undergone but little change in the past year. In spite of the early cessation of the rains and the almost entire absence of rain from October to April, the people, as a whole, he says, have felt no change in their ordinary circumstances. Stocks from previous years were plentiful, and prices did not rise.

37. The Collector of Purnea, Mr. Bernard, writes that with the people of his district the year was one of prosperity. The agriculturists were well off. The supply of land is in excess of the requirements, and in most villages the extent of cultivation depends only upon the capital and industry of the husbandman. Poor labourers can usually obtain employment with ease. On the contrary the difficulty in this district is to find labour. The people of a few villages in the Sadar subdivision suffered from floods, and small advances were made to them to buy seed in February and March. The greater portion of those, however, who had applied for help were found to be well off and really able to help themselves. The common people of the Kishanganj subdivision are generally well off though not given to luxury in any shape save indulgence in litigation. Their litigious habits are said to swallow many a man's savings, and this single subdivisional area mainly supports the Purnea Bar.

38. With the help of the good harvests of bhadoi and winter rice crops during the preceding two years, and the yield of the bhadoi paddy during the year under report, the people of the district of Malda, after meeting their own wants, were able to export large quantities of grain. The growers of mulberry and the rearers of silkworms made moderately good profits, and thus the effect of the partial failure of winter rice and rabi crops was not much felt. On the whole the condition of the agricultural classes was prosperous. The prices of food-grains ruled high in the latter part of the year owing to prolonged drought though not so high as in the preceding years.

39. The labouring classes in the Sonthal Parganas have now, both owing to the local demand of railways, quarries, coal mines and other large employers of labour and to the demand for the tea gardens, a good market value, so that to keep a man at home, the local employer must treat his labourer well. The chief evil of this outside demand is that bread-winners are sometimes induced to desert their families which suffer want. Such cases of desertion are now constantly come across. The other noteworthy observations made by Mr. Carstairs are given in his own words:—

“The everlasting game between the money-lenders and the raiyats continues. Mr. Smith (Pakour) says raiyats often borrow, even when they have money by them, out of old habits or to put burglars off the scent, or to avoid their neighbours' envy.

“The most remarkable movement this year was, I think, the sudden growth of popularity among the central Paharias of emigration to Assam. Those who starved and stole at home are now many of them giving good service in the tea gardens. Other Paharias are getting good work in connection with *sabai* grass, so that our most wretched class are now looking up.”

VI—EMIGRATION AND IMMIGRATION.

40. The number of emigrants registered in the district of Monghyr is gradually decreasing. There was no recruitment through the agency of female recruiters. A criminal case of the ordinary kind of combined decoy and restraint was brought in the Jamui subdivision, in which two of the accused persons were convicted by the Subdivisional Magistrate under section ³⁴¹/₅₄₄ of the Indian Penal Code and sentenced to six months' rigorous imprisonment each, and another accused person was sentenced to one month's simple imprisonment and to a fine of Rs. 50. There are two places for accommodation of sardari emigrants and four depôts for the accommodation of free emigrants in this district, but the whole business is on the decline.

41. On the whole there is but little emigration from the district of Bhagalpur. There were four depôts for the accommodation of emigrants for tea gardens in Assam.

42. There is no regular emigration from the districts of Purnea and Malda. From Purnea people go to Calcutta, Assam, Rangoon and other places to work as grooms, shoeing smiths, &c. The people of Malda do not go to seek work elsewhere, but, as further east, labourers annually visit that district and find employment in road making and similar work.

43. The following extracts are taken from the Deputy Commissioner's report on this head in the Sonthal Parganas:—

“The vexed question of emigration to Assam may be dismissed with a few remarks this year, as the matter has been thoroughly investigated by the Labour Commission, whose report is now being awaited with great interest. The number of emigrants for Assam registered under the Act during the year was 151 labourers and 118 dependants. They were registered only at Dumka and Deoghar. The emigration to Assam that now takes place is almost entirely what is called ‘free,’ that is conducted by unsupervised agents or sardari.

“Mr. Adlam for the Sonthal emigration scheme sent up for the gardens employing him 1,553 labourers and 100 dependants during the year.

Mr. Smally for Messrs. Barry and Company works on the same principle as Mr. Adlam, but I have not thought it right, pending the result of the report of the Labour Commission, to give his work recognition, being strongly convinced of the evil of competition. He registers his contracts, which are not under the Act, at the Registration office. Cases of other ‘free recruiters’ registering similar short contracts have been noticed, but it is somewhat difficult under the present rules to ascertain whether they are duly carried out or not.

"There were 43 criminal cases connected with emigration, chiefly under section 363 (Kidnapping) and section 417 (Cheating). The usual difficulty was found in getting emigrants who were parties in such cases back from Assam.

"The business of the arkatis seems to have fallen off. The number of coolies recruited for Government service in Chittagong was 17 sardars and 441 coolies. The work of recruiting and despatching them was entrusted by Mr. Bernard to Mr. Adam, who has given satisfaction by the manner in which he did it. The service on his part was gratuitous, only actual expenses out of pocket being paid for.

"There is a good deal of temporary emigration to the coal-fields from the south-west and the north of the Ganges and the Duars on the north and east of the district. No figures are kept."

"44. Up to 1883 there was none of this emigration from the Sonthal Parganas. In 1880 it was impossible to get a single transport cooly thence for the Naga expedition of that year. In 1891 the terms for the coolies for Chittagong were Rs. 12 and rations and full clothing. In the course of four years they came down to Rs. 7, rations, and a blanket. What kept the people so stationary up to 1883 was no doubt the benefit and credit and the actual money in pocket given to them by Sir George Campbell's settlements which were not completed till 1880. The changes since must be mainly due to pressure of population, but no doubt the unchecked transfers of lands had their influence in the years immediately following 1883.

VII—PRICES OF FOOD AND LABOUR.

45. From a comparison of the prices of food staples during the last fortnight in March 1896 and during the last fortnight in March of the preceding year, it appears that there has been no difference to speak of. Taking each district separately, it is found that in the Sadar and Banka subdivisions of Bhagalpur, the price of common rice remained the same as in the previous year, while it was cheaper in the Madhipura and Supaul subdivisions. The Collector writes:—

"There is a striking feature about the prices of wheat and gram in three out of the four subdivisions. In spite of the deficient outturn of the rabi crops this year, there is a perceptible fall in the prices in the year under report. This apparent inconsistency is attributable to the fact that stocks from the abundant harvests of the preceding year are still available, and these together with the new produce are keeping the market from going up."

In Purnea common rice sold at 18 seers per rupee in the beginning of April. The price remained almost unchanged with little variations from time to time till August, when it rose to 16 seers a rupee. It fell to 20 seers in the latter end of August, and continued stationary till the end of March, when it again rose to 18 seers the rupee. The price of wheat was 13 seers per rupee during the first two months of the year. It fell to 16 seers in June, and with some fluctuations was steady at that price till the close of the year. The prices of other food-grains ruled higher than in the preceding year.

In the district of Malda the prices of food-grains, especially common rice, remained almost unchanged, and that of gram fell to its normal level; but the price of wheat is said to have ruled higher owing to the deficient crop and to large exportation, thus contradicting the Bhagalpur experience.

The principal food grains of the Sonthal Parganas are Indian-corn and rice. The crop of the former was unusually large during the year under report, and consequently, though rice was reduced in quantity by failure of the rains, there was little pinching.

46. There has been no decided change in the rates of wages for skilled or unskilled labour, but there is a tendency towards increase in all kinds of labour except, as already noticed, in Monghyr, where the tendency seems to be to fall.

In the district of Purnea this tendency, the Collector states, is due to the unhealthy climate. No outsider goes there if he has a choice, and the consequence is the indigenous worker, more or less, commands his own price. I gather that not so long ago there used to be immigration of Dhangars to Purnea.

In the Sonthal Parganas the onward tendency of the rates of wages is gauged not so much by any actual rise in rates as by the growing difficulty in getting labourers on the old terms. Mr. Carstairs writes that the chief disturbing element is the demand for tea gardens and coal mines, and this is shown by

the fact that a man is sometimes able to earn three annas and a boy two annas a day, rates once unheard of. Apparently in the Sonthal Parganas real market rates are taking the place of the old local seasonal and traditional rates. That the supply is not equal to the demand in all parts of the division is proved by the fact that at the time of harvesting rabi crops and mustard in the district of Monghyr ordinary labourers come from other districts. Coolies employed on road making and repairing in Malda also come from outside the division.

XXIII—RAILWAYS AND OTHER PUBLIC WORKS.

Railways.

132. Mr. Toynbee* has left the following notes :—

"The surveys for a line from Lakhisarai to Gaya, to be called the South Bihar Railway and for a line from Bhagalpur to Nonihat and thence to Deoghar on one side and to Ahmadpur on the loop line on the other, were commenced during the year, and are still in progress. Both are important lines which will, in my opinion, pay handsomely and be of the utmost advantage to the division from a general administrative point of view. The District Boards concerned should, I think, prepare plans and estimates beforehand for the metalling and bridging of existing roads which will form important feeders to the above lines and for the construction of new ones. The Bhagalpur line will, if completed to Ahmadpur, open out the Sonthal Parganas and have an important bearing on its future administration. The talked of line from Garhara on the Tirhut State Railway through Begusarai to Katihar has not been heard of during the year. It crosses the Kosi river and many of its offshoots and should not be lightly undertaken without full consideration of the possible and probable effects on the drainage of the country. Another line which has been projected from Khagaria (opposite to Monghyr) through the North Bhagalpur subdivisions of Madhupura and Supaul to the Tirhut State Railway at Nawabganj and Bhaptiahi and thence to the Nipal frontier would, in my opinion, be less open to engineering objections, and would not only pay a better dividend, but would be of more general assistance to the administration. It would also afford protection against famine to the tracts which suffered so much in 1874."

XXVI.—EDUCATION.

145. The following table compares the number of schools and the number of pupils attending them during the last two years :—

CLASS OF INSTITUTIONS		1894-95.		1895-96.	
		Schools	Pupils	Schools	Pupils
1		2	3	4	5
<i>Public Institutions.</i>					
Secondary	{ High English ...	18	3,408	21	3,747
	{ Middle " ...	36	2,036	31	1,776
	{ " Vernacular	46	2,743	47	2,927
Primary	{ Upper Primary	244	10,051	253	11,050
	{ Lower " ...	3,125	66,353	3,266	70,864
Special	14	568	12	416
Female	272	4,559	287	5,364
Total		3,783	89,597	3,977	96,243
<i>Private Institutions.</i>					
<i>Advanced teaching—</i>					
{ (a) Arabic or Persian ...		215	2,793	222	2,869
{ (b) Sanskrit ...		138	1,173	157	1,308
Teaching Koran only ...		98	864	104	961
Other schools ...		747	5,140	765	5,569
Total		1,298	9,970	1,348	10,707
GRAND TOTAL		5,079	99,567	5,325	106,950

146. There has been a further net gain of 247 schools and 7,373 pupils. The increase is shared *by all* the districts, though in the Sonthal Parganas it was in secondary education only, while there was a decrease in the figures of schools and pupils under both upper and lower primary education; and Malda, which had been showing a decline for some years, gained both in schools and pupils. There was an increase both in the number of schools and pupils in Monghyr, Purnea, and Malda, in Bhagalpur there was a loss of schools, but a gain in pupils. Under the head of Special schools in the Sonthal Parganas, there is a decrease of two schools, but a gain of 58 pupils. The Deputy Commissioner states that the guru under training passed the middle vernacular examination and left, and no new guru has yet been sent for training in his place.

147. Female education shows a gain of 65 schools with 805 pupils. Monghyr shows the largest increase, viz. 62 schools, and 716 pupils.

148. Out of 188 candidates who appeared at the Entrance examination 79 passed. Of these successful candidates only 6 were Muhammadans. Of the Government zilla schools, Monghyr passed only 1 out of 15 candidates, Bhagalpur passed 17 out of 23, Purnea 5 out of 12, Malda 6 out of 8, and Dumka 4 out of 6. Among the aided schools, that at Jamalpur passed 9 out of 13 candidates, and the Jamui and Begusarai schools 1 each out of 3 and 2, respectively, the Pakour school 8 out of 9, and the Deoghur school 2 out of 3. The unaided schools in the districts of Monghyr, Bhagalpur, and Malda, 6 in number, passed 25 candidates.

Twenty-five middle English schools sent up 81 candidates for the Middle Scholarship examination, of whom 55 passed, 28 obtaining middle English and 27 middle vernacular certificates. Thirty-nine middle vernacular schools sent up 128 candidates, of whom 61 were successful.

One hundred and fifty-seven upper primary schools sent up 369 candidates, of whom 234, including 3 girls, passed, representing 134 schools. Four upper primary schools, exclusively for girls, sent up 17 pupils, of whom 10 passed from 3 schools; 42 pupils of secondary schools and 21 private students obtained upper primary certificates. Out of 2,987 boys and 12 girls from 953 schools, 2,346 boys and 12 girls representing 811 schools passed, as well as 114 girls from 39 lower primary, exclusively girls' schools, and 20 from 5 upper primary, exclusively girls' schools. Secondary schools passed 55 and upper primary schools passed 759 boys and 3 girls besides 111 private students.

149. The number of Muhammadan pupils in all classes of schools increased from 22,063 to 23,818. The number of Muhammadan pupils on the 31st March 1894 was only 20,678. The Muhammadan male population forms 20·03 per cent. of the total population, and the percentage of the Muhammadan pupils to all pupils has now risen to 22·2. The comparative suddenness of this change explains why the proportion of successful Muhammadan pupils is so much lower.

150. The number of pupils of aboriginal race also increased from 6,183 to 6,514, and more or less in all districts. In the Sonthal Parganas the increase was from 5,598 to 5,771. The majority of pupils of these aboriginals are Sonthals, 104 were Paharias, 85 are returned as Dhangars and 2 as Kols. There were 260 Sonthal schools against 204 in the previous year. Taking the population and the children of school-going age in the Sonthal Parganas, there was 1 Sonthal in every 14·5 and 1 Paharia boy in every 90 at school. The Sonthals are about 1 in 3 and the purer Paharia about 1 in 35 of the population. The expenditure from the Sonthal education grant of Rs. 7,500 was Rs. 7,499 against Rs. 7,493 in the year before. One hundred and ninety-seven Sonthals and five Paharias passed public examinations last year.

151. The total expenditure on account of education (including charges for inspection, scholarships and miscellaneous charges) was Rs. 5,20,201 against Rs. 4,67,155 the year before. Government contributed Rs. 98,997, District Boards Rs. 95,298, and Municipalities Rs. 9,191, against Rs. 99,337 from Government, Rs. 90,415 from District Boards, and Rs. 8,371 from Municipalities in 1894-95. The income from fees amounted to Rs. 2,12,949 against Rs. 1,92,511, and from other sources Rs. 1,03,766 against Rs. 76,521.

152. If the above statistics, which have been obtained from the Assistant Inspector of Schools, are correct, they represent very satisfactory progress. I see, however, that they differ slightly from those furnished by the District Officers, and will try to have the discrepancies reconciled, and to ascertain which source is to be most relied on for the future.

153. The following points for notice are taken from the reports of the District Officers:—

In Purnea there has been an increase in private contributions, which is thought to give grounds for believing that primary education is expanding steadily among the people of this very conservative district.

Regarding the Purnea technical school, the Magistrate writes:—

“The number of pupils in the technical school was 15, that is the same number as returned last year. The total expenditure incurred by it during the year under reference was Rs. 2,530, and the sale proceeds amounted to Rs. 1,172. So the net sum spent by the Board on it was Rs. 1,358 against Rs. 2,295 in the preceding year. The cost per pupil was Rs. 168-6 against Rs. 189-8 the previous year. The school continues to be under the control and supervision of the District Engineer. The boys do not stay long enough to become skilled workmen. After acquiring a smattering of carpentry, they leave the school and set up as *mitris* in their villages.”

About the education of the Muhammadans in his district, the Magistrate writes:—

“The percentage of Muhammadans to the total population of the district is 41.4, and that of the Muhammadan pupils under instruction in schools of all kinds to total pupils is 50.7 against 51.4 in the previous year.”

The Magistrate of Malda writes:—

“The Sidheswari Institution at Chanchal had on its rolls 97 pupils against 87 pupils in the preceding year, 83 of them being Hindus and 14 Muhammadans against 69 Hindus and 20 Muhammadans in the preceding year. This school receives no aid from the public funds, and is supported by Babu Sarat Chandra Rai Chowdhuri, proprietor of the Chanchal Estate, who has dedicated the institution to his mother Sidheswari Debya. The result of the school at the matriculation examination was two boys passed out of four sent up.

“The high school at Nawabganj, called the Hari Mohan Institution, after the name of its supporter, Babu Hari Mohan Mallik, zamindar, was opened during the year under review. It had 77 pupils on the rolls on 31st March 1896. The expenditure of the school amounted to Rs. 2,398—Rs. 588 from fees and Rs. 1,810 from endowment. This is also an unaided school. It passed two boys at the matriculation examination out of seven sent up.”

154. There were three industrial schools in the Sonthal Parganas. The Dumka carpenter's school is carried on on a small scale. There were two apprentices at this school which does not receive any aid from Government. The Pakour industrial school, in which different kinds of handicraft are taught, had eight apprentices. The expenditure on this institution was Rs. 1,735, of which Government contributed Rs. 135. The industrial school at Madhupur is maintained by the East Indian Railway Company for the technical education of their employes. It had 67 apprentices. I intend to speak to the Deputy Commissioner about the Sonthal industrial schools. Sonthals have always been looked on as incapable of skilled labour, but in the South Lushai Hills under local exigencies several of them showed considerable aptitude for carpenter's and sawyer's work and for tasks, which are the real test of work of this kind.

XXX.—LOCAL SELF GOVERNMENT INSTITUTIONS.

167. There are now 10 municipalities in the division (two in each of the five districts) against 11 the year before.

<i>Municipalities.</i>	
Monghyr	{ Monghyr. Jamalpur.
Bhagalpur	{ Bhagalpur Colgong
Purnea	{ Purnea Kishenganj.
Malda	{ English Bazar. Old Malda.
Sonthal Parganas.	{ Deoghar. Sahibganj.

The Jambh Municipality in the district of Monghyr was abolished last year, but there is still plainly a number of local needs, the cost of supplying which is proposed to be thrown on the District Board. I have asked the Magistrate for proposals for the formation of a Union Committee to replace the Municipality. There has been little or no change in the condition of the municipalities,

and they seem to have worked pretty nearly in the same ways as hitherto.

168. The Monghyr Municipality held ten general, eight special and 2 Sub-Committee meetings. A good drainage system and one for the supply of pure drinking water continue to be the crying want of the town. A comprehensive project for proper drainage is now under preparation. The Commissioners spent Rs. 3,917 on education. The Monghyr public garden is in charge of a Municipal Commissioner. The Government made a contribution of Rs. 300 for its support, and its maintenance cost the Municipality Rs. 381. The Jamalpur Municipality held eight general, one special and two Sub-Committee meetings. It spent Rs. 573 on education. As the town is mainly in the hands of the employes of the East Indian Railway Company, sanitation is well attended to.

169. The rates levied in the Bhagalpur Municipality are a 7 per cent. house rate, a 3 per cent latrine rate, and a water rate levied in certain wards of the town. The collections were not satisfactory. Out of the total demand of Rs. 70,305 only Rs. 46,980 were collected, and, excluding remissions, there remained an outstanding balance of Rs. 21,542. Of the total expenditure of Rs. 65,604, 25·8 per cent. was spent on conservancy, 24·1 per cent on water-supply, 9 per cent. on drainage, and 7·2 per cent. on the medical necessities of the town. The charge of establishment was 8·3 per cent. The Government has sanctioned a loan of Rs. 3,00,000 for the extension of the water-works, the cost of which has been estimated to be Rs. 3,13,600. The internal economy of this important Municipality is in a most unsatisfactory state. The Accountant-General, Bengal, has informed it that if the accounts are not in a better condition than they were at last year's audit, he will report that no audit can be held. I myself see no remedy except to improve the establishments, and to spend more on them, since it is plain that the voluntary executive will not undertake the minute and laborious duties demanded even if they were competent to discharge them.

170. The Purnea Municipality held 14 meetings; besides which 5 meetings were abortive for want of a quorum. The Kishanganj Municipality held 24 meetings. The Chairman accords the Commissioners credit for taking an interest in their affairs. The Magistrate writes:—

“It would be a very good thing if the Kishanganj Municipality were abolished, except that it maintains the dispensary at Bhariadangi. The rural tract included within its limits is not suited to a municipal institution.”

I have suggested that the substitution of a Union Committee be considered as at Jamui. The tax on holdings in the Municipality of Purnea continued to be levied at 6 per cent. After the close of the year the Commissioners resolved to raise it to 7½ per cent. The Magistrate writes:—

“I became Chairman of this Municipality after the close of the year, at a particularly busy time. I am not able yet to express an opinion on the interest taken by the Commissioners in business. The chief wants of the town are improved drainage and conservancy. The latter, it appears to me, cannot be effected without levying extra taxation under Part IX. The former is possible to a certain extent. Both matters are receiving attention. It is difficult to get enough coolies even to clear out the main drain at this season, and as for sweepers, it is impossible to get a sufficient number without importation from outside the district. The first step in improving the conservancy will be, if the Commissioners agree to levy a latrine-tax, to import sweepers and settle them so that they will be content to remain here.”

There is no difficulty in either Municipality as to water-supply, and this matter has lately received full attention.

171. The English Bazar and Old Malda Municipalities held 21 and 19 meetings respectively besides 3 and 2 adjourned meetings. They spent Rs. 849 and Rs. 396 on education. Both are stirring little institutions, with some resemblance in their proceedings to debating clubs.

172. The Sahibganj Municipality has hitherto had at its head the local District Traffic Superintendent of the East Indian Railway, but owing to constant changes in the *personnel* of that office, the work of the Municipality has greatly suffered lately. The present Vice-Chairman, who is the resident Hospital Assistant, assisted by a Commissioner of long standing, Babu Hari Das Marwari, has, however, managed to keep things going. There is nothing of importance to record regarding the Deoghar Municipality. The Deputy Commissioner writes—

“As for non-statutory Self-Government institutions, they are to be found in all parts of the Sonthal Parganas, and approach much more nearly an English idea of Local Self-Government than most parts of Bengal with which I have any acquaintance, taking charge of police and road work, sanitation and the like. We have in our indigenous institutions a most valuable material which, with a little well-spent work, could be developed and organised into a most valuable instrument for the prosperity of the district.”

There is no doubt that the Central Provinces system of Local Government can be successfully worked in the Sonthal Parganas.

173. The business in the hands of the District Boards which caused most stir last year was the election of a member of the Bengal Legislative Council. I am unable, however, to say how far this excitement was felt by the masses or the rural population, or if it pervaded them at all. The final electorate of the Boards failed to come to a preponderating opinion, and the elections ended in a tie. Government cut the knot and appointed the Maharaja of Gidhour to the seat in the Council. The Magistrate of Monghyr says nothing about the District Board.

174. The District Board of Bhagalpur held 16 meetings, 3 of which had to be adjourned for want of a quorum. The Board spent Rs. 1,071 only on sanitation, but this seems to be a matter of account. It is contributing handsomely to the Bhagalpur water-works. The District Board of Purnea held 13 general and 3 special meetings. The Local Boards were entrusted with the maintenance of the village roads within their jurisdictions, and seem otherwise to have as little scope and usefulness as elsewhere. The District Board of Malda held eight ordinary and five special meetings, and five meetings were adjourned. There is no Local Board in Malda, but the question of Union Committees has been taken up there in anticipation of the proposed legislation which will render the intermediary of Local Boards unnecessary.

175. It is to be gathered from the reports that all the District Officers are well satisfied with the working of these Councils. In Monghyr the notice of the Local Boards which as Councils are superfluous and as executive bodies have large areas and the smallest of powers is unusually disparaging, but is, I believe, just.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE
CHITTAGONG DIVISION FOR THE YEAR 1895-96.

GENERAL DEPARTMENT.—MISCELLANEOUS.

Darjeeling, the 2nd November 1896.

RESOLUTION, No 3512

READ—

The General Administration Report of the Chittagong Division for the year 1895-96.

THIS report is submitted by Mr. F. H. Skrimo; but Mr. W. B. Oldham held charge of the Division throughout the year 1895-96. Messrs J D Anderson and Agasti were in charge of Chittagong and Noakhali, respectively, the whole year. In the district of Tippera and in all the subdivisions except Brahmanbaria, there were changes of charge.

2. *Tours and Inspections.*—The Commissioner spent six weeks in the Hills, besides touring for 80 days in his Regulation districts and in Hill Tippera. The tours of the Collector of Chittagong and of the Subdivisional Officer of Cox's Bazar fell short of the standard by 3 and 9 days, respectively. The prescribed inspections were all made except in Chittagong, where Mr. Anderson was unable, from pressure of routine work, to hold formal inspections of his own offices, also the subdivisional offices in Noakhali and Chittagong were each inspected by the Collector only once. These omissions are not satisfactory, and the explanation given by Mr. Anderson shows that a better distribution of work is required in Chittagong. The Commissioner is requested to give his attention to this.

3. *Weather and Crops. Public Health: Material Condition of the People.*—The rainfall was below the normal and ill-distributed in all three districts, and the crops did not reach the average except in Tippera, where rice and jute yielded full crops. A storm on the 2nd October did serious damage in Noakhali.

The following are the death-rates per mille returned for each district —

Chittagong	...	30 8		Noakhali	...	25 2
		Tippera				26 7

The rates are so low that there must certainly be considerable room for improvement in registration; and it is useless to institute a comparison with the rates given for previous years. Chittagong and Tippera appear to have been peculiarly affected by cholera during the year.

The price of rice rose steadily through the year, and is still rising; the crop of 1895-96 was not a full one, and much of the previous year's produce had been exported. Mr. Skrimo says that prices have risen generally in the district of Chittagong since the opening of the Assam-Bengal Railway (in July 1895), but the rise had begun before that time. In the north of the Division the excellent jute crop compensated the cultivators for an inferior rice harvest, and the labouring classes found ample employment on the railway works. The wages of unskilled and skilled labour are very high in the Chittagong Division. The condition of the people of the Division is generally good. As the Commissioner remarks, the jute trade has thrown a flood of wealth into the country. The great majority of the people, who are cultivators, have benefitted by the rise in prices of rice and other crops, while the small class who depend solely on fixed incomes are deteriorating in wealth and in other respects.

4. *Manufactures: Trade and Commerce.*—968,949 lbs of tea were manufactured and exported, showing a decrease of 106,999 lbs. from the previous year's outturn. The paddy mills in Chittagong turned out 100,688 maunds of rice.

The Assam Bengal Railway has been opened for traffic from Chittagong to Chandpur and to a point 30 miles north of Comilla. The opening of the railway has already caused changes in the channels of traffic, which are likely

to be accentuated in the future. There was a very large expansion of the trade of Chandpur. The Commissioner dwells on the great development of this inland port, which has an admirable situation at the confluence of the Megna and Padma. Both here and at Chittagong arrangements are being made for the construction of goods-yards, at present the railway has no station buildings and very few feeder roads.

The total trade of the port of Chittagong is valued at Rs. 2,76,83,482, or Rs. 6,16,044 more than in the previous year; the increase is ascribed mainly to larger exports of jute. Twenty vessels cleared from Chittagong for foreign ports, and 620 for Indian ports during the year; the total tonnage of ships clearing was practically the same as in the previous year, but the number of *balam* boats paying port dues decreased by nearly one-third. The ship-building industry is declining, and only one small vessel was built here during the year. 25,538 tons of rice and paddy were shipped from this port, and 45,427 tons of jute, against 37,834 and 37,494 respectively in the previous year. The total exports of these commodities from the Division by internal routes amounted to 13,544 tons of rice and paddy, and 10,817 tons of jute; no figures are available for comparison with the trade of previous years. The bulk of the inland trade of the Division is with Calcutta, and the chief imports are salt, cotton and piece-goods, and kerosene oil.

5. *Civil Justice*.—There was an increase in litigation; the number of title suits increasing by 839 to 11,627 and the number of suits relating to money or movables by 3,803 to 29,941. Arrears were, however, reduced. The Commissioner attributes the increase in litigation to the settlement proceedings, a multitude of notices under section 424 of the Civil Procedure Code having, he says, been received during the year. In point of fact, however, there was a decrease in litigation in the Chittagong district, which the District Judge attributes to the settlement proceedings, and the Lieutenant-Governor is informed that only 10 suits have been actually instituted up to date in connection with the settlement proceedings since their commencement. The increase occurred in districts in which settlement operations were not in progress. The total number of notices under section 424 of the Civil Procedure Code received during the year was only 219.

6. *Crime Police: Criminal Justice*.—Excluding nuisance cases 4,892 cognizable and 11,820 non-cognizable offences were reported, about 1,152 offences less than in the previous year. Cognizable crime, however, shows an increase in Noakhali. 8,457 cases were tried, or 970 cases less than in the previous year. 1,295 out of the whole number of cases were tried by Honorary Magistrates. Of the witnesses examined by Stipendiary Magistrates, only 2·4 per cent. were detained over two days, a percentage which shows an improvement on the previous year and is in itself satisfactory, but Honorary Magistrates, though the number of witnesses they examined (3,053) was less by 594 than in 1894, detained 16 per cent. for more than two days against 10 per cent. in the previous year. The detention of witnesses by Honorary Magistrates is unsatisfactory and demands the attention of the District Officers. Their work in this respect was worst at Chittagong and best at Chandpur. 1,516 cases were sent up by the police and 628 of them disposed of on the first day; 3·2 per cent. were remanded six times or more (including 6 of the 28 police cases tried by Honorary Magistrates). No appeals were lodged against the decisions of the Noakhali Bench and of the Marine Magistrate at Chittagong. The Lieutenant-Governor is pleased to notice the excellent attendance of Honorary Magistrates at Chittagong.

Eighty-four cases were tried at the Sessions and 61·9 per cent. of them resulted in conviction.

Fines to the amount of Rs. 41,439 were imposed during the year; Rs. 38,965 were collected and the outstanding balance reduced from Rs. 11,529 to Rs. 7,719.

In Noakhali the police did good detective work in connection with several important cases. It is stated that in Chittagong district the unhealthy climate and the high prices of provisions make it difficult to secure recruits of a good class. With regard to the rural police, it is to be regretted that only 260 chaukidars in the Division were rewarded for good work, while

1,898 were punished; the experiment of employing *dafadars* as supervisors is being tried with fair success in Tippera.

7. *Land Revenue*.—The current demand on account of Land Revenue and Road and Zamindari Dāk Cess in the Division was Rs. 32,24,636; and the outstanding arrears amounted to Rs. 1,32,938. Out of the total (current and arrear) demand Rs. 31,99,170 were collected. In permanently-settled estates the percentages of current collections on current demand surpassed the standard of 99 per cent. in all three districts; and the following table shows the percentages attained in respect of the other classes of estates.—

Temporarily-settled estates (standard 95 per cent)			Government estates (standard 90 per cent)	
Chittagong	...	100		92 44
Noakhali	...	84 92		84 16*
Tippera	...	99 6		83 76

It is not explained why Noakhali has fallen short of the standard in respect of both these classes. Chittagong is the only district that has worked up to the standard in respect of all three classes of estates, a result which considering the great multiplicity of petty estates in that district is highly creditable to the Collector. Rs. 5,49,754 were collected on account of Road and Public Works cesses out of a demand of Rs. 15,99,368; the standard of 95 per cent. for current collections was nowhere reached.

There was a large decrease of almost 25 per cent. in the number of certificate cases instituted, and it was distributed over all classes of demands except those of Court of Wards' estates. It is not understood why, in view of recent orders, the number of certificates in Wards' estates should have increased, and no explanation has been furnished. The disposals did not keep pace with institutions except in Tippera, and the number pending at the close of the year 1895-96 was greater by one-sixth than in 1894-95. The Lieutenant-Governor thinks that the results of the revenue administration of the Division are generally satisfactory; but would be glad to receive an explanation of the delay in the disposal of certificate cases.

Mr. Skrine insists upon the necessity of providing larger sums of money for the improvement of Government estates. It is, however, observed that in all the districts the amount spent for this purpose fell far short of the amount allotted, and that only Rs. 11,097 were spent in the whole Division against an allotment of Rs. 21,300. This matter should receive the early attention of the Commissioner.

A considerable amount of business was done in connection with the acquisition of land for the Assam-Bengal Railway, and five Deputy Collectors were employed on this work during the year.

8. *Wards' Estates*.—There are 14 wards' estates and estates held in trust in the Division. Their total current demand on account of rent and cesses was Rs. 95,407 in Noakhali; and Rs. 2,84,423 in Chittagong. There are no such estates in Tippera. Of these amounts 89 8 per cent. was realized in Chittagong, and only 62 per cent. in Noakhali. The standard of 90 per cent. was attained in five out of the ten estates in Chittagong, and in only one estate in Noakhali. In the latter district only Rs. 478 were spent on improvements, but in Chittagong the expenditure on this account was Rs. 8,304. The estates of Miss Courjon and Bhubanjay Shaha in Noakhali and of Rajkrishna Bandopadhyaya and Jnanendra Bejoy Ray in Chittagong show very large outstanding balances which every effort should be made to reduce either by collection or remission.

9. *Excise Stamps Income-tax*.—The total excise revenue rose by Rs. 49,362 to Rs. 3 38,183; and the incidence is now 1 anna 3 pies per head of population. The greater part of this revenue is contributed by Chittagong district. The revenue derived from spirits in this Division is comparatively insignificant, a fact ascribed to the influence of Muhammadan and Hindu revivalists. Mr. Skrine believes that smuggling of opium is carried on on a large scale both among the many streams of Tippera and Noakhali, and across the Arakan frontier, in spite of a number of seizures made during the year under report. The importation of salt by sea was 32.3 per cent. in excess of the previous year, the quantity imported being 13,564 tons in 1895-96 against 10,252 tons in 1894-95, and the Commissioner ascribes the increase to the

increased facilities for distribution afforded by the Assam-Bengal Railway. Stamps yielded a revenue of Rs. 15,38,860 against Rs. 14,66,000 in the previous year, and the income tax produced Rs. 96,708; 5,110 persons were assessed to this tax.

10. *Working of the Lodging-house Act.*—This Act is in force only in the area surrounding the well-known shames of Sitakund, the cholera hospital there has been rebuilt, and land is being acquired for the construction of three reservoirs of drinking-water.

11. *Education.*—There were 1,859 schools during the year with 110,951 pupils, or 340 schools and 2,238 pupils less than in the previous year. Of the estimated number of boys of a school-going age in the entire Division, 46·1 per cent. were at school. In Chittagong district the percentage of boys who were at school on the total estimated number of boys of a school-going age was 48·5, in Tippera 40·3 and in Noakhali 53·6. On the whole the attendance was exceedingly good and compares very favourably with some of the other Divisions of the Province. There were 11,833 girls at school; 120,058 Muhammadans were among the pupils, or 5,594 less than in the previous year; the chief decrease being in Tippera. Rs. 4,04,977 were spent on education, or Rs. 11,326 more than in 1894-95; of this sum, Rs. 2,39,021 were spent on primary education. An apprentice department was opened in connection with the Elliott Artizan School at Comilla, which was affiliated to the Sibpur College during the year.

12. *Dispensaries and Hospitals.*—There are 35 of these institutions in the Division, and 225,145 patients were treated in 1895 at a cost of Rs. 37,844. The Tippera District Board now entertains permanently four native doctors, who travel about, each in his own allotted area, treating the sick.

13. *Local Self-Government Institutions.*—District Boards appear to have worked well and without friction during the year; though for some reason unexplained they failed to spend more than Rs. 6,27,442 out of an income of Rs. 8,51,704. The Tippera Board spent but little more than two-thirds of its income. The Boards are reported to be alive to their responsibility for the maintenance of roads and communications, and the Commissioner has directed their attention to the necessity of providing feeder-roads to the new railway line according to a definite scheme.

Five Village Unions were started during the year in the Tippera district; but in none of them was any work done.

There are five municipalities in the Division; that at Chittagong has an income of Rs. 63,525, of which it spent only about two-thirds altogether and only Rs. 815 on primary education. A very unsatisfactory account is given of the working of this municipality, and the Lieutenant-Governor trusts that the current year will show a decided improvement. Comilla had an income of Rs. 25,728; but the other three municipalities have incomes of less than Rs. 8,000 each. Cox's Bazar and Brahmanbaria spent more than the prescribed proportion of their incomes on primary education; the others did not reach the standard.

14. *State of Public Feeling.*—Some interest has been taken among the educated classes in the proposed transfer of the Chittagong Division to Assam, but according to Mr. Skrine the masses neither know nor care anything of it. The survey and settlement proceedings have, the Officiating Commissioner says, created a feeling of unrest, which, he adds, has found vent in a flood of litigation; but, as already remarked, the latter statement is not borne out by the facts.

15. *Political.*—Mr. C. S. Murray, C.M.S., continued in charge of the Chittagong Hill Tracts till 20th March last, when he was relieved by Mr. J. A. Cave-Browne. The crops, with the exception of winter rice, cotton and mustard, were better than in the two previous years. Prices of food-grains ruled high, to the advantage of the hillmen, in consequence of the smaller imports of paddy from the plains. The importation of piece-goods is increasing. Cholera prevailed from April to the end of 1895; but there was no small-pox.

An excluded local fund has been formed for the improvement of the bazars; and permission to open shops is being granted freely in order to encourage

trade. It is in contemplation to reorganize the rural police by the allotment of service-holdings.

There were 1,048 pupils at schools, being 90 more than in the previous year; the Government High English School at Rangamati appears to have been conducted with but little success. It is pleasing to note that 10 passed out of 14 pupils who went up for the lower primary examination and that the first on the list was a Chakma girl.

The Land Revenue demand in the Hill Tracts was increased to Rs. 12,544 by the revision of the Chakma Chief's *jama*.

Major J. Shakespear, D.S.O., had charge of the South Lushai Hills during the year; he has since left the district after five years' service there. In December and January a successful expedition was undertaken in concert with the Burma and Assam authorities against the Chiefs Kanuma and Jaduna. The latter was captured and the tribes of both Chiefs were disarmed.

The administration of the State of Hill Tippera was carried on without friction by the Maharaja and his sons.

16. The Lieutenant-Governor's thanks are due to Mr. Oldham for his efficient administration of the Division. Mr. Skirrow's report, from which extracts are published for general information, is clear and concise.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt of Bengal

Extracts from the Annual General Administration Report of the Chittagong Division for the year 1895-96.

III.—WEATHER AND CROPS.

14. The rainfall during the year was not only deficient in quantity, but was ill distributed, and consequently the crops did not flourish as they did in the preceding years.

15. In Tippera the rainfall was less than that of 1894-95 by 12 inches and of 1893-94 by 48 inches. The *aus* gave 16 annas and the *aman* 16½ annas, against 17½ annas and 19½ annas, respectively, in 1894-95. Jute, however, rendered 18 annas, as in the previous year. The cold-weather crops were about the average.

16. In Noakhali the rainfall was 100·65, against 117·83 in 1894-95 and 145·74 in 1893-94. The rains began late and ceased early. The storm of the 2nd October caused considerable injury to property and crops. The low-lying paddy near the sea was almost entirely lost. Insects appeared some weeks after the gale and did some mischief; and many of Government estates suffered from a plague of rats. The *aman* was 4 annas and the *aus* 3 annas short of the average. Some parts of the littoral on the main land and the islands of Hatia and Sundip suffered more severely than the rest of the district. The northern and north-western villages, where excessive rain is harmful to agriculture, yielded a very fair outturn of *aman*. Jute showed a slight improvement, being 14 annas, against 13 the year before. Disease attacked the betel-nut plantations, and in some parts of the district half the plants perished.

17. In Chittagong the rainfall was below the normal, and the harvests did not reach the average.

V.—MATERIAL CONDITION OF THE PEOPLE

23. The great bulk of the population of this Division depends solely on the outturn of their crops. An abnormally low and ill-distributed rainfall reduced the yield of paddy, which is the most important staple, and pressure was felt the more severely because the previous year's demand for exportation had seriously depleted stocks for future consumption.

24. In Chittagong the prices of food-grains generally have risen since the opening of the Assam-Bengal Railway, but this rise has not materially affected the condition of people of the lower order. The Magh population in the south of the district are said to be gradually losing ground, for Muhammadans and low-caste Hindus are adopting industries which were once monopolized by them. An instance is to be found in the cook's profession, for which Maghs were believed to have peculiar aptitude. The number of *cordons bleus* who are really Mongolian is now very limited, for the great majority of so-called Maghs are Hindus. In consequence of this invasion many Magh families have emigrated to Arakan, where, too, numbers of the ordinary population proceed yearly, returning with large sums gained in harvest work. In Tippera the bumper crops of 1894-95 are said to have relieved the distress which affected the poorer classes towards 1893-94; and though the results of last year were not so favourable, the yield sufficed to prevent a recurrence of pressure.

25. An important factor in the maintenance of prosperity in the north of the Division is the jute crop. This gave a return above the average, while the demand increased owing to extensions to Calcutta mills and the growth of manufacture in Europe and America. This process was fully maintained. A flood of wealth was poured into the country. Tippera is a great producing district, and though much of the profits was absorbed by middlemen, enough remained for the raiyat to compensate for the loss sustained by an inferior rice harvest.

26. The progressive rise in the price of food-grains which benefits the agriculturist, has the opposite effect on the condition of the classes above him, who are not directly concerned with the produce of the soil. As in other parts

of the Province, the *bhadra lok* sections are steadily deteriorating in material prosperity, and therefore in other respects. The landless labourers, on the other hand, thrive considerably, for abundant work was available for them on the railway, while the annual migration to Arakan, already noticed, circulates great sums of money in the south of the Division. On the whole the year was one of solid prosperity.

VI—EMIGRATION AND IMMIGRATION.

27. Beyond the annual migration to Arakan above alluded to, there is little to record in the way of movements of the people. The pressure on the soil is severe nowhere, and emigration is unknown. The reputation of these parts from a sanitary point of view is so bad that immigration is equally unknown. There was an usual influx of labour in Tippera from the Upper Provinces at harvest time and the equally customary exodus from Noakhali to Backergunge when the late paddy ripened there.

VII—PRICES OF FOOD AND LABOUR

28. Owing to inferior harvest results the price of rice, which is the staple crop of the Division, rose everywhere. Except in Chittagong, those of other food grains showed no noticeable fluctuations.

29. As regards wages of labour, slight changes were observed in Noakhali and Tippera. In the former district the wages of skilled and unskilled labour dropped from ten and five annas to eight and four annas, respectively—a fact due to the introduction of Chinese and other foreign workmen by the railway authorities. In the latter district a good carpenter can now be had for 12 annas as compared with one rupee last year. On the other hand, a rise from six annas to eight annas was observable in the daily wage of blacksmiths. Speaking generally, the wages of all descriptions of labour were very high in this Division. There was a drop in Noakhali, due to immigration, but things will speedily right themselves. In Tippera a common coolie can earn nearly six annas per diem, which increases to eight annas at harvest times.

30. In Chittagong the wage is at least five annas for the commonest form of labour, and even at those rates the supply is uncertain.

* * * * *

ACQUISITION OF LAND FOR THE ASSAM-BENGAL RAILWAY.

148. A short account of what has been done for the acquisition of land needed for the Assam-Bengal Railway is given below.

149. Four Deputy Collectors were employed on the work in the Division of whom two, namely, Babu Ganga Charan Chatterjee and Babu Rasik Lal Sen, were in Tippera. The former had charge of the second, third and a portion of the fourth division of the line, extending over 65½ miles, and the latter of the remainder of the fourth division extending over 40 33 miles. Both the officers completed their proceedings during the year, final reports of which were submitted to the Board. The total area acquired is 4,471 acres, of which 26 acres covering roads belonging to the District Board were given free of cost. The total compensation awarded was Rs. 7,26,458, being Rs. 6,881 per mile. Rupees 7,06,804 were paid, and of the balance, Rs. 14,101 were placed in civil deposit on account of disputes about the apportionment, Rs. 1,429 in revenue deposit on account of death or non-appearance of claimants. The total number of cases disposed of was 6,486.

150. In Noakhali Babu Ashutosh Sarkar was in charge of 35 miles of the second section of the railway, 18 of which, lying in Tippera, were subsequently transferred to Babu Ganga Charan Chatterjee. The work has been finished, and the submission of the final report awaits orders on a reference made to the Board. The total compensation paid amounts to Rs. 29,957.

151. Babu Nityananda Bhar had charge of 49 miles of the first section in Chittagong, and a second officer, Babu Behari Lal Mukherji, was deputed to assist him. The latter was employed chiefly in attesting settlement records in the northernmost 15 miles of the line. Out of 2,608·93 acres for which declarations were issued, 1,095·93 acres were actually taken up during the year. The cash compensation paid, including other charges, amounted to Rs. 6,16,785

The rate of compensation per mile was about Rs. 7,488 on an average, excluding the 15 per cent. additional compensation. The proprietors were paid from 6 to 8 annas share of the compensation, and the tenants from 8 to 10 annas. In the case of rent-free and taraf lands, the compensation was calculated at 20 years' purchase of the gross rental, minus the Government revenue and collection charges at 10 per cent.; and at 10 years' purchase of the rental subject to the same deduction as in the case of noabad land. Six thousand two hundred and thirteen cases were disposed of up to the end of the year. The work here has been conducted with an absence of tact and regard for formalities, which will assuredly lead to serious trouble hereafter.

* * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS

172. The great event of the year was the opening of the Assam-Bengal Railway from Chittagong to Chandpur at the confluence of the Megna and Brahmaputra and for a distance of 30 miles north of Comilla, the length within this Division being about 157 miles. It is a single line on the metre gauge, and the rolling-stock is of the latest and most perfect pattern. The permanent-way, however, leaves much to be desired, as it is not yet ballasted, and night running must cease when the rains set in. There are no stations other than mat huts, and only one feeder road has as yet been constructed. But though cut off from many of the centres of trade, this railway is already working a vast change on the economical and social condition of this Division. It has revolutionized the salt trade, and will certainly monopolize that in jute from the eastern districts. With proper appliances at Chandpur and Chittagong, for the construction of which arrangements are in active progress, there can be no question that the southern section of the line will give a rich return to the proprietors. Whether they have been well advised in extending their operations into Assam is, to my mind, open to considerable doubt. The accidents reported during the year were as follows :—

- (1) A coolie jumped out of a ballast train while in motion, and was run over and killed.
- (2) A man was knocked down by the engine of a material train and died from the effects.
- (3) A man was run over by a down mixed train. This is believed to have been a case of suicide. None of the railway servants were held to blame.

* * * * *

XXXVII—GENERAL REMARKS

259. The chief event of the year was the opening of the southern section of the Assam-Bengal Railway, the effect of which is already evident in the improved appearance of the town. The harvests were poor and public health indifferent in Chittagong and Tippera, but there have been no conspicuous public calamities. The smuggling of opium into Burma continues to bring gain to those engaged in the trade at Calcutta and at head-quarters, and this in spite of an unusually successful year in the matter of seizures and convictions. A curious feature in the seizures was that in the majority of cases nearly the same quantity of opium was concerned. This seems to point to a limit of issue which might furnish a clue to its source. Most of the smuggled stuff, however, seems to be Calcutta excise opium, and its passage through this Division, though opposed to excise regulations, is not a source of loss to the public revenue.

* * * * *

CHITTAGONG HILL TRACTS

262. Mr. C. S. Murray, C.I.E., Assistant Commissioner, was in charge of the Hill Tracts from April 1895 till the 20th of last March. Mr. J. A. Cave-Browne, Assistant Superintendent of Police, administered the Bohmong's circle throughout the year. Mr. R. A. Stephen, Deputy Magistrate, succeeded him,

when he was recalled to Rangamati to take over charge of the Hill Tracts from Mr. Murray.

263. Mr. Murray was on tour for 96 days, during which he inspected police-stations, schools, dispensaries, plough-lots, and the Bohmong's circle office. Mr. Cave-Browne was out for 113 days. He visited plough-lots, made assessments and collections in the mauzas, held sales of garjan kholas and fisheries lot, and inspected police-stations in the Bohmong's circle.

264. All crops, with the exception of winter rice, cotton, and mustard, compared favourably with those of the two preceding years. The people, especially the *Jumias*, regained a measure of their normal prosperity.

State of crops, public health, and material condition

The yield of cotton, though below the average, did not materially affect the resources of the *jum* cultivators, as stocks from the previous years were large. The falling off in the import of paddy from the plains raised the prices of food-grains in the local market, and the hillmen were thus able to dispose of their surplus stock with advantage. Owing to the poor outturn, the price of cotton also ruled as high as Rs. 5-8 per maund, against Rs. 3-8 in the preceding year.

265. Cholera of a sporadic form broke out in the Bohmong's circle, and in Ruma it assumed the character of an epidemic. The disease is said to have been imported from Chittagong into Bandarban, whence it spread to Ruma. It prevailed with more or less intensity from April to the close of 1895. There were 123 deaths from cholera, Ruma alone accounting for 69, Bandarban for 24, Lama 17, Chandraghona 8, and Rangamati 5. Small-pox did not visit the hills. Their immunity is attributed to vaccine operations being pushed into outlying places, where population is sparse and which are nests of disease. The number of persons vaccinated was 6,762, against 14,204 and 16,962 in 1894-95 and 1893-94, respectively. The number of successful cases was 96 18, against 98-14.

266. The articles manufactured in the Chittagong Hill Tracts are tea, coffee of superior quality, crude sugar, and home-spun cotton cloth.

Manufactures and trade.

267. The principal imports are piece-goods, paddy, husked rice, tobacco, salt, and dried fish, and the exports are paddy, tobacco, cotton, mustard and garjan oil, and sesamum. It is a noticeable fact that there was a larger importation of piece goods than in 1894-95, which the Assistant Commissioner ascribes partly to the improved condition of the hillmen, and partly to a growing taste for foreign manufactures in preference to the very coarse but durable cloth manufactured by their women. The import of paddy and rice fell, owing partly to the partial failure of the crops in the neighbouring districts and partly to the existence of heavy stocks of food-grains in the Tracts. The exports of cotton and oilseeds declined owing to poor harvest results.

268. The number of trade centres increased from 15 in 1894-95 to 19. Of these, 3 on the Feni and 1 on the Karnafuli are in a more flourishing condition. They are resorted to twice a week both by hillmen and Bengalis from the neighbouring districts. Applications to start shops in these and in outlying places were freely granted as an encouragement to trade.

269. An excluded local fund was formed with the collections from bazars under Government sanction; and a scheme for sanitary improvement of the bazars on river banks was set on foot towards the close of the year. A few *karbaries* were given limited supervision, and remunerated by service lands. As an experimental measure, the Chandraghona ferry, previously held rent-free by a hillman, was sold by public auction. The administration of the police lock-up at Rangamati has been vested exclusively in the Commissioner and the Assistant Commissioner of the Chittagong Hill Tracts, and its connection with the Chittagong Jail has been entirely severed.

Administrative changes.

270. The work of the police in the Hill Tracts does not call for any special remark. The scheme for the reorganization of the rural police was resumed during the year. After the annual *punnya* of the Chakma Chief's estate, the Dewans, headmen, and others present at a meeting were consulted as to the feasibility of appointing *karbaries* remunerated by service lands as village chaukidars. It was

Police

explained to them that 25 acres of service lands yielding at least Rs. 100 per annum each, would be vested in each *karbari*, and they were asked whether they thought this remuneration would secure the proper stamp of men. The Dewans and headmen unanimously admitted the usefulness of *karbaries* in this capacity, but opined that the land grants would not be attractive unless they included areas already reclaimed or a condition of the grant was that compensation for the original outlay in reclaiming the lands would be paid by Government in cases of *karbaries* resigning, dying, or becoming physically unfit for duty. These conditions were to apply only to the reclaimers of the land. They suggested that in mauzas where arable lands were not available a percentage on the collections might be paid to *karbaries*. The whole matter was referred to my predecessor, whose opinion is reproduced below:—

“Neither suggestion can be accepted, but the object of each suggestion is clear and reasonable

“Each case of succession to service land and office would be dealt with on its merits by the Assistant Commissioner, and, where the case required it, the Assistant Commissioner would require a newly-appointed incumbent to pay the compensation awarded by him to the outgoing or his family before the new man is installed”

271. Forty-nine *karbaries* were appointed in the Mong Chief's circle on the recommendation of the mauza headmen, but the award of service lands as remuneration has not yet been made in all cases, nor has the work to be done by the recipients yet been defined.

272. There were altogether 61 schools and 1,048 pupils, against 53 schools and 958 pupils in 1894-95. These figures give one school on the average for every 88 square miles,

Education

against one for 102 square miles in the preceding year. The pupils in attendance included 486 Chakmas, 32 Tonchangyas, 119 Tipperas, 10 Riangs, 7 Tsaks, 1 Kuki, 266 Mughs, 44 Guikhas, 11 Assamese, 43 Muhammadans, and 27 Hindus. As in the previous year, the Government Boarding Institution at Rangamati was the only high English school in this subdivision. Its roll number on the 31st March 1896 was 77, against 84 on the corresponding date of the previous year. The number of boarders dropped from 45 to 41, and that of dayscholars from 39 to 36; while the total expenditure rose from Rs. 5,126 to Rs. 5,744, and the expenditure defrayed by Government from Rs. 4,507 to Rs. 5,129. The school is in the fifth year of its existence as an Entrance school, and for the third time has sent up boys for the Entrance examination. In each of the two previous years out of four boys sent up, two were successful. In the last examination, however, two who went up failed to pass. The cross list shows that each of them failed in one subject only, and passed creditably in the other three, securing more than the aggregate pass marks. Evidently there is something rotten in the management of the school, which cost Government more, and was less numerously attended and less successful than in previous years. Primary education is gradually advancing in these hills. Of 14 candidates sent up from lower primary schools, 10 passed. Amongst the successful ones was a Chakma girl, who stood first in the list and had a special prize worth Rs. 48 awarded her.

273. The minor Chakma Chief, Kumar Bhuvan Mohan Ray, continued to study in the second-year class of the Presidency College, and his step-brother, Ramani Mohan, in the

The Chiefs.

Hare School, Calcutta. The former went up for the University First Examination in Arts, but failed owing to ill-health a few days before the examination. He is very intelligent and studious, and was profoundly discouraged by the result of the test. It is not to be wondered at that he has expressed his unwillingness to return to Calcutta, where the surroundings are very congenial to a hillman. The Assistant Commissioner agreed that he would do better on his native heath, and might learn something of the management of his estates as now carried on by Dewan Kristo Chandra. His brother, Ramani Mohan, is a very delicate child, and as the brothers are deeply attached to each other, it was deemed unwise to separate them. Thus, though the younger lad was making fair progress at the Hare School, both have been removed to Rangamati, where the one is learning to rule, and the other is a pupil at the local high school.

274. Next in local rank comes the Bohmong, or Phru Tsanes Chaudhuri, with the title of Kyet Thaye Zaung Shewe Salwa Yamin, conferred on him in 1891. He is now well stricken in years, and might gracefully retire in favour of his son.

275. The young Mong Chief Niphrusain, locally called "Mong Raja," managed his estate independently both in the Hill Tracts and in the regulation district during the year under report. He is steady and intelligent.

276. There has been no change as regards the circle or taluk divisions. The number of mauzas rose from 160 in 1894-95 to 161, the total approximate area 1,166 square miles, remaining unaltered. Five mauzas in the Mong Chief's and six in the Chakma Chief's circles changed their headmen, two owing to deaths and nine because the headmen previously selected were forbidden to hold more than one mauza each. During the year under report nine taluk dewanis were appointed in the Chakma and three in the Mong circle.

277. The number of holdings in defined and undefined mauzas increased from 2,641 in 1894-95 to 3,295 in 1895-96. The defined mauzas alone embrace 3,134 holdings, the number in the undefined ones being 161. Twenty-three of these holdings are special grants containing large areas. Six hundred and seventy-six are valid plough leases under the rules of 1881 and 1884, and the remaining 2,596 are detached holdings covered by *amulnamas* granted under the rules of July 1892.

278. The leaseholds under the rules of 1881 and 1884 were 666 at the commencement of 1895-96, and not 566 as reported last year. The number increased during the year, owing to regrants on appeal in many, and it would have further increased but for relinquishments in the southern portion of the Bohmong's circle owing to the ravages of wild elephants. The increase in the number of detached holdings under *amulnamas* is due to the examination of old *jamabandis* on the spot and the discovery of concealed cultivators in both defined and undefined mauzas.

279. During the year under report an effort was made to allot 50 acres of service lands to each mauza in the three circles. The Bohmong circle had its full allotment in this respect, but the absence of the requisite arable area in many mauzas, formed during previous years, has retarded the completion of the scheme in the Chakma's and the Mong Chief's circle. Many applications were put in and the mauzas were defined, but as the allotment of service lands was considered more important, nothing further was done in this matter.

280. The land revenue of the Hill Tracts falls under the heads "plough cultivation, san and garjan kholas, *jum* rent, and fisheries." The number of *san kholas* increased from 757 in 1893-94 and 751 in 1894-95 to 810 owing to the discovery of some new *kholas*, chiefly in the Chakma circle. The demand also increased from Rs. 9,096 in 1893-94 and Rs. 9,702 in 1894-95 to Rs. 12,544. The marked increase in the demand under the head "*jum* rent" was the result of the revision of the Chakma Chief's *jama*, with effect from April 1895 under Government orders. It was then raised from Rs. 6,329 in 1894-95 to Rs. 8,387.

281. No ivory was imported into or exported from the Hill Tracts. No *khedda* operations took place during the year, though there are parts of the Hill Tracts where such would be very remunerative.

282. The Assistant Commissioner supervised all the arrangements in the Hill Tracts in connection with the transport of troops, coolies, and rations for the South Lushai Hills.

283. After the receipt of the orders contained in Government letter No. 647A.D., dated 26th October 1895, many of the *sardar mahajuzars* endeavoured to avoid cancelment of their leases by representing their sub-tenants to be hired labourers. The rest, unable to realize rent or to obtain possession of the land, relinquished their holdings on *amulnamas* being given them, with a condition that they should retain the land personally cultivated or that the sub-tenants within their lots should surrender their holdings on the terms of the leases thus relinquished. Many petitions of relinquishments of plough cultivation holdings were put in towards the close of the year, owing to the inability of the lessees to cultivate, or to sub-let their holdings.

SOUTH LUSHAI HILLS

284. This little known tract, with a population of less than 25,000, scattered over an area exceeding 2,000 square miles, was throughout the year under the government of Major J. Shakespear. He has severed his connection with the hills after five years' strenuous service, during which he has imposed the *Pax Britannica* on these hitherto untamed hillmen and, in the words of my predecessor, has made over his charge "thoroughly examined and accurately known, and ready for the gradual application of the internal territorial system, which alone can be a permanent basis for its future administration." The year has not been one of stirring events. An expedition in concert with the authorities of the North Lushai Hills and those of the Aikan Hill Tracts was undertaken in December and January against two Chiefs, named Kanuma and Jaduna, who had declined to comply with a request to surrender their arms. It was completely successful. Jaduna was captured, the tribes under the control of both disarmed, and British authority extended up to the Tyao river. The future of the territory demands attention. There can be no doubt that the North and South Lushai Hills should be under one administration. Pending the amalgamation, proposals have been submitted for establishing a road and telegraph line between Lungleh, the head-quarters of the South Lushai Hills, and Aijul, the capital of the northern territory. Other proposals have been submitted with a view of substituting cold-weather depôts for outlying posts, of diminishing the enormous cost of rationing our hills by roads

RESOLUTION ON THE ADMINISTRATION REPORT OF THE HOWRAH BRIDGE FOR 1895-96.

No. 1777Marino.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT

Dated Calcutta, the 30th October 1896.

RESOLUTION.

READ—

The Administration Report of the Howrah Bridge for 1895-96.

The following statement shows the actual receipts and expenditure of the bridge during the year under review as compared with those of the previous nine years:—

PARTICULARS	1895-96	1894-95	1893-94	1892-93	1891-92	1890-91	1889-90	1888-89	1887-88	1886-87

Miscellaneous										
Proportion of establishment, &c., of steaming <i>Helty</i>			5,073	9,592	1,097	9,423	11,074	10,761	11,052	12,231
Renovals					6,536	10,016		25,094	7,846	2,415
Proportion of salary of Traffic Manager							370	4,500	4,500	
TOTAL	1,36,582	1,53,611	1,40,422	1,55,675	1,67,732	1,47,096	1,41,771	2,04,241	1,52,607	1,47,021
EXCESS	27,576		14,795	6,824		31,928	27,055	60,475	7,072	4,11,235
GRAND TOTAL	1,64,158	1,53,611	1,55,217	1,62,409	1,67,732	1,70,024	1,68,826	2,64,716	4,00,260	5,08,256

2. The receipts during the year amounted to Rs. 1,64,158, showing an increase of Rs. 19,106 over those of the previous year. This was due to the large increase of Rs. 20,896 in the receipts from Railway traffic.

3. The expenditure amounted to Rs. 1,36,582, being less than that of the preceding year by Rs. 17,029. A reduction in expenditure is shown under all the heads except that of "the ferry steamer *Buckland*," the increase in this case being due to the charges on account of repairs during the year.

The wearing surface of the roadway, as well as the superstructure of the bridge and the pontoons, were kept in thorough repair, the iron-work was cleaned, oiled and painted, and the pontoons, fenders and sheathings kept in good order. All other work found necessary to maintain the bridge in order was carried out.

4. As in the previous years, in addition to the ordinary receipts, the following sum, which may be classed as extraordinary, was received —

Interest on Government securities of Pontoon Renewal Fund	Rs. 1,750
The corresponding expenditure under the same head was—	
Sinking fund on loan	... 3,580

5. The cost of lighting the bridge with electricity was Rs. 12,719. As this amount is more than double the originally estimated cost of the electric lighting, the Commissioners were asked for an explanation of the high charges. They state in reply that the expenditure on repairs, coal, and stores has proved to be very much greater than was anticipated, and that it has not been found possible to reduce these items. They confidently hope, however, that, the removal of the Engines from the Armenian ghat to the Commissioners workshops on the other side of the river will result in some reduction of expenditure.

6. The bridge was opened for the passage of vessels on 148 occasions during the year, and of these openings, 104 were on the ordinary fixed days of the week and 44 on Sundays on special application. The number and description of vessels which passed through the bridge on these occasions are given in the subjoined table:—

	1895-96	1894-95	1893-94	1892-93	1891-92	1890-91	1889-90	1888-89	1887-88	1886-87
1	2	3	4	5	6	7	8	9	10	11
Sea going vessels	241	282	291	309	254	414	342	380	391	295
Inland steamers and flats	1,116	1,205	1,060	1,129	1,400	1,059	941	878	890	848
Steam tug	677	667	549	453	866	540	491	456	307	387
Port Commissioners vessels	38	45	161	183	66	92	53	20	40	56
Government steamers and flats	1	2	2	.	5	16	7	6	6	10
TOTAL	2,073	2,201	2,063	2,074	2,086	2,110	1,863	1,741	1,679	1,596

The number of collisions during the year was smaller than in the previous year. No sea-going vessels collided with the bridge. Out of the 78 collisions, 69 were with cargo and other boats. There were 81 collisions in 1894-95 and 78 in 1893-94

By order of the Lieutenant-Governor of Bengal,
A. D. McARTHUR, Col., R.F.,
Secretary to the Government of Bengal.

CONDITION AND PROSPECTS OF CROPS IN THE PATNA DIVISION.

NOTIFICATION—No. 1019T.R.

The 31st October 1896.—The following papers are published for general information.

M. FINUCANE,

Offg. Secretary to the Government of Bengal.

No. 579G., dated Bankipore, the 23rd October 1896.

From—J. A. BOURDILLON, Esq., c s, Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department

IN continuation of my letter No. 565G. of the 8th instant, I have the honour to forward, for the information of the Lieutenant-Governor, the following report on the state and prospects of the crops in the Patna Division during the fortnight ending the 17th instant.

GENERAL REMARKS.

2. So far as prices and the actual condition of the people go, there has been little or no change, except in part of Shahabad; but the outlook for the future is certainly more gloomy by reason of the total absence of rain.

3. Turning first to prices, I give below the rates of common rice on the 3rd, 10th, and 17th October at each of the head-quarter stations in the Division, as shown in the weekly crop reports. The figures represent the number of seers to be purchased for a rupee.—

			3rd October	10th October.	17th October
Patna	10½	10½	10½
Gaya	.	.	9	9½	9
Arrah	..	.	9½	9½	10½
Chapra	10	10	9½
Motihari	11	11	11½
Muzaffarpur	9	9	9
Darbhanga	10½	10½	9

With the exception of those at Darbhanga, prices are virtually stationary, and as the Darbhanga report was issued in the absence of the Collector on tour, its accuracy may possibly be doubtful. In Arrah and Motihari there is reported to be actually a slight improvement.

4. As regards the rice crop, the total absence of the *Hathya* and *Chitra* rains, which are absolutely necessary to keep the *kharif* crop alive in tracts not commanded by irrigation, has made its failure certain over the greater part of the Division. I have not yet received any definite forecast of the extent of failure, since every District Officer has been waiting to see whether rain would fall. Gaya, with its system of *ahars* and *pynes* in the south and east, and the Sone Canals in the north and west, is the best off, and the Collector—with, I think, too sanguine a mind—estimates the outturn all over the district at 12 annas. Parts of Shahabad benefit greatly by the canals from the Sone, but the whole of the south and west are beyond that influence. In Patna the Bihar subdivision is the most prosperous, and along the western border of the district the Sone Canals irrigate several thousand acres. In Champaran a good deal has been done by damming hill streams. In the other districts of the Division little artificial aid is available. Speaking generally, I think that throughout the Division the *kharif* crop may be taken at four annas at the outside, though if rain falls within the next few days, some good may still be done.

5. For the *rabi* crops rain is urgently required during the next fortnight to supply the needful moisture for the sowings. The mainstay of the *rabi* crop is the rain which usually falls in the *Siwati* asterism (October 22nd to November 5th), though, if good rain falls in the previous month, heavy rain in *Siwati* is not so essential. As we have had no rain either in *Hathya* or *Chitra*, the latter of which ended yesterday, the whole fate of the *rabi*

depends on the rainfall during the next fortnight. The lands are everywhere either ready or in course of preparation, and in some places early sowings have already taken place in low lands, and it should be remembered that if we have a good *Siwati* rain, a considerable area of the lands where the rice crop has failed will be sown down in *rabi*. If we have no rain, the area usually sown down in *rabi* will be greatly contracted, and also such crops as have been and will be sown will be largely jeopardised. It is satisfactory to find that *rahar* and sugarcane promise well everywhere, but on the other hand it is feared that the want of rain will prevent these crops coming to full maturity.

6. As regards the condition of the people, there is little change, except in the south of Shahabad. Almost every District and Subdivisional Officer in the Division has been out during the past fortnight, visiting those parts of his jurisdiction where scarcity might be suspected, and police reports have come steadily in. The numerous reports I have received are unanimous in saying that so far, with the exception noted above, there are no symptoms whatever of present distress. The people are still in good case; the number of beggars has not materially increased; the children are well; cattle are in their usual condition; there are few or no complaints, and there has been no material increase of crime, but it is reported that much uneasiness exists as to the future if the *rabi* crop fails.

7. Considering the high price of grain, this statement may seem too optimistic, but I am confident that it is correct, and the reasons are twofold:—*First*, the panic caused by exportations to the North-Western Provinces, and the disturbances which succeeded them in some places, has subsided, and prices have steadied down. *Secondly*, so far there has been no lack of field work. Wherever water was to be had the lands have been assiduously irrigated, whether for the standing rice or the prospective *rabi*. Again, the preparation of the lands for the *rabi*, and in the northern districts the preparation of the fields for indigo, have afforded employment to thousands, and will continue to do so for some time still—some say till Christmas, but a more moderate estimate says till the middle of November. Towards the middle of December labourers will again be required to harvest the rice crops such as they are. *Lastly*, though grain is exported, a good deal is also coming in, and the *bhadoi* crops have come into the market.

8. To gauge the condition of the people, test works were started in the Sadar subdivision of Patna on a famine wage, but they were closed after a few days' trial, as no labourers attended. In the Bhabhua subdivision of the Shahabad district test works have just been started on the reports of the Subdivisional Officer and the District Superintendent of Police; but no report of the result has been received. Elsewhere the District Officers have found it unnecessary to adopt these measures.

9. I now turn to notice such special points as deserve mention in each district.

10. *Patna*.—About one-third of the Bihar subdivision, and the high lands on both sides of the East Indian Railway, greatly require water. Relief Committees are being provisionally organised, supported by private charity, and managed by non-officials. It is proposed that they shall purchase grain in considerable quantities, and sell it in very small quantities to the poor at a little below the market rate. The wage at the relief-works near Patna City, referred to in paragraph 8 above, was Re. 1-9 per 100 cubic feet of earth. These rates proved unattractive. Test relief-works have been started at Bihta, Mokameh, and Barh, but the result has not yet been reported. The Collector reports that there is plenty of grain in the district, and that field work is still available.

11. *Gaya*.—The Collector reports that the Nawada subdivision, through which he has been travelling, is in good condition, and that the only doubtful tract is one in the north-east of the Aurangabad subdivision, to which he will proceed at once.

12. *Shahabad*.—During the fortnight under review there have been five cases in the Bhabhua subdivision, where houses have been robbed chiefly for the sake of the grain they contained. These technical dacoities appear in all cases to have been directed against the most well-to-do man in the village, and

were probably planned by his neighbours. Mr. Ryan, the District Superintendent of Police, has just returned from a tour of inspection in that subdivision, and on his report, which has just reached me, the Collector has decided to open test works in four different places in the south and east of the subdivision. I have requested the Collector to proceed to the spot without delay, and have telegraphed to the Engineer of the East Indian Railway at Dehree to ask him to start earthwork on the Mughalsarai-Gaya line as soon as possible. If the District Superintendent of Police's estimate is accurate, this tract is the worst in the Division. I will proceed there myself if need be. Considerable exports are reported from Arrah and Buxar. There has been no more tendency to grain-rioting anywhere.

13. *Saran*.—The Collector and his Subdivisional Officers have been a great deal on tour, and his conclusion, conveyed in a careful report, is that no test relief-works are yet required, and that no scarcity need be expected for a month or six weeks to come. The rice has been almost a complete failure, except in very low lands, for the rainfall deficiency in Saran on the 15th instant was 16·47 inches, or 42·6 per cent. below the average, and the district has no efficient system for the conservation of water. The worst parts of the district, therefore, are those where there is no *rabi* land. The whole district, especially the Siwan and Gopalganj subdivisions, is studded with wells, but these are chiefly for the poppy and the *rabi*.

14. Yesterday I held a conference with Mr. Buckley, Superintending Engineer, over the proposed new rules for the Saran Canals, and I hope that the rules we approved may be sanctioned and published. The opening of the canals will come too late to save the *khari*, but they will do some good to the *rabi*; and if this is supplemented, as I anticipate, with a large number of *kutcha* wells, the Saran rayats will do well enough, except in tracts where there is no *rabi* grown. Imports considerably exceed exports, but this is always the case, as Saran never feeds itself.

15. *Champaran*.—The Collector estimates that the *bhadoi* has been an eight or nine-anna crop, and I can certify that in some parts of the district it has been very fine. A great deal has been done in the north of the district in the way of damming hill streams and irrigating the rice from them, and the Collector is engaged in still further extending these schemes. His experience of irrigation works in the Gaya district is of great value to him in the present juncture. There is no scarcity, but, for his own satisfaction, the Collector proposes to open test works in one or two places where the *bhadoi* has failed or the rice is particularly poor. It is reported that some of the indigo-planters of the district, at a meeting held for the purpose, have decided to import a large quantity of rice from Burmah for their tenants and employés, and they are also purchasing local supplies for the same purpose.

16. *Muzaffarpur*.—From this district my information is less full than from others, but Mr. Hare is an experienced officer who knows the district well, and may be trusted to administer it to the best advantage. He too reports that there is no present distress, and he has not found it necessary to open test-works anywhere. Prices are steady, and there is plenty of grain in the district. It will be observed that both here and in Gaya prices are higher than elsewhere. I have prepared a chart of the prices in 1895, and I find that the same phenomenon occurred last year also.

17. *Darbhanga*.—During the fortnight the Collector has ridden nearly 300 miles over the greater part of the Madhubani subdivision, and has made a thorough investigation of its condition. He finds no present scarcity and recognises no need for test relief-works, but reports that, in a large tract lying along the northern border, there has been a complete failure of the rice crop, which he estimates to be no more than two or three annas for the Madhubani subdivision, while it is ten annas in the south of the district. As the area in question is solely a rice-growing tract, nothing is to be expected from a *rabi* crop there, and the Collector fears that extensive relief works will be required there towards the end of the year. Mr. Carlyle is now engaged in examining the remainder of the district.

18. *Conclusion*.—It remains to consider what is to be done in the immediate future. It will be seen from the above paragraphs that the District

Officers' reports give no reason to believe that actual scarcity now prevails or is imminent in the near future, except in Bhabhua. But it is clear that as soon as all field work ceases, and with it the daily wage of the poorer classes, they will begin to be in want. I am also keenly alive to the fact that in former famines distress has often come very suddenly, the transition from sufficiency to want taking place sometimes in a few days. Further, the opinion was expressed in your letter of the 15th instant, No. 940T.R., that if rain held off, I should certainly submit the report prescribed by section 9 of the Famine Code.

19. In these circumstances I have issued a circular to all District Officers, requesting them to submit the report required by section 10 on the 2nd proximo, or as soon after as possible, and this will be followed in due course by the fortnightly reports prescribed in sections 13 and 24 of the Famine Code.

20. I have also issued instructions on other subsidiary points as follows:—

- (a) *The free grant of advances for kutchha wells.*—Those cost from Rs. 2-8 to Rs. 3 each in most districts, and in tracts where *rabi* is grown will be most useful. In a purely rice country like parts of Madhubani, they will be useless. An application will be made through the Board for further grants when those already allotted are approaching exhaustion.
- (b) *The revision of District Board Budgets.*—This has already been done in several districts. I have directed that all that can be diverted from the civil works' portion of the budget shall be utilised in the first instance, and that the estimated closing balance may be used up for this purpose. It should then be seen what can be saved after that from the education and medical portions of the budget, and when all that has been expended, Government must be applied to for aid.
- (c) *The curtailment of touring establishments.*—Subdivisional Officers in particular have been directed to fix dates and places for their case-work, and to take with them as few followers as possible.

I have also drawn attention to the instructions in paragraph 2 of your letter quoted above, and am about to issue a further circular, pointing out the sections of the Famine Code which require most attention when relief-works are actually opened.

21. We may now, I think, await the submission of the first report under section 9 of the Famine Code and the development of events. My own opinion is that no real and general scarcity will be felt for some time to come; but in a few tracts, which will be defined with greater detail when the district reports are received, relief-works may be wanted during the month of November. If we have rain in *Siwahi* and a fair *rabi* crop, the scarcity will not be severe; but if (as seems likely) no rain falls during the next fortnight or three weeks, a period of grave distress is in store for the people of this Division, which may continue till the *bhadori* harvest of 1897 is gathered.

No. 1010T.R., dated Darjeeling, the 30th October 1896

From—M FINUCANE, Esq, Offg Secy. to the Govt of Bengal, Revenue Dept.,
To—The Commissioner of the Patna Division

I AM directed to acknowledge the receipt of your letter No. 579G., dated the 23rd October 1896, reporting on the condition and prospects of the crops in the Patna Division during the fortnight ending the 17th idem. You say that, speaking generally, the outturn of the winter rice crop throughout the Patna Division may, in case rain does not fall soon, be taken at four annas at the outside. If this estimate is correct, the outturn would be less than in any previous year of scarcity on record, except perhaps 1873-74. In paragraph 4 of a letter, No. 119R., dated the 29th October 1873, the Commissioner of the Patna Division wrote that there would not be an eight-anna winter rice crop in any district, and that it would be less than two annas in some. In 1888 the outturn of this crop ranged from two to ten annas, but the area in

which the outturn was from two to four annas was small in comparison with the total area of the Division, so that in the Division as a whole the outturn of the winter rice crop was much larger than four annas. The effects of the drought and consequent scarcity of 1891-92 were more acutely felt in the district of Darbhanga than elsewhere, and, although the winter rice crop on the high lands was said to be a total failure over the greater part of the district, the outturn of the crop in the Sadar and Madhubani subdivisions, which were the specially affected tracts in the district, was about five annas. In Muzaffarpur, the only other district of the Patna Division where relief operations were carried on for any length of time in 1891-92, the outturn of the winter rice crop was seven annas in the Sitamarhi subdivision and five annas and three annas in the Sadar and Hajipur subdivisions respectively, and in the Hajipur subdivision the rice crop is not important. The Lieutenant-Governor hopes that your present estimate of the outturn of the rice crop is unduly low. Should it not be so, the gloomy prospects of the rice crop, taken with the facts that the *bhadoi* harvest is short and that prices of food-grains are higher than they ever were at this time of the year, while wages of able-bodied agricultural labourers are not considerably higher now than they were 20 years ago, can hardly fail to cause most serious distress, of which, however, there are at present few indications.

2. The Lieutenant-Governor entirely approves of the instructions issued by you, as stated in paragraphs 19 and 20 of your letter, and will await the promised further report under section 9 of the Famine Code.

COMPENSATION FOR DEARNESS OF FOODGRAINS TO ALL WHOLE-TIME MENIAL SERVANTS OF GOVERNMENT IN BENGAL.

No. 5300F.—The 2nd November 1896.—The following is published in the *Calcutta Gazette* for general information.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

No 5123F, dated Calcutta, the 26th October 1896

From—H. H. RISLEY, Esq., C.I.E., Secretary to the Government of Bengal,
Financial Department,
To—The Accountant-General, Bengal

I AM directed to convey the Lieutenant-Governor's sanction to the grant under article 72 of the Civil Account Code, volume I, of an increase of one rupee a month to the pay of all whole-time menial servants of Government (except process-serving peons attached to Civil Courts) drawing not more than Rs. 12 a month, who are permanently employed in the districts named in the margin, where the average price of common rice was dearer than one rupee for 12 seers during the quarter ending the 30th September 1896. The Lieutenant-Governor also sanctions an increase of Re. 1-8 a month to the pay of such servants employed in the districts of Rangpur, Mymensingh, Backergunge, and Tippera, where the average price of rice during the above-mentioned period was higher than ten seers the rupee.

2. The above orders will have retrospective effect from 1st July 1896.

WEATHER AND CROP REPORT.

For the week ending the 2nd November, 1896.

Burdwan.—No rainfall Weather hot and fair No rain during the last six weeks Both *abi* and *aman* crops are suffering for want of rain Winter crop is withering throughout the district, except where canal water is available Condition of cattle good Fodder and water sufficient. Common rice selling as follows:—

				Srs	
Sadar	10 to 12	} per rupee.
Kalna	9 to 12	
Katwa	10 to 11	
Raniganj	8½	

Birbhum.—No rain Crops withering except on lowest lands and where irrigated tanks being emptied for irrigation Common rice sells at 9 to 9½ seers per rupee

Bankura.—No rain Weather unusually hot *Aman* paddy on high lands withering Cultivation of *abi* nearly stopped for want of moisture Fodder and water sufficient for the present Cattle-disease reported from some villages in Gangajalghati and Onda thanas Common rice selling at 10 to 11 seers per rupee at Bankura and 11 to 12 seers at Vishnupur.

Midnapore.—No rain during the week. Sky is almost cloudless. Rain is very urgently needed both for paddy and cold-weather crops. *Humant* paddy is withering on high lands Sugarcane, indigo, and *tul* are doing badly for want of moisture *Rabi* is being sown in some places Fodder and water sufficient Garhbeta police-station reports heavy exports of rice to Ghatal Common rice selling as follows:—

				Srs.	
Midnapore Town	9½	} per rupee.
Contai	12 to 14	
Tamluk	10	
Ghatal	10 to 12	

Hooghly.—No rain throughout the district *Aman* beginning to wither in places Rain required urgently. *Rabi* cultivation going on. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable Harvesting of jute and sowing of *rabi* almost over. Rain badly wanted for *aman* rice Fodder and water sufficient Common rice sells from 9 to 11 seers per rupee

24-Parganas.—Rainfall nil Weather hot in the day and cool at night Continued drought has seriously injured the crops in north and east of the district Sugarcane also deteriorated. Want of rain is preventing the sowing of *rabi* crops, and in Barasat and Basirhat ploughing and sowing of the same going on poorly No cattle-disease Fodder and water sufficient Common rice sells as follows —

				Srs	c.	
Sadar	9½ to 12	0	} per rupee.
Barasat	9	8	
Basirhat	9	0	
Diamond Harbour	9	10	

Nadia.—No rain Days hot, nights cool *Aman* suffering for want of rain Prospects of *rabi* crops gloomy owing to drought Fodder sufficient Rice selling at 9 to 10 seers per rupee.

Murshidabad.—Rainfall nil Weather hot in the day, cool at night Sowing of *rabi* crops commenced. *Aman* withering for want of rain State of *kharif* is not good. Rain wanted for all standing crops. State of indigo, mulberry, and sugarcane seems good. Insects damaging crop at Jangipur. A flight of locusts appeared at Saktipur in Sadar, but little or no damage was done. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	c.	
Sadar	9	8	} per rupee.
Kandi	10	12	
Jangipur	9	0	

Jessore.—No rain. Weather warm during the day; cool at night. Prospect of *aman* gloomy. Rain badly wanted. Lands being prepared for *rabi* crops. Fodder and water sufficient. No cattle-disease reported.

Khulna.—Rainfall nil. Weather dry; cool at night. *Aman* paddy in some parts withering for want of rain, in other parts there will be a good crop. No cattle-disease. Fodder and water sufficient. Common rice sells as follows.—

				Srs.	
Khulna	9 to 10	} per rupee
Bagerhat	8½	
Satkhira	8½	

Rajshahi.—No rain. Weather seasonable. Prospects of crops comparatively fair at Nator, but gloomy elsewhere. Winter rice withering in places. Fodder and water available. Price of rice ranges between 8 and 11 seers per rupee.

Jalpaiguri.—Rainfall .49. Weather seasonable. Steeping of jute nearly completed. Prospect of *hasmani* paddy not favourable. More rain wanted. Sowing of mustard and tobacco commenced in places. Fodder and water sufficient. Average price of common rice 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar 34, Siliguri 10, Kurseong nil, Kalimpong 57. Weather seasonable. Hills—*Aghuni dhan*, *kalai*, and *bhutmas* coming to maturity, *bara marua* flowering; *phaphur* progressing; wheat, barley, and potatoes sown. Terai—Jute and *bhador dhan* in the market. Coarse rice selling —

				Srs.	
Hills	5 to 7½	} per rupee
Terai	7½ to 8½	

Rangpur.—Rainfall nil. Jute-washing and cultivation of land for winter crops going on. Prospects of standing *aman* fair, but rain is wanted. Mustard and tobacco are being sown in places. Common rice sells at 9 to 12 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather clear. Foggy in the morning sometimes. Jute-washing going on. Winter rice doing well in low lands, it is suffering from drought in high lands. No cattle-disease. Fodder and water sufficient. Common rice sells at head-quarters 9 seers per rupee and in the interior from 7½ to 9½ seers per rupee.

Pabna.—Prospects of crops poor. Rain urgently wanted. Ganges very low. Fodder available. Rice selling from 8 to 9 seers per rupee.

Dacca.—Rainfall nil. Weather hot. Prospects of *aman* not good. Rain much needed. Fodder available. No cattle-disease. Price of common rice 8 to 9 seers per rupee.

Mymensingh.—Rainfall nil. Mornings and evenings cool. Owing to want of rain the outturn of the *aman* crop is not likely to exceed 8 annas. Lands under preparation for spring crops. Price of common rice between 7 and 8 seers per rupee.

Faridpur.—No rain. Weather seasonable. Rain much wanted, especially for sowing of winter crops. Common rice sells from 8 to 10 seers per rupee. Fodder and water available. Cattle-disease said to prevail in Pangsha thana.

Backergunge.—Rainfall nil. Weather warm. Prospects of standing crops moderate, but suffering for want of rain. No cattle disease. Price of common rice—*aman* 7 to 11½ seers and *aus* 9 to 14 seers per rupee.

Tippera.—No rainfall. Crops withering over an area approximating half the district, but fine in low lands. Irrigation from tanks has begun on a small scale. Prices fallen from 9 to 13 seers per rupee.

Noakhali.—Prospects of *aman* crop bad for want of rain. No cattle-disease. Fodder and water sufficient. Price of common rice 9 to 10 seers per rupee.

Chittagong.—No rain. Weather getting cool and pleasant. *Aman* suffering from drought. Prospects unsatisfactory. Water and fodder sufficient. Rice sells at 11 seers per rupee.

Chittagong Hill Tracts (Lungleh).—Prospects of crops excellent all round save in small isolated parts.

Patna.—Rain still urgently wanted for the rice and *rabi* crops in unirrigated areas. Fodder and water for cattle sufficient, except green fodder at Bihar. Prices slightly rising but no distress. Common rice selling at Patna 9 seers per rupee. Relief measures under consideration.

Gaya.—*Kharif* paddy promises an eight-anna crop. Prospects of *rabi* fair. Common rice selling at $8\frac{1}{2}$ seers per rupee.

Shahabad.—Rain continues to hold off. *Aghani* rice dried up except in irrigated tracts. Rain most urgently wanted for *rabi* sowings. Seeds not germinating well for want of moisture. Coarse rice selling as follows:—

	Srs.	
Arrah	$8\frac{1}{2}$	} per rupee.
Buxar	8	
Amrahat	$9\frac{1}{2}$	
Bhabua	$7\frac{1}{2}$	

Saran.—No rain. Prospects of rice bad. Sowing of *rabi* commenced, and lands being largely irrigated. Cattle-disease has appeared in (topalganj). Prices are—rice 9 seers, wheat 8 seers, barley 11 seers, *m. k.* 12 seers, gram 11 seers, *arhar* 11 seers, and *marua* 14 seers per rupee.

Chamraran.—No rain. *Bhadosi* harvest over; average yield eight annas. Winter rice prospects unchanged; average outturn about 3 to 4 annas. Rain urgently required for *rabi* sowings. Relief works will be needed probably very soon in the north of Bettiah subdivision. Price of common rice unchanged at 11 seers, against average of 18 seers per rupee. Fodder and water sufficient.

Muzaffarpur.—No rain. Prospects very bad. High land rice dried up. *Rabi* sowings continue, but prospects very poor. Prices as follow:—rice 8 seers, wheat 8 seers, *mukas* 12 seers, barley 13 seers, gram 10 seers, *arhar* $11\frac{1}{2}$ seers, and *marua* 15 seers per rupee.

Darbhanga.—Prospect of paddy unfavourable. *Rabi* not germinating well. Price stationary.

Monghyr.—Rainfall nil. Westerly breeze during the latter part of the week. Standing crops do not well except paddy, which is withering on high lands. *Rabi* sowings continue. Rain needed. Prospects of sugarcane good. Cattle-disease reported from two villages in the Begusarai subdivision. Sufficient fodder and water. Common rice sells as follows:—

	Srs.	
Monghyr	8 to 9	} per rupee.
Begusarai	8	
Jamui	8 to 9	

Bhagalpur.—No prospect of rain, which is needed everywhere. *Rabi* sowings not going on well and *agham* rice suffering from want of rain. Some cases of cattle-disease in Protapganj thana and in Sadar subdivision. No want of fodder and water. Prices high. Prices of common rice as below:—

	Srs. c.	
Sadar	9 0	} per rupee
Banla	10 0	
Madhupura	10 0	
Supaul	12 0	

Purnea.—No rain. Prospects of *agham* paddy fair. Plants in ear, but on high lands suffering from want of rain. Sowing of *rabi* going on, but progress retarded by want of rain. No cattle-disease. Fodder and water sufficient. Prices rising. Common rice 11 seers per rupee at Sadar and Araria and 9 seers at Kishengauj.

Malda.—No rain. Weather getting cool. Winter rice on high lands in Barunda tract is dying for want of moisture. Sowing of *rabi* crops hindered by want of rain. Coarse rice selling at $8\frac{1}{2}$ seers per rupee. No want of fodder and water for cattle.

Sonthal Parganas.—No rain. Weather hot in day and cool in night. *Murh* rice on dry land withered. New rice coming into market. *Rabi* sowings short for want of moisture. Water reservoirs being depleted.

Cuttack.—Rainfall nil. Days hot; nights cool. Rain very badly wanted, though there has been slight rainfall in Pundalo and Patamandi. Both *laghu* and *guru arad* withering for want of rain. Insect-pests still found in some places. *Rabi* crops not promising in some places. Grain dealers holding off their stocks and not bringing them to market freely. Retail prices of common rice are as follows:—

	Srs. o.	
Cuttack	11 3	} per rupee.
Jajpur	13 2	
Kendrapara	15 12	
Banki	14 7	

Balasore.—Days hot, nights cool. Rain badly wanted. Winter rice in ears withering on high lands. Fields being irrigated where convenient. Loss of crop apprehended. Want of rain retarding *rabi* sowings. Cattle-disease in some parts. Fodder and water sufficient. Common rice selling at 11 seers and 13 seers per rupee at Sagar and Bhadrak respectively.

Puri.—No rain. Paddy withering on high lands. *Rabi* sowings retarded by want of rain. Fodder sufficient. Condition of cattle good. Price of common rice 12 to 16 seers per rupee.

Angul.—No rain. Weather unseasonably hot. *Englu* being put. Irrigated *sarad* may be a full crop; unirrigated a failure. Crop prospects as previously reported. Condition of cattle good in Angul. Disease among Khondmal cattle, and many deaths thereby reported. Coarse rice obtainable with difficulty at 12 Cuttak seers per rupee in Angul and 18 Balasore seers per rupee in Khondmals.

Hazaribagh.—No rain. Crops withering for want of moisture. Very little *rabi* sown. Poppy lands being prepared. Prospects of best villages ten annas and worst villages two annas' outturn of paddy. Rice sells from 7 to 9 seers per rupee.

Lohardaga.—Sky lightly clouded. Harvesting of *gora dhan* finished. Rain badly wanted for standing crops. Rice sells at 9 to 10 seers per rupee (new) and 8 seers per rupee (old). Fodder and water sufficient. No report of cattle-disease.

Palamanu.—No rain. *Rabi* cannot be sown. Prospect of winter rice poor. No cattle-disease. Water and fodder sufficient. Coarse rice selling at about 8 seers per rupee.

Manbhum.—No rain. Weather seasonable. Prospects of rice crop 5 to 8 annas, of pulses and oilseeds 4 to 8 annas, and of sugarcane 8 to 16 annas. Cattle-disease still prevails about thana Raghunathpur. Fodder and water at Sadar ample and at Gobindpur sufficient at present. Common rice sells at Sadar and Gobindpur 10 seers per rupee. Stocks of food-grains irregularly distributed, but sufficient for some months. Relief works not likely to be wanted for some time.

Singhbhum.—No rain. Winter rice may yield 9 annas. Old rice sells at 12 seers per rupee at Baharagora; elsewhere 10 seers per rupee. New rice a seer cheaper.

General Summary.—There was no rain during the week, with the exception of showers in Jalpaiguri and Darjeeling. The prospects of the rice and other standing crops grow everywhere more and more unfavourable with the continued drought; and in many districts the *rabi* sowings cannot be made for want of moisture; in some places too, the seed sown has refused to germinate. Insects still infest the rice plants in parts of Cuttak. Damage by insects is also reported from Jangipur in Murshidabad. Cattle-disease is reported from Bankura, Faridpur, Saran, Monghyr, Bhagalpur, Balasore, Angul, and Manbhum. Prices continue very high, and in many districts, especially those of Orissa, are said to be still rising.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,

The 3rd November, 1896.

M. FINUCANE,

Offy. Secy. to the Govt. of Bengal.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of the anemograph.

The mouth of the rain-gauge is one foot above the ground.

a dew.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 25th to 31st October 1896

REVENUE DEPARTMENT,—(LAND REVENUE.)

NOTIFICATION—No. 4305L.R.

The 6th November 1896 —Under the powers conferred upon him by section 101 (2) (b) of the Bengal Tenancy Act, VIII of 1885, the Lieutenant-Governor is pleased to order that a survey shall be made and a record of rights prepared in respect of all lands included in the revenue-free estates, Jamun, No. 72, and Dhuljhari, No. 50, in Register B of the Dinajpur Collectorate.

The particulars to be recorded in the survey and record of rights shall be the following.—

- (a) The name of each proprietor with the character and extent of his interest.
- (b) The situation, quantity and boundaries of the proprietors' private lands, as defined in Chapter XI of the Act
- (c) The name of each tenant, the class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat, or under-raiyat, and if he is a tenure-holder, whether his rent is liable to enhancement during the continuance of his tenure.
- (d) The situation, quantity and boundaries of the land held by him.
- (e) Name of his landlord
- (f) The rent payable
- (g) The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise.
- (h) If the rent is a gradually increasing rent, the time at which, and steps by which, it increases
- (i) The special conditions and incidents, if any, of the tenancy.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No 4306L R

NOTIFICATION—No. 5495J.

The 10th November 1896.—Under section 8 of the Sonthal Parganas Justice Regulation, No. V of 1893, the Lieutenant-Governor hereby appoints Mr. A. H. Cuming, Subdivisional Officer of Dumkey, in the district of the Sonthal Parganas, to be a Subordinate Judge within the limits of the Dumka subdivision.

O. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT.

ESTABLISHMENT.

The 10th November 1896.

No. 218.—The following notification issued by the Government of India in the Public Works Department is republished for information :—

No. 462, dated the 20th October 1896.—Mr W. A. Inglis, Executive Engineer, 1st grade, Bengal, officiated as a Superintending Engineer from the afternoon of the 15th to the 20th July 1896.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

COMMUNICATIONS.

The 10th November 1896.

No. 220.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for connecting the Koraich Cemetery with the main road, in the village of Koraich, pargana Sasaram, zilla Shahabad, it is hereby declared that for the above purpose a piece of land, measuring more or less 3 ka. $\frac{1}{2}$ dh. of local measurement, bounded on the East by Koraich Cemetery, on the West by main road, on the South by lowland, and on the north by high-land, is required within the aforesaid village of Koraich.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

ESTABLISHMENT.

The 6th November 1896.

No. 219.—Babu Madhu Sudan Sen Gupta, Assistant Engineer, 3rd grade, is granted, under Article 291 of the Civil Service Regulations, privilege leave for three months, with effect from the 15th November 1896, or such subsequent date as he may avail himself of it.

No. 213.—Babu Khirode Chander Mookerjee, Overseer, 2nd grade, is vested with the powers of a Canal Officer under Act III (B.O.) of 1876, to be exercised only when in charge of an Irrigation subdivision in one of the districts of Bengal to which the Act has been extended.

The 6th November 1896.

No. 214.—Mr. G. C. Stawell, Executive Engineer, is on return from the furlough granted to him in Bengal Government Notification No. 37, dated the 24th February 1896, appointed to be Executive Engineer of the Dehri Workshop Division.

Bengal Government Notification No. 12, dated 11th January 1895.

Bengal Government Notification No. 166, dated 7th September 1896.

No. 215.—Mr. K. H. Stephen, Executive Engineer, is, on return from the furlough granted in the orders marginally noted, posted to the South-Western Circle for special duty.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

The 10th November 1896.

No. 216.—Notification.—It is hereby notified for general information that declaration No. 160, dated the 30th April 1895, relative to the acquisition of land required to be taken up for a retired line of embankment at Dumri, in the district of Saran, which was published at page 409, Part I of the *Calcutta Gazette* of 1st May 1895, is cancelled.

No. 217.—Declaration.—Whereas it appears to His Honour the Lieutenant-Governor of Bengal that land is required for public purpose at public expense, viz., for canalization of Bhangore khali, it is hereby notified for whomsoever it concerns that the following two plots of land situated in pargana Calcutta, district 24-Parganas, are to be acquired. This declaration is made under section 6 of Act I of 1894.—

I. A strip of land measuring, more or less, 12 cottahs 8 chitaks in village Kantatala, thana Bhangore, pargana Calcutta, district 24-Parganas, and bounded on the south and west by the land of Chundry Bose, on the east by Kantatala gong, and on the north by Bhangore khali, district 24-Parganas.

II. A strip of land measuring 10 cottahs 6 chitaks, more or less, in village Kantatala, thana Bhangore, pargana Calcutta, district 24-Parganas, and bounded on the south and east by the land of Ram Kristo Naskar, on the west by Kantatala gong, and on the north by Bhangore khali surplus land.

No. 219.—Notification.—With reference to Government of Bengal orders Nos. 1848-50 I.A., dated 26th September 1883, and subsequent modification of these orders, notice is hereby given that the Lieutenant-Governor of Bengal proposes, under section VI of Act V (B.C.) of 1864, to abolish, with effect from the 1st April 1893, all concessions in respect of tollage hitherto granted to Steamer Companies for their transport services on the canals in Bengal.

The 3rd November 1896.

REVISED WATER-RATE RULES FOR THE SARAN CANALS.

No. 209.—Notification.—In exercise of the powers conferred on him by sections 99 and 78 of Act III (B.C.) of 1876, the Hon'ble the Lieutenant-Governor proposes to make the following rules and to fix the undermentioned rates to be charged for water supplied under

individual assessment from the Saran Canals during the *rabi* season of 1896-97 and the hot weather season of 1897, in addition to the rules in notification No. 201, dated 2nd November 1896, published in the *Calcutta Gazette* of 4th idem.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

In Notification No. 110 of the 9th August 1880, issued under the provision of Act III of 1876, Government reserved to itself the rights of property in the water of the river channels known as the Daha, the Dhanai, the Gandaki and the Gangri, and their appendant tributaries, including the Rupan Chap Sota.

2. The revenue administration of the Saran Canals is vested in the Superintending Engineer of the Sone Circle. The Executive Engineer of the Gandak Division is, as Canal Officer under the Irrigation Act [III (B.C.) of 1876], charged with the proper maintenance and management of the canals, and with the control of the supply of water in them. All orders passed by him, or by the Subdivisional Canal Officer, are under the terms of that Act subject to correction on appeal to the Collector of Saran.

3. The following rules will be applicable to all irrigation effected from the Saran Canals in the *rabi* season (1st November to 31st March) of 1896-97, or to the hot weather season (1st April to 13th July) 1897.

4. Any person who wishes to make bunds in the canals must obtain the written permission of the Canal Subdivisional Officer before doing so.

5. Any person who constructs bunds in the canals, who interferes with the supply of water in them, or who takes water from them without the written permission of a duly authorised person, will render himself liable to the penalties defined in the Irrigation Act.

6. Any person who requires water from the channels of the Saran Canals must apply either to (a) the Patrol, (b) the Sectional Officer, or (c) the Subdivisional Canal Officer, who will take his signature on the Form A attached. If the application is approved, the Canal Subdivisional or Sectional Officer (all of whom are hereby empowered in that behalf) will grant a permit for irrigation in Form B.

7. Any person who holds a permit in Form B will be allowed to take canal water for irrigation, and he will be charged for it at the rates detailed in the following schedule:—

Schedule of rates for irrigation.

Crop.	Rate per Saran bigha.		
	Rs.	A.	P.
For indigo irrigated between the 1st November and 31st March ...	2	4	0
For indigo irrigated between the 1st April and 15th July ...	4	8	0
For other crops ditto ditto ...	3	0	0
For opium ...	1	8	0
For <i>rabi</i> crops irrigated between the 1st November and 31st March ...	0	12	0

These rates apply equally to irrigation by lift and flow.

8. Persons who take water from any of the river channels named in rule I, without a permit in Form B, and persons who waste the water, are liable to be charged water-rates, under sections 79 and 80 of the Irrigation Act, at rates which shall be fixed by the Subdivisional Canal Officer, but which shall not be greater than twice the rate which would have been payable for licensed irrigation.

9. All water-rates assessed under rule 7 will be due on the following dates:—

For irrigation in the *rabi* season—5th April 1897.

For irrigation in the hot weather season—20th July 1897.

Water-rates assessed under rule 8 will be due as soon as the demand statement has been prepared.

10. The demand statements for water-rates due will be sent to the Collector as soon as possible after the irrigation in any village is completed, and a *parcha*, showing the area and amount assessed against each cultivator, will be sent to the rate-payer as soon as possible.

11. Any claim for remission of water-rates under section 76 (b), or for compensation under section 76 (c) of the Irrigation Act, must be presented in writing to the Subdivisional Canal Officer at least twenty days before the crop is cut. The Subdivisional Canal Officer shall, after such enquiry as he may consider necessary, pass orders on the application. Any application for remission presented direct to the Collector must be forwarded for the orders of the Canal Officer.

12. Objections to the demand statements must be presented within thirty days of the date on which the *parcha* is issued by the Subdivisional Canal Officer. He will pass orders on such objections.

13. Any person who is not satisfied with an order passed by the Subdivisional Canal Officer may appeal to the Collector under section 91 of the Irrigation Act. Such appeal must be accompanied by a copy of the order appealed against, and it must be submitted to the Collector within thirty days of the date of the order.

14. Remission statements must be signed by the Divisional Canal Officer. Any statement so signed shall be sufficient authority for a refund by the Collector.

15. No guarantee can be given either as to the volume or duration of the supply, or of the delivery of any quantity of water at any particular point of any canal.

16. The Canal Officer will regulate the water passing into, and along, any canal to the best of his ability to meet requirements. If there is any difficulty in supplying all the channels, the Canal Officer will endeavour to divide the available supply as fairly as possible. The Canal Officer shall have complete control of the distribution of water.

FORM A.

Application for water, No.

Name of village

Name of channel

Date of application

We, the undersigned, hereby apply for water from the abovenamed channel for the irrigation of our fields, and we engage to pay, for the area actually found to have been irrigated, to the Canal Officer (or other person duly authorised in that behalf), the water-rates prescribed by the Lieutenant-Governor under the provisions of the Bengal Irrigation Act; and we further agree to abide by the rules issued under the Act:—

Description of crop	Approximate area in bighas.	Signature of cultivators.
1	2	3

FORM B.

*Permit**No.*

Permission is granted to the persons named below to take water from the channel for the irrigation of an area of about bighas in the village of

Name of cultivator.	Approximate area in bighas.

REVISED WATER-RATE RULES FOR THE SONE CANALS.

The 3rd November 1896.

No. 211.—Notification.—In notification No. 262, dated the 14th of August 1894, the Hon'ble the Lieutenant-Governor was pleased to pass certain rules concerning the Sone Canals and to fix certain rates to be charged for water supplied from those canals. In notification No. 28, dated the 28th January 1895, it was notified that it was intended to increase some of those water-rates. The rules which were passed under notification No. 262, dated the 14th of August 1894, contained provision for a class of leases having a currency of three years. That class of lease is no longer considered suitable. The Lieutenant-Governor proposes to make the following alterations in the rules referred to in consequence of his determination to cease to grant such leases:—

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt of Bengal.

(i) Rule 16 to read as follows:—

16. Applications under section 74 of the Act for permits for irrigation upon leases for a term of years (Appendix I), or upon *kharyf* season leases (Appendix III), shall be subject to the following conditions:—

I.—The application must be for a block of land having well-defined boundaries and so situated that adjoining lands will not ordinarily or probably be irrigated by water supplied for the land included in the application.

II.—The application must be in the form annexed to these rules, which states that water-rates will be paid on all lands contained in the block for which an application is presented, whether or no water is required.

III.—The applications may be for a term of seven years, or for the season only—

(a) In the case of applications for the season only, the issue of the permit will not necessarily be delayed until the lands have been measured. The boundaries of the block must be stated in the application, which must be signed by or by authority of the cultivators of all the land included in the boundaries mentioned, and the approximate area in the occupation of each on the block must be specified. Water-rates will be charged on the areas in the block as found by actual measurement.

(b) In the case of applications for a term of seven years, a permit will not be issued until the land has been measured and an application complete in every respect for all the land included in the block has been signed. If water is required to be supplied before the application is completely signed in the manner specified above, an application for water for the season must be made which will be cancelled on a permit for seven years being issued.

(c) Notice that a permit for seven years is required must be given by the 1st of April, and no permit will be issued unless the application is completely signed by the 30th of November, or, with the special sanction of the Superintending Canal Officer, by the 1st of March following. An application for a permit for the season must be filed by the 1st of September.

IV.—With the special sanction of the Superintending Canal Officer—

(a) Existing leases for terms of three years may be cancelled and included in an application for a seven-year lease under the preceding rules.

(b) An application may be made for an addition to a seven-year lease, which, if granted, shall be considered as part of the original lease and terminate therewith.

(ii) Rule 22 to read as follows:—

22. Permits for irrigation upon leases for a term of years (Appendix VIII) or upon *kharyf* season leases (Appendix IX) shall be issued under the following conditions:—

I.—The land to be irrigated must form a compact block defined by well-marked boundaries of such a nature as clearly to distinguish leased from the adjoining unleased lands, and also be so situated that unleased lands will not be ordinarily or probably irrigated by water supplied for the land included in the block. The boundaries must be mentioned in the application for a permit for the season, and in the notice referred to in Rule 16 (c), when a permit for a seven-year lease is applied for.

II.—The Canal Officer may exclude lands included in the block not irrigable by flow or for which canal water is ordinarily not required. In the case of permits for seven years, the block must be not less than 50 bighas in area. In cases where the Divisional Canal Officer considers it advisable to grant a permit to a block of less area than that mentioned above, the previous sanction of the Superintending Canal Officer must be obtained. No permit for seven years

shall be issued unless the owners of the village channel from which water is to be obtained have been registered and the channel itself is in a good state of repair such as to fit it for the conveyance of water without wastage occurring. Such leases will not be issued unless it is known from the experience of previous years' irrigation that a sufficient supply of water is always available and that the quantity required is not excessive.

III.—A permit for a seven-years' lease may be cancelled by the Superintending Canal Officer with effect from a date to be specified in the order for good cause on the application of all the signatories thereto.

IV.—Permits for the season will be issued under less favourable conditions as to situation, soil, and the quantity of water available; it will not be necessary that the owner of the channel should be registered, but the channel itself must be entered on the register.

V.—Water-rates will be levied on the areas of the blocks specified in the permits, and measurement of the areas actually irrigated will not be necessary.

(iii) In Rules 3 (I), 9 (VIII), 11, 12, 24 (II), 25, 31, 39, 50, 62, omit the two words "three or."

(iv) In Rule 42 omit the words "three-years' leases."

Further, the Lieutenant-Governor proposes to make the following alterations in the rules referred to in consequence of the increase he proposes to make in certain water-rates:—

(v) In Rule 71 (a) change the words "1st of April 1892" into "1st of April 1897."

(vi) In Rule 71 (b) change the words "1st of April 1891" into "1st of April 1897."

(vii) Rule 72 will read as follows:—

SCHEDULE No. I.
Leases for a term of years.

For water supplied between the 25th of June of one year and the 25th March of the next.	FLOW OR LIFT.	
	Rate per bigha.	Rate per tenth of a bigha.
1	2	3
For leases for seven years, all crops	Rs. A. P. 1 9 0	Rs. A. P. 0 2 6

Leases having a currency of seven years will be granted at the rate defined in this Schedule until and including the year 1908.

(viii) Rule 73 will read as follows:—

SCHEDULE No. II
Season leases (kharif).

	FLOW OR LIFT.	
	Rate per bigha.	Rate per tenth of a bigha.
1	2	3
For water supplied between the 25th of June and the 25th of October for all crops	Rs. A. P. 2 3 0	Rs. A. P. 0 3 6

- (ix) In Rule 42 omit the five words "for bhader, &c., 1st November."
- (x) Appendix IVB. to be omitted altogether.
- (xi) Further, the Lieutenant-Governor proposes to alter Rule 47 by adding the following words to it:—
- "All applications for compensation under section 76 (a) must be made not less than 20 days before the crop is cut."
- And in Rule 46 to add the words "not less than" before the words "twenty days before the crop is cut."
- (xii) In paragraph 2 of Appendix III omit the figures "1—14."
- (xiii) In paragraph 2 of Appendix IVO alter the words "1st of January" into "25th of March."

RAILWAY DEPARTMENT.

The 10th November 1896.

No. 133.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up at the public expense for a public purpose, viz., for the South Bihar Railway, in the district of Monghyr, it is hereby declared that for the above purpose a strip of land of an average width of 316 feet, more or less, is required at Burhee station, in the village of Indupur, as named in the schedule of an approximate area of 3.40 acres.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the railway, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

No. 134.—Notification.—Whereas it appears to the Lieutenant-Governor of Bengal that land is likely to be required for the following surveys—

	Miles
I. Ranaghat to Bhugwangola, &c.	93
II. Godagari to Sultanpur	53
III. Rampur Boalia <i>via</i> Malda to Raigunge	119
IV. Malda to Katihar	46
V. Kaunia to Dhubri, &c.	44
VI. Reconnaissance <i>via</i> Mogulhat to Dhubri	40

in the districts of Nadia, Rajshahi, Bogra, Malna, Dinajpur, Purnea, and Rangpur, notice is hereby given, under the provisions of section 4 of Act I of 1894, that Survey Parties are about to take the field for the purpose of making surveys of the proposed lines, and that, in exercise of the powers conferred by the abovenoted section 4 of Act I of 1894, the Lieutenant-Governor of Bengal has authorised the Engineers for the time being engaged in the undertaking to enter upon and survey lands, and to do all other acts required for the proper execution of their work as provided or specified in the said section.

No. 135.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the public expense for a public purpose, viz., for enlarging and improving the Dalsingserai Railway station yard section of the Bengal-North-Western Railway in villages Chuk Lukman, Loknathpur and Jagputti, pargana Saraisa, district Darbhanga, it is hereby declared that for the above purpose a piece of land measuring, more or less, 16 bighas 8 cottaks and 14 chitaks of standard measurement, corresponding to 5 acres, excluding the Dalsingserai-Alampur district road and the railway line intersecting the portion of land under acquisition, appertaining to village Chuk Lukman, bounded as below, is required within the aforesaid villages of Chuk Lukman, Loknathpur and Jagputti:—

Boundaries.

South.—By the public road in village Chuk Lukman, the field of Ramlal Choudhry in Jagputti, and railway land.

East.—By the field of Ramlal Choudhry in Jagputti and by the fields of Ghina Choudhry, Darshan Choudhry, road, fields of Bado Jha, serfat of Jhaloo Choudhry, fields of Sheyam Choudhry, Babulal Choudhry in Loknathpur, partee land and mango-trees of Kera Jha, road, fields of Mosamat Darpun Chaudhrani, Babulal Choudhry, Jagmohan Choudhry, road, house and field of Raghoobir Dasadh, Ramcharan Dasadh, Jagmohan Choudhry, Jahki Patsan, road, Budri Narain, Santokhi Kandoo, and Ram Charan Chhipi in Chuk Lukman.

North.—By the fields of Ram Charan Chipi, Mosamat Bhoolo Choudhrani, railway road, field of Bachoo Choudhry and Elahi Mian in Chuk Lukman.

West.—By the field of Elahi Mian, road, Sookhai Dhanukh, Bisesar Prasad, Dowarkaram, Dagor, homestead land of Goolbahar Natni, house and field of Umda Natni, and railway lands in Chuk Lukman.

No. 136.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up at the public expense for a public purpose, viz., for Mogalsara-Gaya Railway, in the district of Gaya, it is hereby declared that for the above purpose a strip of land of an average width of 200 feet, more or less, from Gaya, passing through or near Rafiganj, Aurangabad, Jampur to Barua, is required in the villages named in the following schedule of an approximate area in each case as therein stated:—

Monghyr Collectorate, the 9th November 1896

MAHES CHANDRA SEN, Deputy Collector in charge

Notification B.

NOTICE is hereby given, under sections 5 and 13, Act XI of 1859, that unless the arrears mentioned below are paid on or before the next latest date of payment, viz, the 8th November 1896, the undermentioned estates or shares of estates in the district of Puri will be put up for sale at the office of the Collector of that district on the 11th February 1897 at 12 noon for the said arrears.

When in columns 6, 7, and 9 of the statement it is stated that only a share is to be sold, it is to be understood that a separate account is kept for that share and that the other share or shares in the estate are excluded from the sale.

* Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter box for inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7.30 P.M. precisely, after which hour inland letters and papers fully prepaid and bearing an extra postage stamp of ½ anna will be received up to 8 P.M. and up to 8.45 P.M. with a late letter fee of one anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonies via Tuticorin, the letter box for Foreign articles will be cleared for the last time for articles without the late fee at 8.30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9.30 P.M. On other days the letter box for Foreign articles will be cleared for the last time for articles without the late fee at 7.30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS, Presidency Postmaster.

Copies are to be had at the Office of the Director of Public Instruction.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1899 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1870—

Terms of subscription payable annually in advance.

For the complete series including postage, Rs. 22-8.

	Without postage.	With postage.
	Rs. A. P.	Rs. A. P.
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)	...	2 0 0
" part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India)	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit—

For town. For mufassal

	Rs. A. P.	Rs. A. P.
For the Calcutta Series, per copy	0 8 9	0 10 8
" each of the Madras, Bombay, and Allahabad Series, per copy	0 5 3	0 5 0
" the Calcutta Series. For the year	7 2 8	8 6 8
" each of the Madras, Bombay and Allahabad Series. For the year	4 4 6	4 11 8

Persons desiring to subscribe for or purchase the Report should apply to—
Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
" Curator of Government Books, North-Western Provinces and Oudh.
" Officer in charge, Bengal Secretariat Book Depot.

Orders and subscriptions for 1894 should be at once registered and remitted by money order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance—

	One page	Half page	Quarter page
	Rs. 20	Rs. 14	Rs. 9
For one issue	55	36	24
" three issues	100	68	45
" six "	145	96	64
" nine "	180	120	80

SEVEN volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates—

	Without postage.	With postage
	Rs. A. P.	Rs. A. P.
Bengal Law Reports for one year	20 0 0	22 8 0
Single copies, Rs. 2 per copy		
Full Bench Rulings, Parts I and II	20 0 0	22 8 0

Obtainable at the Bengal Secretariat Book Depot, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Catalogue of Books procurable from Thomason College Book Depot.

Application to be made to Curator Cash must accompany order Articles will be sent by Value-payable Post to persons in Government employment only. It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage and other incidental charges (except commission for value-payable supplies), and are for all purchasers other than resident College Students

Drawing Instruments (electrum) are available at the College Book Depot at Rs 28 per box. Drawing Instruments, drawing materials, &c., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA

Royal octavo, with numerous plates

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required

VOLUME I*

Sec	Rs	A
I.—Building Materials, (1895)	2	0
II.—Masonry, (1891)	1	4
III.—Carpentry, (1889)	1	4
IV.—Earthwork, (1892)	1	4
V.—Tools and Plant, (never published)		

VOLUME II*

VI.—Buildings, (1891)	1	4
VII.—Bridges, (in the Press)		
VIII.—Roads, (in the Press)		
IX.—Railways, (1891)	1	4
X.—Irrigation Works, (1873)	1	8
Roorkee Treatise on Civil Engineering, Vol II, (1867 edition)	3	0

ROORKEE MANUAL OF APPLIED MECHANICS

Vol. I.—Direct and Transverse Strain, principally by Analytical Methods	8	0
„ II.—The Stability of Structures, mostly by Graphic Methods (in the Press)		

MANUALS.

	Rs.	A.
VII.—Surveying, (by Major Firebrace, R.E.), (6th edition), with Curve Table, (in the Press)		
XIII.—Drawing, (by Lieut R. Pulford, R.E.)†	8	0
XIIIA.—Drawing, First Principles of Geometrical (by Lieut. R. Pulford, R.E.) (4th edition)	1	4
XIV.—Simple Applied Mechanics, (2nd edition), Parts I and II in one	3	0
Simple Applied Mechanics, Part II, (1st edition)	0	8
XV.—Examples of Estimating. Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master, (5th edition), (in the Press)		
XVI.—Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E.	0	4
XVII.—Specimens of Printing used in the College Drawing Course and Entrance Examinations	0	6

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting section X, is the course for the Upper Subordinate class. The other Manuals are the complete course for both Classes in the several subjects of which they treat

PART III.

Acts of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

[Third Publication.]

ACT No. II OF 1896.

THE following Act, passed by the Lieutenant-Governor of Bengal in Council, received the assent of His Honour on the 4th September, 1896, and, having been assented to by His Excellency the Governor General on the 21st October, 1896, is hereby published for general information.—

An Act to further amend the Bengal Municipal Act, 1884.

WHEREAS it is expedient to further amend the Bengal Municipal Act, 1884, It is hereby enacted as follows.—

1 This Act shall come into force on the day on which it is first published in the Calcutta Gazette with the assent of the Governor General thereto.

2. The word “section,” as used in sections 3 to 18, both inclusive, of this Act, means a section of the said Bengal Municipal Act, 1884, as amended by Bengal Act IV of 1894.

3 (1) For clauses (1), (2) and (3) of the first proviso to section 15, the following shall be substituted, namely—

“(i) has, during the year immediately preceding such election, paid in respect of any rates an aggregate amount of not less than three rupees, or

“(ii) has, during the year aforesaid, paid or been assessed to the tax imposed by Act II of 1886 (*An Act for imposing a tax on income derived from sources other than agriculture*), or

“(iii) being a graduate or licentiate of any University, or having passed the First Arts Examination of the Calcutta University or the corresponding standard of any other University, or holding a license, granted by any Government Vernacular Medical School, to practise medicine, or holding a certificate authorising him to practise as a pleader or as a mukhtar or as a revenue agent—occupies a holding, or part of a holding, in respect of which there has been paid, during the year aforesaid, in respect of any rates, an aggregate amount of not less than three rupees.”

(2) In the definition of “rates,” in the said section, the word “means” shall be substituted for the words “shall be deemed to include”

(3) To the said section the following shall be added, namely—

“*Explanation*—Rules made under this section may reduce but not raise any of the sums mentioned in the first proviso thereto, and may declare that any persons who are not referred to in that proviso shall be entitled to vote”

4 For section 37L the following shall be substituted, namely—

“37L. The provisions of Part VII shall, notwithstanding anything in section 86, 220, 221, 222, 223, 279 or 287, apply to every Municipality in which a water-supply is provided under section 37K.”

5 To section 39 the following shall be added, namely—

“If the Chairman or the Vice-Chairman fails to call a special meeting within thirty days after

any such requisition has been made, the meeting may be called by the persons who signed the requisition."

6. (1) After the words "or Vice-Chairman," in the first paragraph of section 42, the words "or under section 39 by persons signing a requisition" shall be inserted.

(2) For the words "Chairman or Vice Chairman," in the last paragraph of section 42, the word "President" shall be substituted.

7. For section 69 the following shall be substituted, namely.—

"69 (1) After the said sums have been set apart under section 68, the Commissioners at a meeting shall, as far as the Municipal Fund permits, from time to time cause roads, bridges, tanks, ghats, wells, channels, drains and privies, being the property of the Commissioners, to be maintained and repaired and the Municipality to be cleansed,

and may, except as is otherwise provided in this Act, and subject to such rules and restrictions as the Local Government may from time to time prescribe, apply the Municipal Fund to any of the following purposes within the Municipality, that is to say,—

- (i) the construction, maintenance and improvement of roads, tramways, bridges, squares, gardens, tanks, ghats, wells, channels, drains and privies;
- (ii) the supply of water, and the lighting and watering of roads,
- (iii) the erection and maintenance of offices and other buildings required for municipal purposes;
- (iv) the construction and repair of school-houses, either wholly or by means of grants-in-aid;
- (v) the establishment and maintenance of schools, either wholly or by means of grants-in-aid,
- (vi) the establishment and maintenance of hospitals and dispensaries,
- (vii) the promotion of vaccination;
- (viii) the acquiring and keeping of open spaces for the promotion of physical exercise and education,
- (ix) the training and employment of female medical practitioners and of veterinary practitioners;
- (x) the establishment and maintenance of veterinary dispensaries for the reception and treatment of horses, cattle and other animals;
- (xi) the appointment and payment of qualified persons to prevent and treat diseases of horses, cattle and other animals,
- (xii) the improvement of the breed of horses, cattle and asses, and the breeding of mules.
- (xiii) the establishment and maintenance of free libraries,
- (xiv) the maintenance of a fire-brigade;
- (xv) other works of public utility calculated to promote the health, comfort or convenience of the inhabitants,

(xvi) the establishment and maintenance of Benches for the trial of offences under this Act or any bye-laws made thereunder; and

(xvii) generally, to carrying out the purposes of this Act.

Provided that no portion of the Municipal Fund shall be applied to any of the purposes specified in clauses (viii) to (xii), both inclusive, unless a majority of the Commissioners present at the meeting are satisfied that the other purposes specified or referred to in this sub-section, or such of them as the majority consider it necessary to carry out, have been sufficiently provided for

"(2) The Municipal Fund shall also be applicable to the payment, at such rates as the Local Government may from time to time direct, of travelling expenses incurred by any of the Commissioners in attending meetings convened under the rules made by the Local Government in pursuance of sub-section (4) of section 1 of the Indian Councils Act, 1892, for the purpose of recommending a person to be nominated as a member of the Lieutenant-Governor's Council

56 & 56 Viet.,
cap 14

"(3) The Commissioners may do all things, not being inconsistent with this Act, which may be necessary to carry out the purposes of this section

"69A. (1) The Commissioners shall cause to be kept, for each hospital and dispensary vested in them, accounts, in such form as may be prescribed by rules made by the Local Government, showing—

- (a) all endowments, funds and contributions received by them,
- (b) all sums directed by them to be applied to establishment or maintenance, and
- (c) all expenditure incurred by them

(2) No money which has been received by the Commissioners on account of any hospital or dispensary, or directed by them to be applied to the establishment or maintenance of any hospital or dispensary, shall be expended on any other object.

"69B The Local Government may from time to time make rules—

- (i) prescribing the qualifications of candidates for employment under clause (xi) of section 69, and
- (ii) generally, for the guidance of the Commissioners in all matters connected with the carrying out of the purposes of sections 69 and 69A "

8 (1) For the words "the last preceding section," in section 70, the words and figures "section 69, sub-section (1)" shall be substituted

(2) To the said section 70 the following shall be added, namely.—

"Notwithstanding anything in this section, the Municipal Fund may be applied, by the vote of the majority referred to in the proviso to section 69, sub-section (1), and without the consent and sanction mentioned in this section, to meeting expenses incurred beyond the limits of the Municipality in the training of female medical practitioners or of veterinary practitioners."

9. (1) For the words "or habitually used" and the words "and habitually used," in section 131 and section 142, the words "or is used in the ordinary course of business" and the words "and is used in the ordinary course of business" shall respectively be substituted

Amendment of sections 131, 141A, 142 and 147A

(2) For the words "habitually used" in section 147A the words "used in the ordinary course of business" shall be substituted

(3) To section 147A the following shall be added, namely —

"When carts not kept within any Municipality are so used in more than one Municipality, the Local Government, on the application of the Commissioners of any such Municipality, may, if it thinks fit, apportion between all such Municipalities the registration fees paid under this Act in respect of such carts

"Where a cart is registered under this Act in more than one Municipality, the Commissioners of the Municipality within which the cart is kept shall have a right to levy the registration fee in preference to the Commissioners of any other Municipality"

(4) The words "or cantonment" in sections 141A and 147A are hereby repealed

10. After section 141A the following shall be inserted, namely —

New section 141B

"141B A carriage, horse or other animal

shall be deemed to be used in the ordinary course of business, within the meaning of section 131, if it is used on business on an average thrice a week."

11. After the said section 147A the following shall be inserted, namely —

New section 147B

"147B A cart shall be deemed to be used in the ordinary course of business, within the meaning of sections 142 and 147A, if it is used on an average twice a week"

12. In section 238, sub-section (1), the words

Amendment of section 238

"or without waiting for the orders of the Commissioners for six weeks from the date of his giving notice in writing under section 237" shall be inserted after the words "as aforesaid"

13. (1) After sub-section (1) of section 279, the following shall be inserted, namely —

Amendment of section 279

"(1a) With the sanction of the Local Government, the amount of the water-rate imposed under this section may vary with the distance

of houses or lands from the nearest standpipe or other source of water-supply, and the amount may be higher in the case of premises to which communication pipes are attached than in the case of other premises."

(2) In sub-section (2) of the said section the words 'or amounts' shall be inserted after the word 'amount,' in the first place in which that word occurs

14. After clause (b) of the first proviso to Further amendment of section 279 the following shall be inserted, namely —

"or (c) any holding consisting only of tanks."

15. In section 321, after the words "dwelling-houses" the words "or privies" shall be inserted.

Amendment of section 321

16 For section 322, sub-section (3), the following shall be substituted, namely —

Amendment of section 322

"(3) The net proceeds of the said fees, after deducting a proportionate share, to be fixed by the Commissioners in meeting, of the cost of the staff employed in collecting and in supervising the collection of the fees and in keeping and auditing the accounts thereof, shall be applied to the maintenance of the establishment referred to in section 320, and generally to carrying out the provisions of this Part"

17. After clause (a) of section 350 the following shall be inserted, namely —

Amendment of section 350

"(aa) prohibiting the letting-off of fire-arms, fire-works, fire-balloons or bombs, except (i) with the permission of the Commissioners or a member of the Ward Committee or a Municipal Officer empowered by the Commissioners in this behalf, and (ii) on payment of fees at such rates as may be sanctioned by the Commissioners at a meeting"

18. For clause (f) of section 351A the following shall be substituted, namely —

Amendment of section 351A

"(f) the duties, appointment, leave, fining, suspension and removal of Municipal officers and servants"

19 The following portions of Bengal Act IV of 1894 (*An Act to amend the Bengal Municipal Act, 1884*), namely, section 7, sub-section (1), from "and after clause (2)" to the end, and section 31, are hereby repealed.

Repeal of portions of Bengal Act IV of 1894

AUSTRALIA—TORRES STRAIT, INNER ROUTE.

Positions of Tannadice rock, west extreme of Bih reef and north extreme of Lansdown reef.

THE Portmaster, Brisbane, has given notice (No. 21 of 1896) that the correct positions of the following dangers have been ascertained and are supplied by Captain Howard, R.N., H.M.S. "Dart".—

Tannadice Rock is situated at the N.W. extreme of a shoal 6½ cables long in a N.W. and S.E. direction and 4 cables broad, the depths on which vary from 3 to 7 fathoms. The depth on the rock is 5 feet at L.W.S., and it lies in the following position, viz:—

Latitude	12° 39' 52" S.
Longitude	143° 31' 18" E.

Restoration Rock bears N. 59° W., distant $4\frac{3}{8}$ miles.

The western extreme of Bih (b) Reef lies in—

Latitude	$12^{\circ} 38' 30''$ S.
Longitude	$113^{\circ} 32' 00''$ E

and has foul ground extending half-a-mile therefrom. The reef is not safe to approach

The north point of Lindsay Reef has a depth of 2 fathoms on it, with 9 to 10 fathoms close to the northward, and is about a mile to the northward of its position on the chart, viz —

Latitude	$12^{\circ} 48' 10''$ S
Longitude	$113^{\circ} 33' 30''$ E.

From the north point—

Care Direction summit (500) bears S $12\frac{1}{2}^{\circ}$ W, distant 4 miles,

Wye Reef Beacon, S 85° E, distant $3\frac{1}{10}$ miles,

Chapman Island Summit, S. $37\frac{1}{2}^{\circ}$ E, distant $6\frac{1}{4}$ miles

From the north point the reef trends S. 42° E, 6 cables, then S 31° E, $1\frac{1}{2}$ miles. Southward of this the reef is correctly charted

Bearings are magnetic. The latitudes and longitudes are taken from the new Chart, No. 2920, published in June 1896

Charts affected Nos 2920, 2921, and 2764, and Australia Directory, volume 2

Pulo Weh (Wai) Exhibition of lights in Saban bay

THE British Admiralty has given notice (No. 550 of 1896) that on 25th July 1896, the undermentioned lights were exhibited at Saban bay, Pulo Weh (Wai) —

Kelas island light, shown on the north-west point of Kelas island is fired white, elevated 107 feet above the sea, visible between the bearings S. 72° E and S 4° W., from a distance of 15 miles in clear weather.

The light is shown on an open iron framework 42 feet in height, coloured *white*
 The keeper's dwelling is of stone, with a *red* roof
 Approximate position, on Chart No. 219, lat $5^{\circ} 52' 15''$ N., long. $95^{\circ} 20' 10''$ E.
 Also, that, on Panimpun, a *fixed red* light is exhibited, elevated 19 feet above the sea,
 visible 8 miles, this light is obscured by the land when bearing southward of S. 56° E
 The light is shown from an iron frame 15 feet in height.
 Approximate position, on Chart No. 219, lat. $5^{\circ} 52' 45''$ N., long. $95^{\circ} 20' 40''$ E.

RESOLUTION ON THE TRIENNIAL REPORT ON THE WORKING OF THE CHARITABLE DISPENSARIES IN BENGAL FOR THE YEARS 1893, 1894 AND 1895

MUNICIPAL DEPARTMENT—MEDICAL

Calcutta, the 9th November 1896.

RESOLUTION—No. 4146Medl.

Read—

The Triennial Report on the Working of the Charitable Dispensaries in Bengal for the years 1893, 1894 and 1895.

Read also—

The Triennial Report for the years 1890, 1891 and 1892 and the Returns for 1893 and 1894 and the Resolutions recorded upon them

The Triennial Report was due to Government on the 1st May, but was not submitted till the 14th September 1896, or more than four months after the proper date. It is explained that the delay occurred mainly in the compilation of the notes relating to each dispensary, which cover 110 pages of small print and merely reproduce in narrative form the facts recorded in the statistical tables annexed to the report. The Lieutenant-Governor agrees with the Inspector-General in thinking that these notes need not form part of the report in future.

2. *Number of Dispensaries*—The number of dispensaries rose from 310 in 1893 to 430 in 1895, but two of the latter were not opened, and one was closed during the year, so that the actual number was 427. These additions do not represent a real increase in the number of dispensaries, as the returns of several existing institutions, such as Lady Dufferin hospitals, cantonment hospitals, and dispensaries maintained by the Lligation Department, by State Railways and by Wards' Estates, have for the first time been incorporated in the returns for the Province. The statement below distinguishes newly-established dispensaries from those the returns of which have only now been included in the Provincial total—

Year	New dispensaries opened			Old dispensaries included		
	Class I	Class II.	Class III	Class I	Class II.	Class III
1893	...	15	1	10	...	10
1894	2	9	9	10	1	13
1895	...	28	2	1	2	6

The number of Class II or Local Fund Dispensaries has risen during the three years from 159 to 215, which, as the Inspector-General observes, shows a laudable desire on the part of local bodies to bring medical relief within easy reach of the people. Among local authorities the District Board of Faridpur is conspicuous for having opened five new dispensaries in 1895 and having decided to establish a dispensary at every police-station in their district. Several dispensaries nominally maintained from private resources are stated to be really managed by local bodies, and the Lieutenant-Governor agrees with the Inspector-General in thinking that these should now be formally transferred. The classification of eight dispensaries was changed, two dispensaries were closed, two were burnt down and one was removed from the Government list.

3. *Medical Officers in charge of Dispensaries*.—Of the 427 dispensaries included in the report, 229 were, during the year 1895, in charge of medical subordinates on the Government establishment, the rest being under men appointed locally. The Government medical officers included seven Military Assistant Surgeons in charge of the Dacca Mitford Hospital, the Eastern Bengal State Railway Dispensaries and the Cantonment Dispensary at Barrackpore, 70 Assistant Surgeons and 152 Civil Hospital Assistants. The Inspector-General remarks that the system under which the supporters of private and quasi-private institutions select their own medical officers, leads to the appointment of incompetent men, and suggests that Rule 9 of the Dispensary Manual should be amended so as to subject all such appointments to the approval of the Inspector-General of Civil Hospitals. The proposal should be separately submitted with an account of the specific instances upon which it is based.

4. *Inspections*.—The number of inspections made by Civil Surgeons rose from 267 in 1893 to 303 in 1894, and again to 343 in 1895. Although the number of dispensaries visited four times and over, as required by Rule 29 of the Dispensary Manual, rose from 100 in 1893 to 134 in 1894 and 141 in 1895, this represents only 39·38 per cent. of the total number of dispensaries. The distance of outlying dispensaries, and the duties of the Civil Surgeon at the jail and in the station, are put forward by some officers to excuse their failure to comply with the standing orders on this point. But the Inspector-General rightly observes that in most cases there is no reason why inspections should not be intelligently arranged by the Civil Surgeons, so as not to interfere with their other important work. The Inspector-General of Civil Hospitals inspected 17 dispensaries in 1893, 68 in 1894, and 28 in 1895. A scheme for the reorganization of the Sanitary Department is now under consideration, which will materially facilitate the inspection of dispensaries both by Civil Surgeons and by the head of the Medical Department.

5. *Management by local bodies*.—The number of dispensaries managed by local bodies was as follows during the last three years:—

		1893.	1894.	1895.
By Municipalities	...	117	118	123
„ District Boards	...	72	81	108

The Inspector General complains of the indifference of Managing Committees to the dispensaries under their charge, of their tendency to postpone necessary improvements and to undervalue the value of supervision, and contrasts the state of things prevailing in Bengal with the practice of the Central Provinces, where the medical officer receives co-operation from the Municipal Commissioners and his proposals for improvement are always carefully considered. The amendment of the Bengal Municipal Act which has recently been passed by the Legislative Council will greatly strengthen the position both of the Managing Committee and of the Civil Surgeon, and by increasing the funds available for expenditure on dispensaries will render it possible to introduce various reforms which have long been needed. The Lieutenant-Governor will be glad to consider any proposals which the Inspector-General may wish to make for amending the Dispensary Manual so as to render the control of the Civil Surgeon over all dispensaries in his district more effective than is at present the case.

6. *Patients.*—The following statement shows the number of in-door and out-door patients treated in the hospitals and dispensaries during the period under review, as compared with the statistics of the three previous years —

YEARS	In-door.	Out-door	Total treated.	Population of the Province	Ratio per cent of total treated to population
1	2	3	4	5	6
1893 .	40,589	1,885,939	1,926,528	70,665,427*	2.72
1894 ...	43,824	2,241,626	2,285,450		3.23
1895 .	45,243	2,134,536	2,479,779		3.51
Average 1893—95	43,218	2,187,367	2,230,585	70,665,427*	3.15
Average 1890—92	31,154	1,425,324	1,456,478	70,665,427*	2.06

* Including Calcutta, but excluding the Chittagong Hill Tracts.

The average attendance shows a steady increase from year to year, but, as the Inspector-General points out, the standard attained in other Provinces of Upper India has not yet been reached. The following table indicates the main points which have to be taken into account for the purpose of comparison —

	Number of dispensaries	Area of the Province in square miles	Square miles per dispensary	Population of the Province.	Population per dispensary	Number of patients treated.	Number of patients per dispensary.
1	2	3	4	5	6	7	8
Bengal .	427	151,543	355	70,665,427	165,493	2,479,779	5,807
Central Provinces	86	71,582	832	9,501,401	110,481	1,261,590	14,669
Punjab . .	257	110,667	431	20,860,913	81,171	3,260,617	12,687
North-Western Provinces .	315	107,503	341	46,905,085	148,905	4,017,195	12,753

It will be seen that Bengal has more dispensaries than any of the other Provinces, that each dispensary serves an area slightly larger than in the North-Western Provinces, and considerably smaller than in the Central Provinces and the Punjab; while owing to the greater density of the population in Bengal

each dispensary has, within this area, to provide for the wants of a larger number of persons. In other words, every dispensary in Bengal has within about the same distance 16,588 potential patients more than a dispensary in the North-Western Provinces, while within a much smaller distance it has 55,012 more than a dispensary in the Central Provinces, and 84,323 more than a dispensary in the Punjab. If the Calcutta hospitals and dispensaries were included, as they well might be, though as a matter of convenience their administration is dealt with in a separate report, the statistics would be somewhat more favourable to Bengal.

Primi facie, therefore, it might be expected that the average number of patients treated would be larger than in the other Provinces. The climate of Bengal is less healthy; there are more people to go to dispensaries, and they have, subject to the trifling exception noted above, not so far to go. In fact however, as the last column of the statement shows, the average number of patients treated at each dispensary in Bengal is less than half of the number treated in the North-Western Provinces and the Punjab, and not much more than a third of the number treated in the Central Provinces.

On this question the Inspector General, who has himself had experience of both the Punjab and the Central Provinces, expresses the following opinion:

"One of the chief causes of low attendance in Bengal is the large number of private practitioners and druggists' shops which exist in all parts of the province. Any one with a smattering of medical knowledge, and even without it, can and does set up as a private practitioner. There is absolutely no prohibition in this respect, and I believe there is actually a so-called Medical School in Calcutta which grants medical diplomas, although it has no charter and is not even affiliated to the University or to any recognized medical institution. The result is a flood of ignorant, indigent practitioners let loose amongst a prosperous population. This in itself is sufficient to account for a low attendance at the dispensaries. In other Provinces there are not so many private practitioners, and the people are poorer. Another reason why Bengal dispensaries are not as popular as they might be, is the quality of the subordinate medical officers in charge of them. There is a marked difference in this respect between the Subordinate Medical Establishment of Bengal and that of other Provinces, which no one who has had experience in other parts of India can fail to notice. In the first place there is undoubtedly a higher sense of discipline in other Provinces than seems to exist in Bengal, which probably is the root of the evil in the Lower Provinces, where, I am sorry to say, instances of malingering and other methods of shunning unpleasant duty are surprisingly common. With faults like these, subordinate medical officers can exercise little or no influence over the servants under them, and it all reacts on the attendance. Another factor in this connection is the supply of medicines, which is deficient in Bengal, as is also the attention bestowed by the medical officer on the patient. After all it is the doctor principally that makes a dispensary popular or the reverse. This is illustrated at Ranaghat, where at Mr. Munro's dispensary the daily attendance is 350, while at the Municipal dispensary it is less than 10. But how can a dispensary be popular when, as is generally the case in Bengal, the medical subordinate in charge of it closes the institution after a couple of hours' work in the morning, which he scamps, and does not put in an appearance again until the following morning. This is a common practice. And again, the supply of instruments and surgical appliances are altogether insufficient even in the larger hospitals. The beds also in most places are of the most uninviting description, and what bedding there is, is scarcely better than rags. A radical change in these respects is necessary before the Dispensary Committees can expect the people to go to hospital."

Among the causes enumerated by the Inspector-General of Civil Hospitals the first is believed to be peculiar to Bengal, where the practice of European medicine in some form or other has been long recognised as offering a ready means of livelihood to the English-educated middle class, and where, moreover, there is some reason to believe that the people generally have a special taste for cheap and specious remedies, especially if they can get them without the trouble of attending at a regular dispensary. To this may be added that, as was pointed out by Dr. Hilson in 1891, *kabirajes* and *hakims* are more numerous and have a higher reputation among the people in Bengal than in any other part of India. The discipline of the Subordinate Medical Establishment is a matter within the control of the Inspector-General himself and of the Civil Surgeons of districts. Rule 35 of the Dispensary Manual prescribes the minimum period of attendance for an officer in charge of a dispensary, and empowers the Managing Committee to extend the time. If the Inspector-General is of opinion that this rule should be amended, he should submit definite proposals on the subject. As regards the supply of medicines, surgical instruments and appliances, beds, bedding and

dispensary furniture, the minute inspection reports which have been laid before Government by the Inspector-General place it beyond a doubt that in many of the dispensaries maintained by local authorities the arrangements are so defective and the comfort of patients is so neglected as to deter people from availing themselves of these institutions except under extreme pressure. This is probably due in great measure to the peculiar provisions of the Bengal Municipal Act, which have had the effect of discouraging private liberality by merging dispensary subscriptions in the general Municipal fund, and have also hampered the action of the Commissioners by requiring all expenditure on dispensaries to be sanctioned at a special meeting. The Act as recently amended provides for a separate account being kept of dispensary income and expenditure; prohibits the diversion of these funds to any other purpose, and includes the maintenance of dispensaries among the regular duties of Municipalities. These changes in the law will now render it possible to introduce the reforms considered necessary by the Inspector-General.

7. *In-door patients.*—There has been a steady and continuous rise both in the number of in door dispensaries and the number of in-door patients treated at them, as shown in the following figures:—

Year			Number of dispensaries for in door patients.	Number of in-door patients treated
1893	163	40,589
1894	179	43,824
1895	187	45,243

The number of patients is still considerably less than it should be, for the average number of beds available during the three years under review was 2,768, while the daily average number of patients was only 1,757. The Lieutenant-Governor agrees with the Inspector-General in thinking that if the general standard of comfort were higher, and especially if suitable provision were made in the dispensaries and hospitals for the separate accommodation of patients of good castes and of their relatives attending on them, the number of in-door patients would be greater than at present. The introduction of pauper wards, like those established in the Central Provinces, in all the larger dispensaries, especially those on the main thoroughfares and on pilgrim routes, would also do much to increase the popularity of these institutions by removing objectionable patients from the ordinary wards. The attention of all Civil Surgeons and Dispensary Committees was drawn to this subject in the Resolution reviewing the Triennial Report on Dispensaries in Bengal for the years 1890 to 1892, and the Inspector-General should now proceed, in communication with Commissioners of Divisions, to arrange for the construction of such wards as funds are available. He should also consider whether in outlying dispensaries, where in-patients cannot be properly treated, the practice of receiving such patients should not be stopped and the funds thus set free expended on improving the arrangements for treating out-patients.

8. *Out-door patients.*—There was a satisfactory increase in the number of out-door patients treated at the dispensaries, the figures for the three years under review being 1,885,939 in 1893, 2,241,626 in 1894, and 2,434,536 in 1895, and the daily average attendance 13,732, 15,915, and 17,443 respectively. The number might still be greatly increased if, as observed by the Inspector-General, the arrangements for the treatment of out-door patients in Bengal were improved. Privacy in the dressing of wounds, separate waiting-rooms for females, the avoidance of delay in dispensing medicines, and regular attendance on the part of the officers and staff help greatly to attract patients, and the members of Managing Committees should bear these points in mind and assure themselves by frequent inspection that the rules are complied with. Much also depends on the personal exertions of the medical officer in charge. The increase in the number of out patients at the Noakhali dispensary from 9,593 in 1894 to 16,196 in 1895 shows what can be done in this way and does great credit to Surgeon Captain Grainger and Assistant Surgeon Ganga Gobind Sarkar. In dispensaries at the head-quarters of districts the Lieutenant-Governor believes that the number of out-door patients would be greatly increased if the Civil Surgeon were to visit the dispensary and see and prescribe for

all patients at certain regular hours, which should be formally notified throughout the district so that people may know when to attend. A general order will be issued on this point in consultation with the Inspector-General of Civil Hospitals.

9. *Diseases treated.*—The following statement shows the number of cases of the principal diseases treated at the dispensaries during the triennial period under review:—

Year	Small pox.	Cholera	Dysentery.	Malarial fevers	Diseases of the spleen	Skin diseases.	Diseases of the eye and ear
1	2	3	4	5	6	7	8
1893	91	8,077	42,607	408,043	78,848	800,185	196,524
1894	107	12,181	60,903	473,343	82,903	327,680	155,124
1895	104	11,407	59,787	525,300	101,734	358,930	178,835

Cholera, dysentery and malarial fevers were responsible as usual for the largest number of cases. Small-pox was very prevalent in 1895, owing, it is said, to the epidemic prevailing in Calcutta at that time having spread to other parts of the province. Although the admissions for cholera represent an insignificant fraction of the number suffering from the disease, it is satisfactory to find that the total number of cases treated during the last three years exceeded by 6,198 the number treated in the last triennial period. The number treated for diseases of the spleen corresponds with the increase in malarial fever, to which those diseases are due. Next to malarial fevers skin diseases contributed most largely to the number of cases treated.

10. *Surgical Operations.*—The total number of surgical operations of all sorts rose from 86,915 in 1892 to 119,776 in 1895. During the triennial period the increase has been regular, as the following figures show:—

		Major operations.	Minor operations	Total
1893	...	9,683	82,485	92,168
1894	...	10,912	94,366	105,278
1895	...	13,026	106,750	119,776
Total	...	33,621	283,601	317,222

Under recent orders of the Government of India, the distinction between major and minor operations has been abolished; but in the present report the figures have been treated as heretofore. Among Medical Officers, Surgeon-Lieutenant-Colonel R. Macrae performed the largest number (786) of major operations during the three years, amongst Military Assistant Surgeons, Mr. I. Burnett, of the Dacca Mitford Hospital, performed 944 operations; Babu Ram Kali Gupta, of Bankipore, heads the list of Civil Assistant Surgeons with 857 operations; and amongst Civil Hospital Assistants, Babu Nibaran Chandra Sen, of English Bazar, performed 407 operations. Among the dispensaries concerned, the Dacca Mitford Hospital shows the largest number of operations (2,452), followed by Gaya (1,842), Bankipore (1,488), and Chapra (1,373) respectively. The number of operations for cataract was 2,221 in 1893, 2,323 in 1894, and 2,727 in 1895. Although the number of operations is still much smaller than in the North-Western Provinces and the Punjab, still the increase is remarkable as compared with the figures of 1889, when only 926 operations were performed, and tends, so far as it goes, to bear out the opinions expressed by the present Inspector-General and by some of his predecessors, that cataract is as common in Bengal as in other parts of India. The number of minor operations increased from 82,485 in 1893, to 94,366 in 1894, and 106,750 in 1895.

11. *Sex of patients.*—The statement below shows the sexes of patients treated during the triennial period.—

	Men.	Women.	Children.	Total.
1893	1,118,591	299,187	508,750	1,926,528
1894	1,329,005	362,632	593,813	2,285,450
1895	1,453,786	398,994	626,999	2,479,779

The increase in the number of female patients is satisfactory, and the Lieutenant-Governor believes that a much larger increase may be looked for if

special arrangements are made for their accommodation. The proposal made by the Inspector-General for the modification of Statement IV, showing the class of patients treated in dispensaries, should be submitted separately for the consideration of Government.

12. *Income and Expenditure.*—The following table compares the income and expenditure of the dispensaries for the last three years:—

	1893	1894	1895
1	2	3	4
<i>Income.</i>			
	Rs A P.	Rs A P.	Rs A P.

Total Expenditure	5,86,365 11 10	6,96,101 9 11	7,50,911 12 8
Cash balance on 31st December	28,372 0 11	23,924 5 8	26,388 2 8

The difference between the opening balance of each year and the closing balance of the previous year is due partly to mistakes in the accounts submitted by Civil Surgeons, and partly to the opening or closing of dispensaries and the inclusion of existing dispensaries in the official returns. The income increased by Rs. 66,038-5-2 in 1893, Rs. 1,05,288-2-10 in 1894, and by Rs. 57,223-15-9 in 1895. The contributions from Government rose in 1893 and 1894, and again declined in 1895. Most of the increase in

1893 and 1894 occurred under salaries and was mainly due to the incorporation in the Provincial returns of the accounts of institutions in Class I which had not been brought on the Government list. The increase in 1894 under the head of special allowances given by Government was due to a grant of Rs. 6,600 to the Samastipur Dispensary for the construction of a building. The total income from local funds increased from Rs. 1,44,300-5 in 1894 to Rs. 1,80,619-2-7 in 1895, while the income from Municipal funds decreased from Rs. 2,04,464-7-5 to Rs. 1,89,153-7-6. Subscriptions from Europeans and Natives increased from Rs. 16,155-12-11 and Rs. 1,25,170-12-5 in 1892 to Rs. 21,202-6-3 and Rs. 2,02,786-11-4 in 1895, respectively. The increase in subscriptions has however not kept pace with the increase in the number of dispensaries, and there is reason to believe that the transfer of dispensaries to the control of local authorities, and the incorporation of their income in the general income of these bodies, has had the effect of actually reducing their receipts from private liberality. Thus in 1881 the income derived from subscriptions amounted on an average to Rs. 626 per dispensary, while in 1895 the average income from subscriptions of Municipal dispensaries was only Rs. 276, and that of dispensaries under District Boards only Rs. 166.

The total expenditure, excluding the sums invested, shows an increase from year to year. In 1893 the amount was Rs. 5,86,365-11-10, in 1894 Rs. 6,96,101-9-11, and in 1895 Rs. 7,50,911-12-8. The figures for the previous years were Rs. 4,74,853-15-6 in 1890, Rs. 4,78,441-4-7 in 1891, and Rs. 5,23,544-9-8 in 1892. In 1894 the expenditure on establishment rose for the reason mentioned above. Under the head of Diet there was an increase of Rs. 4,774-14-10 in 1893, of Rs. 1,688-1-1 in 1894, and of Rs. 340-9-10 in 1895. In paragraph 10 of the Resolution on the returns for 1894, the Lieutenant-Governor observed that the average cost per patient had declined from Rs. 39-7-2 to Rs. 38-9-11, and the Inspector-General was asked to ascertain whether undue economy in the matter of diet was not one of the causes which detract from the popularity of the dispensaries. The Inspector-General reports that this is not the case, and that the cost varies in different places according to the price of food-grains.

The cost of European medicines in 1893 was Rs. 80,940-7-3, in 1894 Rs. 1,08,070-0-5, and in 1895 Rs. 1,13,703-2-10. As was observed in the Resolution on the returns for 1893, it is expected that the expenditure on this head will in future show a decrease, if all the dispensaries in the province follow the system introduced in April 1894, of obtaining annually from Messrs. Burgoyne, Burbridge and Company of London, at wholesale prices, such drugs, instruments and medical necessities as cannot be better obtained in India, tinctures and other alcoholic preparations being procured from a leading firm of druggists in Calcutta. It is reported that in 1895 only 194 dispensaries had adopted this plan. It is clearly desirable that the practice of all dispensaries should be uniform, and as soon as the report on the subject promised by the Inspector-General is received the Lieutenant-Governor will be prepared to add a rule on the subject to the Dispensary Manual.

The total sums invested during the triennial period were Rs. 11,12,053-10-1 in 1893, Rs. 11,17,831-11-7 in 1894, and Rs. 11,80,243-6 in 1895, and the value of the securities sold or withdrawn was Rs. 18,535-1-7, Rs. 23,449-7-7, and Rs. 24,106 1-3, respectively.

13. During the greater part of the year 1893 the office of Inspector-General of Civil Hospitals was held by Surgeon-Colonel J. G. Pilcher. Surgeon-Colonel J. H. Newman officiated as Inspector-General for a period of four months in 1893, during the absence on leave of Dr. Pilcher. In November 1893, Surgeon Colonel R. Harvey took over charge of the office, and on his vacating it in March 1895, Surgeon-Colonel Ross was appointed Inspector-General. The thanks of the Lieutenant-Governor are due to Dr. Ross for the keen interest that he has taken in the details of dispensary administration, and for his efforts to render these institutions more attractive to the people whose needs they are intended to serve. Sir A. Mackenzie trusts that Municipalities and District Boards will recognise their obligations in this respect and will cordially co-operate with the Inspector-General in introducing the improvements which he recommends.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 9th November, 1896.

Burdwan.—Rainfall nil Weather hot and fair Standing crops suffering for want of rain throughout the district Cultivation of *rabi* also retarded Sugarcane doing well. Fodder and water sufficient. Condition of cattle good Common rice selling as follows:—

Srs.				} per rupee
Sadar	10 to 12	
Kalna	9½ to 10	
Katwa	...		11	
Raniganj	...		9 to 10	

Birbhum.—No rain Crops withering except on low lands Rice selling at 9 to 9½ seers per rupee

Bankura.—No rain. Hot days with cool nights and mornings *Amam* paddy on high lands becoming worse day by day Withering paddy plants are used as fodder in places Cultivation of *rabi* is stopped where artificial irrigation is not possible Fodder and water sufficient at present Cow pox still reported from Gungajalghati and Ondi Common rice selling at Bankura 11 seers and Vishnupur 12 seers per rupee

Midnapore—No rain during the week. Winter is setting in. *Amam* paddy is withering in some places for want of rain Cattle are said to have been let out to graze on the paddy crops in some places in Gurbeta thana Sugarcane and indigo doing badly *Rabi* crops are being sown in some places Cattle-disease reported from Naraingrah and Salboni police-stations Fodder and water sufficient Common rice selling as follows —

Srs.				} per rupee.
Sadar	9½	
Contai			12 to 13	
Tanluk	...		10	
Ghatal	10	

Hooghly—No rain throughout the district *Amam* is withering in places Rain required urgently *Rabi* cultivation going on Common rice sells from 8 to 11 seers per rupee. Estimated outturn of winter rice—Serampore and Uluberia 7 annas, Jahanabad 9 annas, Howrah 11 annas, and Sadar 6 annas—District average, 8 annas

Howrah.—Rainfall nil Weather seasonable Harvesting of jute and sowing of *rabi* almost over Rain badly wanted for *amam* rice Fodder and water sufficient Common rice sells from 8½ to 10 seers per rupee

24-Parganas.—Rainfall at Sadar nil, at Basirhat 35 fell on 4th instant Hot sun during day, cool at night. Rain in Basirhat has done some good. Estimate of winter rice 10 annas in the south and 8 annas in the northern half of the district Sugarcane poor *Rabi* sowings failing generally for want of moisture, except where lands can be irrigated for sugarcane and tobacco A large flight of locusts was observed in North Barasat, but no injury done Fodder and water-supply for cattle sufficient Prices abnormally high in the interior owing to want of grain stocks, and have risen slightly during the week Common rice selling as follows.—

Srs. c				} per rupee
Sadar	9 to 11 0	
Barasat	8 8	
Basirhat	9 0	
Diamond Harbour	9 10	

Nadia.—Rainfall nil. Days hot, nights and mornings cool *Amam* crop is withering. Prospects of *rabi* crops not favourable owing to continued drought. Common rice selling as follows:—

Srs.				} per rupee.
Sadar	9 to 10	
Kushtia	9	
Ranaghat	9	
Meherpur	10½	

Murshidabad.—Rainfall nil. Weather seasonable. Sowing of *rabi* continues. *Kalan* suffering for want of rain. Prospect of *aman* not favourable. Indigo and mulberry promising well. Rain much wanted for all standing crops. Fodder and water sufficient. Common rice sells as follows.—

				Srs. c	
Sadar	9 0	} per rupee.
Kalin	10 12	
Jangipar	9 0	

Jessore.—Weather warm during the day, cool at night. Prospect of *aman* bad. Rain badly wanted. No rain fell in any of the subdivisions except in Magura, where 2 rainfall reported. Lands continue to be prepared for *rabi* crops. Fodder and water sufficient. No cattle-disease reported. Insects have appeared here and there in the Narail subdivision.

Khulna.—Rainfall at Khulna 05. Weather fine and cool. *Aman* paddy suffering everywhere from want of rain. In south of Satkhira there will be practically no crop. No cattle-disease. Fodder and water sufficient. Common rice sells as follows.—

				Srs	
Khulna	7 to 9	} per rupee.
Bugorhat	8 1	
Satkhira	8	

Rajshahi.—No rain. Weather seasonable. Prospects of standing crops fair at Nator, but gloomy elsewhere. Sowing of *rabi* crops going on, but retarded for want of rain. No cattle-disease. Fodder and water sufficient. Common rice selling from 7½ to 10 seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Standing crops on low lands doing well, those on high land suffering for want of rain. Lands are being prepared for *rabi* crops. No cattle-disease. Fodder and water sufficient. Common rice selling from 8 to 9½ seers per rupee.

Jalpaiguri.—Rainfall nil. Weather seasonable. Steeping of jute nearly finished. Standing *hamanti* paddy needs moisture. Sowing of mustard, tobacco, and pulses going on. Fodder and water sufficient. Average price of common rice 8½ seers per rupee.

Darjeeling.—Rainfall nil. Weather seasonable. Hills—wheat, barley, and *aqham dhan* coming up, but *aman* will soon be harvested, *phaphur* flowering, *kalan* progressing favourably. *Tirai*—*Aqham dhan* ripening, prospects not good, *kalan* good. Coarse rice selling —

				Srs.	
Hills	5½ to 7	} per rupee
Tirai	7 to 8	

Rangpur.—No rain. Jute-washing and cultivation of land for winter crops going on. Prospects of standing *aman* fair, but rain is wanted. Mustard and tobacco are being sown. Fodder and water sufficient. Common rice selling at 10 to 12 seers per rupee.

Bogra.—No rain. Weather clear, cloudy sometimes. Winter rice doing well in low lands, it is suffering from drought on high lands. No cattle-disease. Fodder and water sufficient. Common rice sells at head-quarters 9 seers per rupee, and in the interior from 7½ to 10½ seers per rupee.

Pabna.—Rainfall nil. Harvesting of *aman* paddy commenced, 4 to 6 annas' crop expected. Rain required for *rabi* crops. Rice selling at 8 to 8½ seers per rupee. Fodder sufficient. Good ware becoming scarce.

Dacca.—Rainfall 17. Weather seasonable. Prospects of standing *aman* crop poor. Fodder available. No cattle-disease. Common rice sells at 8 to 9 seers per rupee.

Mymensingh.—Rainfall nil. Cool mornings and evenings. Lands under preparation for *rabi*. Prospects unfavourable. Outturn of *aman* crop not likely to exceed 8 annas. Price of common rice 7 to 8 seers per rupee.

Faridpur.—Slight rain at Sadar. Weather seasonable. No improvement in prospects of crops. The estimated outturn of the winter paddy crop is 8 annas. Common rice sells from 8 to 10 seers per rupee.

Backergunge.—Rainfall nil. Weather seasonable. Prospects of standing crops moderate, but suffering for want of rain. Cattle-disease reported from some places. Price of common rice (*aman*) varies from 7 to 10 seers per rupee. *Rabi* and (*aus*) from 8 to 13 seers per rupee.

Tippera. No rain since last report, nor improvement in crop prospects. Prices rising slowly, ranging from 8 to 10 seers per rupee. No fear of scarcity yet

Noakhali. - Prospects of *aman* bad for want of rain. Sowing of *rabi* crops commenced. No cattle disease. Fodder and water sufficient. Common rice sells from 9 to 10 seers per rupee

Chittagong — Rainfall nil. Weather dry and still warm. Paddy plants suffering from drought. Prospects not favourable. Water and fodder sufficient. Rice sells at 10 seers per rupee. Prices show a tendency to rise

Chittagong Hill Tracts (Lungleh) — Prospects of crops excellent.

Patna — Rain still urgently wanted for both rice and *rabi* crops in unirrigated areas. *Rabi* seeds germinating and doing so far well. Slight damage by locusts in some villages in Bihar than in Patna. Prices show some improvements. Common rice selling at 10½ seers per rupee in Patna to-day (9th instant). Fodder and water for cattle sufficient

Gaya — *Kharif* paddy promises an eight-anna crop. Prospects of *rabi* fair. Price of common rice 8 seers per rupee

Shahabad. — Weather slightly cloudy. Rice crop in unirrigated tracts nearly all dried up. Except in irrigated parts, *rabi* seeds not germinating well for want of moisture. Common rice selling at 8 to 9 seers per rupee

Saran — No rain. Prospects of rice crop bad. Sowings of *rabi* proceeding and crop germinating well, lands being largely irrigated. Sugarcane good. Canals open and doing much good. Cattle disease prevalent in parts of Gopalganj. Fodder sufficient. Prices are—common rice 9 seers, wheat 8 seers, barley 11 seers, *maka* 12 seers, gram 10 seers, *arhar* 11 seers, and *mo* 11 seers per rupee

Champara — No rain. *Rabi* sowings seriously retarded and drying up in many places. Lands being prepared against rain. No change in rice prospects, average outturn expected to be about 3 to 4 annas. Price of common rice risen from 11 to 12 seers per rupee, against average of 13 seers. Fodder and water sufficient. Test works opened in north of Bettiah subdivision, result not yet known

Muzaffarpur. — No rain. Prospects continue very bad. Rice on high lands dried up and being used as fodder. *Rabi* prospects also poor. Prices are—common rice 8 seers, wheat 8 seers, *maka* 12 seers, barley 12 seers, gram 10 seers, *arhar* 12 seers, and *mo* 15 seers per rupee

Darbhanga — Paddy attaining maturity on low lands, that on high lands dried up. Prospects of *rabi* gloomy. *Rahar* excellent. Common rice selling at 11 seers per rupee

Monghyr. — No rain. Weather seasonable. Paddy being out. *Rabi* being sown. Prospects rather gloomy. Cattle-disease reported from two villages in Begusarai. No want of fodder and water. Common rice sells as follows. —

			Srs	
Monghyr	..	.	8 to 9	} per rupee
Begusarai	10½	
Jamui	..		8 to 9	

Bhagalpur. — Weather seasonable. *Rabi* sowings about finished. Want of moisture in the soil preventing free germination, and insects have done much harm. *Agham* crops, except in low lands, not doing well. Cattle-disease in Pithapur and in Sadar. No want of fodder and water. Prices of common rice as below. —

			Srs	c.	
Sadar	..	.	10	0	} per rupee
Banka	10	0	
Supaul	11	0	

Purnea — No rain. Prospects of *agham* paddy on low lands fair, but on high lands the plants are suffering from drought, and will give a poor outturn. Sowing of *rabi* going on still. No cattle-disease. Fodder and water sufficient. Common rice 10 seers per rupee at Sadar, 9 seers at Kishanganj, and 11 seers at Araria.

Malda. — No rain. Weather seasonable. Prospect of winter rice very bad; outturn expected to be 4 to 6 annas. Sowing of *rabi* crops not yet finished for want of moisture. Coarse rice selling at 9½ to 11 seers per rupee. No want of fodder or water for cattle.

Sonthal Parganas. — No rain. Sky clear. Cool in morning and evening, hot in day. The weather has been cloudy with variable winds. Prospects of rice crop and *rabi* not improved.

Cuttack.—Rainfall nil. Weather occasionally cloudy, unseasonably hot. *Laghu* and *guru sarad* and *rabi* crops withering for want of rain in unirrigated tracts. In some places *laghu* being harvested. Condition of cattle fair. Fodder not sufficient in some places. Insects gradually disappearing. Rice is not easily available everywhere. Common rice selling at the following rates:—

			Sis. o	
Cuttack	11 13	} per rupee.
Kendrapara		...	14 7	
Jajpur	.	..	11 3	
Banki		...	(average) 15 1	

Balasore.—Days hot, nights cool. Sky cloudy from time to time. Rain badly wanted. Winter rice in ears withering in highlands. Late *sarad* will be more or less a total failure except where it is irrigated. Want of rain retarding *rabi* sowings. Fodder and water sufficient. Common rice selling at 11 and 13 seers per rupee at Sadar and Bhadrak respectively.

Angul.—No rain. Weather hot and dry. *Laghu* being reaped. Other crop prospects as reported last week. Coarse rice selling at 10 seers per rupee at Angul and 18 seers in the Khondmals.

Puri.—Weather still warm. Prospects of winter rice and *rabi* crops somewhat improved by light and partial showers of rain. Fodder sufficient. Condition of cattle good. Price of common rice 12 to 16 seers per rupee.

Lohardaga.—Days hot, nights cool. Reaping of *don dhan* commenced. Rice sells at 9 to 10 seers per rupee. Fodder and water sufficient. No cattle-disease reported.

Palamau.—No rain. *Rabi* is being grown in few places. What is left of winter rice is being reaped. No cattle-disease. Water and fodder sufficient. Coarse rice selling at about 8 seers per rupee.

Manbhum.—No rain. Weather seasonable. Prospects of the crops on the ground much the same as last week. Dried up rice on higher lands is being cut for fodder. Cattle-disease still prevalent in some villages about Raghunathpur and Goumangdi thanas. Fodder ample. Drinking-water sufficient at present. Common rice sells at Sadar 10 seers per rupee. Gobindpur report not received. Stocks of food-grains appear not to be large at present. Supply sufficient.

Singhbhum.—Rain will not benefit *dhan* now, but is needed for the little *rabi* there is. Total outturn of *dhan* nine annas. Price of old rice varies from 10 to 12 seers per rupee, new rice a seer cheaper.

General Summary.—With the exception of showers at Basulhat (24-Parganas), Magura (Jessore), Khalna, Dacca, Faridpur, and Puri, there was no rain in the Province during the week. The general agricultural prospects continue unfavourable. The winter rice, except in low or irrigated tracts, is withering. In some districts, it is reported, cattle are being turned into the drying rice-plants to graze. The *rabi* sowings are generally retarded for want of moisture, but where irrigation is available, the sowings are progressing and are so far doing well. In Cuttack the insects which had been infesting the rice-plants are gradually disappearing. Locusts have appeared in places in the 24-Parganas and Patna, but have done little or no damage. No cattle-disease is reported except from a few places in Bankura, Midnapore, Backergunge, Saran, Monghyr, Bhagalpur, and Manbhum. Prices are abnormally high and are still rising in many districts, but at Patna the price of common rice is reported to have fallen from 9 to 10½ seers a rupee.

By order of the Lieutenant-Governor of Bengal,

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of October 1896.

	Inches.	Date.	Hour.
The mean pressure of the month	29 876		
The average pressure of October from 24 years' registers ...	29 832		
The highest pressure in the month	30 050	26th	10
The lowest pressure in the month	29 654	0th	16
The range of pressure	0 396		
	Hours		
The total number of hours of bright sunshine during the month	299 3		
The maximum possible number of hours of sunshine ...	359 1		
	°		
The mean temperature of the month	80 5		
The average temperature of October from 24 years' registers .	81 5		
The highest temperature in the month	91 7	5th	
The lowest temperature in the month	69 4	21st	
The range of temperature during the month	22 3		
The mean daily range of temperature	15 8		
The greatest range of temperature in one day	19 4	19th	
	Per cent		
The mean humidity of the month	80		
The average humidity of October from 24 years' registers ...	79		
	Inches		
The mean vapour tension of the month	0 819		
The average vapour tension of October from 9 years' registers ..	0 854		
The mean cloud proportion of the month	0 80		
The average cloud proportion of October from 19 years' registers	3 84		
The total rainfall of the month	Nil		
The total rainfall indicated by a Beckley's self-registering rain-gauge (month of the gauge about 52 feet above the ground)	Nil		
The average fall of October from 48 years' registers	5 61		
The greatest fall in 24 hours	Nil		
	Days		
The number of rainy days in the month	Nil		
The average number of rainy days in October from 24 years' registers	10		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	144 3		
The mean difference of sun and air temperatures	55 5		
The greatest sun temperature	151 2	1st	
The greatest excess of sun over air temperature	61 9	14th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	66 9		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	6 2		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	8 2	20th	
	Miles.		
The mean movement of the wind per day	64 5		
The greatest movement of the wind in one day	131 0	30th	
The greatest movement of the wind in one hour	12 0	27th, 10 to 11 A.M. and 30th 10 to 11 A.M.	

The number of hours with winds from each of the 8 points—

N. 24, N.E. 0, E. 12, S.E. 3, S. 21, S.W. 333, W. 166, N.W. 110, Calm 75.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore 0 03 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0 8°; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0 6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 9th November 1896.

For Meteorological Reporter to the Govt. of India.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of October 1896.

		Inches.	Date.
The mean pressure at 10 A.M. during the month	...	29.989	
The mean temperature at 10 A.M. during the month	...	87.0	
The highest temperature during the month	...	94.0	5th.
The lowest temperature during the month	...	69.8	21st.
The absolute range of temperature during the month	...	24.2	
The mean daily range of temperature during the month	...	18.2	
The greatest range of temperature in one day during the month	...	21.5	20th.
The mean 10 A.M. humidity during the month	...	95	%
The mean 10 A.M. vapour tension during the month	...	1.222	Inches.
The total rainfall of the month	...	Nil.	
The greatest fall in 24 hours	...	Nil.	
The number of rainy days in the month	...	Nil.	Days.

O. LITTLE,

Meteorological Reporter to the Govt. of Bengal.

METEOROLOGICAL OFFICE, BENGAL,

The 9th November 1896.

The mean pressure of the seven days 29.945

The average pressure of the corresponding period for 24 years, Surveyor-General's Office 29.920

The total number of hours of bright sunshine 61.9

The maximum possible number of hours of sunshine 78.5

The mean temperature of the seven days 77.6

The average temperature of the corresponding period for 24 years, Surveyor-General's Office 78.2

The extreme variation of temperature 25.8

The maximum temperature 89.7

The highest velocity of the wind in one hour 10

The mean relative humidity 74

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office 74

The total fall of rain from 1st to 7th November 1896 Nil.

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.27

The total fall from 1st January to 7th November 1896 53.17

The average fall of the corresponding period for 24 years, Surveyor-General's Office 64.74

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

☁ dew; = fog.

PART I.

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT. GOVERNOR OF BENGAL.

No. 6058A.

GENERAL.—No 5955A.—The 19th November 1896.—Mr. P. C. Lyon, Officiating Director of Land Records and Agriculture, Bengal, is allowed furlough for one year, under article 340 (b) of the Civil Service Regulations, with effect from the 27th November 1896.

No. 5958A.—The 19th November 1896.—Babu Lalit Kumar Das, Deputy Magistrate and Deputy Collector, Dacca, is transferred to the head-quarters station of the district of Noakhali.

No. 5961A.—The 19th November 1896.—Babu Jadu Nath Sarkar, Deputy Magistrate and Deputy Collector, under orders of transfer to Purnea, is allowed leave for six weeks, under article 291 of the Civil Service Regulations, with effect from the 4th November 1896.

No. 5963A.—The 13th November 1896.—Babu Probath Nath Roy, Deputy Magistrate and Deputy Collector, on leave, is posted to the head-quarters station of the Purnea district.

No. 5965A.—The 19th November 1896.—Mr. G. Toynbee, Commissioner, Chota Nagpur Division, is allowed special leave for one month and thirteen days, under article 348 of the Civil Service Regulations, with effect from the 1st November 1896.

No. 5984A.—The 16th November 1896.—Mr. W. H. M. Gun, i.c.s., has been granted by Her Majesty's Secretary of State for India an extension of furlough for six months.

No. 5989 A.—The 16th November 1896.—Babu Bipin Bibari Pramanik, Deputy Magistrate and Deputy Collector, under orders of transfer to the Sirajganj subdivision in the district of Pabna, is allowed leave for twenty-five days, under article 291 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 7th September 1896.

No. 5993 A.—The 16th November 1896.—Mr. H. F. Matthews, I.C.S., reported his departure from India, on furlough, on the 17th October 1896.

No. 6013 A.—The 17th November 1896.—Mr. W. H. Lee, Officiating Magistrate and Collector, Puri, is appointed to act, until further orders, in the second grade of Magistrates and Collectors, with effect from the 12th November 1896.

No. 6010 A.—The 17th November 1896.—Mr. Birendra Chandra Sen, Officiating Joint-Magistrate and Deputy Collector, is posted to the head-quarters station of the Mymensingh district.

This cancels the orders of the 30th October 1896, appointing Mr. Birendra Chandra Sen to have charge of the Nator subdivision of the Rajshahi district, and transferring Mr. Satis Chandra Mukerjee, Officiating Joint-Magistrate and Deputy Collector, Nator, Rajshahi, to Mymensingh.

No. 6023 A.—The 17th November 1896.—Mr. A. Forbes, C.S.I., Commissioner, Patna Division, on furlough, is appointed to act as Commissioner, Chota Nagpur Division, during the absence, on leave, of Mr. G. Tuynbee, or until further orders.

No. 6028 A.—The 17th November 1896.—The following officers are confirmed as Magistrates and Collectors of the districts mentioned opposite their names :—

Mr. Umesh Chunder Batavyal, Officiating Magistrate and Collector, Bogra.

Mr. W. D. Blyth, Officiating Magistrate and Collector, Burdwan.

Mr. R. W. Carlyle, Officiating Magistrate and Collector, Darbhanga.

Mr. W. Maude, Officiating Magistrate and Collector, Pabna.

Mr. T. Inglis, Officiating Magistrate and Collector, Patna.

The following officers are confirmed as Deputy Commissioners of the districts mentioned opposite their names :—

Mr. H. Luson, Officiating Deputy Commissioner, Manbhum.

Mr. R. H. Renny, Officiating Deputy Commissioner, Palamau.

The following officers are confirmed as District and Sessions Judges of the districts mentioned opposite their names. —

Mr. Brojendra Coomar Seal, Officiating District and Sessions Judge, Birbhum.

Mr. H. R. H. Cox, Officiating District and Sessions Judge, Midnapore.

Mr. D. Cameron, Officiating District and Sessions Judge, Purnea.

Mr. G. Gordon, Officiating Additional District and Sessions Judge, Dacca, Jessore with Khulna, Backergunge and Mymensingh.

No. 6040 A.—The 17th November 1896.—Captain Charles Vincent M'Carthy Pritchard, Allahabad Volunteer Rifle Corps, Supernumerary List, is appointed to be Captain in the 1st Battalion, Calcutta Volunteer Rifle Corps, *vice* Captain A. T. Avetoom, resigned.

No. 6045 A.—The 17th November 1896.—Babu Sriish Chandra Mozoomdar, Sub-Deputy Collector, is appointed to act as a Deputy Magistrate and Deputy Collector until further orders, but to be employed on acquiring lands required for the Cuttack-Midnapore-Calcutta extension of the Bengal Nagpur Railway.

Babu Sriish Chandra Mozoomdar is vested with the powers of a Collector under Act I of 1894 in the districts of Midnapore and Balasore.

No. 6048 A.—The 17th November 1896.—Kumar Ramendra Krishna Deb, Deputy Magistrate and Deputy Collector, Serampore, Hooghly, held charge of that subdivision from the afternoon of the 28th August to the forenoon of the 17th September 1896.

M. FINUCANE,
Offg. Secy to the Govt. of Bengal.

NOTIFICATION—No. 4535L R

The 17th November 1896.—Under the powers conferred upon him by section 101 (2) (c) of the Bengal Tenancy Act VIII of 1885, and in supersession of Government Notification No. 794T R, dated the 21st September 1896, published at page 972, Part I of the *Calcutta Gazette* of the 23rd idem, the Lieutenant-Governor is pleased to order that a survey shall be made and a record of rights prepared in respect of all lands included within the five under-mentioned tenures appertaining to the Syedpur Trust Estate.—Mudafat Gura Das Muushia in Dihi Siromani, Mudafat Balaram and Bhairab Sen, Mudafat Sanp Darbesh and Golam Kadir, Mudafat Baburam and Bhagaban Ghosh in Dihi Siromani, pargana Moheswarpassa, and Mudafat Dip Chandra and Iswar Chandra Mazumdar in Dihi Pabla, pargana Khalispur, in Estate No. 188, district Khulna.

The particulars to be recorded in the survey and record of rights shall be the following —

1. Name of each proprietor, with the character and extent of his interest, situation, quantity and boundaries of proprietors' private lands.

2. The name of each tenant

3. The class to which he belongs, i.e. to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat or under-raiyat, and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.

4. The situation, quantity and boundaries of the land held by him.

5. Name of his landlord

6. The rent payable

7. The mode in which that rent has been fixed, whether by contract, by order of a Court or otherwise.

8. If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.

9. The special conditions and incidents, if any, of the tenancy.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

REVISED WATER-RATE RULES FOR THE SARAN CANALS.

No. 209 — Notification — In exercise of the powers conferred on him by sections 99 and 78 of Act III (B.C.) of 1876, the Hon'ble the Lieutenant-Governor proposes to make the following rules and to fix the undermentioned rates to be charged for water supplied under individual assessment from the Saran Canals during the *rabi* season of 1896-97 and the hot weather season of 1897, in addition to the rules in notification No. 201, dated 2nd November 1896, published in the *Calcutta Gazette* of 4th idem

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

IN Notification No. 110 of the 9th August 1880, issued under the provision of Act III of 1876, Government reserved to itself the rights of property in the water of the river channels known as the Daha, the Dhanai, the Gandaki and the Gangri, and their appendant tributaries, including the Rupan Chap Sota

2 The revenue administration of the Saran Canals is vested in the Superintending Engineer of the Sone Circle. The Executive Engineer of the Gandak Division is, as Canal Officer under the Irrigation Act [III (B.C.) of 1876], charged with the proper maintenance and management of the canals, and with the control of the supply of water in them. All orders passed by him, or by the Subdivisional Canal Officer, are under the terms of that Act subject to correction on appeal to the Collector of Saran.

3 The following rules will be applicable to all irrigation effected from the Saran Canals in the *rabi* season (1st November to 31st March) of 1896-97, or to the hot weather season (1st April to 13th July) 1897

4 Any person who wishes to make bunds in the canals must obtain the written permission of the Canal Subdivisional Officer before doing so

5. Any person who constructs bunds in the canals, who interferes with the supply of water in them, or who takes water from them without the written permission of a duly authorised person, will render himself liable to the penalties defined in the Irrigation Act.

6. Any person who requires water from the channels of the Saran Canals must apply either to (a) the Patrol, (b) the Sectional Officer, or (c) the Subdivisional Canal Officer, who will take his signature on the Form A attached. If the application is approved, the Canal Subdivisional or Sectional Officer (all of whom are hereby empowered in that behalf) will grant a permit for irrigation in Form B

7. Any person who holds a permit in Form B will be allowed to take canal water for irrigation, and he will be charged for it at the rates detailed in the following schedule.—

Schedule of rates for irrigation

Crop	Rate per Saran bigha		
	Rs.	A	P.
For indigo irrigated between the 1st November and 31st March	...	2	4 0
For indigo irrigated between the 1st April and 15th July	..	4	8 0
For other crops ditto ditto	...	3	0 0
For opium	..	1	8 0
For <i>rabi</i> crops irrigated between the 1st November and 31st March	0	12	0

These rates apply equally to irrigation by lift and flow.

8 Persons who take water from any of the river channels named in rule I, without a permit in Form B, and persons who waste the water, are liable to be charged water-rates, under sections 79 and 80 of the Irrigation Act, at rates which shall be fixed by the Subdivisional Canal Officer, but which shall not be greater than twice the rate which would have been payable for licensed irrigation

9 All water-rates assessed under rule 7 will be due on the following dates.—

For irrigation in the *rabi* season—5th April 1897.

For irrigation in the hot weather season—20th July 1897.

Water-rates assessed under rule 8 will be due as soon as the demand statement has been prepared.

10. The demand statements for water-rates due will be sent to the Collector as soon as possible after the irrigation in any village is completed, and a *parcha*, showing the area and amount assessed against each cultivator, will be sent to the rate-payer as soon as possible

11 Any claim for remission of water-rates under section 76 (b), or for compensation under section 76 (c) of the Irrigation Act, must be presented in writing to the Subdivisional Canal Officer at least twenty days before the crop is cut. The Subdivisional Canal Officer shall, after such enquiry as he may consider necessary, pass orders on the application. Any application for remission presented direct to the Collector must be forwarded for the orders of the Canal Officer.

12. Objections to the demand statements must be presented within thirty days of the date on which the *parcha* is issued by the Subdivisional Canal Officer. He will pass orders on such objections.

13 Any person who is not satisfied with an order passed by the Subdivisional Canal Officer may appeal to the Collector under section 91 of the Irrigation Act. Such appeal must be accompanied by a copy of the order appealed against, and it must be submitted to the Collector within thirty days of the date of the order.

14. Remission statements must be signed by the Divisional Canal Officer. Any statement so signed shall be sufficient authority for a refund by the Collector.

15. No guarantee can be given either as to the volume or duration of the supply, or of the delivery of any quantity of water at any particular point of any canal.

16. The Canal Officer will regulate the water passing into, and along, any canal to the best of his ability to meet requirements. If there is any difficulty in supplying all the channels, the Canal Officer will endeavour to divide the available supply as fairly as possible. The Canal Officer shall have complete control of the distribution of water.

FORM A.

Application for water, No.

Name of village

Name of channel

Date of application

We, the undersigned, hereby apply for water from the abovenamed channel for the irrigation of our fields, and we engage to pay, for the area actually found to have been irrigated, to the Canal Officer (or other person duly authorised in that behalf), the water-rates prescribed by the Lieutenant-Governor under the provisions of the Bengal Irrigation Act; and we further agree to abide by the rules issued under the Act —

The 8rd November 1896.

REVISED WATER-RATE RULES FOR THE SONE CANALS.

No 211.—*Notification.*—In notification No. 262, dated the 14th of August 1894, the Hon'ble the Lieutenant-Governor was pleased to pass certain rules concerning the Sone Canals and to fix certain rates to be charged for water supplied from those canals. In notification No. 28, dated the 28th January 1895, it was notified that it was intended to increase some of those water-rates. The rules which were passed under notification No. 262, dated the 14th of August 1894, contained provision for a class of leases having a currency of three years. That class of lease is no longer considered suitable. The Lieutenant-

Governor proposes to make the following alterations in the rules referred to in consequence of his determination to cease to grant such leases:—

A. D. McARTHUR, *Colonel, R.E.,*
Secy. to the Govt of Bengal.

(i) Rule 16 to read as follows:—

16. Applications under section 74 of the Act for permits for irrigation upon leases for a term of years (Appendix I), or upon *kharij* season leases (Appendix III), shall be subject to the following conditions:—

I.—The application must be for a block of land having well-defined boundaries and so situated that adjoining lands will not ordinarily or probably be irrigated by water supplied for the land included in the application.

II.—The application must be in the form annexed to these rules, which states that water-rates will be paid on all lands contained in the block for which an application is presented, whether or no water is required.

III.—The applications may be for a term of seven years, or for the season only:—

(a) In the case of applications for the season only, the issue of the permit will not necessarily be delayed until the lands have been measured. The boundaries of the block must be stated in the application, which must be signed by or by authority of the cultivators of all the land included in the boundaries mentioned, and the approximate area in the occupation of each on the block must be specified. Water-rates will be charged on the areas in the block as found by actual measurement.

(b) In the case of applications for a term of seven years, a permit will not be issued until the land has been measured and an application complete in every respect for all the land included in the block has been signed. If water is required to be supplied before the application is completely signed in the manner specified above, an application for water for the season must be made which will be cancelled on a permit for seven years being issued.

(c) Notice that a permit for seven years is required must be given by the 1st of April, and no permit will be issued unless the application is completely signed by the 30th of November, or, with the special sanction of the Superintending Canal Officer, by the 1st of March following. An application for a permit for the season must be filed by the 1st of September.

IV.—With the special sanction of the Superintending Canal Officer:—

(a) Existing leases for terms of three years may be cancelled and included in an application for a seven-year lease under the preceding rules.

(b) An application may be made for an addition to a seven-year lease, which, if granted, shall be considered as part of the original lease and terminate therewith.

(ii) Rule 22 to read as follows:—

22. Permits for irrigation upon leases for a term of years (Appendix VIII) or upon *kharij* season leases (Appendix IX) shall be issued under the following conditions:—

I.—The land to be irrigated must form a compact block defined by well-marked boundaries of such a nature as clearly to distinguish leased from the adjoining unleased lands, and also be so situated that unleased lands will not be ordinarily or probably irrigated by water supplied for the land included in the block. The boundaries must be mentioned in the application for a permit for the season, and in the notice referred to in Rule 16 (c), when a permit for a seven-year lease is applied for.

II.—The Canal Officer may exclude lands included in the block not irrigable by flow or for which canal water is ordinarily not required. In the case of permits for seven years, the block must be not less than 50 bighas in area. In cases where the Divisional Canal Officer considers it advisable to grant a permit to a block of less area than that mentioned above, the previous sanction of the Superintending Canal Officer must be obtained. No permit for seven years shall be issued unless the owners of the village channel from which water is to be obtained have been registered and the channel itself is in a good state of repair such as to fit it for the conveyance of water without wastage occurring. Such leases will not be issued unless it is known from the experience of previous years' irrigation that a sufficient supply of water is always available and that the quantity required is not excessive.

III.—A permit for a seven-years' lease may be cancelled by the Superintending Canal Officer with effect from a date to be specified in the order for good cause on the application of all the signatories thereto.

IV.—Permits for the season will be issued under less favourable conditions as to situation, soil, and the quantity of water available, it will not be necessary that the owner of the channel should be registered, but the channel itself must be entered on the register.

V—Water-rates will be levied on the areas of the blocks specified in the permits, and measurement of the areas actually irrigated will not be necessary.

(iii) In Rules 3 (I), 9 (VIII), 11, 12, 24 (II), 25, 31, 39, 50, 62, omit the two words "three or"

(iv) In Rule 42 omit the words "three-years' leases."

Further, the Lieutenant-Governor proposes to make the following alterations in the rules referred to in consequence of the increase he proposes to make in certain water-rates—

(v) In Rule 71 (a) change the words "1st of April 1892" into "1st of April 1897."

(vi) In Rule 71 (b) change the words "1st of April 1891" into "1st of April 1897"

(vii) Rule 72 will read as follows:—

SCHEDULE No. I.

Leases for a term of years

For water supplied between the 25th of June of one year and the 25th March of the next	FLOW OR LIFT.	
	Rate per bigha	Rate per tenth of a bigha.
1	2	3
For leases for seven years, all crops	Rs. A P 1 9 0	Rs. A P 0 2 6

Leases having a currency of seven years will be granted at the rate defined in this Schedule until and including the year 1903

(viii) Rule 73 will read as follows:—

SCHEDULE No. II.

Season leases (kharif)

	FLOW OR LIFT	
	Rate per bigha	Rate per tenth of a bigha
1	2	3
For water supplied between the 25th of June and the 25th of October for all crops	Rs. A P 2 3 0	Rs. A P. 0 3 6

(ix) In Rule 42 omit the five words "for bhadoi, &c., 1st November."

(x) Appendix IVB. to be omitted altogether.

(xi) Further, the Lieutenant-Governor proposes to alter Rule 47 by adding the following words to it:—

"All applications for compensation under section 76 (c) must be made not less than 20 days before the crop is cut."

And in Rule 46 to add the words "not less than" before the words "twenty days before the crop is cut."

(xii) In paragraph 2 of Appendix III omit the figures "1—14."

(xiii) In paragraph 2 of Appendix IVO alter the words "1st of January" into "25th of March."

RAILWAY DEPARTMENT.

The 17th November 1896

No. 138 — Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the construction of a branch railway from Segowhie, on the Tirhut State Railway, to Raxaul, in the district of Champaran, it is hereby declared that for the above purpose a piece of land measuring, more or less, 616 33 acres, is required in the villages of Segowhie, Sukulpakar, Mali, Japasugaon, Katkenwa, Bella, Chainpur, Bheriharia, Murula, Patui, Ramgarwah, Dhanhar Dehooly, Amoody, Uchudy, Harnahi, Gumcoria, Senbaria, Kanana, Karihar, Raxaul.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern

A plan of the land may be inspected in the office of the Resident Engineer, Segowhie.

No. 139 — Notification.—This Department Declaration No 75, of 16th June 1896, relative to the acquisition of land for the Jamosia station of the East Indian Railway, published at page 680, Part I of the *Calcutta Gazette* of 17th idem, is cancelled.

No. 140 — Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a waiting-shed at Purabsharai in the village of Jagalkita, pargana Monghyr, zilla Monghyr, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 cottahs 6 $\frac{7}{8}$ dhurs of standard measurement, bounded on the north by road, drain and road, on the south by Manji Sahu's mango tope, on the east by Manji Sahu's mango tope, on the west by railway line land, is required within the aforesaid village of Jagalkita.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

A plan of the land has been prepared. It is in the office of the Collector of Monghyr, and may be inspected by any one concerned.

No. 141 — Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up at the public expense for a public purpose, viz., for South Bihar Railway in the districts of Monghyr and Gaya, it is hereby declared that for the above purpose a strip of land of an average width of 250 feet, more or less, from Shaikhpara, passing through or near Derhgaon, to Worselyganj, is required in the villages named in the following schedule, of an approximate area in each case as therein stated —

Name of village	Area in acres	Name of village	Area in acres
1	2	3	4
<i>Monghyr.</i>		<i>Gaya</i>	
Hassainganj	4.48	Derhgaon	49.72
Darvishpur	22.52	Khakree	53.33
Dhanole	9.44	Kashichak	16.32
Kariho	15.03	Doulapur	7.62
Lachna	18.37	Chandmuma	24.70
Deokary	22.02	Noorichak	6.90
Dearah	11.13	Shaharganj	5.11
Senaurah	27.20	Bowree	63.48
Dhankaul	8.52	Booghwan	57.11
Kusmoha	27.96	Chandpur	5.56
		Chakhwa	31.27
		Saubarkha	10.01
		Gambhirpur	14.84
		Mohiuddinpur	21.19
		Simree	17.48
		Worselyganj	49.62
		Janglichak	0.57
		Ramjanchak	0.13

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the railway, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

No. 142.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up at the public expense for a public purpose, viz., for the South Bihar Railway, in the district of Monghyr, it is hereby declared that for the above purpose a strip of land of an average width of 100 feet, more or less, near the village of Sisianwan, is required in the village named in the following schedule, of an approximate area as therein stated:—

	Acres				
Sisianwan	1.37

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the railway, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

No. 143.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for additions and alterations to yard for Locomotive Department at Oudal, East Indian Railway, in the villages of Balooksoonda and Baksa, pargana Shergor, zilla Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 19 bighas 13 cottahs 12 89 chitaks of standard measurement (corresponding to 6 acres 2 roods 1.47 poles), bounded by a nick on the ground, is required within the aforesaid villages of Balooksoonda and Baksa.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

TREASURY NOTICE.

DEPUTY COLLECTOR BABU KFDAR NATH BISWAS has been placed in charge of the Nadia District Treasury and authorised to draw bills on other Treasuries

PURNA CHANDRA MITTER, *Personal Assistant, for Commissioner.*

COMM'R.'S OFFICE, PRESIDENCY DIVISION, CALCUTTA, the 9th November 1896

EDUCATION DEPARTMENT, BENGAL.

Subordinate Educational Service.

The 12th November 1896—Babu Siddheswar Banerjee, B.A., Third Master of the Sanskrit Collegiate School (class V), is allowed leave of absence for one year, under Article 371 of the Civil Service Regulations, in extension of the leave for eight months granted to him under the orders of the 14th February and 2nd April 1896, which is also commuted to leave under that Article.

The 17th November 1896—The orders of the 11th September 1896, transferring Babu Ram Das Mukerji, Sub-Inspector of Schools, Nadia, (class VI), to the 24-Parganas, and Babu Ram Dayal Guosh, Sub-Inspector of Schools, 24-Parganas (class VI), to Nadia, are cancelled.

C. A. MARTIN,

Offg. Director of Public Instruction, Bengal.

NOTIFICATION.

It is hereby notified for general information that on the results of the ensuing Entrance Examination being known, the five second grade scholarships allotted to the Rajshahi Division will be awarded to the best students in the division, irrespective of districts, and the nine third-grade scholarships will be distributed as follows:—

Rajshahi	2	Bogra	1
Dinajpur	1	Pabna	2
Jalpaiguri	1				
Darjeeling	1	Total	9
Rangpur	1				

Besides the above, there are two special scholarships, one of the second grade and one of the third grade, open to competition among all high schools in the Rangpur district.

P. NOLAN, *Commissioner.*

DARJEELING, the 28th October 1896.

Civil Engineering College, Sibpur.

Apprentice Department.

THE date for admission to this Department is 1st February 1897. Candidates must be at least 15, and not more than 17, years of age.

They must have passed standard VII of the Code for European Schools or the University Entrance Examination. They must submit their applications accompanied by a certificate of age and a certificate showing that they have passed the requisite standard so as to reach the Principal not later than the 6th January 1897. No application will be attended to after this date.

The number to be admitted each year is limited to 60, and applicants will be selected in order of merit.

Every applicant, before admission to the College will be examined by the College Surgeon as to his physical strength, chest measurement, fitness for manual labour, and eye-sight. If this officer's report is unsatisfactory, the applicant will not be admitted.

Before an apprentice is admitted to the College, his parent or guardian must sign an agreement in the form shown in Appendix A.

The session begins on the first Monday in February. All apprentices are required to join the College on that date. Any apprentice prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding Rs 10. No apprentice will be admitted or re-admitted to the College after the close of the month of February, except by special order of the Director of Public Instruction. This permission will only be given under exceptional circumstances.

There will be no vacancy on the free list for Christian apprentices in February next, but there will be seven on the reduced* fee list. For Natives there will be at least nine vacancies, possibly more, on the reduced† fee list.

These vacancies will be filled up after the opening of the session by the Board of Visitors from those apprentices who join the College. No guarantee can therefore be given beforehand, but forms to be filled up for the consideration of the Board can be had on application to the Principal.

J. S. SEATON, *Principal, Civil Engineering College*

SIBPUR, the 16th November 1896

NOTIFICATIONS OF THE BOARD OF REVENUE.

NOTICE—No. 2080B

AN examination of Patna provision opium of the season 1895-96 will be held at the New Opium Godowns, No. 14, Strand Road, Calcutta, on Monday, the 23rd November 1896, at 11 A.M. Merchants, dealers and others, interested in opium, are invited to attend. Samples of the opium examined will be given to merchants and dealers only, in small tins, if placed by them on the table, labelled with their names.

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Puri will be put up to sale at the Puri Collectorate on the 28th of April 1897, corresponding with 17th Bysack 1304 Umla —

Conditions of Sale

- 1st —The estate to be sold to the highest bidder above the upset price which will be fixed by Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity
- 2nd —The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities
- 3rd —If the amount of purchase money do not exceed Rs 100, the whole amount to be paid down at once.
- 4th —If the amount of purchase money exceed Rs 100, one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale

Copies are to be had at the Office of the Director of Public Instruction.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series including postage, Rs 22-8

	Without postage.	With postage.
	Rs A P	Rs A P
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately (inclusive of postage in India)		2 0 0
" part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India)		1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town	For mufussal
	Rs A P	Rs A P
For the Calcutta Series, per copy	0 8 9	0 10 8
" each of the Madras, Bombay, and Allahabad Series, per copy	0 5 3	0 5 0
" the Calcutta Series For the year	7 2 6	8 6 8
" each of the Madras, Bombay and Allahabad Series For the year	4 4 6	4 11 8

Persons desiring to subscribe for or purchase the Report should apply to—

- Superintendent, Government Press, Madras
- The Superintendent, Government Central Press, Bombay
- " Curator of Government Books, North Western Province and Oudh
- " Officer in charge, Bengal Secretariat Book Depot.

Orders and subscriptions for 1897 should be at once registered and remitted by money order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page	Half page	Quarter page
	Rs	Rs	Rs
For one issue	20	14	9
" three issues	55	36	21
" six "	100	68	41
" nine "	145	96	64
" twelve "	180	120	80

SEVERAL volumes of the **INDIAN LAW REPORTS**, from August 1886 to December 1875, and **FULL BENCH RULINGS**, Parts I and II, are available at the following rates:—

	Without postage	With postage
	Rs A P	Rs A P
Bengal Law Reports for one year	20 0 0	22 8 0
Single copies, Rs 2 per copy		
Full Bench Rulings, Parts I and II	20 0 0	22 8 0

Obtainable at the Bengal Secretariat Book Depot, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed.

1st.—Bay of Bengal and Bengal Daily Weather Report, giving meteorological observations taken at 61 stations on or near the coast of the Bay, and in Bengal and Assam, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by noon in Calcutta soon after midday. Price to subscribers in Calcutta Rs. 3 per mensem, payable in advance for six months.

This report will be issued every year from 1st May to 31st October. From 1st November again the Bay of Bengal Report containing observations taken at 28 stations will be issued up to 30th April.

2nd.—A Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 327 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal and Bengal Daily Weather Report, and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Summary.

C. LITTLE,

Offg. Meteorological Reporter to the Govt. of Bengal.

Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depot except for Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussal courts or offices and for those forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the SECRETARY, Office of the Legislative Department, Government of Bengal.

Copies are available for purchase at the Bengal Secretariat Book Depot.

Notice.

EASTERN ARCHIPELAGO—MAKASSAR STRAIT

Shoals in the southern part of the strait

THE British Admiralty has given notice (No. 598 of 1896) of the existence of the under-mentioned shoals in the southern part of Makassar strait —

A coral shoal about $3\frac{1}{2}$ cables in diameter, with $3\frac{1}{2}$ fathoms least water over it, and over 30 fathoms around, lies S 50° W. about $9\frac{1}{2}$ miles from Twee Vrienden sand bank, or approximately in lat $3^{\circ} 37'$ S, long $117^{\circ} 19\frac{1}{2}'$ E

Another coral shoal, with 5 fathoms least water over it, lies S. 19° W. about $6\frac{1}{2}$ miles from Twee Vrienden sand bank, or approximately in lat. $3^{\circ} 37'$ S, long $117^{\circ} 25' 10''$ E

AUSTRALIA—PORT CURTIS.

Decrease in depth of North Channel.

THE Port Master, Brisbane, has given notice (No. 22 of 1896) that the depth of water at the western end of the North Channel, Port Curtis, between the floating red light and the Junction Buoy, has decreased to $9\frac{1}{2}$ feet at low-water springs on the line of Oyster Rock and Gatcombe Head Lights.

A depth of 11 feet may be obtained by keeping close to the Junction Buoy, or at night by opening the line of lights slightly so as to pass 50 yards south of the floating light.

The depths in this part of the channel are subject to change.

Chart affected—N. 1900, Australia Directory, volume 2.

[Third Publication]

AUSTRALIA—TORRES STRAIT, INNER ROUTE.

Positions of Tannadice rock, west extreme of Bih reef and north extreme of Lansdown reef.

THE Portmaster, Brisbane, has given notice (No. 21 of 1896) that the correct positions of the following dangers have been ascertained and are supplied by Captain Howard, R.N., H.M.S. "Dart".—

Tannadice Rock is situated at the N.W. extreme of a shoal $6\frac{1}{2}$ cables long in a N.W. and S.E. direction and 4 cables broad, the depths on which vary from 3 to 7 fathoms. The depth on the rock is 5 feet at L.W.S., and it lies in the following position, viz:—

Latitude	12° 39' 52" S.
Longitude	143° 31' 18" E.

Restoration Rock bears N 59° W., distant $4\frac{3}{4}$ miles.

The western extreme of Bih (b) Reef lies in—

Latitude	12° 38' 30" S.
Longitude	143° 32' 00" E.

and has foul ground extending half-a-mile therefrom. The reef is not safe to approach.

The north point of Lansdown Reef has a depth of 2 fathoms on it, with 9 to 10 fathoms close to the northward, and is about a mile to the northward of its position on the chart, viz.—

Latitude	12° 48' 10" S.
Longitude	143° 33' 30" E.

From the north point—

Cape Direction summit (500) bears S. 12½° W., distant 4 miles;

Wye Reef Beacon, S. 85° E., distant $3\frac{5}{8}$ miles;

Chapman Island Summit, S. 37½° E., distant 6½ miles.

From the north point the reef trends S. 42° E, 6 cables; then S. 31° E., 1½ miles. Southward of this the reef is correctly charted.

Bearings are magnetic. The latitudes and longitudes are taken from the new Chart, No. 2920, published in June 1896.

Charts affected. Nos. 2920, 2921, and 2764; and Australia Directory, volume 2.

Pulo Weh (Wai) Exhibition of lights in Saban bay.

THE British Admiralty has given notice (No. 550 of 1896) that on 25th July 1896, the undermentioned lights were exhibited at Saban bay, Pulo Weh (Wai):—

Kelas island light, shown on the north-west point of Kelas island is *fixed white*, elevated 107 feet above the sea, visible between the bearings S. 72° E. and S. 4° W, from a distance of 15 miles in clear weather

The light is shown on an open iron framework 42 feet in height, coloured *white*.

The keeper's dwelling is of stone, with a *red* roof.

Approximate position, on Chart No. 219, lat 5° 52' 15" N., long. 95° 20' 10" E.

Also, that, on Panimpun, a *fixed red* light is exhibited, elevated 19 feet above the sea, visible 8 miles; this light is obscured by the land when bearing southward of S. 56° E

The light is shown from an iron frame 15 feet in height.

Approximate position, on Chart No. 219, lat 5° 52' 45" N., long. 95° 20' 40" E.

WEATHER AND CROP REPORT.

For the week ending the 16th November, 1896.

Burdwan.—Rainfall nil. Weather hot and fair. Prospects of *aman* crop not favourable for want of rain throughout the district. Sowing of *rabi* retarded. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows —

	Srs
Sadar	9 to 12
Kalna	9½ to 10
Katwa	11
Ranganj	10
	} per rupee.

Birbhum.—No rain. Harvesting of *aus* completed, outturn 6 to 8 annas. *Aman* withering except on low lands. Rice selling at 9½ to 10 seers per rupee.

Bankura.—No rain. Cold weather has set in. State of *aman* paddy continues bad. Prospects of *rabi* also gloomy. Fodder and water sufficient for the present. Cow-pox still reported from Gangajalghati. Common rice selling at 12 seers per rupee both at Bankura and Vishnupur.

Midnapore.—No rain. Weather seasonable. Paddy crops on high lands of Contai and Ghatal are withering. In Sadar considerable damage done to high lands, especially in the north-west. The standing crops are ripening fast and are being cut in places. Sugarcane

and indigo doing fairly well. *Rabi* crops are still being sown and are germinating fairly. Cattle-disease reported from Naraingarh, Binpur, and Garhbeta police-stations. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	...	9
Contai	..	12 to 13
Tamluk	..	9
Ghatul	..	10

} per rupee.

Hooghly.—No rain throughout the district. *Aman* is withering in places. Rain required urgently. *Rabi* cultivation going on. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Harvesting of jute and sowing of *rabi* almost over. Cutting of *aman* rice on high lands commenced. Rain badly wanted for *aman* rice. Fodder and water sufficient. Common rice sells from 8½ to 10 seers per rupee.

24-Parganas.—Rainfall nil. Weather hot in the day and cool at night. In south of the district winter rice is estimated to yield 10 to 12 annas, elsewhere 8 annas. *Rabi* sowings progressing slowly owing to want of rain. No cattle-disease. Fodder and water-supply sufficient. Common rice sells as follows.—

	Srs.	c	
Sadar	...	8½ to 11	0
Barasat	..	8	8
Basurhat	..	9	0
Diamond Harbour	...	9	10

} per rupee.

Nadia.—No rain. *Aman* paddy suffering everywhere for want of rain. Estimate of winter rice only 2½ annas in the district. Prospects of *rabi* crops bad. Fodder sufficient. Water-supply diminishing daily. Common rice sells as follows.—

	Srs.	
Sadar	...	9 to 10½
Kushtia	...	9
Ranaghat	..	9½
Mohorpur	...	8 to 9

} per rupee.

Murshidabad.—Rainfall nil. Weather seasonable. Prospect of *kharif* is not good. *Rabi* crops suffering and sowing retarded for want of rain. *Aman* withering in some places. State of sugarcane, indigo, and mulberry seems good. Fodder sufficient. Common rice sells as follows.—

	Srs.	
Sadar	..	10
Kandi	...	10
Jangipur	...	9

} per rupee.

Jessore.—Rainfall nil. Weather hot during day, cool at night. Prospect of *aman* is gloomy except in the low *beels* of Narail. Fodder and water sufficient. No cattle-disease reported except from thana Magura. Common rice sells as follows.—

	Srs.	
Sadar	..	8 to 9
Jhenida	...	9
Magura	...	8½
Narail	...	9
Bongaon	...	8½

} per rupee.

Khulna.—Rainfall nil. Weather fine and cool. *Aman* paddy and other crops suffering from want of rain. In south-west of the district there will be a total failure of *aman* paddy, the only crop grown there. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Khulna	...	7 to 9
Bagerhat	...	8
Satkhira	...	8

} per rupee.

Rajshahi.—Rainfall at Naugaon '18; no rain elsewhere. Prospects of standing crops not good. Estimated outturn of winter rice—Sadar 4 annas, Nator 5 annas, Naugaon 8 annas. Sowing of *rabi* crops still continues. No cattle-disease. Fodder and water sufficient. Common rice sells from 7 to 10 seers per rupee.

Dinajpur.—Average rainfall 15. Standing crops on low lands doing well, those on high lands suffering for want of rain. Lands are being prepared for *rabi* crops. No cattle-disease. No complaint of fodder and drinking-water. Common rice selling at 8 to 9½ seers a rupee.

Jalpaiguri.—Rainfall '01. Weather seasonable. Prospect of *haumanti* paddy is not favourable for want of rain. Sowing of *rabi* crops going on. Fodder and water sufficient. Average price of common rice 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar 31, Kurseong 60, Siliguri 09, Kalimpong 28. Weather seasonable. Hills—*agham dhan*, *bara marua*, *kalai*, and *bhutmas* being harvested, *phaphur* and *tori* flowering; wheat and barley coming up. Terai—*Agham dhan* coming to maturity, mustard, *kalai*, and potatoes being sown. Coarse rice selling as follows, —

				Srs.	
Hills	5½ to 8	} per rupee
Terai			.	7 to 8	

Rangpur.—Average rainfall 11. Sowing of winter crops continues. *Aman* is in ears in places. The hail-storm which occurred on the 13th is reported to have done some damage to crops in the southern portion of the Gaibanda subdivision. Prospects otherwise fair. Fodder and water sufficient. Common rice selling at 8 to 10½ seers per rupee.

Bogra.—Hail-storm in thana Khetlal on 13th instant. Rainfall 20. Reaping of winter rice has commenced. Expected outturn 12 annas all round. *Rabi* sowings in progress. No cattle-disease. Fodder and water sufficient. Price of common rice (now) at headquarters 9½ seers per rupee.

Pabna.—Rainfall nil. Weather cooler. *Rabi* crops are withering. Winter rice is being harvested. Prospects are gloomy. Wells and tanks are drying up. Fodder available. Rice at Pabna selling at 9½ seers and at Shajganj at 7½ seers per rupee.

Dacca.—Rainfall nil. Weather hot. Prospects of standing *aman* crop gloomy. Fodder available. No cattle-disease. Common rice sells at 8 to 9 seers per rupee.

Mymensingh.—Rainfall nil. Mornings and evenings cool. *Rabi* crops are being sown. Sugarcane being pressed. Rain wanted. Probable outturn of *aman* 8 annas. Price of common rice 7 to 8 seers per rupee.

Faridpur.—No rain. Weather hot in the day, cool at night. Prospects of crops unfavourable. Land is being prepared for winter crops. Common rice sells from 8 to 8½ seers per rupee. Considerable quantities are being imported into Goalundo subdivision.

Backergunge.—Rainfall nil. Mornings and evenings cool. Prospects of standing crops poor on high lands and average on low lands. No cattle-disease. Price of common rice (*aman*) ranges from 6½ to 9 seers and (*aus*) from 8 to 11 seers per rupee.

Tippera.—About half-an-inch of rain fell in Brahmanbaria subdivision, no rain anywhere else. Paddy on high lands withering. Prices rising slowly. Rice sells from 8 to 10 seers per rupee. No fear of scarcity yet.

Noakhali.—Prospects of *aman* crop bad for want of rain. No cattle-disease. Fodder and water sufficient. Price of common rice from 9 to 10 seers per rupee.

Chittagong.—No rain. Weather dry and still warm. Paddy plants suffering from unusual drought. Prospects unfavourable. Water and fodder sufficient. Sporadic cattle-disease reported. Rice selling from 8 to 10 seers per rupee.

Patna.—Paddy ripening. *Rabi* has germinated well. Opium seedlings doing well. Rain urgently wanted for *rabi* crops. Damage by locusts previously reported insignificant. Prices beginning to rise again, exportation having recommenced. Common rice selling at Patna 10 seers per rupee. Test works have been opened, but are not largely attended. Fodder and water for cattle sufficient.

Gaya.—*Kharif* paddy promises an eight-anna outturn. Most of *rabi* lands sown. Prospects very fair.

Saran—No rain *Rabi* sowings far advanced and crop germinating well. Sowing of poppy begun. No further reports of cattle-disease received. Fodder sufficient except in Gopalganj. Locusts have done considerable damage in twenty villages in Sadar subdivision. Prices are—common rice 9 seers, wheat $8\frac{1}{2}$ seers, barley $11\frac{1}{2}$ seers, *mahun* $12\frac{1}{2}$ seers, gram 11 seers, *ahar* $11\frac{1}{2}$ seers, and *maua* 15 seers per rupee.

Champan.—No rain. Prospects unchanged. *Rabi* sowings making little progress. Prices risen. Common rice sells at 9 seers per rupee, against 10 seers (last week) and average $17\frac{1}{2}$ seers. Fodder and water sufficient. Two tent works opened in north of Bottiah subdivision. Number employed on Saturday (14th)—Men, 705, Women, 444, Children, 268. Gratuitous relief nil.

Dairbhanga—Rain urgently wanted for *rabi* and tobacco. Paddy attaining maturity. *Rabi* doing well at present.

Monghyr.—Rainfall nil. Weather seasonable. Prospects of sugarcane good. *Rabi* sowings in some places over. Rain needed for *rabi*. Cattle-disease reported from interior of Begusarai. Fodder and water sufficient. Prices of common rice.—

	Srs	
Sadar	8 to 9	} per rupee
Begusarai	10	
Jamui	8 to 9	

Bhagalpur.—Rainfall nil. Weather seasonable. *Rabi* sowings nearly finished. *Aghni* harvesting has commenced. No want of fodder and water. Some cases of cattle-disease in Banka and Kotoria and in Sadar subdivision. Common rice sells as below —

	Srs.	c.	
Sadar	10	0	} per rupee
Banka	10	0	
Mudhipura	10	0	
Supaul	11	8	

Purnea.—No rain. An eight-anna crop of winter rice expected. *Rabi* being sown. Mustard in flower. Rain now would damage early mustard, but benefit other *rabi* crops. No cattle-disease. Fodder and water sufficient. Prices of common rice —

	Srs	
Sadar	10	} per rupee
Kishanganj	8	
Araria	11	

Malda.—No rain. Weather getting cool. Harvesting of early winter rice commenced, 4 to 6 annas crop expected. Wheat and other *rabi* crops in Kaliachak and English Bazar thanas are being injured by insects for want of rain. Ordinary rice is selling at 10 to 11 seers a rupee. No want of fodder and water.

Sonthal Parganas.—No rain. Weather cloudy and warm in day. Dews scanty. Common (new) rice 8 to 13 seers, average 11 seers; Indian-corn 12 to 20 seers, average 15 seers per rupee.

Cuttack.—Slight showers of rain in some places, not enough to affect outturn of crops, which are withering for want of moisture. *Laghu* rice being harvested. *Guru sarad* in ear. Insects disappearing. Food-grains not easily available in places. Condition of cattle generally good. Fodder not sufficient in some localities. Common rice sells as follows:—

	Srs.	c.	
Cuttack	11	13	} per rupee
Jajpur	11	13	
Kendrapara	14	7	
Banki	15	12	

Balasore.—Weather seasonable. Sky occasionally cloudy. Slight rain on the 9th in a few villages near Balasore. No change in state or prospects of crops. *Rabi* sowings retarded for want of rain. Fodder and water sufficient. Common rice selling at 11 and 13 seers per rupee at Sadar and Bhadrak respectively.

Angul.—Weather hot and dry. *Laghu* paddy has been reaped. *Sarad* paddy ripening. *Bur* being gathered; *kasu* in seed; both these very poor from want of moisture. Crop prospects much the same as previously reported. Condition of cattle fairly good. Coarse rice sells at 16 seers per rupee in Angul and 18 seers in Khondmals.

Puri.—Slight rain in parts of the district, but more wanted badly. Weather occasionally cloudy. Prospects of crops much the same as last week. Fodder sufficient. Condition of cattle good. Price of common rice 11 seers per rupee in the Chilka and 12 to 16 seers elsewhere.

Hazaribagh.—Weather hot in day; cold at night. No prospect of rain. Prospect of paddy crop 2 to 8 annas. Rice sells at 7½ to 9 seers per rupee.

Lohardaga.—Reaping of *don dhan* continues. Rain badly wanted for *rabi* crops. Rice sells at 9 to 10 seers per rupee. Fodder and water sufficient. No report of cattle-disease.

Palaman.—No rain, but it is urgently needed for sowing *rabi*. Water and fodder still sufficient. Common rice sells at about 8 seers per rupee at Sadar.

Manbhum.—No rain. Weather seasonable. Prospects of crops on the ground remain unchanged. Dried up paddy plants still being out for fodder. Cattle-disease still reported from three thanas, but appears to be decreasing. Fodder and drinking-water sufficient for the present. Common rice sells at 9 to 11 seers per rupee at Sadar and at 8½ seers at Gobindpur. Supply of food-grains at present sufficient.

Singhbhum.—Rain still holding off. The paddy outturn of this district is 10 annas. *Rabi* not doing well. Old rice sells at 11 seers per rupee, and new 1.00 at 12 seers.

General Summary.—There was some rain in Northern Bengal and in parts of Orissa, and also in the Brahmanbaria subdivision of Tippera. It is said to have been insufficient to benefit the rice crop, and prospects remain generally unaltered. In Rangpur and Bogra the rain was accompanied by hail, which did some damage to the crops, but in these two districts the prospects of the winter rice crop are reported to be fair. In Saran locusts have done considerable damage. The *rabi* crops are reported to be germinating well in Northern Bengal and in Patna, Gaya and Saran; elsewhere the prospects of these crops are unfavourable. Cattle-disease is still reported from a few places in Bankura, Midnapore, Monghyr, Bhagalpur, and Manbhum. Prices continue very high, but, except in Patna and Champaran, there has been no material rise since last week. In Patna and Champaran and the Bhabua subdivision of Shahabad test works have been opened, but in Patna they have not been largely attended. In Champaran the number employed on the 14th was—men 705, women 444, and children 268.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,

The 17th November, 1896.

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal

Bengal for the month of October 1896.

Table of Rainfall recorded at Stations

[illegible]

in Bengal in October 1896—concluded

[illegible]

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF OCTOBER 1896.

THE weather in Bengal during October may be described in a few words. There has been very little tendency for the pressure distribution to assume the cold weather appearance, there has been, as in August and September, an entire absence of cyclonic storms in the Bay: the rainfall which almost entirely ceased in the middle of September has never been renewed, except to the extent of a few light showers in the east and north of the province, chiefly in North Bengal, in the hill districts also westerly winds have prevailed with unusually high day temperatures and comparatively cool nights.

From the absence of cyclonic storms and rainfall, it may be seen that settled weather has prevailed over the whole province, and that the changes in the various meteorological elements have been as a rule small and such as occur during settled weather. Conditions from day to day have shown almost identical though abnormal features, and the description of weather for one day in Bengal might almost be taken for that of any other day in the month.

One peculiarity in the pressure distribution has been the high readings in the Circars and Orissa, and as these belonged to a high pressure area over Central India, they have been attended by westerly winds of daily occurrence across the west and centre of the province. These winds being land winds from a highly heated tract of country, day temperatures were several degrees above the normal day after day with a short interruption in the early part of the month. On the other hand, the nights being cloudless and still, greater radiation of heat than usual occurred, and the night temperatures were frequently from 3° to 4° below the normal, especially in the west of the province. The extent to which the range of temperature has at times varied from the normal is shown by the mean maximum and minimum temperatures for the month. In South Bihar and the greater part of Chota Nagpur the mean maximum temperature was 5° to 6° above the normal. This excess diminished towards the east and south, but is less than 2° at a few eastern stations only. The greatest defect in minimum averages is 3° in South-West Bengal, and generally defect is from 1° to 2° . The average increase of range is therefore 5° over a great part of the province.

Rainfall during October being caused by the cyclonic storms which form in the Bay and move in a northerly or north-westerly direction into Bengal, the causes of the non-occurrence of these storms are intimately connected with the failure of rainfall. An investigation of such causes cannot be taken up in a report of this nature, because they probably depend on the condition of the higher levels of the atmosphere which can only be guessed at. On the two occasions when disturbances appeared to be beginning, there was nothing to show that in the early stages of their development there was anything unusual, but the shallow depressions soon disappeared without having moved far from the south or south-east of the Bay where they began.

At the beginning of the month pressure was a tenth of an inch above the normal in the Circars, between $\cdot 05$ and $\cdot 1$ inch in the west, and nearly normal in the east of the Bay, while over Bengal there was a small excess. Readings were very uniform, but lowest in the north of the province and in Burma. A fall of pressure which began rather rapidly in Bihar on the 1st continued moderately over both the Bay and the province on the 2nd. Being followed by a moderate rise in Bengal and slow downward changes in the south-east of the Bay, a shallow depression appeared over Lower Burma and the adjacent sea. This appearance of a depression was more marked on the 5th, when readings varied from 29.83 inches in Madras to 29.69 inches in the south of Burma. As winds were cyclonic and steadily increasing in strength at the Burma stations, there was every prospect that the depression might move across the north of the Bay and give rise to the unsettled weather usual under such circumstances. Probably owing to the relatively high pressure over the Indian Peninsula, the depression moved northwards over Burma, and soon became diffused. By the 9th the distribution was again nearly normal.

The weak current of moist air which followed the depression northwards over Burma caused cloudy weather and light rain as far north as Assam, and extended to parts of East and North Bengal. The falls in these districts, however, were all inconsiderable.

The steady rise of pressure between the 8th and 12th restored the distribution to what it was at the beginning of the month. It was again high in the Circars and moderately high elsewhere, and it remained so with but slight variations till the 19th, when a second shallow depression appeared in the south-east of the Bay. This was due much more to a brisk rise of pressure in Bengal than to the slight fall in Burma. The depression remained diffused on the 20th, and on the following day it had almost entirely disappeared.

By this time pressure had become highest in Assam and northerly winds had extended over North Bengal, but the high pressure in Central India remained unaltered and prevented these northerly winds becoming general in Bengal. In consequence the prevailing wind direction was still west or south-west, and day temperatures remained from 3° to 6° above the normal. The interaction of the north-easterly winds from Assam with the westerly winds

prevailing over a great part of the province gave rise to cloudy showery weather in North Bengal, chiefly in the hill districts. The falls were almost always light and usually local, but a few reports of between one and two inches were received. From the 21st to the end of the month there was no change of any importance. Pressure remained high and underwent the small oscillations usual in settled weather, and south-westerly winds continued with high day temperatures except in North Bengal, where the north-easterly winds were still causing cloudy weather and light scattered showers over the hills.

Pressure was steadily above the normal, at times by considerable amounts, except for a few days at the end of the first week, while the first shallow depression was lying over the south of Burma and the east of the Bay. The defect appeared in Lower Burma on the 3rd, and while gradually increasing extended westwards over the Bay. When the depression was deepest, defect varied from 0.5 inch in the Circars to 2 inch in the south of Burma. By the 9th there was very little defect, and as the steady rise continued the high pressure distribution was again restored, and remained a marked feature of the weather till the end of the month.

Average pressure for the whole month was very nearly 29.9 inches at all stations. Over a great part of the province it was just under that amount, and it was only at a few outlying stations that it was over. The mean excess varied from .05 inch in Orissa and Chota Nagpur to .02 inch in Bihar.

Temperature—As stated above, day temperature has been almost steadily above the normal by amounts increasing from the east westwards and at times by almost as much as 10° in Bihar and Chota Nagpur. At the same time night readings have been as regularly below the normal, but only by a few degrees. Mean day excess for the month varies from 7° in South Bihar to 1° in the eastern half of East Bengal, and the night defect is from 2° to 3° except in Chota Nagpur and parts of North and East Bengal, where the average night temperature is very nearly normal.

In consequence of the excess during the day being partly neutralised by the defect at night, the mean temperature for the whole month varies by only 1° or less from the normal in Bengal Proper, and in the western districts mean excess is under 3°. The means for the larger divisions are above the normal by about half a degree in Lower Bengal and Orissa, by 1° in North Bengal, and nearly 2° in Bihar and Chota Nagpur.

Rainfall—Practically no rain fell except in a part of Oris a near the coast and in East and North Bengal. There were occasional inconsiderable showers in Bihar and South-West Bengal, giving an average of .05 inch over the whole area of the divisions, and in Orissa the average was only .11 inch. In East Bengal there was .49 inch, and in North Bengal, chiefly because of showers in the hills, slightly more than 1 inch.

Most of the stations in the Cooch Bihar, Jalpaiguri and Darjeeling districts received between 2 and 5 inches, and a few in the extreme east of East Bengal had more than 1 inch. In other parts of East and North Bengal the total fall was less than 1 inch and frequently less than half an inch.

The following table gives a comparison between the actual monthly and total rainfall and the normal rainfall of the province up to the end of October in the same form as has been employed in the previous monthly abstracts of the present year. The figures represent the ratio of the rainfall of each month of the present year to the normal rainfall expressed as a percentage. The table thus gives a condensed summary of the rainfall data of the year for each meteorological division. The first ten columns give the percentage amount of rainfall received in each month, and the last column the percentage rainfall of the whole period from the 1st of January to the end of October.—

METEOROLOGICAL DIVISIONS	January	February	March	April	May	June	July	August	September	October	Actual rainfall of last ten months of 1896 expressed as a percentage of the normal fall for the period
South-West Bengal	31	18	18	36	97	128	95	71	56	1	83
North Bengal	4	5	2	63	112	49	106	39	109	26	78
East Bengal	18	110	13	91	115	99	72	10	114	9	80
Bihar	16	5	0	26	102	84	85	75	75	2	74
Orissa	3	0	50	21	78	162	131	128	85	2	104
Chota Nagpur	6	9	0	0	49	139	112	89	65	0	87

The following table gives full data for the comparison of the actual and normal rainfall of the month of October in all districts of the province. The figures are obtained in the manner explained in previous monthly summaries. The first column gives the average district rainfall as determined from the rainfall observations of the past 26 years, the second column gives the actual district rainfall as determined from the actual weighted rainfall of the month at the reporting stations in the district; the third column expresses the ratio of

the actual district rainfall to the normal as a percentage, and the fourth the same information in a slightly different form:—

Percentage Table for October 1896.

The mean pressure of the seven days	Inches
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29.930
The total number of hours of bright sunshine	Hours.
The maximum possible number of hours of sunshine	63.9
The mean temperature of the seven days	74.3
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	76.2
The extreme variation of temperature	21.0
The maximum temperature	85.2
The highest velocity of the wind in one hour	Miles, 10
The mean relative humidity	% 74
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	74
The total fall of rain from 8th to 14th November 1896	Inches, Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0.37
The total fall from 1st January to 14th November 1896	53.17
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65.11

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

☁ dew.

PREPARATION OF ESTIMATES OF FOOD-SUPPLY REQUIRED TO MEET PROBABLE SCARCITY.

The following papers are published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

Circular No 7T.—R., dated Darjeeling, the 3rd November 1896

From—M FINUCANE, Esq., Offg. Secretary to the Govt. of Bengal, Revenue Dept.,

To—All Commissioners of Divisions.

I AM directed to forward, for your information, the accompanying copies of a note prepared in the Department of Land Records and Agriculture, under the instructions of the Lieutenant-Governor, giving comparative statements of rainfall month by month, estimated outturn of crops, prices of food-grains, number of persons who came on to relief works or who received gratuitous charitable relief, in the principal districts of these Provinces in which distress prevailed in the different years of scarcity from 1873-74 to the present time. A similar note for other districts is under preparation.

2. The facts shown in the note and in the half-monthly tables of prices in the *Calcutta Gazette* indicate the necessity for very narrowly watching the symptoms of approaching scarcity. Prices are higher now than they ever were in Bengal at this time of the year, although the rise is not perhaps so marked, compared with normal prices at present, as it was on former occasions, while the likelihood of food coming in from provinces other than Burma to supply any deficit there may be in local supplies is greatly diminished by the scarcity that exists throughout the greater part of India. It will be noticed also that the estimated outturn of the winter rice crop is in some districts less than 8 annas, while owing to the want of rain in the latter part of September and the whole of October, the prospects of the *rabi* crops must necessarily be poor. According to the Famine Commission's report, paragraph 77, Part I, relief will not ordinarily be required where the outturn of a year's crop is above 8 annas, but where it is less, as it is reported likely to be in some districts, there is cause for vigilance.

3. I am, for these reasons, to request that you will instruct all District Officers of your division to institute systematic enquiries as to the stocks in hand, to watch carefully and report on the prospects of the crops, to make themselves thoroughly acquainted with, and conform to, the provisions of the Famine Code, and while avoiding, on the one hand, unnecessary expenditure and the creation of unfounded alarm, on the other to be vigilant, and to endeavour to forecast the possibility of the occurrence and effect of a rise in prices or depletion of food supplies, and to have prepared at once estimates of the stocks of food-grain in hand, and of the probable yield of the winter rice and coming *rabi* crops.

4. Any estimate of the food-supply which does not take into account the stocks in hand must necessarily be defective. In order to ascertain what these stocks are, all District Officers should have enquiries made at once from grain merchants, traders, zamindars and raiyats; they should examine the statistics of exports and imports obtainable from railway authorities and all other sources, and compare them with those of past years; they should also endeavour to form an accurate estimate of the aggregate outturn of the lately harvested *bhadoi*, the standing winter rice, and coming *rabi* crops (a) in case rain falls soon, (b) in case there is no rain, and should make an estimate for each district of the requirements for local consumption up to the reaping of next year's *bhadoi* harvest, and of the deficit or surplus, as the case may be, of stocks, plus probable outturn of crops, under or over the requirements for local consumption.

5. For the purpose of making these enquiries and estimates, the services of Subdivisional Officers, Deputy and Sub-Deputy Collectors, Kanungos, Survey and Settlement Officers, Officers of the Opium Department (where there are any) and of the Police should be utilized to the fullest possible extent. Assistance should also be sought from such non-official sources as may be available, the co-operation of leading zamindars, indigo and tea planters and local bodies being invited.

6. Mr. (now Sir) A. P. MacDonnell estimated in 1875 the stocks in hand at the beginning of the famine of 1873-74, the aggregate yield of crops of that year, and the requirements for local consumption, and thus worked out the deficit in the food-supply which had to be imported into districts where scarcity prevailed. You will observe from a perusal of Sir Antony MacDonnell's report on "The Food-grains and Food-supply of Bihar and Bengal" and of the Famine Commission's report that the quantity of grain imported by Government in that year was about 480,000 tons, or more than one crore and 30 lakhs of maunds. It is no doubt a fact that the importations of that year were far in excess of actual needs of the time, but though the deficit of the present year in these provinces will probably be nothing like that quantity, the question becomes one of serious importance where and how such amount of grain as may be required is to be procured. In order to throw light on this question, District Officers should now, by a similar method to that adopted by Sir Antony MacDonnell, endeavour to work out the probable amount of the deficit, if any, or surplus food-supply, as the case may be, of the present year in their several districts, so as to assist the mercantile community in forecasting approximately the extent to which it may be profitable for them to import grains from Burma, California or other foreign countries. Sir Antony MacDonnell's estimates of stocks in hand were based on *a priori* considerations, but the estimates of stocks now called for should, so far as possible, be based on the actual facts so far as they can be ascertained.

7. Government, in accordance with the policy recommended by the Famine Commission, does not now intend under any circumstances to import grain as it did in 1873-74, or otherwise to interfere with private trade, but adheres fully to the policy of saving life by opening relief works and giving a sufficient wage to enable labourers to purchase food in the local markets, and also by giving gratuitous charitable relief to those who are unable to work. It becomes therefore a matter of importance that the public should have placed before it, as soon as possible, the best available information regarding the probable requirements of the country in the matter of food-supply from the present, till such time as the wants of the people are again likely to be supplied from ordinary sources in August or September next. It is believed that the coming rice crop in Burma is likely to be a good one. In ordinary years about a million and four hundred thousand tons of rice are available for export from that province, and it may be expected that the same quantity will be available this year, so that there ought to be no difficulty in supplying such deficit as there may be in Bengal by the operations of private trade.

8. I am therefore to request that you will give your early attention to the matter, and that you will furnish Government on the earliest possible date with a report, based on the enquiries now to be made, showing for each district of your division, so far as possible—

- 1st.—The amount of stocks of food-grains believed to be in hand.
- 2nd.—The aggregate outturn of food-supply expected from the coming winter rice and *jabi* crops, (a) in case there should be rain in November, and (b) in case there is none.
- 3rd.—The total requirements for the consumption of the entire population for the coming year (*i.e.*, till August or September next).
- 4th.—The probable deficit in each district to be imported, or surplus, as the case may be, available for export.

9. As the Famine Commission remarked in Part III of their Report (to pages 104 to 161 and to the whole of Part I of which I am to invite your special attention), one of the most serious lessons learnt from the experience of the famine of 1873-74, besides the importance of agricultural knowledge, was the danger of erroneous forecasts which, if they err, as they did in 1873-74, on the side of exaggerating probable distress, may cause the State enormous loss, while, on the other hand, they may, if they err by being too sanguine, result in avoidable loss of human life. In making the forecast and estimates now called for, it should be particularly remembered that personal impressions or beliefs are of little value, and explicit reasons should therefore be given for the figures which may be furnished. The statistics published by the Imperial and Provincial Departments of Land Records and Agriculture, which have been circulated and will be found in all Collectors' offices, give the areas under each crop; the normal outturn per acre is given in Sir Antony MacDonnell's report and in the annexed note. The requirements for consumption of the total population can be calculated with tolerable accuracy. With these data and a careful

estimate of the stocks in hand and of the outturn of the winter rice and *rabi* crops, though accurate estimates of the food deficit or surplus of each district are not possible, there ought to be no great difficulty in preparing approximate estimates of the requirements of the province if proper care is exercised in the preparation of them.

10. To save time copies of this circular have been sent to all District Officers direct.

APPENDIX.

Notes referred to in paragraph 1 above.

1893-97	13	8	

GAYA.

THE FAMINE OF 1873-74.

Cause—The monsoon rainfall of 1873, though not much below the average, was very deficient in September, and failed altogether in October. The rice crop was consequently poor, being estimated at $\frac{3}{4}$ ths of an average crop. The *bhadoi* was not less than half of an average crop, and the *rabi* gave an average outturn.

Relief given—The aid given by Government in this district was inconsiderable. The actual expenditure of grain and cash was as follows:—

	GRAIN Tons	CASH Rs.
Charitable relief	220	11,622
Wages of labour	117	40,648
Loans	85	40,503
Grain sold for cash	2,433
Total	2,855	92,673

The average daily attendance of labourers on relief works was as follows:—

January 1874	142	June 1874	2,756
February "	454	July "	1,192
March "	764	August "	377
April "	1,334	September "	383
May "	2,486		

The average daily number of persons charitably relieved gradually rose from 162 in the beginning of March 1874 to 2,120 in the fortnight ending on the 8th August, and then dwindled down to 512 in the fortnight ending on the 3rd October. The average daily number in receipt of charitable relief was 977 for a period of 7½ months.

THE SCARCITY OF 1888-89

The rains of 1888, though plentiful, were badly distributed. The fall was excessive in August, and caused serious floods, which swept away embankments and reservoirs, and nearly the whole of the *bhadoi* crop in the flooded area. All the three harvests (*bhados*, *ayhani* and *rabi*) were poor. But only one tract of country near Sherghati was affected to such an extent as to necessitate the opening of relief works.

The actual expenditure in the administration of relief incurred by Government and the District Board is shown below:—

	GOVERNMENT. Rs.	DISTRICT BOARD. Rs.	TOTAL Rs.
Relief work	4,268	26	4,294
Charitable relief	6	...	6
Loans under the Land Improvement Act	56,125	...	56,125
Loans under the Agriculturists' Loans Act	15,857	...	15,857
Total	76,256	26	76,282

The average daily attendance on relief works was as follows:—

January 1889	155	April 1889	1,212
February "	424	May "	2,379
March "	511	June "	4,500
July 1889	4,000

Gratuitous relief was also afforded to many persons by the Mohunt of Bodh Gaya and other local zamindars.

THE SCARCITY OF 1891-92

The deficiency of rainfall in September and October 1891 caused great loss to the winter rice crop. The *rabi* was also poor owing to insufficient moisture. Apprehensions of distress were felt with regard to Gaya and several other districts of Bihar, but in Gaya the distress was not sufficiently serious to call for the intervention of Government.

SHAHABAI).

SHAHABAD.

THE FAMINE OF 1873-74.

Cause—The summer and autumn rains of 1873 were deficient by 14½ inches, and this deficient fall, unlike the almost equally deficient fall in the preceding year, was unhappily distributed. The rains commenced late, were concentrated in July and August, and ceased altogether at that most important period in September and October, when the rice plant shooting into ears requires abundant moisture to fill out and develop the grain. The result was that the *dhadoi* crops of 1873 yielded only one-fourth of an average crop, while of the great winter rice crop only one-eighth was saved. The *rabi* proved an average crop.—The Sone Canals, which were then in course of construction, were the means of saving the *aghani* and *rabi* crops on some 90,000 acres of land.

Private import trade.—Besides the actual relief given in the shape of cash and grain, the wide publicity given by Government at the earliest date to the state of the country and the condition of the local markets, coupled with the reduction in railway freight, caused an uninterrupted influx of private grain, chiefly from the North-Western Provinces, and to this fact Shahabad, like the rest of South Bihar, mainly owed its immunity from serious hardship.

Relief given.—The actual expenditure of grain and cash was as follows:—

		Grain Tons.	Cash. Rs
Charitable relief	..	287	33,566
Wages of labour	...	545	1,80,373
Loan	...	158	17,437
Grain sold for cash (inclusive of 2,773 tons sold to labourers on the Sone Canals)		8,153	...
Total	.	4,143	2,40,376

The number of labourers relieved by wages in cash and grain was as follows:—

November 1873	...	950
December "	...	2,286
January 1874	...	2,227
February "	..	2,582
March "	..	3,043
April "	..	6,290
May "	..	10,074
June "	...	6,454
July "	...	4,407
August "	..	4,493
September "	...	2,996

These were equivalent to 45,792 persons relieved for a period of one month.

The number of persons charitably relieved was as follows:—

In fortnight ending 21st March	1874	...	135
Ditto 4th April	"	...	239
Ditto 18th "	"	..	413
Ditto 2nd May	"	...	2,361
Ditto 16th "	"	...	2,827
Ditto 30th "	"	..	3,160
Ditto 15th June	"	...	647
Ditto 27th "	"	...	1,224
Ditto 14th July	"	...	2,965
Ditto 30th "	"	...	2,559
Ditto 12th August	"	...	2,997
Ditto 5th September	"	...	2,497
Ditto 22nd "	"	...	2,390
Ditto 5th October	"	...	613

These were equivalent to 12,516 persons charitably relieved for one month.

The relief afforded by the sale of grain and by loans of grain and cash was estimated to be sufficient for the support of 170,531 individuals for a month.

The total number thus directly or indirectly relieved by Government was equivalent to 216,328 individuals relieved for a period of 30 days.

The relief operations during the famine of 1873-74 were commenced in November 1873, and brought to a close in October 1894, and thus extended over a period of 12 months.

THE SCARCITIES OF 1888-89 AND 1891-92

The harvests of 1888 and 1891 were poor in Shahabad as in the rest of Bihar, but the distress caused thereby was not sufficiently serious to require the intervention of Government.

N B—The figures shown with brackets is taken from the Commissioner's Administration Reports

SARAN.

THE FAMINE OF 1873-74.

Cause.—The year 1872 was a year of short and badly distributed rainfall. The outturn of the *bhados* crop of that year was fairly good, but that of winter rice was estimated at 8 to 10 annas. The *rabi* was a little short of the average. The stock of food-grains was in consequence rather low at the opening of the year 1873-74.

The rainfall of 1873 was still more deficient and even more unfavourably distributed than that of 1872. It came late, was excessive in July, deficient in August, while in September, when most rain was needed, only one inch of rain (instead of $7\frac{1}{2}$ inches, the normal) was received. The result was that the *bhados* was only two-thirds of an average crop, while of the winter rice crop, only one-tenth of the average could be saved. The *rabi* crop (which in Saran is next in order of importance to the *bhados* crops, and supplies 50 per cent. more food than the winter rice crop) also gave a poor outturn, estimated at about 7 annas.

Area affected.—The entire district was affected, and no part of it is mentioned as being more seriously affected than others.

Private import trade.—This showed an unexampled activity in throwing supplies of food-grains into the district. The imports were chiefly drawn from the North-Western Provinces. Added to the free importation of food-grains by private traders, a large quantity of grain was imported by Government. Prices were thus prevented from reaching prohibitive rates.

Relief given.—The actual expenditure of cash and grain is shown below:—

			Grain, Tons	Cash Rs
Charitable relief	610	2,92,663
Wages of labour	11,487	15,06,412
Loans	17,894	6,41,477
Grain sold for cash	6,410
	Total	...	36,401	24,40,552

The average daily number of persons employed on relief works was as follows:—

January 1874	20,180
February "	87,181
March "	106,850
April "	166,683
May "	197,442
June "	223,991
July "	140,765
August "	110,262
September "	101,111

The distribution of charitable relief was commenced in February 1874. The average daily number for the first fortnight ending 7th March was only 14, it rose to 1,016 in the fortnight ending on the 4th April, and then steadily rose (with slight fluctuations) to the maximum of 9,568 in the fortnight ending on the 22nd August, after which it gradually declined till the beginning of October when all gratuitous relief was stopped.

During 1889 and 1892 no relief was administered in the district of Saran.

The figures of relief in 1873-74 are very serious, and we have little ground for anticipating a better season this year.

CHAMPARAN

THE FAMINE 1873-74.

Cause—The rains of 1873 were deficient all over the district, the deficiency being much more marked in Bettiah than in the Sadar subdivision. The rainfall during June, July and August was rather capricious, and injuriously affected the *bhados* crops. The outturn of maize, the most important *bhados* food crop, was estimated at 10 annas, and that of millets and early rice at 12 annas. It is to be remembered that in Champaran the *bhados* food crops are more important than the winter rice and the *rabi* crops, and yield, in an average year, almost as much food stuff as the two latter combined.

The rains practically failed altogether in September, thus entailing the almost complete destruction of the winter rice crop, and it is doubtful if even a 2-anna outturn was realized. The *rabi* gave a variable outturn, estimated at 8 annas for the whole district; it was worst in the tract of Ramnagar, which, being a rice-producing tract, had already suffered most severely.

Private trade—Towards supplementing the deficiency of food stocks, private trade seems to have done much more in Champaran than it did in either northern Muzaffarpur or Darbhanga. The great Gandak river, on which the district is situated, afforded an easy and cheap means of communication with Patna, the trade depôt of Bihar. The importations of grain by private traders were, however, on a small scale, and were not sufficient to prevent prices from reaching prohibitive rates. Throughout the famine, the prices of staple articles of food were double, and often more than double, the normal rates.

Relief given—The expenditure of grain and cash incurred in relief was as follows:—

		Grain. Tons.	Cash. Rs.
Charitable relief	...	1,190	36,950
Wages of labour	...	7,294	6,43,808
Loans	...	8,012	3,00,430
Grain sold for cash	...	11,081	...
Total	...	27,577	9,81,188

The average daily attendance on the relief works was as follows:—

November 1873	...	561	April 1874	...	83,917
December "	...	4,589	May "	...	159,668
January 1874	...	11,631	June "	...	79,752
February "	...	25,361	July "	...	73,007
March "	...	52,753	August "	...	8,938
September 1874	...	1,849			

The number in receipt of gratuitous relief could not be ascertained owing to confusion in the official records, but Mr. MacDonnell estimated that the gratuitous relief afforded was sufficient to help 77,219 individuals for a period of one month at the rate of one anna per day in cash, or three-fourths of a seer per day of grain.

THE SCARCITY OF 1888-89.

Owing to the deficiency of rainfall in 1888 and the consequent injury to the winter rice crop, there was scarcity in a tract of country in the north of the district, forming part of a belt of country about 90 miles wide and stretching from east to west along the Nepal frontier through the districts of Champaran, Muzaffarpur and Darbhanga, and extending to the north of Bhagalpur. The tract affected in Champaran comprised the Dhaka thana, and parts of the Motihari thana and Madhubani outpost.

Relief operations were commenced in December, and the symptoms of distress became acute in March, owing to the partial loss of the *rabi* harvest. Relief works were closed at the end of June owing to the fall of abundant rain, which ensured full employment for the people on agricultural labour. The unusually heavy rain which fell in the latter part of July caused floods, and thus added to the sufferings of the poorer classes, about 2,000 of whom were in receipt of gratuitous relief during the months from July to September.

The average daily attendance on the relief works was as follows:—

December 1888	...	5,000	April 1889	...	9,000
January 1889	...	6,200	May "	...	11,000
February "	...	5,000	June "	...	4,000
March "	...	8,000	July "	...	300

The expenditure incurred by Government and the District Board in different shapes is shown below:—

		Government. Rs.	District Board. Rs.
Relief work	...	78,024	15,261
Gratuitous relief	...	3,480
Loans under the Land Improvement Act	...	10,307
Ditto Agriculturists' Loans Act	...	91,930
Total	...	1,83,741	15,261

THE SCARCITY OF 1891-92.

The deficiency of rainfall in 1891 and the consequent injury to the winter rice crop gave rise to apprehensions with regard to the Champaran district (as well as several other districts of Bihar and North Bengal), but the distress was not sufficiently serious to require relief from Government.

MUZAFFARPUR.

Rainfall.

The estimates of outturn of bhadoi and winter rice are far worse than in any previous year

MUZAFFARPUR

THE FAMINE OF 1873-74.

Cause—The rains of 1873 were capricious all over the district. In June, July and August, when the *bhadai* crops are in the ground, the rainfall was heavy, particularly in Hajipur, but the previous year (1872) having been comparatively dry, this did not cause any serious injury to the *bhadai* crops, except in Sitamarhi, where the outturn of *bhadai* was only one-half of the average. Great deficiency of rain during September, and its cessation in October, led to a more or less complete failure of the winter rice crop, of which the outturn was estimated at 6 annas in the Sadar, 4 annas in Sitamarhi and only 2 annas in Hajipur. The outturn of the *rahi* crops varied from 8 annas in the Sadar to 10 annas in Hajipur and 12 annas in Sitamarhi.

Area affected—Although the failure of the winter rice crop was general over the entire district the two subdivisions of Sitamarhi and Muzaffarpur (Sadar) stood in much greater need of relief than the riparian subdivision of Hajipur, which, being situated in the immediate vicinity of Patna, the great grain mart of Bihar, was effectively served by private traders. The Sadar subdivision was the least jeopardized by the failure of the crops, but being situated in the very heart of the famine-stricken country, the stocks in the subdivision were drained from all quarters and soon reduced to a low pitch. Neither in this subdivision nor in Sitamarhi was private import trade equal to the task of replenishing the exhausted stocks, and a large section of the inhabitants was thus thrown upon the hands of Government for subsistence. In Hajipur, Government was relieved of all anxiety by the importation of food-grains by private traders.

Relief given—The expenditure in grain and cash is shown in the following statement—

KIND OF RELIEF	GRAIN			CASH			Total grain.	Total cash.
	Sadar.	Hajipur	Sitamarhi	Sadar	Hajipur	Sitamarhi.		
1	2	3	4	5	6	7	8	9
Charitable relief	Tons 1,062	Tons 123	Tons 2,261	Rs 20,000	Rs 5,000	Rs 1,16,711	Tons 3,348	Rs 1,41,711
Wages of labour	5,800	300	3,400	5,68,783	32,242	4,09,680	9,500	11,00,685
Loans	8,012	000	7,553	1,00,000	10,000	1,11,255	15,007	2,21,255
Grain sold for cash	6,030	164	12,860				10,074	
Total	19,904	1,186	26,679	6,88,783	47,242	7,27,626	47,009	14,63,651

The number of labourers relieved by wages in grain and cash in each subdivision was as follows.—

	Sadar	Hajipur	Sitamarhi.	Total.
December 1873	851	851
January 1874	978	978
February "	2,890	...	10,802	13,692
March "	25,126	...	39,715	64,841
April "	93,475	3,194	80,569	177,238
May "	174,925	7,447	144,876	327,248
June "	18,172	8,343	102,662	269,177
July "	101,068	4,410	23,270	128,778
August "	84,242	2,736	15,205	102,183
September "	34,381	279	4,976	39,651

Relief works were commenced earliest in Sitamarhi (i.e., in December); in the Sadar they were opened in February, and in Hajipur not before April 1874. The highest numbers reached were 327,248 in May for the district as a whole; 174,925 in May in the Sadar, 144,876 in the same month in Sitamarhi, and 8,348 in June in Hajipur.

The distribution of charitable relief was commenced in the Sadar and Sitamarhi subdivisions at the end of March, and in the Hajipur subdivision about the end of April. It was closed in the beginning of October. The average number daily relieved was as follows—

	Sadar	Hajipur	Sitamarhi.	Total.
For the fortnight ending 8th April	250	...	5,300	5,550
Ditto 21st "	421	...	5,052	5,474
Ditto 4th May	4,989	1,668	7,261	13,918
Ditto 18th "	15,179	2,384	5,782	23,345
Ditto 1st June	7,850	3,921	4,303	16,074
Ditto 15th "	11,146	2,501	45,135	58,782
Ditto 29th "	15,130	2,398	45,000	62,528
Ditto 13th July	18,902	2,964	21,256	43,122
Ditto 27th "	20,592	3,632	20,200	44,424
Ditto 10th August	18,395	3,342	24,017	45,754
Ditto 24th "	13,789	3,011	16,232	33,055
Ditto 7th September	10,101	1,800	6,194	18,095
Ditto 22nd "	5,450	1,367	1,893	8,719
Ditto 6th October	2,115	2,115

The relief given throughout this period of scarcity was on an enormous scale, and the above figures should receive careful attention.

THE SCARCITY OF 1875-76.

The rice crop of 1875 was a total failure in many places in North Bihar. The subdivision of Sitamarhi (in common with the Madhubani subdivision of Darbhanga) appears to have been specially affected, but no relief was actually required. "The Assistant Magistrate of Sitamarhi had, with praiseworthy activity, turned out the labouring population along the banks of streams, and by banking up the water had irrigated large areas of land, on which the villagers were not slow in sowing cold-weather crops. A little later on and the holders of Indian corn in Nepal began to sell freely, and poured a large quantity of grain into the market; prices went down, the bazars became amply stocked with cheap grain, and the partial scarcity in the subdivision was relieved." (*Bengal Administration Report, 1875-76*)

THE SCARCITY OF 1888-89.

As in Darbhanga, the failure of the winter rice crop of 1891 affected a tract of country running along the Nepal frontier, and including parts of the Barania, Majouganj, Sonbarsa, Bela and Sursand outposts, and a small part of the Purni thana.

The scarcity of 1888-89 was aggravated by heavy floods in the latter part of July 1889. The average daily attendance on the relief works is shown below —

January 1889	6,000	June 1889	10,000
February "	4,000	July "	3,500
March "	10,000	August "	4,000
April "	8,000	September "	5,000
May "	15,000	October "	3,000

About 2,000 persons were in receipt of gratuitous relief from February to May. The numbers increased to 3,000 in June, 5,000 in July and 8,000 in August, in consequence of the distress caused by the floods, but they fell again to 5,000 in September and 4,000 in October, when all relief was gradually withdrawn. Much relief was also given during these months gratuitously and on private works by the Maharaja of Darbhanga and other local zamindars.

The total expenditure incurred in the relief operations was as follows —

	Government	District Board.	Total
	Rs	Rs	Rs
Relief work	88,339	89,885	1,28,224
Gratuitous relief	23,815	23,815
Loans under the Land Improvement Act	1,090		1,090
Ditto Agriculturists' Loans Act	86,854		86,854
Total	1,60,098	89,885	2,39,983

THE SCARCITY OF 1891-92

The rains of 1891-92 being very deficient, the winter rice crop of 1891 and the succeeding *rabi* were both equally poor. The tracts which suffered most were the Lalgaon thana in Hapur, and the Belsand and Shuhtar thanas in Sitamarhi. Considerable distress also existed in a tract to the west of Muzaffarpur, near Patu and Sahabganj, and in parts of the Katra and Muzaffarpur thanas in the Sadar subdivision. The total area affected comprised 1,300 square miles, with a population of 1,173,785 persons. About 1,50,000 maunds of food-grains were imported by private traders into the district by rail during the period from April to July 1892.

Relief works were opened in the first week of March 1892, and were closed on the 11th July, when field-work became abundant. The average daily attendance during the relief operations amounted to close upon 5,000 for a period of 19 weeks. The highest daily average number (14,117 persons) was reached in the week ending 11th June. No gratuitous relief was given at the expense of Government. Several indigo-planters rendered valuable assistance in supervising relief works, and also in distributing loans.

During the period of distress, Rs. 25,616 were distributed as loans under the Agriculturists' Loans Act, and Rs. 200 under the Land Improvement Act.

DARBHANGA.
FAMINE AND SCARCITY
1873-74

Cause—The rains of 1873 commenced late, were insufficient for the requirements of the *bhadoi* crops, or to permit of the usual rice area being sown down, and ceased in September with a deficiency varying from 11 inches below the normal in Tajpur to 23 inches in Madhubani, and 28 inches in the Sadar subdivision. The recorded outturn of the *bhadoi* crops was 8 annas in Madhubani and Tajpur, and 5 annas in the Sadar, and that of the winter rice crop was 3 annas, 4 annas and 2 annas, respectively. The drought also prevented much of the *rabi* area from being sown. The outturn of the *rabi* harvest was insignificant in the two northern subdivisions (Sadar and Madhubani), in Tajpur, however, which contains a large area of *deua* land, the *rabi* crop gave a fair outturn, estimated at 10 to 12 annas.

Area affected—The distress was most acute in the two northern subdivisions, Madhubani and Darbhanga (Sadar). Unlike South Bihar and Saran, the importation of food-grains showed but a flickering vitality in the Sadar subdivision, and did not show any signs of activity in Madhubani from first to last. On the contrary, the latter subdivision had to spare some of its stocks to Nepal and the Sadar subdivision of Darbhanga. Tajpur, on the other hand, had the advantage of a fairly good *rabi* harvest, and enjoyed throughout the benefit of an active private import trade. It was in Tajpur, therefore, that the least help was required from Government.

Relief given.—The following statement exhibits the expenditure in grain and cash during the famine of 1873-74—

	GRAIN			CASH			Total grain	Total cash
	Sadar	Madhubani	Tajpur	Sadar	Madhubani	Tajpur

Total	31 931	42,797	2,714				77 383	34,70 1 0

The number of labourers relieved by wages in grain and cash was in each subdivision as follows—

	Sadar	Madhubani	Tajpur	Total
January 1874	1,500	1,000	2,500
February "	25,000	20 000		45,000
March "	107,053	140,547	3,802	251,402
April "	220 289	309,212	2,077	531,578
May "	192,168	369,207	8,017	569,392
June "	76,183	190,398	13,362	279,943
July "	21,688	41,164	11,763	77,615
August "	21 628	36,026	8,741	66,408
September "	3,996	15,004	2,682	21,682

The highest numbers reached were 220,289 in April in the Sadar, 369,207 in May in Madhubani, and 13,362 in June in Tajpur.

The distribution of charitable relief was commenced in the beginning of April 1874, and closed early in October of the same year.

The average daily number gratuitously relieved in each subdivision is shown in the following statement.—

	Sadar	Madhubani	Tajpur	Total

Average daily number relieved during continuance of scarcity .. 81,110 38,154 4,787 124,051

The highest daily number for the three subdivisions was 133,911 in July in the Sadar, 71,561 in August in Madhubani, and 7,163 in July in Tajpur.

The relief given by Government in various shapes was estimated by Mr. MacDonnell to be sufficient for the support of 1,954,732 individuals in the Sadar, 2,925,146

in Madhubani, and 188,688 in Tajpur for a period of one month. Allowance should, however, be made for a portion of the grain sold in Madhubani having found its way into Nepal, and for a large portion of the cash wages and loans having come back into the Treasury in the shape of sale-proceeds of grain.

1875-76.

Owing to the failure of the winter rice crop of 1875, some suffering was caused in the north-east parts of Darbhanga included in the parganas of Alapur and Naridigar. The administration of relief was commenced early in February 1876. The relief offered was principally in the form of village charity to the sickly and weak, and to a small extent employment was afforded on relief works, such as village roads, tanks and the like. The expenditure in relief was estimated at Rs 30,000. Extensive relief was also afforded by the Maharaja of Darbhanga.

1888-89.

The chief seat of distress was a tract of land stretching through Champaran, Muzaffarpur and Darbhanga, about 90 miles long from east to west along the Nepal frontier, and extending into the north of the Bhagalpur district. The tract included the Jali and Khajauli thanas of Darbhanga. In this area the rainfall was much lighter than elsewhere, and ceased prematurely, with the result that the winter rice crop, which is the mainstay of the people, was entirely lost, while the *bhados* also failed in parts, and the *rabi* was sown under unfavourable conditions.

Relief operations were commenced in January 1889. The symptoms of distress became very acute in the last fortnight of May. Besides the excavation of tanks, the construction of the Darbhanga-Sitamarhi Railway was taken in hand as a relief work. The number on relief works appears to have gradually risen until the last fortnight of June, when abundant rain having fallen, many people were induced to return to their ordinary occupations. The number of persons employed on relief works, therefore, fell from 14,656 in the first-half of June to 6,270 in the last fortnight of June, and 5,726 at the end of July. It again rose to 19,570 at the end of August, when some light work in turing and dressing the new roads was provided, and then began to decline. It fell to 9,158 by the 15th September, and to 6,213 by the 22nd idem. Finally, the relief works were closed in the first week of October.

A large number of persons were in receipt of gratuitous and other relief throughout the year from the Maharaja of Darbhanga, the Raja of Bachour, and other local zamindars. The cost of this relief was estimated at Rs. 76,000.

The total expenditure incurred in relief by Government and the District Board was as follows —

	Government. Rs	District Board. Rs	Total Rs.
Relief works ...	1,15,440	1,10,031	2,25,471
Loans under the Land Improvement Act	2,395	2,395
Loans under the Agriculturists' Loans Act	8,500	8,500
Total ...	1,26,335	1,10,031	2,36,366

1892.

The great deficiency of the rains of 1891 caused a total failure of the winter rice crop on the high lands and great injury to the *bhados* crops. The outturn of the *bhados* was estimated at not more than 6 annas, and that of winter rice at about the same. The affected tracts were the Roshera and Bahera thanas, and a small portion of the Darbhanga thana to the east of the Darbhanga town, in the Sadar subdivision, and the Benipati and Khajauli thanas, the northern half of the Madhubani thana, and parts of the Phulparas thana, in the Madhubani subdivision.

The distressed tract was divided into seven circles. The relief works carried out consisted of the excavation of tanks and the construction of roads. Altogether 67 tanks were dug at a cost of Rs 94,310; and 994 miles of road were taken in hand, of which 582½ miles were completed at a cost of Rs 1,00,902. The cost in each case was exclusive of establishment and other charges. The relief operations were commenced in the beginning of March 1892, and finally closed on the 19th of July. The average daily attendance was about 19,200 for a period of 19 weeks. The highest number of persons daily employed (47,452) was reached on the 11th June. The rate of Rs. 1-6-6 per 1,000 cubic feet of earthwork then allowed was suspected to have attracted a large number of professional diggers, and was therefore reduced to Rs 1. This reduction, combined with the rain which fell about this time and enabled the people to return to their ordinary occupations, led to a speedy decrease in the numbers employed. The number of labourers fell to 25,815 on the 18th June, and to 12,899 on the 2nd July, and continued to decrease until the relief operations were closed at the end of that month.

The administration of charitable relief was commenced at the end of April and brought to a close on the 23rd July. The number of persons thus relieved averaged 536 daily for a period of 14 weeks. The maximum daily average was 1,550 in the week ending the 28th May. The total amount expended on gratuitous relief was Rs 1,557-5-10.

There was a great demand for agricultural loans, but of 2,186 applications received all except 349 were rejected, and the loans issued were restricted to the affected area and limited ordinarily to Rs. 2 per bigha. The advances made amounted to Rs. 11,880 in the Sadar, and Rs. 19,992 in the Madhubani subdivision.

MONGHYR

THE FAMINE OF 1873-74.

Cause—The years 1871 and 1872 were not as prosperous in Monghyr as they were in the rest of Bihar. The pressure on food-stocks consequent thereon had an exhausting effect on the resources of the district, and the year 1873 opened with prices ranging from 10 to 20 per cent higher than the normal.

The rainfall of 1873 in Monghyr was excessive in July and August, deficient in September, and entirely absent in October. The consequence of the unseasonable excess in the earlier months was that the *bhadoi* crop yielded only a 6-anna crop, and owing to the abnormal deficiency in September and October, the winter rice crop was only 2 annas in the Sadar and Begusarai subdivisions, and 4 annas in Jamui.

The *rabi* gave a favourable outturn, estimated at three-fourths of the average, all over the district. The district also derived much support from a large crop, which was sown over nearly 10 per cent of the cultivated area with a view to make up for the loss of previous crops.

Private trade—In spite of the deficiency of local stocks, there was considerable exportation of food-grains both by river and by railway, side by side with the heavy importations necessary to meet the local demand. The balance on the whole was in favour of imports. The interference of Government was not so pronounced in Monghyr as in districts which had not the advantage of both railway and river communication, and which were not, therefore, so readily open to the operations of private trade. The attitude of Government as a holder of large reserves, and its readiness to do all that the crisis might demand, rendered much material expenditure unnecessary.

Relief given.—The Government expenditure in grain and cash incurred in relief was as follows—

		Grain Tons	Cash. Rs
Charitable relief	300	83,865
Wages of labour	486	1,32,993
Loans	5,009	1,86,464
Grain sold for cash	1,900	.
Total	7,695	4,03,322

The average daily attendance of labourers in receipt of wages was as follows—

December 1873	4,210
January 1874	5,227
February "	4,240
March "	..	.	4,160
April "	4,631
May "	10,596
June "	11,148
July "	3,912
August "	1,972
September "	332

These were equivalent to 50,753 individuals relieved for a period of 30 days.

The daily average number of persons charitably relieved was follows :—

In fortnight ending 30th May 1874	3,402
Ditto 13th June "	3,744
Ditto 27th " "	4,824
Ditto 11th July "	3,775
Ditto 24th " "	4,650
Ditto 8th August "	5,150
Ditto 22nd " "	2,125
Ditto 5th September "	2,084
Ditto 19th " "	100

These were equivalent to 25,587 persons relieved for a period of one month.

1888-89.

There was some pressure among small cultivators and day-labourers, but no relief measures were found necessary.

1892

The scanty outturn of the winter rice crop of 1891, preceded by a short crop in 1890, with a cause of this scarcity. Anxiety was felt chiefly for a low tract of country in the Sadar subdivision, north of the Ganges, and extending to the boundaries of Darbhanga and

Bhagalpur. Relief operations were found necessary only in the extreme north of the belt, within the jurisdiction of the Bakhtiarpur outpost of the Gogri thana.

Relief works were first started in February 1892, but the attendance was very low till the latter part of May, when the excavation of some tanks in the extreme north of the district resulted in a sudden rush of labourers.

The highest average daily attendance on relief works (1,815 persons) was reached in the week ending the 2nd July. After the middle of July, the situation was so far relieved by the prospect of a good *bhados* crop that the number of labourers rapidly dwindled away until the relief works were closed on the 23rd July.

Gratuitous relief was commenced in the latter part of February, and continued till the 20th of August, i.e., a month longer than the relief works. The average daily number so relieved was 285 for a period of 24 weeks, the daily number seldom falling below 200 and never exceeding 300.

A sum of Rs. 19,088 was distributed in loans to cultivators holding from 10 to 20 bighas of land.

FAMINE AND SCARCITY.

1873-74.

Cause.—The rains of 1873 were not only deficient, but also unseasonably distributed. The result was a poor *bhados* crop, and a more or less complete failure of the winter rice crop. The outturn of the *bhados* was 6 annas in South Bhagalpur, 10 annas in Supaul, and 11 annas in Madhipura. The winter rice crop did not yield more than $\frac{1}{10}$ th of an average crop in Supaul, and half an average crop in the rest of the district. The failure of the crop was thus most complete in Supaul. The *rabi* crop, however, gave an average outturn all over the district.

Area affected.—The subdivision of Supaul was most affected by the famine, but Mr MacDonnell was unable to give a separate account of the relief afforded in each subdivision, as he did with regard to Darbhanga and Muzaffarpur. He states, however, that by far the largest portion of the expenditure incurred in the relief operations was incurred in Supaul, and in limited parts of Madhipura, bordering on Supaul, and that the assistance given by Government out of Supaul was inconsiderable.

Private trade.—Private import trade was always active in South Bhagalpur, and in the riverain tracts of Madhipura, but it never extended to Supaul. It was remarkable that the surplus produce of Madhipura, instead of being attracted to Supaul, where prices reached almost prohibitive rates, found its way out of the district by the accustomed trade channels.

Relief given.—The expenditure in grain and cash on account of the relief operations was as follows:—

			Grain. Tons.	Cash. Rs.
Charitable relief	4,232	1,28,064
Wages of labour	1,474	1,85,498
Loans	4,276	1,47,050
Grain sold for cash	10,118
Total			20,100	4,60,612

The number of labourers employed during the relief operations daily averaged in each month as follows:—

November 1873	...	1,351	May 1874	...	32,637
December "	..	4,166.	June "	...	27,628
January 1874	..	7,485	July "	..	29,556
February "	...	3,639	August "	...	29,424
March "	...	7,956	September "	...	12,002
April "	...	22,234			

These were equivalent to 177,847 persons relieved for a period of 30 days.

The daily average number of persons in receipt of gratuitous relief was as follows:—

In fortnight ending on 24th March	1,340
Ditto 7th April	1,638
Ditto 21st "	1,143
Ditto 5th May	1,565
Ditto 21st "	12,261
Ditto 3rd June	12,783
Ditto 18th "	44,448
Ditto 15th July	50,714
Ditto 17th "	55,959
Ditto 30th "	18,475
Ditto 13th August	31,305
Ditto 26th "	41,156
Ditto 9th September	60,296
Ditto 22nd "	38,469
Ditto 7th October	19,658

These were equivalent to 194,085 persons relieved for one month.

1889.

In a portion of the Supaul subdivision the loss of the rice crop, owing to the deficiency of the rains of 1888, was as great as in the adjoining parts of North Bihar. Up to May 1889, the distress was not acute, and employment was found for people requiring it in the excavation of tanks (of which 27 were finished) at the expense of private persons and of the Court of Wards. One road was under construction, but only 31 persons sought employment on it. In June distress deepened, and considerable works were opened in the affected tract at the expense of zamindars and of the Local Board. The situation, however, soon changed for the better with the more favourable rains which succeeded, and

admitted of the completion of the *bhadoi* sowings and the preparation of late rice seed beds. The total expenditure incurred by Government was as follows:—

	Rs.
Relief work	1,397
Gratuitous relief	37
Advances under the Land Improvement Act ...	Nil
Advances under the Agriculturists' Loans Act ...	17,458
Total	18,892

The expenditure incurred by the Local Board in this district is shown (in the Bengal Administration Report, 1889-90) in the aggregate with that incurred in the Sonthal Parganas, and cannot be separated.

1892.

The deficiency in the rains of 1891 caused all the three harvests to fail more or less in this district. The condition of the people was never, however, very bad, or justified excessive anxiety.

Three tracts were especially affected. The first was a small area on the northern frontier, lying west of the Birbandh; the second lay immediately round Supaul. But even in these two tracts, extending each over 20 square miles, the distress was never acute. The third, which was the largest and the most affected area, was 400 square miles in extent, and extended from the Darbhanga boundary through the Bangaon thana of Supaul and the *sadar* thana of Madhipura. The worst parts were those west of the Dimra, along the Darbhanga boundary, and in the corner between Darbhanga and Monghyr.

The prices of food-grains never reached a famine point, and it was remarkable that the exports by railway considerably exceeded the imports, thus showing that the general stock of food-grains was sufficient for local requirements, although the poorer classes stood in need of help.

Relief works were started in January. The average attendance rose to 3,494 at the end of March. It was highest (12,370) in the second week of June. The numbers then gradually declined until the 20th August, when the works were finally closed. The distribution of gratuitous relief was not commenced till the end of April, and was closed in the third week of August. The highest number of persons so relieved was 1,527 in the week ending 23rd June.

Rs. 37,180 were advanced as loans in April, May and June.

Private relief played an important part in this district. The total sum thus contributed by private individuals amounted to Rs. 47,000.

PURNEA.

THE FAMINE OF 1873-74.

Cause.—The deficient and unseasonable rainfall of 1873 reduced the *bhadoi* crop to one-half the average, and the winter rice crop to 3, or at the most 4 annas. The failure of the winter rice crop was severest all down the east of the district, in the lands usually flooded by the Mahanadi and the Panar.

The *rahi* crop gave a fair outturn

Private trade.—The district appears to have enjoyed the advantage of an active private import trade throughout the famine.

Relief given.—The expenditure incurred by Government in money and grain was as follows:—

		Grain. Tons.	Cash. Rs.
Charitable relief	...	1,897	1,92,000
Wages of labour	...	5,866	2,17,584 (including in part
Loans	...	4,583	1,13,125 the value of
Grain sold for cash	...	10,762*	.. grain given
			away as wages)
Total	...	22,608	5,22,709

Part of this was sold after the famine was over.

The average daily attendance at the relief works was as follows:—

December 1873	...	356	May 1874	...	81,029
January 1874	...	945	June	..	28,763
February	..	3,640	July	..	21,746
March	..	10,231	August	..	9,626
April	..	20,264	September	..	1,014

These were equivalent to 127,614 individuals relieved for a period of one month.

The average number of persons in receipt of gratuitous relief was as follows.—

In the month ending 24th February	7
Ditto 24th March	797
Ditto 24th April	3,844
Ditto 24th May	8,233
Ditto 24th June	16,538
Ditto 24th July	36,180
Ditto 24th August	33,331
Ditto 24th September	3,572

These were equivalent to 102,502 persons relieved for a period of one month.

The scarcity of 1892.

During the scarcity of 1892, consequent on the failure of the winter rice crop of 1891 and of the *rahi* of 1891-92, actual distress was confined to 365 square miles of country in the Kadwa thana, and to 285 square miles in the Amur thana. The winter rice crop in these areas was estimated at about 2 annas, and the *rahi* at 5 to 6 annas.

Relief works were started on the 27th of January 1892 and closed on the 28th May. The attendance was largest in March and the first half of April, when about 3,200 persons found employment on the relief works. The total amount expended on the operations was Rs. 20,578.

The distribution of gratuitous relief was commenced on the 30th January, and was continued till the 17th June. The highest number of persons so relieved was 1,360 in the week ending the 9th April. The total amount spent on gratuitous relief was Rs. 3,410, of which Rs. 2,380 were defrayed from private subscriptions, and the remainder devolved upon Government.

Advances to the extent of Rs. 22,551 were given to cultivators under the Agriculturalists' Loans Act, and Rs. 140 were granted under the Land Improvement Act. This form of relief was not, however, confined to the Kadwa and Amur thanas, but was extended to parts of the Sadar and Gandwara thanas, and to the khas mahal of Belwa in Manihari.

DINAJPUR.

THE FAMINE OF 1873-74.

Cause.—The rainfall of 1873 was deficient by 43½ inches, that is, by more than half the normal quantity, and the September and October rains were almost wholly wanting. The result was a very poor *bhados* crop, estimated at about one-eighth of the average, and a nearly equally poor winter rice crop, of which not more than 4 annas was saved in the whole district. The rice crop was completely lost wherever recourse could not be had to artificial irrigation, or wherever the natural basins which stud the country did not retain moisture from the early rains.

The *rabi* gave an average outturn, but in Dinajpur the *rabi* harvest is of no importance as a source of food-supply.

Private trade—The district derived but little help from private trade, and it owed its immunity from great distress mainly to the efforts of Government.

Relief given.—The Government expenditure in money and grain is shown below:—

			Grain.	Cash.
			Tons.	Rs.
Charitable relief	2,732	87,683
Wages of labour	2,934	11,61,492
Loans	12,531	23,300
Grain sold for cash	13,516
Total			31,713	12,72,425

The average daily attendance at the relief works was as follows:—

November 1873	...	1,808	May 1874	...	94,797
December "	...	6,055	June "	...	53,259
January 1874	...	21,179	July "	...	25,742
February "	...	29,696	August "	...	8,653
March "	...	60,516	September "	...	2,543
April "	...	93,208			

Those were equivalent to 397,456 persons relieved by wages for a period of one month. The numbers charitably relieved were —

In fortnight ending on	6th April	1874	1,791
Ditto	on 20th "	"	7,175
Ditto	on 4th May	"	12,678
Ditto	on 18th "	"	19,869
Ditto	on 1st June	"	19,112
Ditto	on 15th "	"	27,149
Ditto	on 29th "	"	54,693
Ditto	on 13th July	"	82,512
Ditto	on 27th "	"	84,307
Ditto	on 10th August	"	53,881
Ditto	on 24th "	"	34,845
Ditto	on 7th September	"	26,147
Ditto	on 21st "	"	17,190
Ditto	on 5th October	"	9,831

Those were equivalent to 225,590 people relieved for a period of one month.

The scarcity of 1892.

The failure of the winter rice crop of 1891 affected a large tract of country, extending over 1,030 square miles, with a population of nearly half a million souls. The tract lay to the north of the Dinajpur branch of the Northern Bengal State Railway, and comprised Western Thakurgaon, Ramsankoil thana, and a part of the Pirganj thana in the Thakurgaon subdivision, the Hemtabad thana, excluding Raiganj outpost, and a part of the Birganj thana in the Sadar subdivision. Relief works were opened in January 1892, but there were no large numbers at work till about the middle of February, when the *rabi* had perished. Heavy rain began to fall on the 16th March, and changed the whole situation. The highest daily average number of labourers employed was 2,406 in the week ending 7th May. The number then gradually diminished until the works were closed on the 2nd July.

Rupees 5,838 was advanced as loans to cultivators under the Agriculturist Loans Act.

B. O. BASU,

Assistant Director of the Dept. of Land Records
and Agriculture, Bengal.

Countersigned.

P. O. LYON,

Offg. Director of the Dept. of Land Records
and Agriculture, Bengal.

CALCUTTA,

The 5th November 1896.

Provisional return showing the approximate yield to the acre of some of the principal crops of each district of the Lower Provinces of Bengal

[illegible][illegible][illegible]

W. C. MACPHERSON,

*Offg. Director of the Department of Land
Recreation and Agriculture*

Memorandum stating for each crop shown in the "Provisional Return" the data on which the averages have been computed.

RICE.

General remarks.—Rice is a "principal crop" in every district of these Provinces.

1. MacDonnell's "Food Grain Supply and Famine Relief of Bihar and Bengal" published in 1876.
2. Lieutenant Otley's "Note on Rice Statistics," written in the year 1878.
3. Report on the Tenancy Bill, 1883, Volume II.
4. Irrigation Reports of the Public Works Department.
5. Mr. Luson's Note on Experiments made in Bihar, written in 1888-89.
6. Board's Return 41 B of the year 1888-89. (But this return does not distinguish between husked and unhusked rice, and some of the figures given in it are obviously incorrect.)
7. Hunter's Statistical Account of Districts.
8. Journals of the Agri-Horticultural Society of India.

In the absence of any single authoritative source of information as to the average outturn of clean rice to the acre in each district of Bengal, the statistics and estimates given in the reports noted in the margin have been consulted, and averages computed from those which are considered most trustworthy. As has been pointed out in the forwarding letter, accuracy is not claimed for these figures,

or for the figures given in the accompanying return, with regard to other crops. In some cases the figures may be approximations to the truth, but in other cases they are altogether doubtful.

2. Estimates of rice outturn per acre for Bankura, Birbhum, Murshidabad, Dinajpur, Rangpur, Patna, Gaya, Shahabad, Darbhanga, Muzaffarpur, Saran, Champaran, Monghyr and Bhagalpur have been obtained from Mr. MacDonnell's "Food-Grain Supply." The averages given by Mr. MacDonnell were arrived at from a consideration of figures specially obtained from Collectors, from enquiries made in specimen areas, from the figures given by Lieutenant Otley in his "Note on Rice Statistics," and from a consultation of all available sources of information. Mr. MacDonnell's averages may be regarded, therefore, as being up to the present date the most trustworthy figures available as to rice outturn, excepting those districts where, for test purposes, actual weighments have since been made with due care and attention.

3. In consideration of the average yield of rice entered against each district, it must be remembered that in all districts two main kinds of rice are grown, viz., winter or *aman* and *aus* or *bhadol*; and that in some districts a third kind, viz., *boro*, is grown. The average yield to the acre for a district depends, first, upon the average yield of each kind of rice, and, secondly, upon the proportion which each kind of rice crop bears to the whole rice crop of the district. It has been usual in this Department to assume, for the whole of these Provinces, an average yield to the acre of 15 maunds of clean rice from the *aman* crop and 10 maunds from the *aus* or *bhadol* crop.

Remarks on outturn of rice per acre shown against particular districts.

Burdwan.—Mr. Otley gives 15 to 24 maunds of paddy as the average outturn per acre. This is equivalent to 9½ to 15 maunds of rice, or (if the difference be halved), say, 1,000lbs. to the acre. Mr. A. O. Sen, c.s., on page xl of his Report on the Agriculture of Burdwan, gives higher figures. Considering the figures estimated for adjoining districts, it has been thought proper to take 13 maunds, or 1,066lbs.

Bankura—See page 318 of Mr. MacDonnell's "Food-grain Supply."

Birbhum.—See page 305 read with pages 317 and 318 of Mr. MacDonnell's "Food-Grain Supply."

Midnapore.—The average for Midnapore is based on consideration of the average outturns assigned to other districts, and on results reported in the Agri-Horticultural Society's journals. In the Board's selections of the Jellamutha and Majnamutha records, 1,555lbs. were reported as the average outturn, but this figure was rejected as being too high. Mr. Otley put the average outturn at from 21 to 36 maunds of paddy.

Hooghly.—Mr. Otley says "average 24 to 30 maunds of paddy," say, 27 maunds of paddy, or 17 maunds of clean rice, or 1,494lbs., which seems to be high considering the averages of adjoining districts, even after allowing for the alleged exceptional fertility of Hooghly. Mr. B. O. Basu says that the practice of manuring paddy land with oil-cake is found only in Hooghly.

24-Parganas.—Mr. Otley says "average 15 to 27 maunds of paddy," say, 21 maunds of paddy, or 13 maunds of rice, or 1,066lbs.

Khulna.—1,066lbs. entered, the district being similar to the 24-Parganas.

Nadia.—Mr. Otley says "20 maunds of paddy." This would give 12½ maunds of rice, or 1,026lbs.

Jessore.—1,066lbs. The same average is taken as for the 24-Parganas and Khulna.

Murshidabad.—1,230lbs. See page 262 of Mr. MacDonnell's "Food-Grain Supply." This appears to be high in comparison with neighbouring districts. The average of 20 experiments made by Babu Parbati Oharan Nag in this district gave 4 maunds 30 seers to the standard bigha or, say, 1,168lbs. to the acre. See page 603 of Volume II of Bengal Government Report on Tenancy Bill.

Dinajpur.—See page 216 of Mr. MacDonnell's "Food-Grain Supply."

Rajshahi.—Mr. Otley says "27 to 33 maunds of paddy." This seems to be too high. Board's Return No. XLI for 1868-69 says 1,200lbs., and this estimate has been entered.

Rangpur.—See page 233 of Mr. MacDonnell's "Food-Grain Supply."

Bogra.—14½ maunds, or 1,189lbs. of rice, taken as representing the estimate of 4 maunds 34 seers shown on page 603 of Volume II of the Report on the Bengal Tenancy Bill. This estimate was made by Mr. D. J. Macpherson, c.s., on information gathered chiefly in the Government estate of Jaipur.

Patna.—960lbs. taken from Board's Return No. XLI for 1868-69.

Dumking.—943lbs. given in Board's Return No. XLII for 1868-69.

Jalpaiguri.—No trustworthy information available.

Dacca.—11½ maunds of rice is estimated in the Agri-Horticultural Society's journal. Board's Return No. XLI for 1868-69 shows 480lbs to 880lbs. On page 33 of Mr. Ambica Charan Sen's Report on the Dacca District, the yield for the various kinds of paddy is stated as 3 to 4½ maunds a bigha, say, 9 to 36 maunds an acre; but this is of unhusked grain. It is difficult to strike an average on this. The estimate of 984lbs. is offered with much caution.

Baridpur.—860lbs. taken from Board's Return No. XLI of 1868-69.

Backergunge.—1,280lbs. taken from Board's Return No. XLI of 1868-69. No reason is known why the Backergunge estimate should be so much higher than that of adjoining districts.

Mymensingh.—Board's Return No. XLI of 1868-69 gives 800lbs. The Agri-Horticultural Society's journals give 9 to 11 maunds. Ten maunds, or 820lbs., have been taken therefore.

Typpora.—The Agri-Horticultural Society's journals give 9 to 15 maunds. Twelve maunds, or 984lbs., have been taken therefore.

Noakhali.—Board's Return No. XLI of 1868-69 gives 1,600lbs, but it is uncertain whether this means rice or paddy. As no other information is available, it is thought best to enter "not known."

Chittagong.—The Agri-Horticultural Society's journals give 18 to 21 maunds of paddy, or 11 to 13 maunds of rice. Twelve maunds, or 984lbs., have been taken.

Patna.—In default of other information as to the average for the whole district, 984lbs. has been taken, being the same outturn as reckoned by Mr. MacDonnell for Gaya and Shahabad. For irrigated lands in the Patna, Gaya and Shahabad districts, the figures given are taken from Mr. Luson's note, dated 4th February 1889, giving the result of weighments made of first class crops on lands regularly irrigated from canals in the Patna, Gaya, and Shahabad districts. In 222 experiments made with transplanted *ughunt dhan*, a yield averaging about 33 maunds of paddy was got. Thirty-three maunds of paddy are equivalent to about 21½ maunds of rice, or 1,763lbs., which has been entered against the heading 1st class irrigated lands for these three districts. Against the head "Average for irrigated lands" for these three districts, Mr. Luson's estimate of 12½ maunds, or 1,023lbs, for the average irrigated crop of 1888-89, shown on page 34 of the Public Works Department Irrigation Report for 1888-89, has been accepted. But it is observed that the average of experiments from 1880-81 to 1887-88 gives 16½ maunds of paddy, or only 833lbs. of rice.

Gaya.—See page 116 of Mr. MacDonnell's "Food-Grain Supply." See also above under "Patna."

Shahabad.—See page 7 of Mr. MacDonnell's "Food-Grain Supply." See also above under "Patna."

Darbhanga.—1,066lbs have been taken, or 13½ maunds, on consideration of the figures on page 67 of Mr. MacDonnell's "Food-Grain Supply."

Muzaffarpur.—984lbs, or 12 maunds, have been taken on consideration of the figures on pages 81-82 of Mr. MacDonnell's "Food-Grains."

Saran.—See page 32 of Mr. MacDonnell's "Food-Grain Supply."

Champaran.—See page 100 of Mr. MacDonnell's "Food-Grain Supply."

Monghyr.—See page 170 of Mr. MacDonnell's "Food-Grain Supply."

Bhagalpur.—See pages 150 to 151 of Mr. MacDonnell's "Food-Grain Supply."

Purnea.—No information available on which an average for the district can be struck.

Malda.—Mr. Otley says:—"The ordinary outturn of paddy per acre is 36 to 39 maunds." This would be equal to over 23 maunds of rice, which is clearly too much. The outturn for this district is therefore left blank.

Sonthal Parganas.—No trustworthy information available.

Cuttack.—902lbs is the estimate made by Mr. N. N. Banerji, Assistant to the Director in his Agricultural Report on Cuttack, which is now passing through the Press. Mr. Otley gave 16 maunds of paddy, i.e., about 9½ maunds. The average outturn of irrigated crops in the three Orissa districts shown in the Provisional Return is based upon the figures given on page 31 of the Orissa Canals, Appendix to the Public Works Department Irrigation Report for 1885-86. The averages for the five years, 1880-85, there shown give a quinquennial average of 20 40 maunds of paddy to the acre of irrigated land, equivalent to 12½ maunds of rice, or 1,040lbs. The figures returned for the same years for unirrigated land give an average of 16 66 maunds of paddy, or 10½ maunds, i.e., 854lbs. of rice.

Balasore.—902lbs. estimated, as it is likely that the yield approximates to that of Cuttack. Board's Return No. XLI of 1868-69 gives 800lbs.

Puri.—902lbs. on page 206 of Volume II of the Selections from the correspondence relating to the settlement of Khurda. The Settlement Officer, in his letter, dated January

1883, gives 12 maunds as the average outturn in Khurda; but Khurda is probably on the whole more fertile than the rest of the district, and 11 maunds, or 902lbs., have accordingly been taken as the district average.

Hazaribagh — Not known.

Lohardaga.—In his Report on the Agriculture of Lohardaga, written in 1890, Mr. B. C. Basu says (page 60) that 10 maunds of paddy is the average yield. This represents 6½ maunds of clean rice, or 512lbs. This is practically the same outturn as was reported by Mr F. A. Slack, c s, in his report written in 1888 on the settlement of the estate of the Maharaja of Chota Nagpur (see page 86 of the report).

Palamau.—The Lohardaga estimate has been taken.

Manbhum and Singhbhum — No trustworthy information available.

WHEAT.

Average yields of wheat to the acre have been shown in the Provisional Return in the case of districts in which the area cultivated nearly comes up to or exceeds 10,000 acres. On a consideration of the figures given in Mr. Finucane's Report on Wheat, No. 391T., dated 7th July 1886, and the figures given in the Report on the Wheat Production and Trade of India, published by the Government of India in 1883, an estimate of 10½ maunds, or 861lbs to the acre, has been taken for the five Bengal districts, viz., Nadia, Murshidabad, Dinajpur, Rajshahi and Pabna, under which wheat is shown as a principal crop, and 12 maunds to the acre for the Bihar districts. The average outturn depends very much on the extent to which this crop is irrigated and manured. On page 86 of his Settlement Report for Chota Nagpur, Mr F. A. Slack shows 5½ maunds (nearly), or 461lbs., as the average yield of wheat to the acre, and this estimate has accordingly been entered under Lohardaga.

OTHER FOOD GRAINS, INCLUDING PULSES

Every district in these Provinces has a large area of cultivation coming under the statistical head of "Other food-grains, including pulses." The most important crops under this head are barley, Indian-corn, millets and gram. Some information with regard to the outturn of these crops in certain districts is contained in various agricultural reports and settlement reports which can be tabulated when the next return of the kind now submitted is prepared.

OILSEEDS.

Nearly every district in these Provinces has a considerable area under oilseeds. From the estimates given by Collectors in the forecast of the oilseed crops, it would seem that six maunds to the acre is about the average yield. In a future return, it may be possible to give estimates of yield under the three main heads of linseed, rape and mustard.

SUGARCANE.

Sugarcane also is an important crop in nearly every district of these Provinces. The existing statistics of sugar cultivation and production were considered in correspondence which passed between the Government of India and the Government of Bengal in 1888-89. A reference to that correspondence will show that the district estimates of outturn of sugar are open to much doubt. Thirty maunds or 22cwt. (equivalent to 2,684lbs) of *gur*, or unrefined sugar, has been taken as the average outturn in Bengal (paragraph 11 of Statistical Department note, dated 25th July 1888). The Government of India estimated 20cwt or 1 ton as the outturn of coarse sugar per acre (paragraph 2 of Revenue and Agricultural Department Resolution of 20th March 1889), but this estimate included sugar plants of all kinds. For particular districts of these Provinces the most trustworthy statistics which are known to me are those shown on page 607 of Volume II of the Bengal Government Report on the Tenancy Bill of 1888. In his letter No. 111, dated 31st March 1883, there printed, Mr D. J. Macpherson, c s, reported that he had obtained an average outturn of 33cwt. to the acre on the Jaipur Estate in Bogra, and he compares this result with a yield of 26cwt obtained by Messrs. Thomson and Mylne in Shahabad.

COTTON.

Meinapore.—147lbs to an acre. So shown in a statement submitted to the Government of India by the Bengal Government in the Financial Department in 1875.

All the other figures entered against cotton are taken from the Appendix to Bengal Government letter No. 3573, dated 13th November 1876.

JUTE.

On page 86 of Babu Hem Chandra Kerr's report on the cultivation and trade in jute, published in 1877, six maunds per bigha is taken as the average outturn for the large jute-growing districts. This is equivalent to about 18 maunds, or, say 1,500lbs. to the acre. This estimate has been taken for all the Bengal districts. With reference to the estimate shown against Manbhum on the same page of the report cited, 750lbs. has been roughly estimated as the outturn in Manbhum.

INDIGO.

On page 23 of his Pamphlet on Indigo, Dr. Watt takes the outturn of indigo as 10 to 12 lb an acre in Bengal, and 20 lb an acre in Bihar. 12lb and 20lb have been taken respectively for all the Bengal districts, and for all the Bihar districts in which indigo is an important crop.

TEA.

The district outturns are those shown in the Appendix to Revenue Department letter No. 304Agri., dated 7th August 1891, which agree with those published on page 132 of the Bengal General Administration Report for 1890-91.

TOBACCO

In the report on cultivation and curing of tobacco in Bengal submitted to the Government of India, with Bengal Government letter No 3726, dated 29th December 1874, it was stated (paragraph 4 of the Report) that while under ordinary cultivation the yield per acre varies from 2 or 3 maunds to 6 or 7 maunds, the return under high cultivation may be from 10 to 30 or even 40 maunds. For districts in which tobacco is a principal crop, as returned in the agricultural statistics published in 1891, the outturns shown in Appendix A to the Report of 1874 above quoted have been shown.

CINCHONA

The estimate of 168lb per acre has been kindly supplied by Dr. Prain

OPIMUM.

The figures entered for opium show the average outturn per standard acre of opium for the ten years (1881-82 to 1890-91) They have been compiled from the Opium Administration Report for 1890-91 As no separate figure is given for Darbhanga, the outturn for Muzaffarpur has been entered under it.

GANJA.

The estimate of 824lb is obtained by taking the average of the estimated yield for the six years 1885—1891 shown on page 34 of the Excise Administration Report for 1890-91.

W. C. MACPHERSON,

*Offg. Director of the Dept of Land Records and
Agriculture, Bengal.*

DARJEELING,
The 14th June 1892

Statement showing roughly the average outturn per acre, in maunds, of bhadoi, kharif and rabi crops in Bihar.

Name of crop	Average outturn per acre in maunds.	REMARKS
1	2	3
Winter rice ...	12 to 13 maunds per acre, of rice	For purposes of the winter rice forecast 15 maunds per acre is taken as the average outturn of winter rice in these Provinces. In a return published by the Agricultural Department in 1892, showing the average outturn per acre of the principal crops of these Provinces 984 lbs or 12½ maunds was accepted as the average outturn of rice per acre in Bihar. The winter rice crop in Bihar yields a smaller outturn than that in Lower Bengal. Twelve to 13 maunds may be, therefore, taken as a fair average rough estimate.
Bhadoi rice .	10 maunds of rice ...	In estimating the rate of outturn per acre of clean rice for the bhadoi crop, 10 maunds has been provisionally assumed to be the average outturn. This figure may be accepted for Bihar.
Wheat ...	12 maunds ...	In Agricultural Department return previously referred to the average outturn, after consulting different reports, was taken as 984 lbs. per acre, or 12½ maunds per acre. About 12 maunds per acre or 4 maunds per Bengal bigha may be accepted as an approximately correct average for Bihar.
Barley ...	13 maunds	
Gram ...	14 maunds ..	The outturn of gram is very much the same as that of barley, if anything, a little more, and 14 maunds may be well accepted as the approximate average outturn per acre.
Maize ...	13½ maunds	
Marna ...	10 maunds	
Bajra ...	10 ditto.	
Jowar ...	12 ditto.	

N. N. BANERJEE,

Assistant Director of Land Records and Agriculture.

CALCUTTA,
The 3rd November 1896.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT
OF THE PRESIDENCY DIVISION FOR THE YEAR 1895-96

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 18th November 1896.

RESOLUTION—No. 3851.

READ—

The Annual General Administration Report of the Presidency Division for the year 1895-96.

The report is submitted by Mr. E. V. Westmacott, who held charge of the Division throughout the year; there were changes in the charge of all five districts, which however, except in Jessore and Khulna, did not interfere seriously with continuity of administration.

2. *Tours and Inspections.*—The Commissioner was on tour 113 days. He paid special attention to the working of municipalities, and endeavoured by personal discussions with Municipal Commissioners in their towns and offices to show wherein their working was defective. The Lieutenant-Governor is glad to observe that the result is reported to be satisfactory, and that the cordial relations established between Mr. Westmacott and the Commissioners have rendered his criticisms more effective than they ever were before. All District Officers spent the prescribed number of days in camp, except Mr. Kennedy at Murshidabad and Mr. Fischer at Khulna, both of whom were to some extent prevented from doing so by ill-health; Mr. Kennedy might, however, notwithstanding his bad health have spent on tour some part of the month of February during the whole of which, it is stated, he was detained at head-quarters in consequence of volunteer and race meetings, and of preparations for going on furlough. In the 24-Parganas Mr. Collin succeeded in reaching the prescribed limit without the help of the Joint-Magistrates, a thing which his predecessors have generally been unable to do, and his and Mr. Garrett's tours and inspections are reported to have been extremely useful. In all the subdivisions the prescribed standard was reached or exceeded, except at Diamond Harbour, where the Subdivisional Officer's tour fell short of the minimum by three days, but the tours of the Subdivisional Officers of Bongaon and Meherpur are reported to have been badly planned. The Collector of Jessore gives a very good account of the work done in camp by Babu Amrita Lal Mukherji, who was in charge of the Narail subdivision.

All the prescribed inspections were made, except those by the Commissioner of the subdivisional offices at Kandi and Jangipur. The Khulna treasury was inspected by the Collector only once, and the Subdivisional Officers of Ranaghat and Kushtia failed to finish the second inspection of their own offices within the year.

3. *Weather and Crops: Public Health: Material Condition of the People.*—The rainfall was abnormally low, the divisional average being 42·67 inches, or 15·48 inches less than in the previous year. The result was poor harvests generally: the *boro* rice was injured by excessive rain in May, the *aus* rice was a fairly good one, but the early cessation of the rains injured the later crops, and especially the winter rice. In the Satkhira and Bagirhat subdivisions of Khulna the crops were injured by salt water driven over them by a cyclone a fact which probably accounts also for the abnormal shortness of the present year's crop reported from these subdivisions. The price of common rice rose steadily towards the end of the year under report, and is still rising. Another effect of the scanty rainfall was the scarcity of water for irrigation and household purposes, which began to be felt in the latter part of 1895-96. Mr. Westmacott points out that the standard of comfort is rising in this part of Bengal, and is not likely to be permanently affected by such temporary evils as partial failure of crops or a deficient supply of water.

The recorded death-rate for the whole Division was 36·2 per mille, against an average of 32·5 in the two preceding years. The public health showed the most considerable deterioration in the 24-Parganas, and especially in the suburbs of Calcutta. Khulna district was visited by a severe epidemic

of cholera, owing to the early cessation of the rains, and the inadequate supply of good drinking water. The year was on the whole an unusually unhealthy one, except in Murshidabad.

4. *Manufactures: Trade and Commerce.*—The principal manufactures are cotton twist and yarn, gunny bags and cloth, paper, ice, shellac and lac-dye, indigo, silk, sugar and molasses. The manufacture of all but the four last-mentioned commodities is confined to the 24-Parganas, where 56 factories employed 62,047 operatives against 60,474 in the preceeding year. The outturn of gunny bags and cloth is valued at Rs. 2,57,54,478; of cotton twist and yarn at Rs. 76,31,970; of paper at Rs. 26,56,480. All these branches of manufacture showed a large expansion as compared with the previous year, but the output of cotton twist and yarns was less than in 1893-94. Lac was manufactured to the value of Rs. 17,17,695; rather less than in 1894-95, but much more than in 1893-94. The districts of Nadia, Murshidabad and Jessore produced 8,968 maunds of indigo, so far as statistics which have been received show. Silk to the value of Rs. 33,08,129 was produced in Murshidabad, where the season for cocoons was a good one and twelve new filatures were opened; the outturn of silk in the 24-Parganas is valued at Rs. 52,347. Silk cloths are manufactured at Mirzapur in Murshidabad. Sugar was produced (by both European and native processes) to the value of Rs. 24,27,742; no statistics are furnished from Nadia, and the figures are otherwise incomplete.

The statements of imports and exports have this year been prepared for the first time on an improved method; the registered imports into the Division of food-grains amounted to 8,76,519 maunds; and the registered exports of food-grains from the Division into Calcutta (for which the figures available may be taken to be approximately correct) amounted to 58,36,293 maunds, rice (29,04,332 maunds) and gram and pulses (17,87,155 maunds) forming the chief items.

5. *Civil Justice.*—113,071 suits were disposed of in 1895, or 2,146 less than in the previous year. The number of institutions diminished to about the same extent; and the balance of cases increased by 357 to 12,656. The number of witnesses examined was 1,31,507, and the percentage of this number who were detained more than two days was 9·9 against 1,40,566 and 10·4 in 1894.

6. *Crime: Police Criminal Justice.*—The number of cognizable offences reported increased from 15,936 to 16,758, and of non-cognizable cases from 15,562 to 16,906. It is not reported how many of the cognizable cases were prosecutions for breaches of sanitary laws. In both classes of cases the increase was confined to the districts of Nadia, Murshidabad and Jessore; the other two districts (24-Parganas and Khulna) showing a decrease. 732 cases were declared false, in only 45 of these were prosecutions instituted against the complainants, 19 of whom were convicted. 125 complainants were ordered to pay compensation. The police abstained from making enquiry in 9·4 per cent. of the cases reported to them.

19,651 cases were decided by Stipendiary, and 10,048 by Honorary Magistrates, against 18,578 and 8,253 in the previous year. The number of witnesses examined was 72,139 in 1895 against 72,254 in 1894; in 1895, 3,752 witnesses were detained more than two days, or 5·2 per cent. of the whole number examined, and 148 more than in 1894. The number detained over two days increased very considerably in the 24-Parganas, and it is believed that the figures given do not represent the whole number so long detained. Mr. Collin, the District Officer of the 24-Parganas, found that at Sealdah witnesses were shown as discharged after their examination-in-chief, and if recalled for cross-examination were shown as new witnesses, and the Lieutenant-Governor fears that it is possible that the errors discovered in the attendance registers of the courts in this district may exist in other districts also; and the matter is one which should receive the attention of District Magistrates. The Honorary Magistrates (especially those sitting singly) are reported to have generally rendered considerable assistance to the administration, but the percentage of witnesses detained by them for more than two days was very high in some cases, especially before some of the Benchmen in the 24-Parganas and Jessore. The percentage of police cases remanded six times

or more increased from 3·9 to 4·8; and it is certain that these delays might to a great extent have been avoided by better arrangements.

Two hundred and nineteen cases were tried at the Sessions, and 154 of them ended in conviction, a proportion which shows that commitments were made on the whole with care.

Fines to the amount of Rs. 1,27,037 were imposed during the year; Rs. 1,12,153 were collected on this account. A sum of Rs. 17,836·10 was written off; and the outstanding balance at the close of the year reduced from Rs. 26,547 to Rs. 23,641.

Among the regular police there has however, been a considerable increase in the number of officers rewarded, and some decrease in the number punished. The Commissioner observes that there has been a decided improvement in police work in Nadia, due to the personal exertions of Mr. J. H. E. Garrett, the Magistrate, and of Mr. W. T. Moore, the District Superintendent of Police. Better quarters for the police are, it is reported, much needed in the 24-Parganas. Among chaukidars also the number rewarded has been nearly doubled; but the number punished has increased from 4,482 to 6,015, though the whole force consists of only 16,773 men. Attention has been given to the necessity for securing the prompt payment of their wages, and efforts have been made, without much success, to recruit men of a higher class. The Commissioner is of opinion that efforts of this kind must continue to be futile unless the pay of chaukidars is raised to equal the earnings of day-labourers, which are exceptionally high in this Division.

7. *Land and Land Revenue.*—The current demand on account of land revenue in the Division, including Calcutta, was Rs. 51,02,291, and the arrear demand was Rs. 1,37,493; Rs. 50,47,083 were collected or 96·2 per cent. of the total demand. The following statement shows the percentage of current collections on current demand in respect of the three classes of estates, as well as the standard percentages:—

Standard percentage	Permanently settled estates.	Temporarily settled estates.	Estates under direct management.
Collections in 24-Parganas	99·	95·	90·
„ Nadia	98·2	90·7	81·1
„ Murshidabad	97·3	95·2	74·5
„ Jessore	99·8	93·9	58·3
„ Khulna	99·6	85·2	94·2
„ Calcutta	98·8	89·6	70·4
	99·9

The prescribed standard of collections was nowhere attained, except in respect of permanently-settled estates in Murshidabad and Jessore, of temporarily-settled estates in Nadia and of estates under direct management in Jessore. The short collections are attributed to bad harvests, but the revenue bears such a small proportion to the rent in these provinces, that a partial failure of crops is no sufficient excuse for failure to collect it in full in the case of permanently and temporarily settled estates. In the case of Government estates partial failure of crops, due to want of rain in some instances and to injury by floods in others, may be an adequate reason for leniency in enforcing the Government demands; but even as regards these, if the demand was fairly adjusted, the collections ought not to have been as bad they were. The gross demand on account of Road and Public Works Cess was Rs. 10,15,067, of which amount Rs. 8,98,613 or 87·2 per cent. were collected.

Eighty-seven estates and share of estates were sold at auction out of 832 which defaulted for land revenue.

The number of certificates issued for the recovery of public demands shows a satisfactory decrease, being 7,828 less than half the previous year's number; the balance pending at the close of the year was reduced in a greater proportion.

8. *Wards' and Trust Estates.*—There were six estates under the Court of Wards, besides the Syedpur Trust Estate in Khulna. The most important of these charges is the Kassimbazar Estate in Murshidabad. The total current demand on account of rent and cesses in these seven estates is Rs. 8,91,097; the arrear demand in 1895-96 was so much as Rs. 10,99,488; the greater part of these heavy arrears is due to the Kassimbazar Estate and is the result of a bad

settlement of the Sarail Pargana in Tippera, on which the Lieutenant Governor has already commented in the Government Resolution on the Board's annual report on Wards' estates. The total collections were only 44 per cent. of the total demand, but the arrearages were reduced by Rs. 64,759. Rupees 42,517 were spent on improvements of all descriptions.

9. *Excise Stamps Income-Tax.*—The excise revenue increased by Rs. 2,27,206 to Rs. 38,42,486; the greater part of the increase, Rs. 1,59,562, accrued in the town of Calcutta. The revenue derived from country-spirit rose by Rs. 95,514 to Rs. 16,30,812, and that derived from rum yielded Rs. 4,64,796 or Rs. 33,760 more than in the previous year. Ganja and opium yielded Rs. 5,11,744 and Rs. 7,86,744 respectively, or Rs. 53,983 more than in the previous year.

The revenue derived from stamps was practically stationary, showing an increase of only Rs. 5,108 in a total income of Rs. 47,73,278. The number of prosecutions for infringement of the stamp law decreased from 387 to 174.

The collections of income-tax amounted to Rs. 22,00,677, or Rs. 45,160 more than in the previous year. Much the greater part of this sum, Rs. 19,37,977, was contributed by Calcutta. The percentage of collections on the final demand of the tax was 95·1; in Calcutta the percentage was only 94·6, but in all the districts it was over 97.

10. *The Lodging-House Act* is in force only in the town of Nadia. The number of licensed lodging-houses here rose from 132 to 175; the receipts have increased as well as the expenditure on sanitary improvements.

11. *Education.*—There are three colleges and 5,979 schools in the Division, with a total attendance of 199,701 pupils. Though the number of schools and pupils was practically the same as in the previous year, the total expenditure rose from Rs. 10,23,352 in 1894-95 to Rs. 10,59,902 in 1895-96. The reasons of this increase are not given. Rupees 3,26,018 were spent on primary education, and the number of primary schools was 4,864, showing a slight decrease from the previous year. The number of girls' schools increased by 20 to 463, but there was a decrease of 517 in the number of female pupils; 14,830 girls were at school in the Division. The proportion of boys at school to the whole number of boys of a school-going age, 31·1, is small for advanced districts like those of the Presidency Division, and compares unfavourably with Dacca where the percentage is 35·2, and Chittagong where it is as high as 46·1. The number of Muhammadan pupils at school is now 56,036, showing a satisfactory increase of 1,856. The Lieutenant-Governor would be glad to see an increase of Muhammadan Inspecting Officers in districts where that community preponderates.

12. *Dispensaries and Hospitals.*—There are 57 of these institutions in the Division; 291,962 patients were treated at a cost of Rs. 1,02,198. Among the most successful are the dispensary at Ranaghat, under the management of Mr. J. Munro, C.B., and those at Kamarhati, supported by the estate of the late Babu Sagar Dutt, at Cossipur, at Russa, and at Kandi.

13. *Local Self-Government Institutions.*—The District Boards worked successfully and smoothly during the year; but, in this Division as elsewhere, it is reported that the Local Boards take little interest in the somewhat limited duties entrusted to them. Three of the District Officers express themselves dissatisfied with the management of funds by some or all of the Local Boards in their districts. In the District Board of Murshidabad and the Local Boards of Barasat, Basirhat, Jessore, Jangipur and Kandi, an excessive number of meetings fell through for want of a quorum.

The District Board of the 24-Parganas is reported to have been especially active in the matter of communications; and spent Rs. 28,417 in the construction of original works of this nature. It also spent money on the excavation of tanks and wells, as did the District Board of Nadia. In the latter district the Commissioner considers that the maintenance of all the roads is beyond the resources of the District Board. All the District Boards contributed liberally towards the expenses of primary education.

Three Union Committees have been established in the 24-Parganas, four each in Nadia and Murshidabad, five in Jessore and six in Khulna; it does not appear that any of them has yet done any work.

There were 38 Municipalities in the Division, Titaghar having been erected into a separate Municipality during the year. The aggregate income of these bodies amounted to Rs. 7,33,879; and their aggregate expenditure to Rs. 6,33,044. The income was less by Rs. 71,941 than in the previous year. No reason is assigned for this decrease.

The proportion to income of the expenditure on primary education fell short of the prescribed percentage (32 per cent.) in fifteen Municipalities. That of Cossipur-Chitpur, with an income of Rs. 1,25,980, spent only Rs. 584 on this object; in Maniktola, North Dum-Dum, Naihati, Krishnagar and Jessore also a very small proportion of income was devoted to primary schools.

Mr. Collin thinks that the Municipal Commissioners in his district have shown a proper and sufficient interest in the working of Municipalities. The Commissioner thinks rightly that the weakest point in Municipal administration generally is in the collection of taxes, and the Lieutenant-Governor agrees with him in the opinion that the establishment of cordial relations between the controlling officials and the Municipal Commissioners cannot fail to produce good results. Mr. Westmacott visited thirty of the Municipalities in the course of his tours.

14. *Conduct of Zamindars.*—The Nawab Bahadur of Murshidabad, Maharani Surnomoyi, c. l., the Maharaja of Krishnagar, Rai Hari Krishna Mazumdar Bahadur of Islampur (since deceased) and Babu Jogendra Narayan Ray of Lalgola in Murshidabad, the Mukharji family of Gobardanga and the Chaudhuri family of Baruipur in the 24-Parganas have, as in previous years, been distinguished by liberality and public spirit; but the zamindars generally are said to take a very slight interest in the welfare of their tenants.

15. The Lieutenant-Governor's thanks are tendered to Mr. Westmacott for his efficient administration of the Division and for his complete and interesting report, from which extracts are published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

*Extracts from the Annual General Administration Report of the Presidency
Division for the year 1895-96.*

* * * * *

III.—WEATHER AND CROPS.

21. The average rainfall in each district of the Division was considerably less than that of either of the two preceding years, the divisional average being 42·67 inches during the year under report, against 58·15 in 1894-95 and 71·49 in 1893-94. The largest rainfall was at Bagerhat in Khulna, being 60·94 inches, and the smallest at Lalgola in Murshidabad, where it was 30·72 inches only. The rainfall was not only abnormally low, but was also ill-distributed, there having been practically no rain at those seasons of the year in which it was most needed. As a consequence the outturn of *aman* (or winter rice) and of *aus* (or early rice), which form the principal supply of food for the Division, fell in all the districts as compared with the preceding year, the average outturn of *aman* in the Division being 9·01 annas, against 15·1 in 1894-95, and that of *aus* 10·2 annas against 14. In the 24-Parganas the failure of rain was most felt in the northern half of the district, where the rainfall did not reach 40 inches. In the Barasat subdivision the rainfall was only 33·28 inches. In Basirhat and Diamond Harbour the rainfall was over 40 inches, but these subdivisions require from 60 to 70 inches to make the season a good one. The rainfall was deficient from May to July, and the total absence of rain in November and December caused the outturn of the cold-weather crops to be poor. The outturn of *bhadoi* rice was only 10½ annas, against 13 annas in the preceding year. The jute crop was also slightly injured, and its outturn was estimated at 12½ annas, against 13 annas in the preceding year. The outturn of the winter rice crop was estimated at 13½ annas against 15½ in 1894-95. In the Diamond Harbour and Basirhat subdivisions the outturn was estimated at 12 annas, while in the Sadar it was estimated at 10 annas and in Barasat at 8 annas only. It varied, however, greatly in different localities. In some villages in the Diamond Harbour subdivision the outturn fell from 11 maunds per bigha in the preceding year to 5 maunds. The outturn of the crop in many villages was only one-half of that of the previous year. In estate Bil Bullee, however, and such low-lying tracts as ordinarily suffer from excess of rainfall, the crops were above the average. The average outturn of the *rabi* crops was 9½ annas, against 14 annas in 1894-95. The outturn of sugarcane is estimated at 14 annas. This is sufficient to make up for defects in other cold-weather crops. In Nadia there was practically no rain after September, and the outturn of winter rice was only 7½ annas, against 12½ in 1894-95, and of early rice, 9 annas against 14. This had the effect of raising the price of common rice, which would be more felt during the current year than in the year under report. In Murshidabad the rainfall of the year under report was considerably below that of either of the preceding two years, and in consequence the crops were generally poor. It was only in the south of the district, however, that any real failure occurred. In the Barua thana in the Sadar subdivision the outturn of both the *bhadoi* and winter rice crops was less than half the average, and in Bharatpur and in parts of the Kandi and Gokarna thanas in the Kandi subdivision the winter rice crop was only about six annas. As these parts of the district have enjoyed favourable harvests for some years, they can well stand an occasional bad season. The outturn of pulses and of the *rabi* crops was the same as in the preceding year. Jute and indigo are the only crops the outturn of which shows an improvement, being respectively eleven and twelve annas, against ten annas for both crops in the preceding year. In Jessore heavy rain in May drowned the *boro* or summer rice, which is grown in the Narail subdivision on low lands, and this submersion of the land prevented the sowing of *aman* rice on such lands throughout the district. The short rainfall in July and August partially affected both the *bhadoi* and the winter rice crops. Finally, want of rain in November prevented the development of the winter rice. The preceding year, however, had yielded a bumper crop, and so the partial failure of the rice crops of the year under report did not occasion much distress. The principal food-crops of this district are

aus and *aman* rice and pulses. The different subdivisional officers have differently estimated the outturn. For instance, the Subdivisional Officer of Narail has estimated the *bhadoi* or *aus* crop as yielding sixteen annas, against eighteen annas of the preceding year, winter rice crop fourteen annas against eighteen annas, and pulses sixteen annas against twelve annas. The Subdivisional Officer of Magura, which adjoins Narail, has, on the other hand, estimated *aus* at ten annas against fifteen annas, *aman* ten annas against sixteen annas, and pulses ten annas against twelve annas in the previous year; while the Subdivisional Officer of Bangaon's estimate, probably from the land of this subdivision being higher, is far below the estimate of either of these two officers, being ten annas only for *bhadoi* and five annas for winter rice. On the whole, it may be said that the winter rice crop yielded an outturn below the average, and the pulses an average one. As regards other crops, neither indigo nor jute suffered, and both yielded an average crop. The district generally is prosperous, and no special remarks are necessary. The rainfall in Khulna during the year was scanty, and was not well distributed; consequently the outturn of all the crops, excepting jute, sugarcane, &c., was smaller than that of the preceding year. The Subdivisional Officer of Bagerhat reports that, owing to a storm-wave which accompanied a cyclone in the beginning of October last, the winter rice crop was only fourteen annas. This cyclone did much damage to the betel-nuts, which form an important article of export from that subdivision. The Subdivisional Officer of Satkhira reports that the standing plants suffered much from the ravages of salt water driven into the land by the cyclone, which also visited that subdivision. The following may be taken as a summary of the foregoing accounts of the weather and crops. The *boro* rice was injured by excessive rain in May; other crops, and specially the *aus* rice, were grown and harvested under fairly favourable conditions, but an early cessation of the rains injured the later crops, and especially the *aman* rice. The localities which depend principally on the latter crop undoubtedly suffered, but the higher land, such as great part of Nadia, in which the *aus* rice is a more important crop, had little reason to complain. Latterly there was much inconvenience from the failure of the sources of supply of water for irrigation and domestic purposes, but this belongs rather to the history of the following year than to that of the year ending in March 1896.

* * * * *

V—MATERIAL CONDITION OF THE PEOPLE.

24. In the 24 Parganas the material condition of the people has been affected to some extent by partial failure of crops, by an increased number of deaths from fever, cholera, and small-pox, and by a serious scarcity of drinking-water, but it can scarcely be said that there has been actual distress, nor have the prices of food-grains risen to any extent. The labouring classes can get as much work as they like in mills and workshops, and in February and March there was an unusual amount of work for them in re-excavating and cleaning tanks. The condition of the non-labouring classes is reported to be unsatisfactory. They dislike any but clerical labour, for which there is keen competition. In Nadia the material condition of the people was not much affected by the shortness of the outturn of *aman* rice and of the *rabi* crops, as *aus* rice is more important in this district. The price of labour ruled high, and labourers have undoubtedly been well off. With regard to the necessity of improving the water-supply of the people at large, Mr. Garrett writes:—
 “One of the chief, if not the chief, difficulty to be overcome is the apathy of the people themselves, and their indifference to the simplest sanitary precautions. Offer a village a tank on condition that they shall reserve it entirely for drinking purposes, and the offer will be refused. A Brahman will not drink water out of a well used by Muhammadans, and yet he will freely drink water from a tank in which the whole village bathes or washes clothes and cattle, and the banks of which are rank with human ordure. A tank almost dries up, and the residue of the water becomes of the consistence of pea soup, and yet the women who have been accustomed to take water from it will not go even a hundred yards further to

"a well or river because it would be an innovation. Under these conditions what wonder is it than in a year of drought cholera should spread like wild fire, and thousands of people fall victims to it. This is the immediate and palpable result of the consumption of bad water, but there can be no doubt that fever and diseases of the spleen are also induced, and the physique of a people thus enfeebled generation after generation must deteriorate. The outlook is hopeless until the people can be taught to help themselves." In Murshidabad the want of rain and the poor outturn of the *aman* crop affected the condition of the agricultural classes to some extent. Prices of food grains, however, ruled low, and were steady throughout the year, and the condition of the people was not much below the average. The non-cultivating middle classes, as elsewhere, are reported to have run into debt. In the Jangipur and Sadar subdivisions, the labouring classes are able to find sufficient employment, and in the latter subdivision they are largely assisted by charitable doles distributed among them by the local nobility and gentry. Indiscriminate charity of this nature, however praiseworthy in years of scarcity and distress, is certainly demoralising when practised habitually, as it is in Murshidabad. In the Kandi subdivision, the poor harvests affected both the labouring and non-cultivating classes, with the result that there was an increase of thefts and burglaries throughout the subdivision. The condition of the people of Jessore was normal during the year. There was unusual drought during part of the year and a poor harvest, but the effects of the good crop of 1894-95 were still felt. The dry weather and consequent want of water caused numerous deaths from cholera in most parts of the district. The agricultural classes were benefited during the winter by a good outturn of date sugar. The scale of expenditure among the better classes tends slowly upwards. Those who have daughters find it expensive to marry them, and the cost of dress and food is on the increase, but the lower classes are generally well off, and work is not hard to get. The large quantity of rice and other food grains exported from the district testifies to the fertility of its soil. New sub registry offices are being opened, and new schools of all classes are being established. The excise revenue has increased, and stamp-vendors appear to find their business profitable. There are on all sides distinct proofs of steady improvement. In Khulna, where the bulk of the people are agriculturists, their material wellbeing depends largely on the outturn of the winter rice crop. The condition of the agriculturists of the Bagurhat subdivision was generally good, although the rice harvest was not as good as in the preceding year. The higher prices, however, which prevailed compensated to a large extent for the smaller outturn. In the northern part of the Satkhira subdivision *rab* crops are grown, and the manufacture of sugar from date juice is a very paying industry. The inhabitants of the southern part depend solely on the winter rice harvest. A short outturn, however, does not affect the condition of the cultivator in this fertile district, except as regards his ability to pay his rent. Upon the whole the condition of the people of the Division improves steadily, and is not affected in the long run by such temporary evils as partial failure of crops or deficient supply of water. Even among the educated middle classes, who look to clerical labour for their livelihood, and who are clamorous as to the distress caused by their competition for it, the standard of comfort and expenditure is rising. I fancy that inquiry would show that there are few families of this class which do not derive an income from interest in land rents. The rent exacted from the actual cultivator often far exceeds the amount which reaches the zamindar, and the difference is generally absorbed by the educated non-labouring classes to which I refer. The condition of the labourer, who is not too dainty to work with his hands, improves rapidly, and peons and menial servants who not very long ago were content with five rupees a month now expect eight.

* * * * * * *

VII.—PRICE OF FOOD AND LABOUR

26. Notwithstanding the deficient rainfall during the year under report, the price of common rice in the 24-Parganas was lower during the greater part of the year than in the corresponding period of the preceding year. This was due

to the good outturn of the *aman* crop in 1894-95 and to imports from other districts. Towards the end of the year, and since the last *aman* harvest, which was a poor one, the price of common rice has, in many parts of the district, risen higher than in the corresponding period of the previous year. In the Diamond Harbour subdivision the price remained almost stationary till the end of the year. This is attributed to the good outturn of *aman* in the preceding year and to the steady import of paddy from Midnapore and the Sundarbans where, it is reported, there was a good harvest during the year. The price of common rice in Nadia, where the *aman* harvest is generally less important than the *aus*, ruled higher than in the preceding year, while there has been a fall in the prices of wheat and gram in Kushtia, Moherpur, Chuadanga, and Ranaghat. The rise in the price of common rice in this district is chiefly due to the failure of the *aman* crop. In Murshidabad the price of rice, wheat, gram, and salt was somewhat lower than in the preceding two years, and this is ascribed to the favourable harvest of the year immediately preceding. In Jessore the price of common rice rose in the Sadar as well as in the other subdivisions steadily towards the end of the year. The prices of wheat, gram, and salt were not, however, so much affected. In Khulna the price of common rice rose considerably above that in the year preceding, though it was somewhat cheaper than in 1893-94. The price of grain was stationary at Satkhira, while the price of salt was cheaper in the Sadar. The prices of labour continued much the same in the Division as in the two preceding years. In noticing last year a decrease in the wages of blacksmiths from twelve to ten annas, reported in the 24-Parganas, I remarked that I supposed there was no real fall, and I observe that during the year under report their wages again came up to twelve annas. The fluctuations in the price of rice, which is the staple food in the Division, have apparently no effect on the wages of labour, which are more or less fixed by local custom.

VIII—MANUFACTURES AND MINES

27. The principal manufactures of this Division are—cotton twist and yarn, gunny-bags and cloth, paper, ice, shellac and lac dye, indigo, silk, sugar, and molasses. As in the preceding year, the manufacture of cotton twist and yarn, gunny-bags and cloth, paper, ice, shellac, and lac dye was confined to the district of the 24-Parganas, in which 56 factories were at work, against 57 in 1894-95, one having been closed. Of these factories, nine are owned by Government, and the rest belong to companies or private individuals. In 34 of these, work was carried on by shifts and in 20 by midday stoppages, while two (the Oriental Gas Work and the Cossipore Jute Warehouse) worked on other systems. The former factory worked continuously, and the latter had no fixed rules for working. The total number of operatives employed in the several factories and mills was 62,047, against 60,474 of the preceding year, but is still below the number employed in 1893-94. Of these, 47,736 were men, 8,685 women, 5,139 boys, and 487 girls. The increase in the number of employes, in spite of the reduction in the number of factories, is attributed to extensions, especially in jute factories, where electric lighting has been to some extent introduced. The statement given below shows the value of the outturn as returned by the owners of the several mills and factories during the last three years:—

ARTICLES.	OUTTURN.			REMARKS.
	1895-96.	1894-95	1893-94	
1	2	3	4	5
	Rs.	Rs.	Rs.	
Gunny-bags and cloth ..	2,57,54,478	2,09,96,916	1,61,98,071	
Cotton twist and yarn ..	76,31,970	74,18,581	81,51,872	
Paper	26,56,460	20,35,479	12,05,873	
Lac	17,17,695	18,00,000	950,000	
Leather	16,500	66,000	72,000	

28. With regard to cotton twist and yarn, the Secretary to the Dunbar Cotton Mills remarks as follows:—"In our report of the previous year ending 31st March 1895 we noted that an upward movement in the price of cotton from the recent abnormally low level had commenced. This continued till the end of September, owing to the new American crop having proved to be as far below the average in quantity as its predecessor had been in excess. Rates continued level for the next two months, when it was found that, in spite of the small American crop of 1895-96, sufficient balance of the huge crop of 1894-95 had remained over to supply the world's requirements, and rates began to subside. This movement in India was helped by a very large local crop of excellent quality, while the rise in exchange has further helped to depress local prices. *Yarn*.—The strong and continued improvement in the value of raw materials forced up the rates of yarn and induced a brisk trade. The local mills, which mostly secured their cotton early in 1895, made fair profits till the close of the year, and dealers and middle men found that cash contract yielded them good profits. Since the opening of 1896 the fall in the prices of raw materials above noted has reversed this state of things, and mills have seen their margins disappear, and dealers have been unwilling operators during the continuance of the fall. Scanty wheat and rice crops in many of the grain-consuming districts have increased the dullness of the market. There was a fair demand from China during the year, but at the moment this has ceased." It will be seen that the manufacture of gunnies, &c., has shown a remarkable extension, and the value of the manufactures has risen by nearly 48 lakhs of rupees over that of the preceding year and by 96 lakhs over that of the year 1893-94. The Manager of the Shannagar Jute Factory remarks:—"Very full average prices has been paid to raiyats for the new materials. The rates for manufactured goods have also ruled steady without much fluctuation in comparison with the previous year, leaving manufactures a reasonable margin of profits, and our company has for the year 1895 paid a 12½ per cent. sterling dividend to its share-holders." On this subject the Agent of the Barnagore Jute Factory writes as follows—"This season might be described as rather an uncommon one. Contrary to the usual course and to general expectation, there was a steady shipment demand for heavy goods throughout the slack season, say, June to September, which was sufficient to take off the whole of the production and maintain prices with but slight fluctuations right through this part of the season. The failure of the crops up country was disastrous to the gunny trade, and this season has been marked by an almost entire absence of country demand for gunny-bags. Native dealers having bought forward, as usual, to supply the expected demand, have all been heavy losers, and several old-established and reputedly wealthy native merchant firms have become bankrupt. The shipment demand has, however, taken off most of the productions, but at very low prices. The result would have been very different had there even been half the usual demand for gunnies for country requirements. Hessians have been in steady demand throughout the whole year at remunerative prices. Most mills have made fair profits during the year. Half a dozen new companies have been floated. These, with considerable additions to some of the existing concerns, will increase by about 3,000 the number of looms at work from early in 1897, and half of the new machinery is for the manufacture of Hessians, and it is expected that this will probably affect the Dundee Hessian trade more than Calcutta."

29. There was no material change in the rates of wages paid to the operatives employed in factories. The average monthly wages were as follows.—

Men from	Rs 8	to	Rs. 10
Women from	" 4-8	to	" 6
Children	" 4	to	" 5

30. These are higher wages than the same people could have earned in other employment. As in the preceding year, there were only two paper

mills in this Division—one at Titaghur and the other at Kankinara. The outturn of these mills shows satisfactory increase as compared with the previous year, as is shown below.—

NAMES OF MILLS.	OUTTURN IN 1895-93		OUTTURN IN 1894-95		REMARKS.
	lbs.	Value in rupees	lbs.	Value in rupees.	
1	2	3	4	5	6
Titaghur . . .	83,13,654	12,99,008	80,69,376	12,01,869	
Kankinara ..	82,40,774	13,57,152	56,38,111	8,30,610	

31. The manufactures consisted of white printing, *badami*, and coloured papers, blotting, cartridge, foolscap and water-marked stamp paper. The raw materials used were grass, rags, jute hemp, waste paper, &c. I consider that the substitution of paper made in the country for the imported article is a valuable boon to India.

32. There is a glass factory called the Pioneer Glass Company at Titaghur, but it has not been very successful. In the district of Nadia some oil-mills have been added since last year to the sixteen mills started at Sharupgungo, but they were not worked continuously. It is observed by the proprietors of the mills that they have ascertained by careful local enquiry that the local consumption is not less than the total outturn of the mills, that, on the contrary, it is many times greater than their total outturn, but that the tendency of the public to consume cheap articles of inferior quality is the cause of the occasional closing of the mills. It is reported that a flour-mill has also been added to the works with the machinery for cleaning wheat and to make good flour from the wheats produced locally.

33. Indigo is largely manufactured in the districts of Nadia, Murshidabad, and Jessore. The table below shows the state of this industry during the year under report as compared with the two preceding years —

DISTRICT	Number of factories			Produce in maunds			Value in rupees			REMARKS
	1895-96	1894-95	1893-94	1895-96	1894-95	1893-94	1895-96	1894-95	1893-94	
1	2	3	4	5	6	7	8	9	10	11
Nadia	48	61	63	3,048	4,693	1,240	4,55,410	7,06,681	2,81,253	
Murshidabad	24	23	23	3,004	2,454	1,641	9,81,581	6,75,723	4,21,277	
Jessore ..	17	14	17	1,416	1,160	478	3,44,997	2,36,644	1,30,086	
Total	89	98	103	8,068	8,207	3,359	17,81,986	16,07,061	7,02,728	

34. It will be seen that the number of factories is gradually decreasing in Nadia, while there has been an increase in Jessore and Murshidabad. Mr. Garrett, Magistrate of Nadia, reports that on account of the unprecedented drought most of the factories in the Ranaghat subdivision did not work. The outturn has been better in the year under report than in the previous year, the decrease in the district of Nadia being only apparent, and due to

the non-receipt of statistics from some of the principal factories in the district. The increase in the outturn is chiefly due to the good harvest of the year.

35. The silk industry is principally carried on in the districts of the 24-Parganas and Murshidabad. The following table compares the state of the industry during the last three years:—

DISTRICT	Number of factories			Product in lbs			Value in rupees			REMARKS
	1895-96	1894-95	1893-94	1895-96	1894-95	1893-94	1895-96	1894-95	1893-94	
1	2	3	4	5	6	7	8	9	10	11
24-Parganas	Information not available						52,347	53,332	53,719	
Murshidabad	74	63	63	406,910	300,830	576,380	33,08,129	24,09,265	33,34,573	

36. Mr. Levingo, Officiating Collector of Murshidabad, attributes the increase in the quantity of silk manufactured to the opening of twelve new filatures and to a good outturn of cocoons during the year under report. At Mirzapore, in the Jangipur subdivision, there was some improvement in the manufacture of silk-cloths—7,611 pieces, valued at Rs. 55,724, were manufactured during the year, against 6,311 pieces, valued at Rs. 55,058, in the preceding year.

Sugar

37. The following table compares the state of the sugar industry during the last three years:—

DISTRICT	Number of factories			Outturn			Value			REMARKS
	1895-96	1894-95	1893-94	1895-96	1894-95	1893-94	1895-96	1894-95	1893-94	
1	2	3	4	5	6	7	8	9	10	11
24-Parganas	173	171	229	Mds 75,527	Mds 74,674	Mds 92,646	Rs 5,16,562	Rs 5,24,236	Rs 6,61,007	
Nadia	No statistics are available									
Jessore	143	144	174	26,735	2,68,624	2,68,036	10,32,594	21,79,676	20,79,536	
Khulna	Not available			36,631	18,373	18,160	2,79,566	1,49,801	1,36,497	

38. No statistics have been received from the sugar-mill at Cossipore. Sugar is still manufactured under native processes in the subdivisions of Basirhat and Barasat in the district of the 24-Parganas. The principal centres of the date sugar manufacture in the district of Nadia are Santipur, Chakdaha, Krishnagunge, Daulatgunge, Alundanga, and Moheshgunge, but no statistics are available regarding them. In the district of Jessore there are three refined sugar factories under European managers, at Changacha, Tarpoor, and Kotechandpur. Sugarcane is largely cultivated in the Kushtia subdivision and in parts of Meherpur in the district of Nadia. In the Kushtia subdivision sugarcane-crushing mills were worked throughout the year, but the Collector reports that figures showing the number of mills let out on hire and the rate at which they were let out cannot be given, as the manager of the factory has declined to give the information. Mr. Garrett says that he has every reason for believing that the profits of the concern continue to be very great.

39. The brass foundry at Moheshgunge manufactures iron screws and other requisites for indigo factories. Brass utensils are manufactured at Nawadwipa, Jivannagar, Dharmada, and Matiori in Nadia and in some parts of the district of Jessore. Bell-metal and brass utensils of a superior kind are manufactured in considerable quantities at Berhampore, Khagra, Kandi, and Baranagore in the district of Murshidabad. These articles are generally sold in the local market, but are also to some extent sent to Calcutta, Rajshahi, and other places.

40. Santipur muslin has still a ready market in Bengal. The weavers of Kushtia and Kumarkhali make cotton *dhories*, bed-sheets, &c., which are largely in use. The cotton wrappers are well known, and are largely used by the poorer classes on account of their cheapness. The manufacture of coarse cotton cloth is carried on in all the districts of this Division.

41. The clay figures of Ghurni, a part of the Krishnagar town, are much appreciated both here and abroad. As reported last year, they possess a good deal of artistic merit, and the knowledge of anatomy shown by the ignorant workers is more than would be expected. Locks and keys in imitation of Chubb's locks and of good quality are made at Natagore, in the district of the 24-Parganas, and at Jangipore, in the district of Murshidabad. The Magistrate of Murshidabad says that the locks are sold at prices ranging from four to six rupees each, but that the local demand not proving sufficient, the makers have set up business in Calcutta during the year under report.

XXIII—RAILWAYS AND OTHER PUBLIC WORKS

134. *Railways*.—In the 24-Parganas there are 124½ miles of the Eastern Bengal State Railway, including branches to Budge-Budge, Port Canning, and Diamond Harbour, already opened for traffic. The proposal to construct a steam-tramway from Barasat to Basirhat is still under the consideration of the District Board. An agreement has been made with a native firm of promoters who are engaged in preparing a survey with a view to submit the scheme to Government for sanction. The work, however, proceeds slowly, and changes in the original project are now under consideration. Experience only will show whether such a line would attract traffic from the lines of water carriage now existing. I doubt much whether it would. As regards the construction of a steam-tramway from Ranaghat to Krishnaghur, in the district of Nadia, Messrs. Martin & Co, the promoters of the scheme, were to commence the construction of the tramway within nine calendar months, and to open it for traffic within 18 months from the date of publication of the Government Notification No. 331 of the 16th December 1895. On the application of the Company, however, the period for constructing the line has been extended to fifteen calendar months, and the period for the opening of the tramway to two years from the date of publication of the aforesaid notification. The tramway should therefore be open for traffic from the beginning of the year 1898. It is satisfactory to notice that the promoters have already finished all field work. They are now engaged on the plotting of the same, and making detailed drawings and estimates for submission to Government. I do not think that this line is likely to attract much goods traffic. As a passenger line it would be for the convenience of the town of Krishnaghur, and would also convey pilgrims to Santipur and Navadwip. If it were extended to Murshidabad and brought into connection with the East Indian Railway system at Azimgunge, I think it might be of much more use. The only railway that runs through Murshidabad is from Azimgunge to Nalhati. The line is a broad-gauge one. In Jessore or Khulna no new railways were constructed during the year. The portions of the Bengal Central Railway which pass through these districts were maintained.

138. *Sanitation and Water-supply*.—In the 24-Parganas the District Board expended Rs. 2,689, against Rs. 1,473 in the preceding year, on water-supply. Of this sum, Rs. 1,343 were expended in the excavation of a tank in the Barasat subdivision and Rs. 1,310 on temporary wells to meet the scarcity of water which began to be felt at the close of the year. Thirty ring-wells and three tube-wells were sunk in the northern half of the subdivision. The excavation of tanks is not always successful owing to the difficulties of soil. In the preceding year a large tank was dug at Nowrah, but owing to the badness of the soil and the deficient rainfall, the work has not

hitherto been successful. The tank has been placed in charge of a local Committee, and it is hoped that it may prove serviceable if there are good rains this year. The Board is willing to take over and improve tanks if the owners will devote them to the public use. There have been frequent negotiations with the owners of tanks for this object, but so far no one has agreed to have his tank reserved for drinking purposes only. At a meeting held on the 31st January 1896, the Board resolved to spend a special allotment of Rs. 1,500 in digging wells in localities where they were specially required. Since the close of the year a further allotment of Rs. 5,000 has been sanctioned for this purpose and for grant-in-aid to persons who wished to excavate tanks themselves. In Nadia the District Board spent Rs. 2,516 on the construction of 13 masonry wells during the year. The Board's expenditure on the maintenance and purification of the water of its existing wells amounted to Rs. 146. The rules circulated by the Sanitary Commissioner of Bengal in his letter No. 430, dated the 20th July 1895, were strictly followed in disinfecting wells. A sum of Rs. 507 was spent in Murshidabad in improving the water supply of the district and Rs. 29 in cleaning the Katiganga cut, which flushes and drains the Cossimbazar bhd. Rupees 637 were also spent in maintaining two drainage channels $8\frac{1}{2}$ miles in length. This is independent of the expenditure on water-supply of the Cossimbazar Ward's estate. In Jessore two tanks have been formed at a cost of Rs. 1,080, and trial boros sunk in old tanks at a cost of Rs. 23. At Jhenidah orders have been issued to have several pits in the town filled up. Arrangements are also being made with the Chairman of the Jessore Municipality to prepare a scheme to improve the part of the town known as Bagehur. A scheme for opening a channel from the Kumar river into the Noboganga at Bhawanipur is being pushed on, and a considerable portion of the money required has been promised. A sum of Rs. 556 was spent in Khulna on sanitation and water-supply. The unusual drought of the latter part of the year and the succeeding two months has drawn special attention to the question of water supply, and there has been clamour for expenditure on the part of Government and of local authorities to an extent which it would be impossible to meet. In municipalities there is taxation from which the necessary funds may be provided, but in other localities it would be impossible for Government or district authorities to do all that is necessary, and nothing but self-help on the part of the people can provide a proper water-supply. The emergency does not recur sufficiently often to induce the people to organise measures to meet the comparatively remote contingency of its recurrence, and I do not feel sanguine as to anything of any practical value being done. I think that the authorities can do no more than give assistance in placing the public in possession of old tanks which proprietors will not improve or place at the disposal of the public. The work of deepening and improving old tanks and of excavating new ones in every locality, which in a year of unusual drought finds itself in distress for water, cannot be undertaken unless funds are raised either locally or by an increase in general taxation. If the labouring classes would combine to give labour, and the non-labouring classes would contribute maintenance for the labourers, the problem would be solved, as it used to be solved by rulers who had the necessary power to organise such measures, but I do not think the people of this division are like'y to organise them for themselves.

* * * * *

XXX —LOCAL SELF GOVERNMENT INSTITUTIONS.

Municipalities.

174. It appears that in twenty-one municipalities as against ten of the previous year, less than 50 per cent. of the Commissioners were present at each meeting, which is not satisfactory. Mr. Collin, Magistrate of the 24-Paiganas, reports that Municipal Commissioners have shown a proper and sufficient interest in the working of the municipalities, and thinks that on the whole the record of progress in municipal administration is creditable. In the Barnagore Municipality the rate on holdings was substituted for the tax on persons, and the provisions of Part VII were extended to the Cossipore-Chitpur Municipality.

The drainage scheme of the Krishnagar Municipality by excavating the channel of the Anjona, which has been pending since the year 1891, is no nearer realisation than it was a year ago. The administration of this municipality is in the hands of pleaders, and is very far from satisfactory. Nothing has been done to remove the nuisance of well privies existing in many municipalities in the district of Nadia, and jungle flourishes in most of the municipalities as before. The work of collection in the Krishnagar Municipality is very badly done; everything is left to subordinates, who doubtless make a profit out of it. Mr. Levinge, Officiating Magistrate of Murshidabad, also considers that the control and supervision exercised over the subordinates in municipalities is often insufficient. This was specially the case at Jangipur and also at Kandi, where there is an official Chairman, the resident Deputy Magistrate, from whom better work might have been expected. In Jessore the Jessore and Kotechandpore Municipalities have, as heretofore, been managed satisfactorily, while there has been some improvement in Moheshpur, of which municipality, however, the condition is still very unsatisfactory. There were cases of embezzlement in the municipalities of Santipur, Kushtia, and Kandi, all of which were due to the want of proper supervision, and in each of these municipalities the Chairman was a Deputy Magistrate. Where there is an active Chairman or Vice-Chairman resident in the municipality, as at Cossipore-Chitpur, Titaghar, and Baruipur, the administration is successful, but generally subordinates are left very much to their own devices both in office and out of doors. The Municipal Commissioners of the South Suburban Municipality passed a resolution during the year for the division of the Municipality into two municipalities. A subdivision of the Municipality has become urgently necessary in the interest of the important wards in Garden Reach and its neighbourhood. The proposal is now under the consideration of Government. During the year the system of paying for the collection of taxes by commission, instead of by fixed pay, has been introduced in many municipalities. This will, it is expected, greatly improve the collection of municipal taxes, which is at present one of the weakest points in municipal administration. There are very few cases in which both Chairman and Vice-Chairman do their duty, or where work either in office or out of doors is properly supervised. There is seldom any check over the accounts of collections, and the tax-darogas, whom the rules appear to assume to be officers who may be trusted to look after the collecting sarkars, themselves require much supervision, which they do not get. Large amounts of income are lost for want of prompt inquiry into items of arrears, and of proceedings against defaulters, and the whole system of collection of taxes is in most cases marked by laxity and culpable leniency. The executive officers of a municipality dread, above all things, incurring the wrath of rate-payers and of the general body of Commissioners by raising or enforcing taxation. There is also a strong opposition in most municipalities to sanitary improvement, and, although the unusual drought of the year has caused an alarm about drinking-water, Municipal Commissioners seem far from inclined to prevent pollution of reserved tanks by bathing, washing clothes and animals, and other still more objectionable contamination. In reporting on my tours, I have stated that I visited thirty municipalities during the year, and that District Magistrates also made inspections. This has established cordial personal relations between the controlling officials and Commissioners of municipalities, and will doubtless produce some effect, but I am still obliged to say that I think there are very few municipalities in which there has been any improvement except as a result of official pressure.

Orders and Notifications by the Lieutenant-Governor of Bengal. the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 6233A.

GENERAL.—No 6066A.—The 18th November 1896—Babu Nagendra Nath Ghose, Deputy Magistrate and Deputy Collector, on leave, is posted to the head-quarters station of the district of Manbhum.

No. 6080A.—The 19th November 1896—The following promotions, confirmations and appointments are sanctioned in the grades of Magistrates and Collectors and Joint-Magistrates and Deputy Collectors.—

Promoted substantively to the first grade of Magistrates and Collectors.

Mr. H. A. D. Phillips, with effect from the 17th June 1896, *vice* Mr. A. C. Tate, deceased

Confirmed in the first grade of Magistrates and Collectors.

Mr. R. Carstairs, with effect from the 11th October 1896, *vice* Mr. G. A. Grierson, C.I.E., appointed Opium Agent, Bihar.

Mr. Brojendra Nath De, with effect from the 31st October 1896, *vice* Mr. J. C. Price, retired.

Confirmed in the second grade of Magistrates and Collectors.

Mr. R. W. Carlyle, with effect from the 11th October 1896, *vice* Mr. R. Carstairs.

Mr. E. F. Growes, with effect from the 31st October 1896. *vice* Mr. Brojendra Nath De.

Appointed substantively to the third grade of Magistrates and Collectors.

Mr. W. B. Brown, with effect from the 11th October 1896, *vice* Mr. R. W. Carlyle.
 Mr. F. S. Hamilton, with effect from the 31st October 1896, *vice* Mr. E. F. Growse.
 Mr. H. E. Ransom, with effect from the 6th November 1896, *vice* Mr. E. G. Colvin,
 appointed Settlement Commissioner of Alwar and Bhartpur.

Confirmed in the first grade of Joint-Magistrates and Deputy Collectors.

Mr. Barada Charan Mitra, with effect from the 11th October 1896, *vice* Mr. W. B. Brown.
 Mr. Kedar Nath Roy, with effect from the 31st October 1896, *vice* Mr. F. S. Hamilton.
 Mr. N. D. Beatson Bell, with effect from the 6th November 1896, *vice* Mr. H. E. Ransom.

Promoted substantively pro tempore to the first grade of Joint-Magistrates and Deputy Collectors.

Mr. E. P. Chapman, with effect from the 11th October 1896, *vice* Mr. Barada Charan Mitra.
 Mr. E. G. Drake-Brockman, with effect from the 31st October 1896, *vice* Mr. Kedar Nath Roy.
 Mr. N. Bonham-Carter, with effect from the 6th November 1896, *vice* Mr. N. D. Beatson Bell.

Confirmed in the second grade of Joint-Magistrates and Deputy Collectors

Mr. L. F. Morshead, with effect from the 11th October 1896, *vice* Mr. Barada Charan Mitra.
 Mr. J. H. Temple, with effect from the 31st October 1896, *vice* Mr. Kedar Nath Roy.
 Mr. J. E. Phillimore, with effect from the 6th November 1896, *vice* Mr. N. D. Beatson Bell.

Appointed substantively pro tempore to the second grade of Joint-Magistrates and Deputy Collectors.

Mr. J. Lang, with effect from the 11th October 1896, *vice* Mr. L. F. Morshead.
 Mr. J. D. Cargill, with effect from the 31st October 1896, *vice* Mr. J. H. Temple.
 Mr. J. E. Webster, with effect from the 6th November 1896, *vice* Mr. J. E. Phillimore.

No. 6102A.—The 19th November 1896.—Babu Sarat Chandra Sen Gupta, Deputy Collector, Khulna, is vested with the powers of a Collector under Act I of 1894 in that district.

No. 6130A.—The 20th November 1896.—Babu Opendra Chandra Mozumdar, Deputy Collector, Murshidabad, is vested with the powers of a Collector under Act I of 1894 in that district.

No. 6133A.—The 20th November 1896.—Maulvi Afsaruddin Mahomed, Officiating Deputy Collector, Chittagong, is vested with the powers of a Collector under Act I of 1894 in that district.

No. 6158A.—The 23rd November 1896.—In modification of the order of the 5th October 1896, Maulvi Mahmud-ul-Nabi, Deputy Magistrate and Deputy Collector, Hooghly, is allowed leave for two months and seventeen days, under article 291 of the Civil Service Regulations, with effect from the date on which he may avail himself of it.

No. 6167A.—The 23rd November 1896.—Babu Jogendra Kumar Sinha, Deputy Collector, Balasore, is vested with the powers of a Collector under Act I of 1894 in that district.

No. 6171A.—The 23rd November 1896.—Mr. Basanta Kumar Mullik is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, and is posted to the head-quarters station of the district of Gaya on being relieved of his present appointment as Officiating Magistrate and Collector of Dinajpur.

No. 6173A.—The 23rd November 1896.—In modification of the order of the 10th November 1896, Mr. N. Bonham-Carter, Joint-Magistrate and Deputy Collector, is posted to the head-quarters station of the district of Champaran on being relieved of his present appointment as Officiating Magistrate and Collector of Bankura.

No. 6189A.—The 24th November 1896.—Mr. H. Luttman-Johnson, Commissioner of the Dacca Division, is allowed furlough for one year, under article 340 (d) of the Civil Service Regulations, with effect from the date on which he may be relieved.

No. 6190A.—The 24th November 1896.—Mr. G. Toynbee, Commissioner of the Chota Nagpur Division, on leave, is appointed to act as Commissioner of the Dacca Division, during the absence, on furlough, of Mr. H. Luttman-Johnson, or until further orders.

No. 6194A.—The 24th November 1896.—Mr. J. T. Rankin, Officiating Joint-Magistrate and Deputy Collector, on leave, is appointed to have charge of the Sasaram subdivision of the district of Shahabad.

No. 6196A.—The 24th November 1896.—Maulvi Basul Karim, Deputy Magistrate and Deputy Collector, Sasaram, Shahabad, is transferred to the head-quarters station of the district of Rangpur.

No. 6193A.—*The 24th November 1896.*—Mr. J. Kennedy, Magistrate and Collector on furlough, is appointed to act, until further orders, as Magistrate and Collector of Tippera.

No. 6200A.—*The 24th November 1896.*—Babu Raghu Nath Sahai, Deputy Magistrate and Deputy Collector, Saran, is allowed furlough from the date on which he may avail himself of it up to the 30th September 1897, under article 371 of the Civil Service Regulations.

This cancels the order of the 10th October 1896, transferring Babu Raghu Nath Sahai to Gaya.

No. 6203A.—*The 24th November 1896.*—Mr. L. F. Morshead, Joint-Magistrate and Deputy Collector, is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, with effect from the afternoon of the 3rd November 1896, the date on which he was relieved of his appointment as Officiating Deputy Commissioner of Manbhum.

In modification of the order of the 11th September 1896, Mr. Morshead is allowed leave for three months under article 291 of the Civil Service Regulations, with effect from the 4th November 1896.

No. 6205A.—*The 24th November 1896.*—Maulvi Khondkar Fazlal Huq, substantive *pro tempore* Deputy Magistrate and Deputy Collector, Mymensingh, is transferred temporarily to Siliguri, in the district of Darjeeling.

No. 6208A.—*The 24th November 1896.*—Mr. H. R. H. Coxe, District and Sessions Judge of Midnapore, is allowed leave for five days, viz, one day under article 308 of the Civil Service Regulations, and the remaining period under article 306 (b) of the same Regulations, in extension of the leave granted to him under the order of the 29th August 1896.

No. 6210A.—*The 24th November 1896.*—Babu Banka Bihari Baks, Officiating Deputy Magistrate and Deputy Collector, Pirojpur, Backergunge, is transferred temporarily to Satkhira, in the district of Khulna.

No. 6222A.—*The 24th November 1896.*—The services of Mr. H. J. S. Cotton, C.S.I., Chief Secretary to the Government of Bengal, are placed at the disposal of the Government of India in the Home Department.

POLICE.—**No. 6078A.**—*The 19th November 1896.*—Mr. C. P. Crouch, District Superintendent of Police, is allowed furlough for three months, under article 340 (b) of the Civil Service Regulations, in extension of the furlough granted to him under the order of the 14th July 1896.

No. 6150A.—*The 21st November 1896.*—The following Probationary Assistant Superintendents of Police, who have been selected by Her Majesty's Secretary of State for India and allotted to Bengal, are posted to the Bhagalpur district:—

Mr. Ernest Grey Hart.

„ Trevor Claude Simpson.

No. 6176A.—*The 24th November 1896.*—Mr. O. B. Drake-Brockman, Assistant Superintendent of Police, is posted to Sirajganj, Pabna, on being relieved of his present appointment as Officiating Deputy Commissioner of Police, Calcutta.

No. 6178A.—*The 24th November 1896.*—Mr. W. O. M. Dundas, Probationary Assistant Superintendent of Police, Sirajganj, Pabna, is transferred to the South Lushai Hills District.

No. 5697J.—*The 23rd November 1896.*—Rai Sreenath Pal Bahadur, Superintendent of the Calcutta Police, in charge of the Northern Division, Suburbs, is allowed leave for one month, under article 291 of the Civil Service Regulations, with effect from the 1st November 1896.

No. 5699J.—*The 23rd November 1896.*—Inspector Kristo Churn Banerjee is appointed to act as a Superintendent of the Calcutta Police, and is placed in charge of the Northern Division, Suburbs, during the absence, on leave, of Rai Sreenath Pal Bahadur, or until further orders.

REGISTRATION.—**No. 6128A.**—*The 20th November 1896.*—Maulvi Syed Feda Ali, Special Sub-Registrar of Tippera, was on leave from the 5th September to the 22nd October 1896 (both days inclusive) under article 291 of the Civil Service Regulations.

EDUCATION.—**No. 6183A.**—*The 24th November 1896.*—Mr. J. Mann, Professor in the Presidency College, acted in class II of the Bengal Educational Service from the 6th July to the 12th August 1896, both days inclusive, *vice* Mr. J. H. Gilliland, on privilege leave.

No. 6185A.—*The 24th November 1896.*—Mr. Jagadis Chandra Bose, Professor in the Presidency College, now on deputation to Europe, acted in class III of the Bengal Educational Service from the 6th July to the 12th August 1896, both days inclusive, *vice* Mr. J. Mann.

No. 6225A.—*The 24th November 1896.*—Babu Hari Prasad Banerjee, Head Master, Hooghly Collegiate School, is appointed to be Assistant Inspector of Schools, Onota Nagpur Division, *vice* Babu Bireswar Chakravarti, about to retire.

No. 6227A.—*The 24th November 1896.*—Babu Khirad Chandra Rai Chaudhuri, Head Master, Chapra Zilla School, is appointed to be Head Master of the Hooghly Collegiate School, *vice* Babu Hari Prasad Banerjee.

ECCLIASTICAL—No 6229A—The 24th November 1896.—The Revd. C. W. Darling, Officiating Junior Chaplain of St. Paul's Cathedral, Calcutta, and Chaplain of the Presidency General Hospital, is appointed to act, until further orders, as Chaplain of Dum-Dum, with effect from the date on which he may assume charge of his duties.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,—(LAND REVENUE.)

NOTIFICATION—No. 4609L.R.

The 21st November 1896.—It is hereby notified for general information that, under the powers conferred on him by section 1 (2) of the Land Records Maintenance Act III (B.C.) of 1895, the Lieutenant-Governor of Bengal is pleased to extend the provisions of that Act to pargana Supamutha, in thanas Bhagwanpur and Nandigram, in the district of Midnapore, with effect from the 1st January 1897.

The Sub-Registrars of Kajlagurh and Nandigram, appointed under Act III of 1877, shall be respectively the Registrars of Mutations under Act III (B.C.) of 1895 of those portions of the pargana specified in this notification which are contained within their respective jurisdictions.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No 4646L.R.

The 23rd November 1896—Under section 4 of Act V (B.C.) of 1875, Captain R. T. Crichton, s.c., is appointed to be a Superintendent of Survey in the districts of Saran and Darbhanga.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No 4647L.R.

The 23rd November 1896.—Under section 4 of Act V (B.C.) of 1875, Mr. A. W. Smart, Extra Assistant Superintendent, Survey of India, is appointed to be an Assistant Superintendent of Survey in the district of Saran.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4648L.R.

The 23rd November 1896—Under section 4 of Act V (B.C.) of 1875, Lieutenant C. W. H. Symonds is appointed to be an Assistant Superintendent of Survey in the districts of Saran and Darbhanga.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No 4649L.R.

The 23rd November 1896—Under section 4 of Act V (B.C.) of 1875, Mr. C. S. Kraal, Extra Assistant Superintendent, Survey of India, is appointed to be an Assistant Superintendent of Survey in the district of Darbhanga.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4710L.R.

The 24th November 1896—Mr. Dwija Das Datta, substantive *pro tempore* Deputy Magistrate and Deputy Collector, is appointed to be the Settlement Officer of the Government Estates in the district of Tippera, with effect from the date on which he joins that appointment.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4711L.R.

The 24th November 1896—Mr. Dwija Das Datta, substantive *pro tempore* Deputy Magistrate and Deputy Collector, is authorised, under section 8 (17) of the Bengal Tenancy Act, VIII of 1885, to discharge the functions of a Revenue Officer in the district of Tippera under the provisions of that Act so far as they relate to Revenue Officers. He is also vested with the powers of a Settlement Officer under Rule 1, Chapter VI of the Rules under the Bengal Tenancy Act.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

FINANCIAL DEPARTMENT

NOTIFICATION—No. 56203.R.

The 24th November 1896.—Babu Abinash Chandra Basu, Excise Deputy Collector, is appointed Deputy Collector of Income-tax in the district of Patna, *vice* Babu Prokash Chandra Roy, transferred, and under section 40 of Act II of 1886, is vested with the powers of a Collector under the Act.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

MEDICAL DEPARTMENT.

No. 4346 Med.—The 23rd November 1896—Assistant Surgeon Nripendra Nath Basu, of the Gaya Pilgrim Hospital, held medical charge of the civil station of Gaya, in addition to his own duties, from the 12th to the 15th October 1896, both days inclusive.

No. 4361 Med.—The 23rd November 1896.—Assistant Surgeon J. M. Perena, of the Krishnagar Dispensary, held medical charge of the civil station of Nadia, in addition to his own duties, from the 16th April to the 26th May 1896, both days inclusive.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 6234A.

No. 6068A.—The 18th November 1896.—Babu Krishna Dayal Pramanik, Deputy Magistrate, Tippera, is vested with powers under sections 110 and 133 of the Code of Criminal Procedure.

No. 6124A.—The 20th November 1896—Babu Gopal Chandra Banerjee, Subordinate Judge, Tippera, is allowed leave for two months, under article 306 (b) of the Civil Service Regulations, with effect from the 20th November 1896, or such subsequent date as he may be relieved.

No. 6142A.—The 20th November 1896.—Babu Probodh Chunder Dutt, Munsif of Howrah, in the district of Hooghly, is appointed to act, until further orders, as Subordinate Judge of Rangpur, *vice* Babu Krishna Chunder Chatterjee, retired, and is vested temporarily with the powers of a Judge of a Court of Small Causes for the trial of suits cognizable by such a Court up to the value of Rs. 500 within the local limits of the Rangpur Munsif.

This cancels the order of the 5th November 1896 appointing Babu Girindra Mohan Chuckerbutty, Munsif of Krishnagar, in the district of Nadia, to act as Subordinate Judge of Rangpur.

No. 6145A.—The 20th November 1896—Babu Monmohun Neogy, B.L., is appointed to act as a Munsif in the district of Hooghly, to be ordinarily stationed at Howrah, during the absence, on deputation, of Babu Probodh Chunder Dutt, or until further orders.

No. 6220A.—The 24th November 1896.—Babu Akshay Kumar Basu, Munsif of Barisal, in the district of Backergunge, is vested, under section 19 (2) of the Bengal North-Western Provinces and Assam Civil Courts' Act XII of 1887, with power to try, under the ordinary procedure, original suits up to the value of Rs. 2,000, arising within the original jurisdiction of the District Judge of Backergunge.

GRANT OF LEAVE TO MUNSIFS.—*No. 6192A.—The 16th November 1896.*—Babu Jogendra Nath Mookerjee, Munsif of Sudharam, in the district of Nonkhali, is allowed leave for twenty eight days, under article 306 (b) of the Civil Service Regulations, with effect from the 23rd November 1896, or from the date on which he may be relieved.

No. 6193A.—The 21st November 1896.—Babu Ram Jadab Tolapatra, Munsif of Sitakund, in the district of Chittagong, is allowed leave for twelve months, under article 309 of the Civil Service Regulations, in extension of the leave granted to him under the orders of the 27th April 1896.

No. 5718J.—The 24th November 1896.—The undermentioned gentlemen are appointed to be Honorary Magistrates of the Independent Bench at Govindpur, in the district of Manbhum, and are vested with the powers of a Magistrate of the third class:—

Babu Kedar Krishna Banarji.

Babu Bejoy Naryan Singha.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

REVISED WATER-RATE RULES FOR THE SARAN CANALS.

No. 209.—Notification.—In exercise of the powers conferred on him by sections 99 and 78 of Act III (B.C.) of 1876, the Hon'ble the Lieutenant-Governor proposes to make the following rules and to fix the undermentioned rates to be charged for water supplied under individual assessment from the Saran Canals during the *rabi* season of 1896-97 and the hot weather season of 1897, in addition to the rules in notification No. 201, dated 2nd November 1896, published in the *Calcutta Gazette* of 4th idem.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

In Notification No. 110 of the 9th August 1880, issued under the provision of Act III of 1876, Government reserved to itself the rights of property in the water of the river channels known as the Daba, the Dhanai, the Gaudaki and the Gangri, and their appendant tributaries, including the Rupan Chap Sota.

2. The revenue administration of the Saran Canals is vested in the Superintending Engineer of the Sone Circle. The Executive Engineer of the Gandak Division is, as Canal Officer under the Irrigation Act [III (B.C.) of 1876], charged with the proper maintenance and management of the canals, and with the control of the supply of water in them. All orders passed by him, or by the Subdivisional Canal Officer, are under the terms of that Act subject to correction on appeal to the Collector of Saran.

3. The following rules will be applicable to all irrigation effected from the Saran Canals in the *rabi* season (1st November to 31st March) of 1896-97, or to the hot weather season (1st April to 13th July) 1897.

4. Any person who wishes to make bunds in the canals must obtain the written permission of the Canal Subdivisional Officer before doing so.

5. Any person who constructs bunds in the canals, who interferes with the supply of water in them, or who takes water from them without the written permission of a duly authorised person, will render himself liable to the penalties defined in the Irrigation Act.

6. Any person who requires water from the channels of the Saran Canals must apply either to (a) the Patrol, (b) the Sectional Officer, or (c) the Subdivisional Canal Officer, who will take his signature on the Form A attached. If the application is approved, the Canal Subdivisional or Sectional Officer (all of whom are hereby empowered in that behalf) will grant a permit for irrigation in Form B.

7. Any person who holds a permit in Form B will be allowed to take canal water for irrigation, and he will be charged for it at the rates detailed in the following schedule:—

Schedule of rates for irrigation

Crop.	Rate per Saran bigha.		
	Rs.	A	P
For indigo irrigated between the 1st November and 31st March ...	2	4	0
For indigo irrigated between the 1st April and 15th July ..	4	8	0
For other crops ditto ditto ...	8	0	0
For opium	1	8	0
For <i>rabi</i> crops irrigated between the 1st November and 31st March	0	12	0

These rates apply equally to irrigation by lift and flow.

8. Persons who take water from any of the river channels named in rule-I, without a permit in Form B, and persons who waste the water, are liable to be charged water-rates, under sections 79 and 80 of the Irrigation Act, at rates which shall be fixed by the Subdivisional Canal Officer, but which shall not be greater than twice the rate which would have been payable for licensed irrigation.

9. All water-rates assessed under rule 7 will be due on the following dates:—

For irrigation in the *rabi* season—5th April 1897.

For irrigation in the hot weather season—20th July 1897.

Water-rates assessed under rule 8 will be due as soon as the demand statement has been prepared.

10. The demand statements for water-rates due will be sent to the Collector as soon as possible after the irrigation in any village is completed, and a *parcha*, showing the area and amount assessed against each cultivator, will be sent to the rate-payer as soon as possible.

11. Any claim for remission of water-rates under section 76 (b), or for compensation under section 76 (c) of the Irrigation Act, must be presented in writing to the Subdivisional Canal Officer at least twenty days before the crop is cut. The Subdivisional Canal Officer shall, after such enquiry as he may consider necessary, pass orders on the application. Any application for remission presented direct to the Collector must be forwarded for the orders of the Canal Officer.

12. Objections to the demand statements must be presented within thirty days of the date on which the *parcha* is issued by the Subdivisional Canal Officer. He will pass orders on such objections.

13. Any person who is not satisfied with an order passed by the Subdivisional Canal Officer may appeal to the Collector under section 91 of the Irrigation Act. Such appeal must be accompanied by a copy of the order appealed against, and it must be submitted to the Collector within thirty days of the date of the order.

14. Remission statements must be signed by the Divisional Canal Officer. Any statement so signed shall be sufficient authority for a refund by the Collector.

15. No guarantee can be given either as to the volume or duration of the supply, or of the delivery of any quantity of water at any particular point of any canal.

16. The Canal Officer will regulate the water passing into, and along, any canal to the best of his ability to meet requirements. If there is any difficulty in supplying all the channels, the Canal Officer will endeavour to divide the available supply as fairly as possible. The Canal Officer shall have complete control of the distribution of water.

FORM A.

Application for water, No.

Name of village

Name of channel

Date of application

We, the undersigned, hereby apply for water from the abovenamed channel for the irrigation of our fields, and we engage to pay, for the area actually found to have been irrigated, to the Canal Officer (or other person duly authorised in that behalf), the water-rates prescribed by the Lieutenant-Governor under the provisions of the Bengal Irrigation Act, and we further agree to abide by the rules issued under the Act —

REVISED WATER-RATE RULES FOR THE SONE CANALS.

No 211.—*Notification*—In notification No. 262, dated the 14th of August 1894, the Hon'ble the Lieutenant-Governor was pleased to pass certain rules concerning the Sone Canals and to fix certain rates to be charged for water supplied from those canals. In notification No 28, dated the 28th January 1895, it was notified that it was intended to increase some of those water-rates. The rules which were passed under notification No. 262, dated the 14th of August 1894, contained provision for a class of leases having a currency of three years. That class of lease is no longer considered suitable. The Lieutenant-

Governor proposes to make the following alterations in the rules referred to in consequence of his determination to cease to grant such leases:—

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

(i) Rule 16 to read as follows:—

16. Applications under section 74 of the Act for permits for irrigation upon leases for a term of years (Appendix I), or upon *kharij* season leases (Appendix III), shall be subject to the following conditions:—

- I.—The application must be for a block of land having well-defined boundaries and so situated that adjoining lands will not ordinarily or probably be irrigated by water supplied for the land included in the application.
- II.—The application must be in the form annexed to these rules, which states that water-rates will be paid on all lands contained in the block for which an application is presented, whether or no water is required.
- III.—The applications may be for a term of seven years, or for the season only—
 - (a) In the case of applications for the season only, the issue of the permit will not necessarily be delayed until the lands have been measured. The boundaries of the block must be stated in the application, which must be signed by or by authority of the cultivators of all the land included in the boundaries mentioned, and the approximate area in the occupation of each on the block must be specified. Water-rates will be charged on the areas in the block as found by actual measurement.
 - (b) In the case of applications for a term of seven years, a permit will not be issued until the land has been measured and an application complete in every respect for all the land included in the block has been signed. If water is required to be supplied before the application is completely signed in the manner specified above, an application for water for the season must be made which will be cancelled on a permit for seven years being issued.
 - (c) Notice that a permit for seven years is required must be given by the 1st of April, and no permit will be issued unless the application is completely signed by the 30th of November, or, with the special sanction of the Superintending Canal Officer, by the 1st of March following. An application for a permit for the season must be filed by the 1st of September.
- IV.—With the special sanction of the Superintending Canal Officer—
 - (a) Existing leases for terms of three years may be cancelled and included in an application for a seven-year lease under the preceding rules
 - (b) An application may be made for an addition to a seven-year lease, which, if granted, shall be considered as part of the original lease and terminate therewith.

(ii) Rule 22 to read as follows.—

22. Permits for irrigation upon leases for a term of years (Appendix VIII) or upon *kharij* season leases (Appendix IX) shall be issued under the following conditions:—

- I.—The land to be irrigated must form a compact block defined by well-marked boundaries of such a nature as clearly to distinguish leased from the adjoining unleased lands, and also be so situated that unleased lands will not be ordinarily or probably irrigated by water supplied for the land included in the block. The boundaries must be mentioned in the application for a permit for the season, and in the notice referred to in Rule 16 (c), when a permit for a seven-year lease is applied for.
- II.—The Canal Officer may exclude lands included in the block not irrigable by flow or for which canal water is ordinarily not required. In the case of permits for seven years, the block must be not less than 50 bighas in area. In cases where the Divisional Canal Officer considers it advisable to grant a permit to a block of less area than that mentioned above, the previous sanction of the Superintending Canal Officer must be obtained. No permit for seven years shall be issued unless the owners of the village channel from which water is to be obtained have been registered and the channel itself is in a good state of repair such as to fit it for the conveyance of water without wastage occurring. Such leases will not be issued unless it is known from the experience of previous years' irrigation that a sufficient supply of water is always available and that the quantity required is not excessive.
- III.—A permit for a seven-years' lease may be cancelled by the Superintending Canal Officer with effect from a date to be specified in the order for good cause on the application of all the signatories thereto.

IV.—Permits for the season will be issued under less favourable conditions as to situation, soil, and the quantity of water available; it will not be necessary that the owner of the channel should be registered, but the channel itself must be entered on the register.

V —Water-rates will be levied on the areas of the blocks specified in the permits, and measurement of the areas actually irrigated will not be necessary.

(iii) In Rules 3 (I), 9 (VIII), 11, 12, 24 (II), 25, 31, 39, 50, 62, omit the two words "three or."

(iv) In Rule 42 omit the words "three-years' leases."

Further, the Lieutenant-Governor proposes to make the following alterations in the rules referred to in consequence of the increase he proposes to make in certain water-rates —

(v) In Rule 71 (a) change the words "1st of April 1892" into "1st of April 1897."

(vi) In Rule 71 (b) change the words "1st of April 1891" into "1st of April 1897"

(vii) Rule 72 will read as follows :—

SCHEDULE No I.

Leases for a term of years

For water supplied between the 25th of June of one year and the 25th March of the next.	FLOW OR LIFT.	
	Rate per bigha.	Rate per tenth of a bigha.
1	2	3
For leases for seven years, all crops	Rs. A. P. 1 9 0	Rs. A. P. 0 2 6

Leases having a currency of seven years will be granted at the rate defined in this Schedule until and including the year 1903.

(viii) Rule 73 will read as follows :—

SCHEDULE No. II.

Season leases (kharif).

	FLOW OR LIFT	
	Rate per bigha.	Rate per tenth of a bigha.
1	2	3
For water supplied between the 25th of June and the 25th of October for all crops	Rs. A. P. 2 3 0	Rs. A. P. 0 3 6

(ix) In Rule 42 omit the five words "for bhadoi, &c , 1st November."

(x) Appendix IVB. to be omitted altogether.

(xi) Further, the Lieutenant-Governor proposes to alter Rule 47 by adding the following words to it. —

"All applications for compensation under section 76 (c) must be made not less than 20 days before the crop is cut."

And in Rule 46 to add the words "not less than" before the words "twenty days before the crop is cut."

(xii) In paragraph 2 of Appendix III omit the figures "1-14"

(xiii) In paragraph 2 of Appendix IVC alter the words "1st of January" into "25th of March."

MARINE DEPARTMENT

The 23rd November 1896.

No. 141.—Notification.—In exercise of the powers conferred on him by section 11 of the Petroleum Act, 1886, and in supersession of rule 15, clause (4) of the rules for regulating the grant of licenses to possess and transport petroleum in the Lower Provinces of Bengal, which were sanctioned under Notification No 62 Marine, dated the 21st May 1895 which was published in Part I, page 504, of the *Calcutta Gazette* of the 22nd idem, the Lieutenant-Governor proposes to make the following revised rules. The rules will be taken into consideration after the expiry of a month from the date of their publication in the Gazette, and the Lieutenant-Governor will be glad to consider any suggestions or observations that may be made by any person concerning them within that period.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

(4) (a) Licenses for the transport of petroleum other than dangerous petroleum in bulk by steamer or barge may be granted if the vessel is certified to be fit for the service by an Officer appointed by the Local Government in this behalf.

(b) The vessel, if a steamer, must possess a certificate of survey granted under the provisions of the Inland Steam-vessels Act, 1884.

(c) The vessel, if a barge, should be towed by a steamer.

(d) Vessels carrying petroleum in bulk shall not be allowed to carry other inflammable cargo at the same time, such as jute, cotton, straw, &c, nor passengers; and such vessels shall not be allowed to load any cargo after having discharged the petroleum until the oil compartments have been thoroughly cleaned and certified by an officer of the Government to be quite free from petroleum.

(e) A steamer towing a barge carrying petroleum in bulk shall not be allowed to carry any such inflammable cargo, nor shall such steamer be allowed to have in tow at the same time any other vessel carrying such inflammable cargo.

(f) No naked lights shall be allowed on board any vessel carrying petroleum in bulk.

The 24th November 1896

No. 142 Marine—Mr. R. A. Hopkins, Senior Master Pilot, is granted, under Article 746 (a) of the Civil Service Regulations, privilege leave for one month, from the 15th December 1896, or such subsequent date as he may avail himself of it.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt of Bengal.

EDUCATION DEPARTMENT, BENGAL

Subordinate Educational Service.

The 19th November 1896—Babu Jagat Bandhu Bhadra, Head Master of the Pabna Zilla School (Class IV and officiating in Class III), is appointed to be Head Master of the Faridpur Zilla School, *vice* Babu Bhubhan Mohan Sen, transferred.

Babu Jagat Chandra Sarkar, B.A., Head Master of the Jalpaiguri Zilla School (Class IV), is appointed to be Head Master of the Pabna Zilla School, *vice* Babu Jagat Bandhu Bhadra, transferred.

Babu Uma Charan Ray, B.A., Head Master of the Dinajpur Zilla School (Class V), *seconded*, is appointed to be Head Master of the Jalpaiguri Zilla School, *vice* Babu Jagat Chandra Sarkar, transferred, but he will continue to be employed under the Cooch Behar State, until further orders.

Babu Harendra Narayan Chakravarti, B.A., Head Master of the Darjeeling High School, and now temporary Head Master of the Dinajpur Zilla School (Class VI and officiating in Class V), is confirmed in the latter appointment, *vice* Babu Uma Charan Ray, transferred.

The 20th November 1896—Babu Kishna Lal Sadhu, M.A., Third Master of the Darjeeling High School and now Temporary Third Master of the Pabna Zilla School (Class VII), was absent on leave for 26 days, under Article 306 (b) of the Civil Service Regulations, with effect from the 10th August 1896.

Babu Ram Dayal Ghosh, Sub-Inspector of Schools, 24-Parganas (Class VI), having returned to duty on the afternoon of the 10th August 1896, the unexpired portion of the leave granted to him by the District Board of the 24-Parganas, which was notified in the *Calcutta Gazette* of the 11th September 1895, under orders of the 31st August 1895, is cancelled.

C. A. MARTIN,

Offg. Director of Public Instruction, Bengal.

Civil Engineering College, Sibpur.

Apprentice Department

THE date for admission to this Department is 1st February 1897. Candidates must be at least 15, and not more than 17, years of age.

They must have passed standard VII of the Code for European Schools or the University Entrance Examination. They must submit their applications accompanied by a certificate of age and a certificate showing that they have passed the requisite standard so as to reach the Principal not later than the 6th January 1897. No application will be attended to after this date.

The number to be admitted each year is limited to 60, and applicants will be selected in order of merit.

Every applicant, before admission to the College, will be examined by the College Surgeon as to his physical strength, chest measurement, fitness for manual labour, and eye-sight. If this officer's report is unsatisfactory, the applicant will not be admitted.

Before an apprentice is admitted to the College, his parent or guardian must sign an agreement in the form shown in Appendix A.

The session begins on the first Monday in February. All apprentices are required to join the College on that date. Any apprentice prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding Rs. 10. No apprentice will be admitted or re-admitted to the College after the close of the month of February, except by special order of the Director of Public Instruction. This permission will only be given under exceptional circumstances.

There will be no vacancy on the free list for Christian apprentices in February next, but there will be seven on the reduced* fee list. For Natives there will be at least nine vacancies, possibly more, on the reduced† fee list.

* Rs. 5 per mensem
† Rs. 2 per mensem

These vacancies will be filled up after the opening of the session by the Board of Visitors from those apprentices who join the College. No guarantee can therefore be given beforehand, but forms to be filled up for the consideration of the Board can be had on application to the Principal.

J. S. SLATER, *Principal, Civil Engineering College*

SIBPUR, the 16th November 1896

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1740A.

NOTIFICATION.

LAND REVENUE

(Bengal Tenancy Act)

THE HON'BLE C. C. STEVENS, C.S.

Dated Calcutta, the 23rd November 1896

THE price lists of staple food-crops in the local areas of Bengal prepared under section 39 (1) of the Bengal Tenancy Act, VIII of 1885, for the period from the 1st of January to the 31st of March 1896, having been approved by the Board of Revenue, are published for general information under sub-section 4 of that section.

By order of the Board of Revenue, L. P.,

F. A. SLACK,

Offg. Secretary.

Price-list (retail) of staple food-crops in the local areas of Bengal, prepared under section 39 of the Bengal Tenancy Act (No. VIII of 1885) for three months, from January to March 1896

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No 4345M.—21st November 1896—It is hereby notified for general information that, in supersession of all previous rules on the subject, the Lieutenant-Governor is pleased to lay down the following rules under sections 15 and 69 of the Bengal Municipal Act III of 1884 as amended by Bengal Acts IV of 1894 and II of 1896, for the conduct of all future elections of Commissioners of Municipalities.—

1. In these rules—

- (a) The term "the Magistrate" has the meaning defined by section 6, sub-section (8) of the Act.
- (b) A "general election" means an election held under section 14 of the Act.
- (c) A "bye election" means an election held under section 27 of the Act.
- (d) A person shall be deemed to be resident within the limits of a Municipality if he—
 - (1) ordinarily lives within those limits; or
 - (2) has his family dwelling-house within those limits, and occasionally visits it; or
 - (3) maintains within those limits a dwelling-house ready for occupation in the charge of servants, and occasionally occupies it

A person may be resident within the limits of more than one municipality at the same time.

Of the qualification of voters.

2. Every male person shall be eligible to vote who has attained the age of 21 years has been resident within the limits of the Municipality for not less than 12 months, immediately preceding the election, has been duly registered as provided in rules 4 to 12 inclusive, and who—

- (i) has, during the year immediately preceding such election, paid an aggregate amount of not less than Rs. 1-8 (Rs. 3 in Howrah, and Cossipore-Chitpur) in respect of any one or more of the rates specified in section 15 of the Act, or in respect of the fees for the registration of carts under section 143 of the Act; or
- (ii) has, during the year aforesaid, paid or been assessed to the tax imposed by Act II of 1886 (*an Act for imposing a tax on income derived from sources other than agriculture*); or
- (iii) being a graduate or licentiate of any University, or having passed the First Arts Examination of the Calcutta University or the corresponding standard of any other University, or holding a license, granted by any Government Vernacular Medical School, to practise medicine, or holding a certificate authorising him to practise as a pleader or as a mukhtar or as a revenue agent—occupies a holding, or part of a holding, in respect of which there has been paid, during the year aforesaid, in respect of any rates specified in section 15 of the Act, an aggregate amount of not less than Rs. 1-8 (Rs. 3 in Howrah, and Cossipore-Chitpur); or
- (iv) has, during the same period, paid not less than Rs. 20 as rent in respect of the occupation by him of a holding or part of a holding which is assessed with the rate under section 85, clause (b) of the Act

3. At elections held in newly-created Municipalities before municipal taxation has been imposed, every male person shall be eligible to vote, who has attained the age of 21 years, has been resident within the limits of the Municipality for not less than 12 months immediately preceding the election, has been duly registered as provided in rules 4 to 11 inclusive, and who—

- (1) prior to the creation of the Municipality was qualified under the rules framed under section 138(a) of the Bengal Local Self-Government Act, 1885, to vote at an election of members of a Local Board in respect of the area within the limits of the newly-created Municipality; or
- (2) has, during the year immediately preceding the election, paid an amount of not less than 12 annas on account of chaukidari tax; or
- (3) being a graduate or licentiate of any University, or having passed the First Arts Examination of the Calcutta University or the corresponding standard of any other University, or holding a license, granted by any Government Vernacular Medical School, to practise medicine, or holding a certificate authorising him to practise as a pleader or as a mukhtar or as a revenue agent—occupies a holding, or part of a holding, in respect of which there has been paid during the year aforesaid an amount of not less than 12 annas on account of chaukidari tax.

Of the registration of voters.

4. In every Municipality a register in Form A of all persons qualified to vote shall be prepared by or under the orders of the Chairman as soon as may be after these rules shall have come into force, and shall from time to time be corrected and added to as the Chairman

may direct, and shall be thoroughly revised by him at least three months before the date fixed for any general election as hereinafter provided. Such register shall be open to inspection at the Municipal Office by any resident of the Municipality at any time between 11 A.M. and 5 P.M., Sundays and holidays excepted.

5 Not less than 60 days before the date fixed for any general election, the Chairman shall publish the register as revised by him under the last preceding rule at the Municipal Office and at such other places as he may think fit or as the Commissioners in meeting may direct.

6 Any person whose name does not appear in the register, and who claims the right of voting, may, within fifteen days of the publication thereof, apply to the Chairman in writing to have his name added to the register or substituted for any name in the register.

7 Any person who considers that any name in the register of voters prepared under rule 4 ought to be omitted, may, within fifteen days after the publication of the register, apply to the Chairman in writing to have such name omitted.

8. The Chairman shall, not less than 30 days before the date of election, send a letter to every incorporated Company entitled to vote, requesting it to fill in a form, which shall accompany such letter, with the name of the person authorised to vote on behalf of such Corporation, and to return the same within seven days. Upon receipt of the form the Chairman shall cause the name stated therein to be entered in the register revised under Rule 9, and the person whose name is thus entered shall be deemed to be duly authorised to vote on behalf of the said Corporation.

9. Every application for the revision of the register under rules 6 and 7 shall be considered and decided by the Chairman with all reasonable despatch on some date of which three days' notice shall have been given by publication in the Municipal Office; and not less than fifteen days before the date of the election, the Chairman shall publish a revised register in the same manner as the original register containing all the alterations or amendments made in such original register by his order or by order of the Magistrate under the next succeeding rule.

10 Any person whose application under rules 6 or 7 has been refused may, within eight days after such refusal, apply to the Magistrate for an order to have his name inserted in, or a name omitted from, the register of voters, and such Magistrate shall, after enquiry, make such order as to the insertion or omission of the name as appears to him to be just; and the Chairman shall, upon receipt of a copy of such order, give effect to the same, and such order shall be final.

11 The register thus prepared and amended shall be deemed to be the final register of persons entitled to vote whether at a general election or at any bye-election.

Provided that at any time any person whose name is not in the register may apply to the Chairman to enter his name therein, and rules 9 and 10 shall be held applicable to such claim. If such application is made not less than fifteen days before a bye-election, it shall be decided in time for such bye-election, but not otherwise.

12 It shall not be necessary to publish the register or extracts from the register on the occasion of bye-elections, provided that the register shall at all times be open to inspection by rate-payers at the Municipal Office, and that all persons whose claims have been admitted under the preceding rules shall be entitled to vote at such elections. The Chairman shall in the case of each bye-election publish a notice stating the latest date upon which claims to be registered will be received.

Of the qualification and the nomination of candidates

13 Any person qualified to vote under these rules shall be qualified to be elected a Commissioner.

14 Every person who is a candidate for election shall send his name to the Chairman in writing in form B, with the necessary particulars filled up in columns 2, 3, 4, and 5, not less than 21 days before the day fixed for the election, supported by the signatures in columns 5, 6 and 7 respectively of two electors in each ward in which he proposes to stand, who propose and send his nomination, and of eight electors in each such ward who approve his nomination. The Chairman shall publish a list of all candidates in the same form at the Municipal Office not less than fifteen days before the day fixed for election.

Of the manner of holding elections.

15 The elections and bye-elections shall be held on such dates as may be fixed by the Commissioner of the Division, and notified by him in the *Calcutta Gazette*.

16. In the event of the number of candidates for election in a Municipality or in any ward of a Municipality not being greater than the number of vacancies, such candidates shall be deemed to be elected. If the number of candidates exceeds the number of vacancies, a poll shall be held.

17 The poll shall be held at such time and place as the Commissioners in meeting or the Chairman may determine, and the time and place fixed shall be notified, by beat of drum and by the publication of notices, at the same time as the list of candidates is published under rule 14.

18 Each voter shall be entitled to vote for the ward in which he ordinarily resides, and for no other, and to give as many votes as there are vacancies for such ward. Provided

that where the Municipality has not been divided into wards, each voter shall be entitled to vote for as many candidates as there are vacancies in the entire number of Commissioners. Provided also that he may give all or any number of the votes to which he is entitled to any one candidate.

19. All votes must be given in person, and no votes will be received by proxy or in writing.

20. The Chairman or other fit and proper person, not being himself a candidate for election, deputed by the Chairman for the purpose, shall preside at the election for each ward assisted by a Committee of not less than three and not more than five rate-payers of the ward, nominated by the Chairman. If any of the members of such Committee fail to attend, their places may be filled by the presiding officer from the rate-payers present at the polling station.

21. The presiding officer shall read out the list of candidates and state the number of vacancies, and the names of the voters and the votes given by them shall then be recorded by him, or by the members of the Election Committee under his personal supervision, in Form C.

22. No objection to a voter shall be entertained except on the ground that he is not the person under whose name as entered in Register A he claims to vote. Such objections shall be summarily decided by the presiding officer.

23. The presiding officer shall then and there declare such candidates as have the largest number of votes to be duly elected and shall report accordingly to the Chairman, if he is not himself the Chairman.

Provided that, if the majority for any candidate consists only of votes to which objections have been raised, and if the presiding officer has been unable to decide such objections summarily as provided by Rule 22, he shall adjourn the proceedings and report the matter to the Magistrate. The Magistrate shall hold such enquiry regarding the disputed votes as shall be necessary, and his decision shall be final. On the termination of such enquiry, he shall declare such candidates as have the largest number of votes to be duly elected.

24. If there be an equality of votes for the same vacancy, and if the number of vacancies does not admit of all the candidates who have obtained an equality of votes being elected, the presiding officer, or, in the case prescribed in the proviso to Rule 23, the Magistrate, shall give a casting vote or votes.

25. In the event of any candidate being elected for two or more wards, such candidate shall be at liberty to choose the ward which he will represent, and in every other ward in which the said candidate has been returned, the result of the election shall be determined as if no votes had been recorded for him. Provided that, if there is no other candidate for whom votes have been recorded to fill the vacancy thus caused, a fresh election shall be held.

26. The list of duly returned candidates for the whole Municipality shall be forwarded by the Chairman through the District Magistrate to the Commissioner of the Division for publication by him in the *Calcutta Gazette*.

27. In municipalities where the Magistrate is the Chairman, the duties assigned to the Chairman in the foregoing rules shall be discharged by the Vice-Chairman.

28. If in any case such a course appears to the Local Government to be necessary, it may direct that the Magistrate shall perform all or any of the duties assigned by the foregoing rules to the Chairman or the Commissioners in meeting.

Provided that the Magistrate shall always perform such duties for the purposes of the first general elections in newly created Municipalities.

General

29. All disputes arising under these rules shall be decided by the Magistrate, and his decision shall be final.

30. No person in the employment or pay of the Municipality shall, directly or indirectly, engage in canvassing for votes, or otherwise assist in the election of any candidate, otherwise than by giving his own vote. Any breach of this rule will render him liable to dismissal.

31. All costs incurred in the preparation of the register of voters, the publication of notices, the holding of elections, or taking any other necessary action under these rules, shall be payable by the Commissioners out of the Municipal Fund. In the case of a newly-created Municipality, in which no Municipal Fund has been formed, the Magistrate of the district shall advance such sums as may be required; and such sums shall be recoverable from the Municipal Commissioners within six months.

No. 4379 M.—The 23rd November 1896.—It is hereby notified that, under section 27 of the Bengal Municipal Act III of 1884, as amended by Act IV of 1894, the Lieutenant-Governor is pleased to appoint Mr. A. S. Rickie to be a Commissioner of the Consipur-Chitpur Municipality, in the district of the 24-Parganas, *vice* Rai Gopal Chandra Mukerji Bahadur, deceased.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 4381 M.—The 23rd November 1896.—Whereas a notification No. 2776 M., dated the 7th July 1896, was published at page 134, Part IB of the *Calcutta Gazette* of the 8th idem, declaring the intention of the Lieutenant-Governor to extend the provisions of sections 236 to 244, 267, 270 clause 5, 271 and 273 clause 1, of Part VI of the Bengal Municipal Act III of 1884, as amended by Bengal Act IV of 1894, to that portion of the Barisal Municipality, in the district of Backergunge, which lies within the boundaries specified below, and whereas no valid objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Barisal Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the above provisions of the Municipal Act to the area in question of the said Municipality:—

On the North.—Shaw's Road and the Jail khel.

On the South.—The Racquet Court Road.

On the East.—The Barisal River.

On the West.—A line drawn southward along the Khadanchibari Road, and then westward along the North Bagura Road and then southward along the North Mullick Road and then eastward along the Kalibari Road and then southward along the road passing by the old premises of Babu Rakhal Chandra Roy Chowdhury and then eastward along the Fakirbari Road and again southward 50 feet west of the Jail Road up to a point west of the Racquet Court Road.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No 4384M.—The 23rd November 1896.—It is hereby notified that, under section 27 of the Bengal Municipal Act III of 1884, as amended by Act IV of 1894, the Lieutenant Governor is pleased to appoint Babu Biswaranjan Bagchi to be a Commissioner of the Santipur Municipality, in the district of Nadia, *vice* Babu Sarat Chandra Ray, resigned.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No 4387M.—The 23rd November 1896.—It is hereby notified that the Commissioners of the Jajpur Municipality, in the district of Cuttack, having, at a meeting, requested the Local Government, under section 23 of the Bengal Municipal Act III of 1884, as amended by Act IV of 1894, to appoint a Chairman, the Lieutenant-Governor is pleased to appoint Babu Monmohan Chakraverty, Subdivisional Officer, to be their Chairman, *vice* Babu Raj Kishore Dass, resigned.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION

No. 4388M.—The 23rd November 1896.—Whereas a notification No. 3809M., dated the 2nd September 1896, was published at page 175, Part IB of the *Calcutta Gazette* of the 9th idem, declaring the intention of the Lieutenant-Governor to extend the provisions of sections 256A, 256B and 260A of Part VI of the Bengal Municipal Act III of 1884, as amended by Bengal Act IV of 1894, to the Jainagar Municipality, in the district of the 24-Parganas, and whereas no objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Jainagar Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the above provisions of the Municipal Act to the said Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No 4391M.—The 23rd November 1896.—It is hereby notified that, under section 16 of the Bengal Municipal Act III of 1884, as amended by Act IV of 1894, the Lieutenant-Governor is pleased to appoint Babu Umes Chandra Ghose, B.A., to be a Commissioner of the Khirpai Municipality, in the district of Midnapore, *vice* Babu Mohes Chandra Sarkhel, deceased.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 4396L.S.-G.—The 23rd November 1896.—It is hereby notified that the Lieutenant-Governor is pleased to approve the election by the members of the Sadar Local Board, in the district of Bhagalpur, under section 25 of the Bengal Local Self-Government Act III of 1885, of Munshi Shujaat Ali Khan to be their Chairman.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 4409M.—The 24th November 1896.—Whereas a notification No. 3861M., dated the 8th September 1896, was published at page 188, Part IB of the *Calcutta Gazette* of the 16th idem, declaring the intention of the Lieutenant-Governor to extend the provisions of sections 254 to 260A and 274 of Part VI of the Bengal Municipal Act III of 1884, as amended by Bengal Act IV of 1894, to the North Dum-Dum Municipality, in the district of the 24-Parganas, and whereas no valid objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the North Dum-Dum Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the above provisions of the Municipal Act to the said Municipality.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION

No. 4393M.—The 23rd November 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for improvement of the ditch off No. 57, Banstola Street, it is hereby declared that for the above purpose pieces of land, Nos. 22 and 23, Kalaker Street, in the Town of Calcutta, district 24-Parganas, measuring, more or less, 12 chitaks and 14 square feet only, are required.

The boundaries of the land are as follows:—On the north Bysack's Lane and premises No. 4, Bysack's Lane; on the south the remaining portion of premises No. 23, Kalaker Street; on the east premises No. 4, Bysack's Lane, and the remaining portions of premises Nos. 22 and 23, Kalaker Street; and on the west premises No. 3—1, Bysack's Lane, and a municipal flushing chamber.

This declaration is made, under the provisions of section 6 of Act of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 4402M.—The 24th November 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Howrah Municipality for a public purpose, viz., for extending a road and making a trenching ground in the village of Samaugachi, pargana Boro, district Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, 9 bighas 5 cottaks and 7 chitaks of standard measurement, is required. The land is bounded on the North by the tank, embankment and land of Sristidhar Deb; on the East by the gardens of Hari Mandal and Gopal Chandra Saha and the land of Sristidhar Deb; on the South by the land of Gopal Chandra Saha, a municipal road and the land of Sital Sett; and on the West by the land of Gopal Chandra Saha.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern, and supersedes the declaration No. 784M., dated the 25th February 1896, published at page 39, Part IB of the *Calcutta Gazette* of the 26th idem.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTICE TO SUBSCRIBERS.

SUBSCRIBERS to the *Calcutta and Bengal Gazettes* and *Indian Law Reports* are hereby informed that unless the amount of their subscription for 1897 is received before the 31st December 1896, it will be concluded that the *Gazettes* and *Reports* are no longer required, and the supply will accordingly be discontinued from 1st January 1897.

All remittances should be made direct to the Accountant and Treasurer, Bengal Secretariat, Calcutta, by means of money-orders. No postage stamps or stamps of any other kind will be received in payment of subscriptions.

The correct address of the subscriber should be legibly written on the money-order coupon, and the period for which the subscription is paid should also be stated. Omission to note these particulars will involve considerable delay.

B. FOLEY,

Under-Secy. to the Govt. of Bengal.

The 24th November 1896.

The Indian Law Reports.

Published under Authority

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876—

Terms of subscription payable annually in advance

For the complete series including postage, Rs 22-8

Obtainable at the Bengal Secretariat Book Depot, Writers' Buildings, Calcutta		
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta		

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat at

Notice

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series to the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed

1st.—Bay of Bengal and Bengal Daily Weather Report, giving meteorological observations taken at 61 stations on or near the coast of the Bay, and in Bengal and Assam, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by post in Calcutta soon after midday. Price to subscribers in Calcutta Rs 3 per mensem, payable in advance for six months.

This report will be issued every year from 1st May to 31st October. From 1st November again the Bay of Bengal Report containing observations taken at 28 stations will be issued up to 30th April.

2nd.—A Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 327 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Rs 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal and Bengal Daily Weather Report, and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Report.

C. LITTLE,

Offg. Meteorological Reporter to the Govt. of Bengal.

Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depot except for Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices, and for those forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REVENUE DEPARTMENT, Office of the Legislative Department, Government of Bengal.

Copies are available for purchase at the Bengal Secretariat Book Depot.

NOTICE TO MARINERS—No 238.

[First Publication.]

CHINA—TUNGHAI OR EASTERN SEA.

Amended position of 9 fathoms bank.

With reference to Notice to Mariners No 142, dated 17th July 1896, issued by this office, on the report by the Commander of the P. and O. steam-vessel *Shanghai* that he obtained two soundings, each of 9 fathoms, black mud bottom, nearly a mile apart; in a position, as given in the *Japan Weekly Mail*, of lat $30^{\circ} 1' N.$, long. $125^{\circ} 9' E.$, the British Admiralty has given further information (No 618 of 1896) that this bank is situated in lat $32^{\circ} 1' N.$, long. $125^{\circ} 9' E.$, and not as given in the above Notice.

Port of Alleppey—Buoys and landmarks

THE Master Attendant, Alleppey, has given notice, dated the 26th October 1896, that two Port Pillars, 25 feet high, and about $1\frac{1}{2}$ mile apart, have been erected as landmarks from which bearings may be taken

Two Buoys (the Northern Red and the Southern Black) have been put out in about $\frac{1}{2}$ fathoms, but the mud bank appears to shift frequently and rapidly, and the Black (Southern) Buoy has been found to be now in only 23 feet of water, so Commanders must use the lead.

*Red Buoy—*Bearing from Northern Pillar about S W. \times W. $\frac{3}{4}$ W., , Light-house , W \times S $\frac{1}{4}$ S, , Southern Pillar , N. AUSTRALIA—PORT CURTIS.

Decrease in depth of North Channel.

THE Port Master, Brisbane, has given notice (No. 22 of 1896) that the depth of water at the western end of the North Channel, Port Curtis, between the floating red light and the Junction Buoy, has decreased to 9½ feet at low-water springs on the line of Oyster Rock and Gatcombe Head Lights.

A depth of 11 feet may be obtained by keeping close to the Junction Buoy, or at night by opening the line of lights slightly so as to pass 50 yards south of the floating light.

The depths in this part of the channel are subject to change.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, NOVEMBER 25, 1896.

THE COMMISSIONERS FOR THE PORT OF CALCUTTA.

AUDITORS' REPORT ON THE PORT COMMISSIONERS' ACCOUNTS FOR
1895-96.

APPENDIX I.

No ^A
289

FROM

THE AUDITORS OF THE ACCOUNTS OF THE COMMISSIONERS
FOR THE PORT OF CALCUTTA,

TO

THE COMMISSIONERS FOR THE PORT OF CALCUTTA

Dated Calcutta, the 2nd September 1896

GENTLEMEN,

WE have the honour to report that the Cash and Store Accounts maintained in your Office for the year ending 31st March 1896 have been audited under our supervision and by our direction, and, subject to the exceptions pointed out in the appended note, have been found correct

We append statements (1) of Receipts and Expenditure during the year under audit, (2) of Assets and Liabilities on the 31st March 1896, and (3) a General Summary of Income and Expenditure from the 1st April 1895 to 31st March 1896, comparing the original and supplementary estimates with the actual income and expenditure as obtained from your books.

We have the honour to be,

GENTLEMEN,

Your most obedient servants,

R. E. HAMILTON,
Accountant-General, Bengal.

D. BURBRIDGE,
Examiner of Local Audit.

*NOTE on the Audit of the Cash and Store Accounts of the Port Commissioners
for the year ending 31st March 1896.*

PART I.—JETTIES.

Cash Voucher No 337, dated 4th May 1895.—Establishment Pay Bill for April 1895

The pay of four punkha-pullers at Rs 6 per month each has been irregularly included in the bill.

Such charges should in future be drawn in contingent bills, as they are met from a contingent grant.

STORES AUDIT.

A receipt statement of stores, amounting to Rs. 15-12, was given to the Store-keeper by T C Coondoo and Company on the 31st January 1896, but was not sent to the Account Department until the 19th June 1896. The Store-keeper should explain why the statement was detained in his hands for nearly six months.

2 The daily totals of both Receipt and Issue statements should be stated in words as well as figures by the Store-keeper in future. This will safeguard the statement against being tampered with.

3 The Store-keeper's Actual Stock List not being ready at the time of audit, no agreement could be made with the book balances in the stock ledgers.

4. The Register of Unserviceable stores was *not* ready at the time of closing the audit, and has therefore not been checked.

APPENDIX 'I'—continued.
Statement of Receipts for the year 1895-96.

HURRO LAUL DASS,

J. H. APJOHN,

AUDITORS' REPORT ON HOWRAH BRIDGE ACCOUNTS FOR THE YEAR
ENDING 31st MARCH 1896.

APPENDIX I.

No. $\frac{L A}{253}$.

From

THE AUDITORS OF THE ACCOUNTS OF THE COMMISSIONERS
OF THE HOWRAH BRIDGE, CALCUTTA,

To

THE COMMISSIONERS OF THE HOWRAH BRIDGE, CALCUTTA.

Dated Calcutta, the 2nd September 1896.

GENTLEMEN,

We have the honour to report that the Accounts of the Howrah Bridge for the year ending 31st March 1896 have been audited under our supervision and by our direction, and to certify that they have been found correct.

We append statements of (1) Income and Expenditure during the year under audit, and (2) Assets and Liabilities on the 31st March 1896, as obtained from your books.

We have the honour to be,

GENTLEMEN,

Your most obedient servants,

R. E. HAMILTON,
Accountant-General, Bengal

D. BURBRIDGE,
Examiner of Local Audit.

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF 1896-97.

No. 998B., dated Calcutta, the 12th November 1896

From—E H WALSH, Esq., Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

I AM directed to submit the following report on the state of the salt market for the second quarter of 1896-97, comprising the months of July, August, and September 1896.

SALT

THE HON'BLE MR W H GRIMLEY.

2. The quantity of salt of every description cleared during the quarter under review amounted to 26,77,294 maunds, against 28,43,269 maunds in the previous quarter, and 26,12,380 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 61,68,873, against Rs. 68,06,060 in the previous quarter and Rs. 61,10,917 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of locally-made salt removed from the golas in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown in table I below :—

TABLE I.

1	2
	Purt.
	Mds
Balance at the close of the previous quarter .	3,95,554
Manufactured and added during the quarter	48,600
Total	4,44,154
Sold during the quarter	16,134
Wastage	2,471
Total .	18,605
Balance at the close of the quarter ..	4,25,549

The total sales of locally-made salt during the quarter under review amounted to 16,134 maunds, against 18,130 maunds in the previous quarter, and 22,180 maunds in the corresponding quarter of the previous year. Duty was levied during the quarter on the full quantity sold.

4. The subjoined table II shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review, as compared with the figures of the corresponding quarters of the previous two years:—

TABLE II.

WHENCE IMPORTED	1894-95		1895-96		1896-97.

5. Table III shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter under review, as compared with the results of the previous four quarters:—

TABLE III.

WHERE STORED	Second quarter of 1896-96	Third quarter of 1896-96	Fourth quarter of 1896-96	First quarter of 1896-97	Second quarter of 1896-97
1	2	3	4	5	6
	Mds	Mds	Mds	Mds	Mds
Sutkea Salt golas ..	27,50,366	28,36,045	26,50,846	13,39,359	17,93,863
Kidderpore Dock do ..	3,51,871	6,26,006	5,48,200	1,72,863	1,704
Chittagong Government Salt golas	1,64,211	2,74,168	3,00,777	1,45,761	18,168
Ditto Private ditto ..			60,900	48,953	64,163
Khulna (Salt Bonded Warehouse of Messrs Turner, Morrison & Co)	1,564	819	6,849	1,246	5,038
Malasore (ditto)	1,837	2,455	8,558	137	
Chandbali (ditto)	..	3,460	3,086	3,724	..
Bhairab Bazar (ditto)		9,880	2,969		
Total	31,60,549	38,73,462	35,60,740	17,11,073	18,61,025

The stock in bond at the close of the quarter under review, though higher by 1½ lakhs of maunds than at the close of the previous quarter, is much below that at the close of any of the preceding three quarters; and the shipments of salt for the port of Calcutta, as noted in paragraph 9, have also declined considerably.

6. The despatches of salt from Calcutta by water and the three railways passing the several pass-stations into the interior of the country both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter under review and the corresponding quarters of the previous two years, are shown in table IV below:—

TABLE IV

PERIOD	By WATER					By RAIL			By STEAMERS AND FLATS

No transactions in sea-imported salt have been reported for the quarter from Cuttack and Puri.

RECONSTRUCTION OF THE PRESIDENCY GENERAL HOSPITAL.

MUNICIPAL DEPARTMENT—MEDICAL

Calcutta, the 23rd November 1896.

RESOLUTION—No 4966Medl.

READ—

The Report of the Committee appointed by the Government Resolution No. 314T M., dated 13th June 1896, to consider and report on the structural requirements of the Presidency General Hospital.

In February last, Brigade-Surgeon-Lieutenant-Colonel A. Crombie, the Superintendent of the Presidency General Hospital, drew prominent attention to the acknowledged defects in the structural arrangements of the hospital, and submitted certain proposals for improving and adding to the existing buildings. He pointed out at the same time that the reforms proposed by him would cost a large sum; that it was doubtful whether the present buildings would bear altering, and whether the results would justify the expenditure involved, and he suggested that the better plan would be to remodel the entire hospital so as to adapt it to modern requirements. The Lieutenant-Governor accordingly decided to appoint a Committee, consisting of the following gentlemen, to consider and report on the subject —

The Hon'ble H. H. Risley, C. I. E.	President
The Hon'ble W. B. Gladstone	.		
Surgeon-Colonel G. C. Ross, Inspector-General, Civil Hospitals	Members
The Hon'ble J. G. H. Glass, C. I. E., Chief Engineer, Public Works Department	
Surgeon Lieutenant-Colonel R. Cobb, Officiating Surgeon Superintendent, Presidency General Hospital	
W. Banks Gwyther, Esq., Under-Secretary, Public Works Department	
			Secretary

2. The report of the Committee was submitted on the 2nd September. In it they discuss the questions referred to them very fully, and recommend the demolition of most of the existing buildings and the complete reconstruction of the hospital at a cost of twenty-two lakhs. The Lieutenant-Governor was not prepared to accept so costly a scheme without full examination, and he therefore deferred passing orders on the report until he could visit the hospital himself and see on the spot the precise effect of the Committee's proposals. It was clear, however, from the first that their scheme proceeded in the main on sound lines; that two out of the three main blocks of the present hospital must be condemned as defective in every respect, and that several additional buildings would have to be constructed. As the existing site would not admit of these changes being carried out, and funds were then available in the budget of the year, His Honour decided to take up at once the busti land on the east of the hospital, the acquisition of which the Committee consider desirable in any case on sanitary grounds and essential for the purpose of gaining space to extend the hospital buildings. At the same time the preparation of detailed plans and estimates for the entire project was sanctioned, and the Public Works Department were directed to consider whether the central building of the present hospital could not be converted into the administrative section of the new scheme, and a portion of it fitted up as an obstetric ward.

3. The Lieutenant-Governor has since visited the hospital, and, after discussing the scheme with the members of the Committee and the medical staff, has decided that the central building shall be retained for the purposes indicated above. This will reduce the estimate of the cost of the buildings by about a lakh and a quarter. Further reductions may also probably be effected in the estimate for the paying patients' block. The Lieutenant-Governor can recognise no obligation to provide in a public hospital at the cost of the tax-payers special accommodation for the wealthier classes of Europeans, who can afford to pay for treatment in their own houses or in a private hospital. It is true, as the Committee observe, that Hospital Port Dues are levied for the purpose of

affording medical aid to the officers and seamen of ships visiting the port, and the Lieutenant-Governor is prepared to admit that reasonable provision should be made for officers who come to the hospital as paying patients. But the European community generally cannot claim, as of right, that in their case the standard of comfort observed in respect of rooms, furniture, cooking, and attendance shall be higher than a public hospital would ordinarily afford, unless they are prepared, not only to accept a scale of charges bearing a reasonable relation to the working expenses, but also to raise by subscription a substantial proportion of the cost of constructing the separate block which is proposed. In the event of these conditions being complied with, the Lieutenant-Governor would be willing to place the management of the paying patients' block under the control of a Committee on which the subscribers would be represented.

4. Subject to the foregoing remarks, the Lieutenant-Governor accepts the scheme drawn up by the Committee as offering the best possible solution of the questions referred to them, and he will endeavour to give effect to their proposals as soon as the resources of the Province permit. In June last, when the Committee was appointed, the financial outlook was more promising than has been the case for many years; and the Lieutenant-Governor was justified in hoping that it would be in his power to carry out extensive reforms, not only in the European General Hospital, but also in the Medical College and Campbell Hospitals, where the bulk of the patients are natives. Since then the position has undergone a material change; the Province is now threatened with scarcity, if not with famine; the Government of India has enjoined the observance of the strictest economy; and the Provincial balance of twenty-one lakhs must be held in reserve to meet expenditure on relief. Sir Alexander Mackenzie will, however, press upon the Government of India that the gradual reconstruction of the Presidency General Hospital on the lines laid down by the Committee and the other necessary medical reforms in Calcutta must be undertaken as soon as the money can be found; and he hopes that in the Provincial contract now under consideration it may be possible to provide funds for the completion of a large portion of the work within the next five years.

5. In conclusion, the Lieutenant-Governor desires to thank the Committee for the thoroughness with which they have discussed the questions referred to them, and for the admirable report which they have submitted. His acknowledgments are more especially due to Mr. Banks Gwyther, the Secretary to the Committee, for the design of the buildings and for the excellent plans which accompany the report. The report of the Committee with this Resolution will be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,
Secy. to the Govt. of Bengal.

Report of the Committee appointed to consider and report on the structural needs of the European General Hospital, Calcutta.

By the Government Resolution No. 314T.—M., dated the 13th June 1896, a Committee consisting of the following gentlemen was appointed to consider and report on the structural requirements of the Presidency General Hospital:—

The Hon'ble H. H. RISLEY, C.I.E.	President.
The Hon'ble W. B. GLADSTONE	.		
SURGN.-COL. G. C. ROSS, Inspector-General of Civil Hospitals	} Members.
The Hon'ble J. G. H. GLASS, C.I.E., Chief Engineer, P. W. Dept.	
SURGN.-LIEUT.-COL. R. COBB, Offg. Surgn.-Supdt., General Hospital	
W. BANKS GWYTHER, Esq., Under-Secy., P. W. Dept.	
	Secretary

In the Resolution appointing the Committee reference was made to the Inspection Report of the Inspector-General of Civil Hospitals, dated the 13th December 1895, and to a letter from Dr. Crombie, Surgeon-Superintendent, dated the 14th February 1896, as indicating defects in the hospital buildings, and suggesting certain alterations and additions. It was stated that the attention of Government had frequently been drawn to the unsatisfactory condition of the hospital and the many reforms needed in order to bring it up to the standard of metropolitan medical institutions of the present day. In order to carry out Dr. Crombie's proposals, very large expenditure would have to be incurred, and the question was raised whether, in view of the structural defects of the existing buildings, it would not be as well, once and for all, to reconstruct the entire hospital so as to adapt it to the requirements of the present day. The attention of the Committee has therefore been directed in the first place to ascertaining in what respects the existing structures are defective, whether the defects are such as can be removed at a reasonable cost, and to what extent any scheme for merely remodelling the existing buildings is likely to prove adequate and satisfactory. The Committee have in the next instance turned their attention to the alternative of reconstructing the hospital in accordance with the most approved modern principles, so as to secure for Calcutta an institution that will provide suitable accommodation for the various classes of patients who may resort to it, and will supply them with all necessary appliances and conveniences while under treatment.

Points referred to Committee.

2. The early history of the General Hospital cannot be fully cleared up. Of the three main buildings, it is believed that the one known as the central block was not originally constructed for the purposes of a hospital, but was purchased by Government in 1768 from a native gentleman who occupied it as a garden-house. The two detached wings, known as the eastern and western blocks, were erected in 1795, the central building being then used as a Civil Hospital, the eastern building as a European Military Hospital, and the western building as a hospital for sepoys. This arrangement continued till 1870, when the European soldiers were transferred to the building formerly occupied by the Sudder Court, and now known as the Military Station Hospital, Dallanda, and the sepoys to a new hospital specially constructed for them at Alipore. Since then the institution has continued on its present footing as a general hospital for Europeans. Minor buildings have been added from time to time, but in the main the hospital may be said to consist of buildings erected more than a century ago, one at least of which was not constructed for use as a hospital.

The present Hospital.

3. Before entering on a detailed account of the existing buildings it is desirable to describe the site. This is airy and healthy for Calcutta, and is generally regarded as occupying an appropriate position for a hospital. It comprises nearly 70 bighas of land, and measures 1,200 feet from east to west and 825

Its site.

from north to south. It thus admits of the hospital buildings being placed so as to get the full benefit of the prevailing wind, which blows across the grounds without obstruction.* In respect of its surroundings the site is also advantageous, having the large open maidan towards the north, the Bhowanipore Road and Military Hospital on the west, and the European Lunatic Asylum and some native residential houses to the south. On the east side, however, there is a basti of considerable size, which should, if possible, be removed, as it is open to many objections from the sanitary point of view. Reference will be made to this basti further on in the report. The large tank in the compound should be filled up.

List of existing buildings.

4. The following are the buildings which now stand in the General Hospital compound.—

- (i) Central Block.
- (ii) Western Block.
- (iii) Eastern Block.
- (iv) Quarters of Military Assistant Surgeons
- (v) Stewards' quarters.
- (vi) Bacteriological Laboratory.
- (vii) Contagious Diseases Ward.
- (viii) Medical Officers' quarters.
- (ix) Canning Home.
- (x) Nurses' quarters.
- (xi) Cook-house for central and western blocks
- (xii) Cook-house for eastern block.
- (xiii) Servants' quarters, eastern block
- (xiv) Coach-house and stable
- (xv) Protestant Chapel
- (xvi) Dead-house
- (xvii) Mehters' quarters.
- (xviii) Dhobis' quarters
- (xix) Cow-shed
- (xx) Medical officers' servants' quarters.
- (xxi) Store-house
- (xxii) Western cook-room
- (xxiii) Eastern cook-room
- (xxiv) Cook-room of Canning Home
- (xxv) Cook-room of nurses' quarters, durwans' lodges, latrines, samitas, dhobis' platform, cow-shed and water reservoir

For our present purpose only the main buildings which are shown in thick type in the list need be considered, and these will be noticed at length.

Defects of the three main blocks.

5 Patients are now accommodated in the three main blocks—**Central, Western and Eastern**—which are shown in plan 1. It will be seen that these buildings, which stand nearly in the middle of the site, are so placed that the Eastern and Western blocks obstruct the free passage of air to the Central block. Plans 2, 3 and 4 illustrate the arrangement of wards in each block. The condition of the buildings from an engineering point of view was carefully considered by the Superintending Engineer, Central Circle, who, at the request of this Committee, made a close personal examination of them, and has furnished the following report on the subject.—

I inspected the three main buildings of the General Hospital on 9th and 10th instant

Central Building—I consider this building structurally sound. The masonry, though not up to our present standard, is good bricks fair, mortar fair, and the walls are thicker than as now built. The weight borne by foundations is nearly double the Calcutta standard per superficial foot, and in any alterations no increased weight can be placed on the existing walls. The average pressure is 2 tons per superficial foot. The walls are, so far as I could see, uncracked. The floor, and roof-beams are generally sound, though of weak scantlings, and the first floor has a slight deflection in the main wards.

The walling would permit of considerable alterations, and should stand a good deal of interference without more than ordinary risk.

The ground floor is low—only 1 foot above ground level—and damp, and the wards badly lit, gloomy, and ill-ventilated. The rooms are of a good height—18 feet 4 inches from floor to floor. The central staircase interferes in both stories with light and ventilation. If the ground floor of the main wards were raised and floored, the inner south walling removed and replaced by pillars and brissummers, as in first floor, the wards would be drier and better lit, especially if the central staircase were removed and placed elsewhere; but the lowering of the height of rooms and doorways would affect the ventilation. Without some drastic alteration of the general design, it seems to me scarcely possible to utilise these ground floor wards and make them up to the standard.

The upper story wards appear to be quite sound, and, except for the obstruction caused by the central staircase, are airy and well lit. The ventilation is along the wards, and any effluvia is carried, intensifying, from patient to patient.

Eastern Block.—The masonry work in this block is not so sound as in the central block—more unequal in quality. The walls are, so far as I could judge, uncracked. The inner south wall might be dismantled with safety, no extra weight being placed on remaining walls. Piercing of openings in existing walls or widening of ditto should be limited as much as possible, and should be carefully supervised, as there is reason to believe the work is very unequal in quality.

The floor heights are very low. The ground floor is little more than a cellarage; the other two floors are only 11 feet 6 inches and 14 feet respectively from floor to under side of beams. This makes impossible an economical distribution of floor space per patient, with proper air space or cubic content, and the unit cost per patient for an altered ward will probably be found to be more than in an entirely new structure.

Western Block.—The walls are of very indifferent masonry, quite unsound, bricks and mortar of poor quality. The eastern wall is tied back by iron tie-bolts and plates. That end of the building is said to have badly cracked years ago. The ground floor is low, damp and uninhabitable. The first floor flooring is cracked, cut up, and seems very unsound. Light and ventilation are both much wanting. The staircase blocks up the wards and interiors with light and air.

I consider that much interference with the structure of this building is risky. If the requirements necessitate extensive alterations, it would, in my opinion, be better to rebuild.

Generally.—The central block would, in my opinion, from a structural point of view, bear considerable alterations with only ordinary risk, the eastern block with some risk, and in the western block considerable structural alterations are not advisable.

6. The buildings known as (iv) the **Military Assistant Surgeons' quarters**, and (v) the **Stewards' quarters** (now inhabited by the Ward Masters), were condemned several years ago as being structurally unfit for the purposes to which they are put and incapable of being remodelled, except at a prohibitive cost. In the Public Works budget for the current year provision has been made for the construction of a new block of quarters for these officers, but the commencement of the work has been deferred pending the consideration of the larger questions affecting the hospital as a whole, which have been referred to the Committee. The proposals which the Committee have to make on this point are stated in paragraph 31 below.

Quarters of
Military Assistant
Surgeons
and Stewards.

7. The **Bacteriological Laboratory**, which stands in the north-east corner of the hospital compound, was erected from funds supplied by the Government of India, the Local Government giving the site. It is understood that when the proposed Central Laboratory is established at Agra, the Calcutta Laboratory will be closed, and the building with its site will revert to the Local Government. On this assumption the Committee propose to utilise it for the purposes of the scheme of reconstruction which they recommend.

Bacteriological
Laboratory

8. The existing **Contagious Diseases Ward** (No. VII on the list), formerly known as Sambu Nath Pandit's Ward, was opened in 1873 for the reception of native in-patients, but was closed in 1878 as "being costly and out of all proportion to its use." It stands to the south-east of the eastern building and consists of two main rooms, each 28' 2" x 20', surrounded on all four sides by small rooms and verandahs. In 1887 it was converted into wards for cholera and contagious diseases, latrines and quarters for servants being added. It has accommodation for 18 patients.

Contagious
Diseases Ward.

9. The **Medical Officers' quarters** (No. VIII on the list) stand at the north-western corner of the hospital compound, and are in tolerably good condition. The building is two-storied and is divided into four suites of apartments, of which the two central suites are occupied by the Resident Medical Officers, while the British Medical Officer in charge of the Station Hospital lives at the east end, and the Superintendent of the Presidency Jail at the west end.

Medical Offi-
cers' quarters

10. The **Canning Home and Nurses' quarters** (Nos. IX and X) are connected buildings, each two-storied, standing at the south-west corner of the hospital compound, and having a separate entrance from the Bhawanipore Road. The Canning Home was built by Government from subscriptions raised for the purpose. The Nurses' quarters were erected in 1879 at a cost of Rs. 30,600; both buildings are in good condition.

Canning Home
and Nurses'
quarters

Probable number of patients.

11. Before considering whether any of the existing buildings should be retained, remodelled, or reconstructed, an estimate must be made of the hospital requirements of the European population of Calcutta and the districts of Bengal and Assam from which patients are ordinarily received. The number that can be accommodated in the hospital at present is 220 ordinary patients and 18 suffering from infectious diseases, making a total of 238. The daily average number of patients has risen during the last five years from 144·63 to 197·62, or by 36·64 per cent., and the maximum number treated in 1895 was 289. The latter figure may therefore be taken as indicating the possible demand that has to be met. This admits of being reduced by about 20, if certain non-European patients are treated in future in the new hospital at Bhawanipore, and the probable maximum demand under existing conditions may thus be stated at 270. On the other hand, with the extension of railways, the opening of new mills, tea-gardens, and coal mines, and the general industrial development of the country by means of European capital, the European population of the enormous area served by the hospital tends steadily to increase, and the Committee are satisfied, from evidence which has come before them in various ways, that the defective arrangements of the present hospital deter many persons from seeking admission, and that with improved accommodation and better appliances a substantial addition to the number of patients may be looked for. Bearing in mind then that the accommodation to be provided in a hospital is determined, not by the daily average number of patients, but by the maximum number that may claim admission to a particular ward at any given time, and also in view of the considerations just mentioned, the Committee are unanimously of opinion that accommodation should be provided for 336 beds as set out in detail in paragraph 27 below.

Drawbacks to remodelling existing buildings.

12. Having regard to the heavy expence of demolishing the present hospital and constructing an entirely new one in accordance with modern principles, the Committee have carefully considered the possibility of adapting the present buildings so as to remove some of their most prominent defects. They have accordingly drawn up a plan to show how the eastern and western blocks, which in some respects lend themselves to a satisfactory rearrangement of floor space, could, but for their structural defects, be partially remodelled. An estimate has also been prepared for laying the floors with marble and lining the walls to a height of 5 feet from the floor with glazed tiles, and introducing other improvements. In both buildings, however, there are inherent structural defects beyond all remedy, and the accommodation that could be provided would in any case be small in relation to the ground space taken up. The structural shortcomings of these blocks are clearly brought out in the report submitted to the Committee by the Superintending Engineer. Although the buildings have three stories, the basements of both are damp and absolutely unfit for the reception of sick persons. The first or principal floor has a height of only 11 feet 6 inches from floor surface to beam level, which is less than the recognized minimum of 13 feet, and this defect cannot be rectified without alterations that would amount practically to reconstruction. The top floor has a height of 14 feet to beam level, but even this is less than ought to be given in properly constructed wards. The central building, although according to the Superintending Engineer's report less unsound than either the eastern or western buildings, is, from the arrangement of its floors and the disposition of the rooms, quite unsuited for hospital purposes, no matter how it may be remodelled. In the first place the entire block, which contains only two stories, is so built that ventilation is along the wards instead of across them—an arrangement condemned by all authorities, but which it is impossible to alter. The lower floor is raised only a foot above the ground, and, being damp, dark and ill-ventilated, cannot in the opinion of the Committee be used, even if raised and flued in the manner suggested by the Superintendent Engineer. Finally, this block, together with the eastern and western buildings, occupies the middle of the site, and thus interferes materially with any scheme for new buildings. For these reasons the Committee have come to the conclusion that the three main blocks of the present hospital are defective as buildings, unwholesome as hospital wards, and unsuitable for administrative purposes. It is their settled conviction that no half-measures are feasible, and that the only prospect of effecting any real improve-

ment in the arrangements of the European General Hospital, is to be found in the demolition of the three main buildings and the complete reconstruction of the hospital on modern lines.

13. The scheme which the Committee advocate is based upon proposals framed by Surgeon-Lieutenant Colonel Cobb, and is shown in block plan No. 5 attached to this report. Its main features may be summarised as follows:—

General outline of scheme.

- I.—That of the existing buildings only the medical officers' quarters and out-offices, the Canning Home, nurses' quarters, and out-offices, and the laboratory should be retained.
- II.—That the plot of land on the east, shown in plan No. 1, should be acquired in order to provide space for new buildings.
- III.—That new buildings should be provided for hospital purposes, viz., separate blocks for (i) paying patients, (ii) women and children, (iii) adult male patients, (iv) infectious diseases, (v) administrative offices, (vi) lying-in cases; and that new kitchens, a steam laundry, a new mortuary and other subsidiary buildings should be constructed to complete the accommodation necessary for the efficient working of the hospital.
- IV.—That the standard of construction of the buildings should be such as modern science has shown to be necessary, and that the furniture and fittings, sanitary appliances and general equipment should be of the most approved patterns.
- V.—That the European Lunatic Asylum should be utilized as quarters for Military Assistant Surgeons, stewards and menials.
- VI.—That a portion of the Native Lunatic Asylum grounds should be handed over for the purposes of the hospital dairy.
- VII.—That a house should be built for the Superintendent in the vicinity of the Hospital.

14. In arranging the new buildings, two essential conditions have to be complied with, viz., that the wards should be so placed as to ensure for the patients the conditions best suited to their recovery, and that the reception and prompt treatment of patients and the proper supervision of the work of the hospital should be rendered as easy as possible. To give effect to the first condition, all buildings containing patients are arranged with their longer sides facing the prevailing south wind so as to ensure the thorough cross ventilation of the wards. The two main buildings, containing the bulk of the patients, are given the most prominent position parallel to the south boundary wall of the hospital, and are placed end-to-end in line. The paying patients' block is placed at the north-western corner, and the infectious wards near the north-eastern corner, the rest of the buildings being arranged with reference to the purposes they have to serve. After much consideration and discussion the Committee are convinced that no other arrangement of the main blocks is possible, without cramping the other buildings, blocking the passage of air, and locating the infectious wards in dangerous proximity to the ordinary wards. The plans adopted will, however, render it necessary to acquire the basti land on the east side of the hospital up to Badiapara road, the cost of which is estimated at Rs. 1,45,000.

Arrangement of proposed new blocks

15. In respect of the second condition, the Committee have kept in mind the frequent complaints that have been made of delay in admitting patients, more especially in cases of accidents. To guard against this in the future, provision has been made in the scheme for an entrance lodge, where a European gate-keeper will be given suitable quarters, and will be always in attendance to control and direct persons entering and leaving the hospital compound. It is proposed that the lodge should be connected by telephone with the administration block, where the Resident Surgeon, or Military Assistant Surgeon on duty, can be immediately communicated with. Directly in front of the entrance gate, but set back so as to be in proximity to the main wards, is placed the administration block, in which the offices of the Superintendent and the Medical Officer on duty, all hospital stores, linen and bedding are contained, and all appliances would be provided for the immediate treatment of accident cases. The Medical Officer's room looks out towards the entrance gate, and commands a view of all the other buildings. It should be connected by telephone with all parts of the hospital.

Arrangement for admission

Paying patients' block.

16. Great stress has been laid by the Chamber of Commerce, the 'Trades' Association and the Defence Association, in communications which they have addressed to the Committee, on the necessity for providing suitable accommodation in a separate block for the wealthier class of paying patients. There can be no doubt that the want of such accommodation is keenly felt both by residents in Calcutta and by persons who come in from the mufassal for treatment, and it is abundantly clear that the existing arrangements cannot be too strongly condemned. As it is probable that the receipts from patients of this class would cover a large proportion, if not the whole, of the cost of maintaining the block, and there is some prospect of a substantial sum being contributed from private sources towards its construction, the Committee consider that this part of the hospital may properly be designed with reference to a higher standard of comfort than is necessary for the general wards. Plan No. 6 has been prepared on this assumption.

17. From the statistics of the hospital it appears that the accommodation for paying patients should be divided between men on the one hand and women and children on the other in the proportion of about two of the former to one of the latter. Thus, of the 31 rooms provided for in the plan, 21 will be required for men and 10 for women and children. The block has been arranged in the form of a central portion containing general accommodation, such as dining, recreation, sitting, and operation rooms, with staircases and lifts, and two wings, of which the eastern wing would have three stories, and would contain seven rooms in the ground floor for second class patients, and seven in each of the two floors above for first class patients. A corresponding two-storied wing would be built on the west side for women and children, with five rooms on the ground floor for second class patients, and five on the upper floor for first class patients. To render the ground floor accommodation healthy and attractive it is considered essential to raise it not less than 8 feet above the level of the ground, this being the minimum necessary to keep patients beyond the reach of miasma. The space below the ground floor forming a basement will be kept open, the portion to the south under the wide verandahs being used as an ambulatory for patients, and that to the north as a passage for servants, &c. Each suite will consist of a living room measuring 16' x 14', dressing room 10' x 7', and bath-room 10' x 6' 6", and will have a verandah 12 feet wide to the south for the use of patients, and a verandah 8 feet wide to the north to serve as a passage for servants. The two end suites will be connected by a doorway so as, if necessary, to be convertible into a double suite. The height from floor to floor is proposed to be made 16' 6" so as to have a clear height of 15 feet below beam level. floor and ceiling ventilation will also have to be provided. The floor of the living rooms, dressing rooms and bath-rooms will be of marble, and that of the south verandahs of encaustic tiles. It is also proposed to line the walls up to a height of 5 feet with glazed tiles and to use hard plastering finished with oil paint for the rest of the wall surfaces. Wall angles and junctions of walls with floors will be rounded off. A special staircase for servants is provided for each wing to prevent their using the main staircases. The sanitary arrangements in each bath-room will be of the kind commonly used in Calcutta residences, as with so many separate bath-rooms the water-closet system would lead to a multiplication of pipes and prove a source of danger. Water, however, will be laid on throughout. As regards lighting, it is unanimously agreed that the electric light is the most suitable for hospitals, as it does not vitiate or heat the air of a room, is steady, can be regulated, and requires very little attention. If, as seems probable, a comprehensive scheme of electric lighting is carried out in Calcutta, the hospital would be connected with the general mains; it might also be possible to obtain power from the Alipore Jail electric station, or by a separate installation. The employment of electric power for punkah-pulling has been proposed and should, if possible, be carried out, it is obviously desirable to exclude punkah coolies from the vicinity of hospital wards. Under this head and that of the lighting the introduction of electric power will effect a considerable saving in the working expenses of the hospital. Space is also given in the wings for the accommodation of nurses, and the storage of medicines, of ward linen, and of patients' clothes. In the central portion there will be a lift-working from basement to roof in addition to separate staircases. Rooms for the

medical officers are provided on the ground floor, an operation room over the porch, and a billiard room on the top floor. Dining and day rooms on each floor with pantries and food lifts are also necessary, and attention should be paid to the laying out of the terraced roofs, so that they may be used for recreation. A special kitchen (plan No. 11) has been provided, and a range of out offices for private servants will also be required.

18. The two blocks for adult males and for women and children would occupy the southern portion of the site. The latter has been located westward of the former and a gap of 100 feet allowed between the two, and both blocks are set back in plan 150 feet from the south boundary wall so as to ensure a free current of air through the buildings. After careful consideration, the Committee have thought it sufficient to provide for the following accommodation in these two blocks:—

Accommodation of main blocks.

Women and children's wards—

Paying patients @ Rs. 2 and Re 1	16
Free patients	60
Total	76

Men's wards—

Paying patients @ Rs 2 and Re 1	24
Free patients	162
Total	186

19. Taking the requirements of the women and children's block first, it has been found advisable to arrange the accommodation in two stories, and the plan drawn up for it (No. 7) follows the approved type of a double pavilion connected to a central block. The pavilions contain four twelve-bed wards, four two-bed wards, and four one-bed wards, or a total of 60 beds, while the central block provides accommodation for eight patients in single rooms paying Rs. 2 each per diem and eight patients in two-bed rooms paying Re. 1 per diem. The total accommodation for women and children is therefore 76. The general arrangement proposed for these wards is similar to that of the separate block for paying patients already described, except that the bath-room accommodation is located in projecting corner blocks. In regard to the basement, height of wards, flooring, and manner of finishing off the walls, it is proposed to adopt the same system as is suggested for the paying patients' block. The wards are designed 26 feet wide, and the wall space to each bed is taken at 9 feet 6 inches, so that the floor space per patient is $123\frac{1}{2}$ square feet. The clear internal height of the wards being 15 feet, a capacity of $1,852\frac{1}{2}$ cubic feet per patient is secured, and only one bed will be placed between each pair of windows. At the outer end of each wing projecting corner blocks are provided, that to the south being for baths and lavatories and that to the north for water closets. The further accommodation in connection with each ward consists of a nurse's room and a scullery, each with a window looking into the ward and separated by an eight-foot passage forming the entrance. There will also be a room for ward linen, a day room for patients, a two-bed separation ward, a single bed ward for critical cases, and a room for the medical officer. At the inner corners of the pavilion blocks small turrets are provided at the angles, that to the south side being for a sink and receptacle for foul articles that cannot be disposed of in the scullery, while the other turret will contain water-closets. Each pavilion is separated from the central section by a sixteen-foot gap crossed by a corridor bridge, alongside of which it is proposed to provide open iron staircases for servants. In the central section, besides the main staircase and lift for patients, are rooms for the principal medical officer and the Assistant Surgeon in charge, an operation room, a matron's room, and a recreation room for children, besides wards for the poorer class of paying patients, turret blocks containing bath and water-closet accommodation being provided at the north corners. All the sanitary appliances must be of the best kind.

Plan of block for women and children.

20. In the men's block (plan No. 8) the number of patients to be provided for can be conveniently arranged in a three-storied building of the double pavilion type with a central block, the distribution of wards and patients being as follows:—

Plan of Block for men.

	Patients.
6 Wards with 24 beds	144
6 Separation wards with two beds in each	12
6 Special wards with one bed in each	6
12 Single paying wards at Rs. 2	12
6 Two bed paying wards at Re. 1	12
Total	186

In nearly all respects the men's block will be similar to that for women and children, the difference merely consisting in the number of stories and the number of beds to a ward. In both blocks provision has been made for the poorer classes of paying patients on a scale calculated with reference to probable requirements as indicated by the experience of the present hospital.

Administration block.

21. Intimately associated with the proper working of all the wards is the administration block, containing the rooms which are necessary in connection with the general control of the hospital, but which form no part of any special section of it. The site proposed has been selected so as to combine special facilities for the prompt admission of patients with proximity to the hospital and ready control over every branch of its working. In this building the Superintendent will transact general business connected with the hospital; patients will be received and discharged; medical and surgical stores will be kept; hospital clothes and linen stored, examined, and distributed to the various wards; laboratory work done, &c. The building (plan No. 10) will be of an ordinary type with a plinth of three feet, and will be connected by telephone with every part of the hospital.

Infectious Diseases Wards.

22. The only site that can be considered at all suitable for the wards for infectious diseases is at the extreme east on the plot of land between the hospital compound and Badiapara Lane. This is necessarily determined by the direction of the prevailing winds, and has an important bearing on the proposal of the Committee to acquire land in this direction. The existing infectious wards are all grouped together—an arrangement which is open to serious objections. After considering the demands made in the past for accommodation of this nature, the Committee have come to the conclusion that the following accommodation will be sufficient:—

				Beds.
Cholera cases	Men	4
	Women	2
Diphtheria cases	2
Measles	16
Chicken-pox	6
				—
Total				30
				—

In plan No. 9 the beds are arranged in isolated buildings connected with a central disinfecting chamber through which the nurses and doctors would pass on entering and leaving the wards. These buildings would be raised on an 8 feet basement, and, with the exception of the measles block, would be single-storied. Each building would have separate accommodation for nurse, scullery, linen, water-closets and baths, and a separate kitchen and servants' room. The entire group would be placed in a separate enclosure with a gate leading into the main hospital compound.

Obstetric block.

23. In deference to the representations of the Chamber of Commerce and the 'Trades' Association, a separate obstetric block has been included in the scheme (plan No. 10). The arguments in favour of this arrangement are clearly stated in the following extract from a letter, dated the 24th August, which has been addressed to Government by the Trades' Association:—

With regard to the new hospital, the Committee would advocate the erection, as far as possible, of separate buildings for each class of disease; they would also urge that an Obstetric ward of a superior class be added. In doing so, the Committee are quite aware that the Eden Hospital was originally intended to meet the needs of the community in this respect, but as regards the better class of patients, and also of paying patients, there appears to be considerable room for improvement in the accommodation provided by this institution. The chief objections to this hospital, from a European point of view, are (1) that it is situated in the heart of the native quarter of the town, the atmosphere and outlook being in themselves serious drawbacks; (2) that it is not exclusively for the use of Europeans, while the accommodation provided is inadequate, and falls short of the standard of the present day, such accommodation as does exist consisting principally of bare rooms, devoid of comfort; (3)

that the Medical College is essentially a training institution, and such patients in a maternity hospital attached thereto are distinctly out of place, (4) that the constant presence of the native and military students, principally the former, is undesirable. To make the hospital suitable for the accommodation of European patients would necessarily involve a considerable outlay of money; and as it doubtless meets the requirements of the poorer classes, and of native patients, it seems unnecessary to incur any expenditure in this direction, in view of the opportunity the Government now have of providing a suitable Obstetric ward in the General Hospital, which would in every respect be more desirable and calculated to attract patients.

The accommodation proposed is two single-bed wards for paying patients, two double bed wards for free patients or patients paying the lower rates, and a segregation ward for puerperal cases. The type of building would be one-storied on an 8-feet basement, constructed on the same lines as the other sick wards, and both it and the segregation ward would have a day room and separate accommodation for nurses, scullery and linen. It is understood that the separation, not only of puerperal, but also of all obstetric cases, is insisted upon by the highest medical authorities.

24. It is proposed to utilise the existing bacteriological laboratory for the reception of inebriates and insanes, who disturb the other patients, and should be kept apart. Wards for inebriates and insanes.

25. The scheme includes a separate building (plan No. 11) for out-patients; but in the opinion of the Committee this should not be built until experience has shown it to be necessary. The out-patient department of the hospital was re-opened in 1894, but the attendance is at present small, and it is not yet clear that special accommodation need be provided. Out-patient department.

26. The need of better laundry and kitchen arrangements has already been admitted by Government, and provision was made in the Public Works Budget for the current year for carrying out certain necessary improvements. A laundry worked by steam is a necessity in a large hospital, and in connection with it two disinfectors are required—one for disinfecting clothes from the contagious wards, and the other for disinfecting patients' clothes, bedding, &c. The site selected is at the north-east corner on the plot of land which it is proposed to acquire. Laundry and kitchen.

The main kitchen (plan No. 11) has been placed in a central position, and will contain, besides the kitchen and its adjuncts, accommodation on one side for daily supplies and on the other for the steward's office and certain kinds of stores. In front will be two rooms for food distribution, and at the back a kitchen yard with rooms for cooks and servants.

25. The other new buildings proposed are—

Other subsidiary buildings.

- (i) A 'destructor' to be placed near the laundry for destroying all articles which are likely to carry infection. This building, as well as the laundry and disinfectors, will be provided with a chimney to throw off noxious products at a height sufficiently great to ensure diffusion.
- (ii) A chapel for Church of England patients to replace the present structure, which will have to be removed to make room for the new block for women and children.
- (iii) A mortuary with corpse chamber, *post-mortem* room and waiting-room in a small separate enclosure. It is proposed to place this building near the west gate of the hospital, that being the most retired position and the most suitable for funeral parties starting from the hospital.
- (iv) Additional accommodation for nurses. For this purpose a new two or three-storied block can be built near the south-eastern corner of the existing nurses' quarters, to which it can be attached by means of a gangway at each floor level.

Distribution
of accommoda-
tion

27. The following table shows how the accommodation provided would be distributed among the several buildings:—

Name of Block.	Paying patients upper class.	Paying patients lower class.	Free patients.	Total.
1	2	3	4	5
Paying patients' block ...	31	31
Women and children's block	16	60	76
Male block	24	162	186
Obstetric block ...	2	2	3	7
Ward for inebriates and insanes	6	6
Infectious diseases block	30	30
Total .	33	42	261	336

Covered ways.

28. To facilitate communication between the several buildings, it will be necessary to provide covered ways open on both sides. Carriage roads will also be needed, and walks should be arranged for the use of patients, the grounds being suitably laid out. The surface drainage of the whole area will require to be carried out effectively, so that water may not stagnate.

Drainage.

29. The Calcutta Municipality propose to lay a new main sewer along Badiapara Road with a fall southwards, and to realign the road to a width of 60 feet. The drainage of the Hospital premises might with advantage be made to flow into the new sewer. All pipes, traps, pits and chambers must be carefully arranged so as to be readily accessible and to admit of cleaning and ventilation. The whole of the water-supply should be from the filtered mains.

Dairy

30. A carefully supervised dairy is essential, and the existing cow-shed should be removed. The Committee are disposed to recommend that a portion of the Native Lunatic Asylum compound should be given up for the purpose. A dairy on that site would be near enough to allow of proper supervision and sufficiently distant not to prove offensive.

Quarters of
Superintendent
and officers.

31. The Committee consider that it would be very desirable, if possible, to provide a house for the Superintendent on the site now occupied by the residence of the Deputy Superintendent of the Native Lunatic Asylum, which faces the maidan and is within a short distance of the Hospital. They further think that the resident medical officers' quarters, about half of which is now occupied by officers in no way connected with the General Hospital, should be reserved entirely for the staff, the extra quarters thus set free being allotted to junior surgeons who may be appointed to do duty at the hospital. The Committee also suggest that the two-storied building occupied by the Deputy Superintendent of the European Lunatic Asylum should be converted into quarters for the Military Assistant Surgeons and the steward; the single-storied quarters being utilized for hospital servants. This will enable a considerable saving to be effected on the allotment of Rs. 90,000 provided for this purpose in the current years' budget.

32. The cost of the proposed scheme has been roughly estimated at Cost of scheme Rs. 22,00,000, the details of which are as follows:—

	Rs.
Paying patients' block, including kitchen and servants' quarters ...	3,94,000
Block for women and children	4,50,000
Block for men	6,80,000
Administration block	70,000
Obstetric block	50,000
Main kitchen	50,000
Gate lodge	6,000
Mortuary	15,000
Additions to nurses' quarters	30,000
Inebriates' wards	2,000
Chapel	6,000
Out-patient block	30,000
Laundry with disinfectors and destructor	60,000
Infectious diseases wards, with kitchen and out-office accommodation and separate mortuary	1,20,000
Dairy	5,000
Covered ways, compound walls and gates, laying-out grounds, &c .	47,000
Acquisition of land on east side	1,45,000
Residence of Superintendent	40,000
Total ..	22,00,000

The Committee venture to hope that it may be found possible to commence and complete the rebuilding of the hospital during the period of the next Provincial contract. The expenditure proposed is no doubt large, but it cannot be regarded as excessive if it is borne in mind that the greater part of it is needed to remedy defects of very long standing, most of which existed before the introduction of the system of Provincial Finance, and thus represents an aggregate of outstanding liabilities in respect of this hospital which the Government of Bengal may be said to have inherited from the Government of India.

The Committee further observe that since 1867, when Hospital Port

	Rs.		Rs.

† Act XII of 1875, section 50.

Dues were first introduced, the owners and agents of vessels coming to Calcutta have paid in this form no less than Rs. 16,21,787,* which has been applied under the orders of Government to the support mainly of the European General Hospital and "otherwise for providing sanitary superintendence and medical aid for the shipping in the port * * * and for the seamen belonging to the vessels therein, whether such seamen are ashore or afloat.†" It would be beyond the province of the Committee to offer any

opinion on the question, which has been raised in a letter addressed to them, by the Chamber of Commerce whether the Hospital Port Dues have been in all respects properly applied. But they submit that the mere fact of so large a sum being levied from one section of the mercantile community for the purpose of affording medical aid to officers and seamen of ships visiting the port may not unreasonably be held to impose upon Government at least a moral obligation to provide a higher standard of hospital accommodation than was considered suitable more than a hundred years ago, when Hospital Port Dues did not exist, and the entire cost of the hospital was borne by Government.

33. The cordial acknowledgments of the Committee are due to their Secretary, Mr. Banks Gwyther, for the admirable designs annexed to the report, which are believed to be in accordance with the views of the best European authorities on the subject of hospital construction. They desire also to thank Surgeon-Captain Pilgrim, who has attended at all their meetings and has supplied much valuable information concerning the working of the present hospital.

REPORTS ON THE PROSPECTS OF THE CROPS AND CONDITION
OF THE PEOPLE IN THE PATNA, CHOTA NAGPUR,
ORISSA AND RAJSHAHI DIVISIONS.

NOTIFICATION.

No. 4681 Agri.—The 24th November 1896.—The following papers are published for general information.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

No. 4550 Agri., dated Calcutta, the 18th November 1896

From—M. FINUCANE, Esq., Offg. Secy. to the Govt. of Bengal, Revenue Dept.,
To—The Commissioner of the Patna Division.

I AM directed to acknowledge receipt of your report No. 609G., dated 11th November 1896, drawn up under section 9 of the Famine Code, and in reply to say that Sir Alexander Mackenzie considers that the report has been prepared with much care and ability, and desires to thank you for the promptness with which it has been submitted, and for the labour bestowed by you on the compilation of it.

2. I am at the same time to forward for your information the accompanying copies of a letter addressed by this Government to the Government of India on the subject of the approaching scarcity in Bengal generally, and in the Patna Division in particular, and to invite your special attention to the remarks contained in paragraphs 7, 12 to 19, 21 and 22 of that letter.

3. You will observe that a sum of Rs. 34,000 is now available in the hands of the Bengal Distress Relief Committee which was formed in Calcutta in 1888, and His Honour proposes, after consulting you at Sonapore, to ask the Committee to place at your disposal so much of the amount as may be required at present and in the immediate future for distribution in charitable relief.

No. 609G., dated Bankipore, the 11th November 1896.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, General Department.

IN continuation of my letter No. 579G. of the 23rd ultimo, I have now the honour to forward, under section 9 of the Famine Code, the following report which describes the state of affairs in the districts of the Patna Division on the 1st November 1896, and supplies the information required by the section quoted.

PART I.

INTRODUCTION.

2. After full consideration, I have decided that the time has come for declaring scarcity to be prevalent, and for submitting this report, because although there are so far no signs of distress among the mass of the population, yet grain is already at famine prices almost everywhere, and it follows that all those who have to purchase grain for their daily consumption must already be greatly straitened. I am also anxious to have all arrangements made in good time, and to place all the available information in the hands of Government long before the actual onset of distress, which must certainly be felt in greater or less degree in the course of the next few months.

3. I propose first to set forth the condition of each district as reported by the district officer, with some remarks of my own, and then to review the whole situation, with such observations and recommendations as seem appropriate. The area and population in each case are taken from the latest census pamphlets. It is to be noted that the population figures are probably below the truth, as a period of nearly five years has elapsed since the census was taken, but there is a manifest convenience in using the figures of 1891, and I have adopted them throughout. The areas under each crop are taken from the forecasts published by the Director of Land Records, and the average outturn of each crop per acre has also been obtained from him: lastly the rainfall figures in Appendix B have been compiled from a memorandum supplied by the same officer. The terms *bhadoi* and *khari* used in the following paragraphs refer (a) to all the rainy season crops and (b) to the winter rice, sometimes called *aghani*.

PART II.

DISTRICT REPORTS

4. PATNA.—[Area 2,082 square miles, population 1,772,509.] This district, which lies wholly to the south of the Ganges, consists of four broadly marked tracts, viz.—

- (1) The deara land along the Ganges.
- (2) A long and narrow strip of highland close to the bank of the Ganges, along which the East Indian Railway runs from east to west.
- (3) A large tract of low land to the south of the railway and the high strip just mentioned, which is annually subject to inundation.
- (4) The Bihar subdivision.

The first three areas are comprised in the Dinapore, Sadar, and Barh subdivisions. Tracts Nos. 1 and 2 grow *bha'oi* crops in the rains and *rabi* in the winter: there is little rice. Tract No. 3 produces little rice or *bhadoi*, but usually grows a magnificent crop of *rabi*. The Bihar subdivision again is divided into the hills in the south and the low country to the north: the whole subdivision is intersected with streams, and the greater part is provided with a system of reservoirs (*ahars*), some of which are filled with rain-water and natural drainage, while others are replenished by damming the rivers. An elaborate system of conduits (*pynes*) conveys the water from the rivers to the reservoirs, and again to the fields of the cultivators. Mention should also be made of the Sone Canal System, which runs for about 40 miles near the western border of the district, and irrigates in ordinary years about 40,000 acres of land, an area which has been increased during the present year to about 54,000 acres. The chief crop of the district is the *kharij*, which in an ordinary year produces 43·43 per cent. of the total food crop, 36·01 per cent. being *rabi* and 20·55 per cent. *bha'oi*.

5. *Reasons for apprehending scarcity.*—The rains in the present year have been both unseasonable and deficient. They broke late, *i.e.*, at the end of June, and were heavy (the June rainfall being 7·19 inches against a normal fall of 6·24 inches). More rain followed in the first half of July, viz., 8·97 inches against an average of 11·93 inches, and some little damage was done by floods. A prolonged drought succeeded, which lasted till the middle of August, during which month 10·05 inches fell against an average of 10·48. This fall saved the *bhadoi* and enabled the raiyats to transplant the rice seedlings, though the operation was later than usual and was not completed till well into September. A third downpour occurred in the middle of September, which was about half the average, viz., 3·70 inches against 7·04. Up to this time the deficiency from the 1st of April was 7·28 inches, and not much harm would have been done had seasonable rain followed in October, but as a matter of fact not a drop has fallen since the 18th September, instead of the usual allowance of 3·25 in October, and by the end of that month the deficiency amounted to 10·53 inches or 25·53 per cent. of the average.

6. The result is that the *bhadoi* has been a short crop of 10 annas, the rice is estimated at 9 annas, and fears are entertained for the *rabi*. There is nothing in these figures to suggest scarcity in the district as a whole, and if sufficient rain falls during the cold weather months, the outturn of the *rabi* may be better than the Collector expects, although he reports that the area sown is a good deal below the average. In 1873-74 a rainfall of 1·99 inches in the first three months of the calendar year 1874 produced what was estimated at 16 annas, or a full average crop of *rabi*. The crop where sown is said to be germinating freely everywhere, much of the land has been irrigated before sowing, and many temporary wells are said to have been made.

7. But though the crop outturn is not very bad, the sudden rise of prices to famine rates introduces a grave element into the situation. A good deal of excitement was felt in the first week of October, and prices oscillated considerably, but exportation has ceased to a great extent, and prices have now steadied down. I give in the margin the prices of food-grains in Patna on the 31st October 1896 and the corresponding date last year.

	1895	1896.
Common rice	... 18½	9
Wheat	.. 18½	8½
Barley	.. 28	11
Gram	.. 21	11
Arhar	... 20	11½

8. *Area and population likely to be affected.*—Certain parts of the district, however, are worse than the average. These are—

- (a) The Islampur thana in the south-west of the Bihar subdivision (area 117 square miles, population 81,401).
- (b) The high strip of land along the north of the district, especially parts of the Barh subdivision.

The tract first mentioned contains a good deal of poor sandy soil. It stands high and has few wells; *bhadoi* is little grown; the rice has been a failure, amounting only to 4 annas, and the absence of rain greatly jeopardises the *rabi* crops. The second tract is also high: its *bhadoi* has been poor, and it depends chiefly on its *rabi*. Further particulars are not given; they will be supplied in a later report. On the whole it may be said that a rural population of about 600,000 will be earliest affected by the failure of the crops besides the urban population of the district, since it is upon them that the stress of high prices falls most severely. Their number under Mr. O'Donnell's average of 6·5 per cent. on the whole population comes to 115,263. The total is 715,263, and this is the population, which we may expect to be affected within the next few months, whatever the result of the *rabi* may be. But it is not to be supposed that the whole will require aid. It is stated in the Report of the Famine Commission, Part III, pages 106, 107, that in the famine of 1868-69 in the North-Western Provinces, the largest number that Government ever had to relieve was 13 per cent. of the population for a short time, and 3·9 per cent. for a continuance, and that was only in one exceptional district; in the same report, Part I page 35, it is stated that in Bengal in 1873-74 the highest number in receipt of direct relief at any one time was 20 per cent., and the average about 10 per cent. for nine months. Looking at these figures and remembering that distress is always less acute at first, it seems to me that an estimate of 5 per cent. on the total would be a liberal estimate of the numbers to be provided for during the next few months, partly by charitable relief and partly on relief works. The nett result is 35·763.

9. *Communications*.—As regards communications, the district is most favourably situated: the East Indian Railway runs through its northern thanas from end to end, the Patna-Gaya Railway intersects the Sadar subdivision from north to south, the Sone Canal skirts the whole of its western border, and the Ganges, with a large boat traffic, bounds it on the north. Besides all this, it is well supplied with roads, the mileage being 1,212 on the 31st March 1896. Islampur is connected with Gaya, and with Patna on the East Indian Railway (28 miles) by a first class district road. In the matter of cross-roads it is rather badly off, but every village in the thana, and indeed in the whole district, can be reached by pack-bullocks, which are numerous and largely used.

10. *Grain stocks*.—In the matter of grain stocks no very definite information is available, but the Collector reports that they are said to be ample: the *bhaoh* system prevails largely over the whole of the south of the district, and it is believed that some zamindars have considerable stocks, while every raiyat has something. Exportation is said to have ceased. This question will be more fully discussed in subsequent reports.

11. *Sources of food supply*.—The remarks in paragraph 8 above will show that grain can be imported by rail, road, canal and river, and can be distributed by pack bullocks everywhere. There are many large bazaars and marts, and Patna itself is a great grain emporium. Probably no district in the division offers so many facilities for private trade or is so well protected against exhaustion.

12. *Proposed measures of relief*.—So far the Collector is of opinion that the necessity of relief works has not been proved. Early in October, when the sudden rise of prices caused by the assured failure of the Hathiya rains, and the exportation of grain to the North-Western Provinces, caused a panic in the large towns, test relief works were opened at Patna and in various places in the north of the district, but these were not largely attended and were soon closed. The Collector now proposes to open test works once more from the 16th instant at eight places in the north of the district, and also one at Islampur. These will afford employment to 1,676 persons for 90 days. If it is found that work is really needed, they will be promptly expanded and others started. Meanwhile the scheme of works submitted annually under rule 5 of the Famine Code is being carefully revised, and work will be started as the need arises. The Collector at my request is mapping out the whole district into relief circles, which will, however, not be manned till the proper time comes. Private Committees for the relief of the indigent have been formed in Patna, and in all the chief centres in the north of the district, and loans have been offered to zamindars for the construction and repair of agricultural works, as well as to cultivators for temporary wells.

13. *Estimate of expenditure*.—At this stage it seems absolutely impossible to form any definite estimate of what will be required, as so much depends on the outturn of the *rabi*, and the progress of prices. The District Board have, however, revised their budget, and have put a stop to all but unavoidable

expenditure. By this means they have now available a sum of Rs. 25,000, including the estimated receipts up to the end of December, and a further sum of Rs. 25,000 will be available during the first three months of 1897. The Collector's letter, however, is not quite clear on this point, and these figures will probably be modified. From the commencement of the financial year 1897-98, the District Board expect a large increase of revenue. An application is being separately made for an increase to the grant for advances under the Agricultural Loans Act, and the Land Improvement Act.

14. *Remissions or suspension of revenue*.—Nothing of the sort is required at present.

15. *Additional establishment*.—None is at present needed, but the Collector expects, if scarcity increases, that he will require three or four officers to take charge of circles, and some increase will be inevitable in the number of kanungos and ministerial officers.

16. *Conclusion*.—The condition of the district gives cause for no immediate anxiety. The first need here, as elsewhere, is a careful investigation of the state of towns and large villages, where the unusually high price of grain will first be felt by the non-agricultural population. I am drawing the special attention of the district officer to this matter.

17. *GAYA*.—[Area 4,712 square miles, population 2,138,343.] The district is very diverse in character: the north and west partake of the character of the Gangetic plain, while the south is hilly and jungly, and the Nawada subdivision on the east combines both these characteristics. The district is intersected with numerous streams flowing from the Chota Nagpur plateau, and these are largely used for the conservation of water in reservoirs, whence it is distributed by channels. This system prevails over nearly the whole district, except parts of Jahanabad and the northern areas of Aurangabad. The district is bounded on the west by the Sone river and the higher reaches of the Patna and Gaya Canal, which irrigates in ordinary years about 40,000 acres, and in the present year has irrigated as much as 53,000. The chief crop of the district, as might be expected, is the *kharif*; for out of the whole food crop usually produced in an ordinary year, 65·89 per cent. is rice, 24·47 per cent. is *rabi*, and *bhadoi* is represented by only 9·66 per cent. of the total.

18. *Reasons for apprehending scarcity*.—As in the case of Patna, the Collector of Gaya reports that though the crops are not bad on the whole, the high prices ruling in the bazars justify him in saying that scarcity prevails in his district to some extent. Here as in Patna the rainfall was scanty, and ceased early. During April and May only 0·27 of an inch fell, against an average of 2·02. In June the rain was late and heavy, being 8·34 inches against an average of 5·63. Early in July another downpour followed of 10·44 inches, the total up to date being then only 18ths of an inch below the average. A long drought succeeded, which was followed by 10·91 inches in August, against an average of 11·73, and after another long break, the middle of September gave another fall of 3·93 inches instead of 6·79. No rain has fallen since, and the deficiency to the end of October is 7·34 inches, or 17·8 per cent. These heavy falls alternating with long droughts did less harm in Gaya than they would have done elsewhere, for the water was carefully stored and used as required. Floods caused by heavy rain on the Chota Nagpur plateau did some damage in the Nawadah subdivision at the end of September.

19. The result of these vagaries in the rainfall is an outturn which is estimated by the Collector at 12 annas for the *bhadoi*, 8 annas for the *kharif*, and 7 annas for the *rabi* crop. The whole outturn of the district in an ordinary year is estimated at 2,44,01,000 maunds, and the equivalent of the above proportions, if the usual area has been sown this year, is as follows:—*Bhadoi* 17,88,000 maunds, *kharif* 81,22,000 maunds, and *rabi* 44,79,000 maunds. The total is 1,43,89,000 maunds, which corresponds to 68·96 per cent. of an average crop.

20. These figures, as in Patna, give no cause for present anxiety, but that is unfortunately supplied, as indeed it is throughout the Division, by the early rise of prices to famine rates. I give in the margin the prices quoted at the Sadar station on the 31st October last, and the price of common rice on the corresponding date in 1895, which is the only grain mentioned in the return. Prices at the subdivisions are a trifle easier.

	1895.	1896.
Common rice	14	8·4
Wheat	...	8
Barley	...	11
Makai	...	11·2
Gram	...	10·2
Arhar	...	10·4
Marua	...	13·4

21. It is clear, as Mr. Savage observes, that "persons of the wage-earning class who receive their wages in money must find their means of livelihood seriously curtailed." To these I would add all persons on fixed incomes and all those who depend on charity; all those in fact catalogued in paragraph 109 of the Famine Commission Report, Part I. But here as elsewhere work in the fields is still plentiful, and as this is always paid chiefly in coarse grain, the daily labourer does not at present feel the high prices any more than the agriculturist who is living on his own stocks. There is no increase either in vagrancy or crime, and there are no signs of emaciation or distress anywhere.

22. *Area and population likely to be affected.*—But while the above paragraphs supply a satisfactory report on the general condition of the district, there are spots where the people are not so well off, because the rainfall has been scanty and the system of reservoirs is incomplete, or the land too high, so that there has been a more or less complete failure of the kharif crop. Three such tracts are marked by the Collector and are described as follows:—

- (a) the northern portion of the Jahanabad subdivision round the sub-divisional head-quarters;
- (b) the portion of the Sherghatti thana which lies to the south of the Grand Trunk Road; and
- (c) A tract in the north-east of the Aurangabad subdivision between Aurangabad and Goh.

In the former of these tracts the area is about 100 square miles, and the population 65,000. The *kharif* crop here is placed at 2 annas only. In the second tract the area is much larger, being about 350 square miles, but it is hilly and is thinly populated, and the population is about 72,000. The crop here is expected to be about the same, *i.e.*, 2 annas. The third tract comprises an area of about 150 square miles with a population of 63,000, and here the rice is estimated at 5 annas. I also add the urban population, which at 6·5 per cent. of the whole population of the district comes to 139,291. The whole population to be first affected, therefore, comes to 339,291, and the area to 600 square miles. Taking 5 per cent. of the above total the number for whom some sort of relief may be necessary during the next few months is 16,645.

23. *Communications.*—The Gaya district itself is well supplied with communications. The Patna-Gaya Railway runs from Gaya to its northern boundary, about 40 miles; the Grand Trunk Road runs along through its southern thanas for about 70 miles; the Patna-Gaya canal passes along its western boundary for about 40 miles; and the mileage of roads on the 31st March 1896 was as follows:—district roads 849 miles, village roads 551 miles, total 1,403 miles. In the affected tracts also communication is ample. Through the Jahanabad area runs the Patna-Gaya Railway, and from Jahanabad itself unmetalled roads, passable at all times of the year, though heavy in the rains, radiate in all directions. To the Sherghatti tract there are two good roads from Gaya, and the Grand Trunk Road runs along its northern limit, but in the tract itself there is only one road which the Collector proposes to raise as a relief work. To and through the Aurangabad tract runs a good unmetalled road fully bridged except at the big rivers, and from the centre of the tract (Rafingunge) radiate two fair-weather roads—one northward to Goh and the other westward to Okh. Means of communication are therefore ample and good till rain falls.

24. *Grain-stocks.*—The Collector reports that every zamindar and every well-to-do raiyat has his *golah*. Exportation has stopped, and his information is that stocks are now everywhere held up partly for consumption and partly for sale when prices rise higher still. This was the experience of 1873-74, when in a year very similar to the present the stocks of the people enabled them to maintain themselves till the *rabi* was reaped, and again till the *bhadoi* harvest came in. A lakh and a half of maunds of grain were forced upon the Gaya officials, of whom I was one, but of this amount only 11,000 maunds were expended on relief in various forms, 50,000 maunds were sold, and the remainder was distributed to other districts, or returned to Patna.

25. *Sources of food-supply.*—Mr. Savage says that if a fair *rabi* crop is reaped, the grain, together with that of the *kharif*, added to the stocks already in hand, will enable the district to support itself without special importation. The matter will be further examined below. If importation has to be resorted to, it will no doubt be carried out by private enterprise along the lines of communication indicated above. Jahanabad, Sherghatti and Rafingunge are all large villages with considerable grain marts.

26. *Proposed measures of relief.*—The Collector reports that exhaustive enquiries in every part of the district have satisfied him that there is no demand whatever for relief works at present, and in this view I entirely concur. There is plenty of field work to be had, which will carry on the labouring population till the South Bihar Railway breaks ground along a line from Baroon to Gaya, which will pass through Rafigunge, and will supply work for 10,000 able-bodied men for at least six months. Should the necessity for other relief works arise, however, the Collector has arranged to open as test works the various feeder roads to the railway, which will provide for the Rafigunge tract, and in the Sherghatti and Jahanabad tracts to start work on the Sherghatti-Imamgunge and Jahanabad-Dharawat roads, which will supply all the work that is needed. If, contrary to all expectations, distress deepens, other railway feeder roads will be opened, and the scheme submitted under section 5 of the Famine Code will be utilised. This programme seems to me to be fully sufficient. In anticipation of their being required at some future date, the Collector has mapped out his district into 14 relief circles, each circle comprising a thana, but he has so far only appointed circle officers to the three circles in which distress may possibly occur: moreover, they are at present engaged on famine work in addition to their ordinary duties.

27. *Estimate of expenditure.*—The Gaya District Board has as requested revised its budgets for 1896-97 and 1897-98. For the current year it has diverted Rs 15,850 from various masonry works, and will also have at its disposal the estimated closing balance of Rs. 36,000, or Rs. 51,850 in all. For expenditure, if need be, in the early months of 1897-98 it has set aside Rs. 60,000, so that it has practically provided more than a lakh of rupees to meet the demands of the next eight or nine months. I consider the sum ample for the present at any rate.

28. *Conclusion.*—The condition of the Gaya district is the best in the Division. The Nawada subdivision seems to be absolutely safe, and the doubtful areas in the other subdivisions are small and easily accessible. Here as elsewhere prices are already very high, and certain classes will feel the pinch this year much earlier than they have in former years of scarcity. As regards the agricultural population there is little to fear. The daily labourers will find employment on the South Bihar Railway, which runs right through the district, while it is almost certain the zamindars and the better class of cultivators will have sufficient stocks to carry them on till the *bhadoi* crop of 1897. The *bhaoli* system which prevails over so large a portion of the district directly tends to the hoarding of grain, and, in a year like the present, both landlord and tenant will reap large profits from the sale of surplus grain. For these reasons I have no fears for Gaya.

29. *SHAHABAD.*—[Area 4,375 square miles, population 2,063,927.] Like the district of Gaya the large district of Shahabad is divided into clearly defined tracts. In the south there is a large area of hill and forest thinly inhabited, while the central and northern portions of the district are fully cultivated, and carry a numerous population. On the north the district is bounded by the Gauges, and on the east by the Sone, while the Arrah Canal running along the bank of that river irrigates 475,000 acres with a perfect net-work of distributaries and village channels. Its operations cover the greater part of the Sasaram subdivision, all the south of the Buxar subdivision, and much of the Sadar subdivision, but only a small corner of the Bhabua subdivision is reached. The main crop of the district is the *rabi*; for out of the whole outturn of the district in ordinary years 48·11 per cent. is *rabi*, 44·27 per cent. is *kharif*, and only 7·60 per cent. *bhadoi*. Consequently the failure or success of the *bhadoi* is, comparatively speaking, a matter of little moment. The *kharif* is grown mostly in the neighbourhood of the canals and in the south of the district, while the Sadar subdivision, and the high land to the north along which the line of the East Indian Railway is carried, is chiefly devoted to *rabi*.

30. *Reasons for apprehending scarcity.*—The rainfall in the Shahabad district was more deficient than in either Gaya or Patna, and was equally capricious, but the feature of the season was fair rain up till the end of August, and then a great deficiency in September. Here as in other Bihar districts the monsoon was very late: there was heavy rain early in July, then a long break till the middle of August, and a second lasting till the middle of September; but whereas up to the end of August the deficiency was only 7·09 inches, in September the rainfall was only 2·30 inches against an average

of 7·07. No rain has fallen since the middle of that month, and the total deficiency to the end of October is 10·30, which is equivalent to 25·84 per cent. of the normal fall. This explains at once why the estimated outturn of the crops is as low as the Collector anticipates in spite of the efforts of the Sone Canal officers.

31. The crops resulting from these meteorological conditions are estimated by the Collector as follows:—*Bhadai* 7½ annas, *kharif* 3 annas, and *rabi* 11½ annas. In 1873-74, with exactly similar conditions during August, September, and October, the *kharif* was found to be only a 2-anna crop and the *bhadai* 4 annas; but it is to be remembered that in that year the canals were not yet at work, and that damage was done by an abnormal fall of 16·79 inches in July. The whole outturn of the district in an ordinary year is 2,07,73,000 maunds, and the above estimates expressed in maunds and calculated on the areas cultivated, with the *rabi* estimate raised to 12 annas, work out as follows:—*Bhadai* 9,29,000, *kharif* 24,06,000, *rabi* 1,07,43,000, giving a total of 1,40,78,000 maunds as the produce of the district, which is equivalent to 47·28 per cent. of the produce of an ordinary year.

32. These figures, as has already been remarked in the case of Patna and Gaya, need cause no immediate anxiety for the district as a whole, but unhappily here as elsewhere famine prices have already appeared, and one part of the district is a good deal worse than the rest. As has been reported in a previous letter, prices rose very rapidly at the beginning of October, and a grain riot was apprehended. Exportation, which had been very considerable from Arrah and Buxar was temporarily stopped at Arrah, but has since been carried on till it ceased from natural causes, and prices have now settled down. I give in the margin for convenience of reference the prices of the principal food-grains at Arrah on the 1st November 1896 and on the corresponding day in 1895.

33. *Area and population likely to be affected.*—The figures just quoted show clearly enough that the urban population, and all those who have fixed incomes or are paid in cash must be greatly pinched. Following the calculation adopted in the case of other districts, I take the non-agricultural population likely to be affected to be 134,155. Besides these there is the population of the Bhabua subdivision, in which is the area referred to above as being in worse case than the rest of the district. The area of this tract is 1,301 square miles, and the population 344,902. The Collector reports that the whole of them are affected, and I accept the statement in the sense that this area will first require relief works. Five per cent. of the sum of these two totals is 23,952.

34. *Communications.*—The Shahabad district is not so well off in this respect as the other two districts of South Bihar, but there is no great cause for complaint. The Ganges bounds it on the north, and the East Indian Railway runs along its northern boundary for 60 miles. The Arrah Canal leaving the Sone at Dehree runs up to Arrah (60 miles), while other large branches diverge to Buxar and elsewhere. Lastly, the Grand Trunk Road traverses it from south-east to north-west, and the whole district is well supplied with District Board and village roads, the mileage of which reaches a total of 1,855 miles. One-third of the area of the Bhabua subdivision, which is the affected tract, is covered with hill and forest and very thinly populated; the remainder is well supplied with communications. Besides the Grand Trunk Road, which runs through the centre of it for about 30 miles, there are 3 metalled roads and 35 unmetalled roads. All these roads are passable until the rains set in, and some of them can be used even after that. Many of them will be raised and levelled as relief works during the current season if the need arises.

35. *Grain-stocks.*—As elsewhere the Collector reports that grain-stocks are said to be abundant, and I have every reason to believe that he is right. Sales to brokers have stopped, and not only the dealers, but the zamindars and cultivators are said to be holding up their stocks for consumption or for sale at higher prices later in the year. There is a considerable *bhaoli* area in this district on the south and west, and hence, as stated in paragraph 28 above, it is believed that the habit of hoarding grain is well established and largely followed.

36. *Sources of food-supply.*—Should necessity arise, grain can be poured into the district by all the means of communication noted above, and into the Bhabua subdivision from Zamania on the East Indian Railway (30 miles), from Dehree on the canal, through Sasaram, up the Grand Trunk Road, and by many cross-country roads from local marts in the Sadar and Sasaram subdivisions where grain is cheaper and more plentiful. Meanwhile, the Collector has arranged with two important local grain-dealers to open markets near the test relief works to be mentioned in the next paragraph. These markets are reported to be in full swing and will meet all the requirements of the case for the present.

37. *Proposed measures of relief.*—In paragraph 12 of my letter of the 23rd October, I have already reported that test relief works were required in the south and east of the Bhabua subdivision. In accordance with my request, the Collector proceeded to the subdivisional head-quarters, and remained there till all arrangements were completed. The work, which consists of repairing, raising and levelling existing unmetalled roads, has been commenced in five places, viz.—

- (1) Bhabua to Jahanabad (7 miles east).
- (2) Bhabua to the Karamnasa river (20 miles west and north-west).
- (3) Durgauti to Hata (12 miles south) (Durgauti is on the Grand Trunk Road).
- (4) Mahania to Panjraon (17 miles north and north-west).
- (5) Bhagwanpur to Rajghat (12 miles south).

Work was commenced on the 21st October, and a return in Form 19 of the Famine Code is appended, showing the numbers employed and other particulars.

21st October	13
22nd "	57
23rd "	316
24th "	312
25th "	981
26th "	808
27th "	1,159
28th "	792
29th "	1,478
30th "	1,289
31st "	766

The daily figures are given in the margin: on the first day only one work was opened: there were two open on the 22nd and 23rd, and after that date three were open. The work should not have remained open on the 25th, Sunday, and the sudden fall on the 24th and 31st requires explanation, which has been asked for. Mr. Egerton commenced by paying rates calculated under section 103 of the

Famine Code, and the task set is that calculated by Mr. King (*vide* Appendix IV, page 80 of the Famine Code). A man and woman working together have to cut 100 cubic feet of earth with a 50-foot lead, the woman doing the carrying and a child assisting. The rate of wage in Government pice is man 6, woman 5, big child 3. This rate was based on a price-current of 1.1 seers to the rupee, but rice was selling at Bhabua on the 2nd instant at $7\frac{1}{2}$ seers. Mr. Egerton reported that this rate worked out to Rs 2-4 per 1,000 cubic feet, whereas the District Board rate is Re. 1-12 for piece-work, and the Railway authorities were offering only Re. 1-8, which has since been raised to Re. 1-12. I accordingly telegraphed to him to reduce his rate and to introduce calculations under section 104, though it is to be observed that the rise in price has considerably reduced the value of the money wage. These changes have been carried out since the 1st November, and the District Engineer, Mr. Edwards, who was on leave when the work was first opened, has returned and proceeded to Bhabua. The labourers are reported to be in good case, but there are a good number of B class men, as the annexed statement (Appendix A) will show. Further particulars will be given in my next report; meanwhile the Lieutenant-Governor may rest assured that these relief works will in no case be allowed to compete with those of the Moghalserai-Gaya Railway.

38. This work, which will supply many thousands of labourers with employment all through the cold weather, forms a splendid natural relief work, and will be of the greatest assistance to the people in the Bhabua and Sasaram subdivisions. It runs from Khajura on the Karamnasa to Dehree on the Sone, following generally the line of the Grand Trunk Road. I have been in telegraphic communication with the Collector and the Resident Engineer, and have arranged that without waiting for the usual formalities work is to be started in several places, where this can be done without objection. This has already been done, and I fully expect that all the professional and able-bodied labourers will be drawn away from our test works and find employment on the railway.

39. The Collector has increased the allotment of the Subdivisional Officer, Bhabua, for advances, and loans for wells are being freely given. A Deputy Collector and a Khag Mahal Tahsildar have been deputed to assist the Subdivisional Officer. Mr. Egerton has also applied for sanction to start some agricultural improvements in the Government estates in the Bhabua subdivision, and has placed Rs. 500 in the hands of the District Superintendent of Police for use under section 12 of the Code.

40. *Estimate of Expenditure.*—The Collector finds that he cannot at present make any confident estimate of expenditure, and I agree with him. It is impossible at this moment to estimate even the numbers who will seek our relief works, as the effect of the opening of the railway work has yet to be noted. By revision of the District Board budget Rs. 20,000 have been saved for the current year, besides the estimated closing balance of about the same sum. For the early months of 1897-98 the Board has provided Rs. 55,000 out of the Civil Works budget without touching the other heads. These sums seem quite sufficient for the present. The Collector has addressed all the leading zamindars of the district on the subject of organising private charity and giving advances and remissions to their raiyats. No response has been received so far.

41. *Suspension of Government revenue.*—This is not recommended at present, but, with my sanction, the Collector has for the time being suspended the collection of rents from the raiyats in the Government estates in Bhabua, and has postponed all certificates except those which would be time-barred by the operation. These latter will be carefully looked into one by one.

42. *Additional establishment.*—No confident estimate can be given, but the Collector has been a good deal hampered by the transfer of two Deputy Collectors and a Sub-Deputy Collector. If settlement operations in Bihar are suspended some of these should be posted to the district again; meanwhile the services of Mr. Ryan, Assistant District Superintendent, will be utilised in both the Sasaram and Bhabua subdivisions.

43. *Conclusion.*—With a good *rabi* crop Shahabad will do well enough. The Bhabua subdivision will require to be carefully watched, but I expect great things from the commencement of the Moghalserai-Gaya Railway.

44. SARAN.—[Area 2,651 square miles, population 2,466,065.] The Saran district is the most densely populated and the most closely cultivated district in the Patna Division. It contains practically no waste land, and is a fertile *doab* of rich alluvial soil washed on three sides by the Gogra, the Ganges, and the Gandak. It possesses a so-called system of canals which are of little practical value, but its surface is pitted with innumerable wells, and it is cultivated by the most adroit agriculturists in the whole of Bihar. Unlike other districts which depend on one, or perhaps two, harvests, and stand or fall by them, the crops of Saran are almost equally divided among the three great harvests of the year, so that it is practically impossible for it to lose its whole crop. The area cultivated with food crops in an ordinary year is appropriated as follows:—*Bhadoi* 37·5 per cent., *kharif* 25·5 per cent., and *rabi* 37·4 per cent., while the normal outturn is thus divided:—*Bhadoi* 31·5 per cent., *kharif* 30·11 per cent., and *rabi* 38·28 per cent.

45. *Reasons for apprehending scarcity.*—The rainfall in Saran during the current year has been unusually short, the total according to the published returns being only 22·32 from 1st April to 1st November in place of a normal fall of 42·80. The rains commenced late in June and from the first were insufficient, the monsoon current which came up from the east seeming to be exhausted before it reached Saran, and two long periods of drought in August and September occurred here also as elsewhere. In June the fall was 2·68 against 6·42; in July the fall was 3½ inches short, and in August the deficiency was an inch and a half; but worse was to come, for in September only 1·28 inches fell against an average of 7·45, and none has fallen since the middle of that month. Thus the three asterisms of the *Hathiya*, *Chitra*, and *Srivati*, which are the most important in the whole agricultural year, have passed without a drop of rain in this district. The total deficiency is equivalent to 47·85 of the normal fall.

46. A glance at the above figures will show that they must mean a considerable failure of the *bhadoi*, a great deficiency of the *kharif*, and very poor prospects for the *rabi*. Accordingly the Collector's estimate for the two former

is as follows:—*Bhadoi* 6 annas and *kharij* 3 annas, while he hazards no speculation for the *rabi*, since so much depends on the rainfall during the current month, and again in the first three months of 1897. In 1873-74 the total rainfall from 1st April to 1st November was half as much again as in the present year, viz., 32.02 inches, but the conditions in September and October were practically the same: if we may assume that the fate of the *rabi* will be the same as in that year, then we may expect an 8-anna crop. Taking this as my standpoint and expressing the result in maunds, the outturn will be as follows, viz.:—*Bhadoi* 21,17,000, *kharij* 10,74,000, and *rabi* 34,39,000—total 66,30,000. In an ordinary year the figures are—*Bhadoi* 56,45,000, *kharij* 53,95,000, and *rabi* 68,78,000—total 1,79,18,000 maunds. The total outturn will therefore be only 37 per cent. of that in an average year.

47. These figures suggest a serious failure of the food-supply of the district, but for reasons which I will explain below, they would give me little concern but for the fact that the situation is complicated by the extraordinary high price of grain. This has been caused here, as elsewhere, by exportation,

	1895.	1896
Common rice	17 8	9
Makai	25 8	12
Maize	...	14
Wheat	...	8 8
Gram	...	11

the natural result of improved communications and of greater distress elsewhere. The figures in the margin show the price of the ordinary grains on the 1st November 1896 and the same date in 1895.

Obviously here as elsewhere, all but those who are paid in grain, or who live on their own stocks, must be much pinched already, but the Collector reports that all persons are unanimous in saying that no general inconvenience need be expected till after the beginning of December, since the *bhadoi* crop is still in hand, and there is ample employment available for cultivators and field labourers in the irrigation and preparation of lands for the *rabi* crop.

48. *Area and population likely to be affected.*—Bearing the above considerations in mind, the Collector has reported that the whole district will be affected. Strictly speaking, this is true, but I do not think that it was the intention of the framers of the Famine Code that the expression should be taken so literally, and I prefer to confine the estimate of distress to the urban population and that of certain tracts where the crops have been particularly bad. These tracts are the thanas of Mirganj, Gopalganj, and Darauli, the gross area of which is 1,046 square miles, and their population 860,670, but I cannot think that the whole of these thanas are in bad case, and we shall, I think, be near the truth if we divide the figures by 2. The urban population taken at 29 per cent.; Mr. O'Donnell's ascertained ratio for North Bihar, comes to 71,515, and if we add this total to half that of the abovenamed thanas, we get a grand total of 501,850 persons who are likely to be the earliest affected. Five per cent. of this total gives 25,092 persons who may require relief during the next few months.

49. *Communications.*—Saran is amply supplied with means of communication. On three sides it has the great waterways of the Gogra, the Ganges, and the Gandak. The Bengal and North-Western Railway traverses it for 84 miles from south-east to north-west, and it possesses a more complete reticulation of roads than any other district in Bihar. There are 66 main roads with a total length of 976 miles (of which 118 are metalled), and besides this 470 so-called village roads with a mileage of 1,705, many of which are of great importance. All these roads can be used with effect till the rain falls, and many of them can be used throughout the year. The tracts likely to be first affected are well supplied with roads, and pack-bullocks are numerous and good. The railway runs past the northern boundary of the Darauli thana, and from the important station of Siwan grain can be easily and rapidly transported to any part of Mirganj and Gopalganj.

50. *Grain-stocks.*—The Collector of Saran is no more able to give a confident opinion on this point than his brother officers. He has ordered detailed enquiries to be made, and in the meantime reports that there are said to be sufficient quantities in hand for present needs. In this opinion I fully concur, and I would go further and say that I have no doubt that however high prices may rise, Saran will always have grain for those who have the money to buy it.

51. My reasons for this belief are many. In the first place the Saran raiyat is notoriously capable, and he may be trusted, before any man in Bihar, to keep by him what he considers a fair supply of grain. But even in

ordinary years this supply is not nearly enough to feed the whole of the teeming population of Saran, and the result is that there is always a large importation of food-grains. Thus it follows that the habit of importation is of old standing, and all that is necessary—provided that grain can be procured elsewhere at a remunerative price—is for the dealer to extend his operations: there is no question of establishing a new trade, and development is all that is required. Moreover, it is particularly noted in the accounts of the relief operations of 1873-74 that Saran was preserved by the extraordinary activity of its private trade. Lastly, it is probable that more money is poured into Saran than into any other district in the Division. The average annual payments of the Opium Department are very large, as are the sums paid out in the cultivation and manufacture of indigo, while lastly the vast numbers of Saran emigrants remit and bring home sums of money, which those who are unacquainted with the district find it difficult to accept. In a memorandum which was published in the *Calcutta Gazette* of the 10th December 1890, I pointed out that the value of money-orders paid in Saran from other districts, which were nearly all in small sums, and almost certainly family remittances, was nearly 10½ lakhs of rupees, and it is believed that each emigrant brings back twice as much as he sends home. In 1893-94, according to Mr. Slack, the Collector, the amount so paid was Rs. 13,33,450, and in 1894-95 it was Rs. 16,42,900, a very moderate estimate would therefore place the amount annually sent and brought home by Saran emigrants at 30 lakhs of rupees every year.

52. *Sources of food-supply.*—The district generally can be easily and effectively supplied by rail and river, and what has been said above in respect of communications will show that internal distribution is easy. These remarks apply to the affected tracts equally with the rest of the district. Revilganj on the Gogra, 7 miles from Chapra, is a famous grain mart, and is now connected with the Bengal and North-Western Railway.

53. *Proposed measures of relief.*—Mr. Earle has gone very fully into this subject. After consulting the District Board he has decided to open experimentally, under the Famine Code, a few small test works which comprise the improvement of three roads in the Gopalganj subdivision and the construction of a new road in the Siwan subdivision, across the only part of the Darauli thana which is not yet completely supplied. It is not expected that the experiment will prove the necessity of opening regular relief works, but should this be so, a second list has been prepared to which effect can be given at once. Another work proposed is the quarrying of *kankar* for a two or three years supply: others of a less practical character it is unnecessary to mention. The authorized programme of relief works includes works under Public Works agency of which the cost is estimated at Rs. 80,722, but sanction to these has not been received: it would be well if this could be accorded without delay. Lastly, the authorities of the Bengal and North-Western Railway report that they are prepared to spend Rs. 30,000 on earthwork in the Saran district, partly in constructing the line from Revilganj to Manjhi (seven miles), and partly in petty works. In conclusion, as the Lieutenant-Governor is well aware, the Saran Canals have been thrown open, and every effort is being made to send as much water down them as possible into one of the canals, viz., the river Dolia. Some water passed as early as the first week of this month.

54. No meetings for collecting subscriptions or organising charitable relief are spoken of, but there is no doubt that these will be called in due course. The late Maharaja of Hatwah expressed his intention of undertaking the assistance of the raiyats throughout his estates, and the Court of Wards will doubtless do what is needed.

55. *Estimate of expenditure.*—Mr. Earle hesitates to offer any definite estimate of expenditure, as the magnitude of the crisis is still a matter of pure speculation; but the District Board budget has been pruned down in accordance with the principles of the Famine Code and the instructions of Government, so as to provide an allotment of Rs. 78,000 in the current year, including the estimated closing balance, and arrangements have been made to make available Rs. 80,000 out of the budget of 1897-98 in the first few months of that year. The provision is ample for the present.

56. *Conclusion.*—For all the reasons stated above, I consider that Saran is in no real danger at present. The urban and non-agricultural population here, as everywhere, will feel the pressure of high prices, and it is to them that attention must first be turned; but remembering the fact that the district grows three crops in something like equal proportion, that its agriculturists are resourceful and adroit above the general average, that the supply and distribution of food-grains in almost any quantity over its numerous roads is well understood, and lastly, that an unusually large number of emigrants has left the district this year at an unusually early date, so that not only will there be fewer mouths to feed but more money than usual to be sent home this year, I feel no anxiety for Saran, except in the improbable event of a total failure of the *rabi*.

57. CHAMPARAN —[Area 3,531 square miles, population 1,859,465.] The Champaran district is the westernmost of those north of the Ganges, and has all the characteristics of a sub-Himalayan tract. It is bounded on the west (with the exception of one outlying thana) by the river Gandak, on the north by the Nepal frontier, and on the south and east by the Munger district. The eastern and southern portions are rich and fertile, but its northern and western thanas contain a large proportion of hill and jungle, and are thinly populated: the climate is humid, lakes and streams abound, and the normal rainfall (49·85 inches) is higher than that of any other district in the Division. The chief crops of the district are the *bhadoi* and *kharif*, and the *rabi* is of comparatively little importance. Out of the area cultivated in an ordinary year, 41 per cent. is devoted to *bhadoi*, 39 per cent. to *kharif*, and 19·9 per cent. to *rabi*. In the matter of outturn these proportions are somewhat varied, for the *kharif* stands at 43·92 per cent., *bhadoi* at 35·04 per cent., and *rabi* at 21·02.

58. *Reasons for apprehending scarcity.*—The rainfall at Motihari, the headquarters station of the district, was of much the same character as in other districts of the Division. The monsoon commenced late (25th June), and was 4 inches below the average of that month. In July there was not much to complain of, but in August the deficiency was 2½ inches, and the total deficit up to that time was 9·47 inches. This was bad enough, but the September rainfall was even more disappointing. This district usually receives 9·30 inches of rain in September and 3·54 in October—total 12·84, but in the present year there fell only 2·35 inches in September, of which almost all fell in the first week. No rain at all fell in October. To this cause principally, and also to the long droughts from the middle of July to the middle of August, and again from the middle of August to the beginning of September, is to be attributed the bad outturn of the *bhadoi* and *kharif* crops and the poor prospects of the *rabi*. The total deficiency of the year is 19·96 inches, or 41·67 per cent. In this respect Champaran stands second only to Saran. The Collector estimates the *bhadoi* at about 8 and the *kharif* at 3 annas, and has made no estimate of the *rabi* outturn yet, but the unusually early cessation of the rains and the prevalence of west winds give cause for serious apprehension. In the north of the district a good deal of irrigation is done from hill streams which are dammed for the purpose, but in the south of the district irrigation is not practised. Mr. Macpherson reports that *rabi* sowing can without disadvantage be postponed till the 20th November, if a good shower falls before that time. At present there are no signs of such an event, and the chances against it are very great.

59. In Statement D appended to this report I have calculated that on the Collector's first estimate of 8½ annas for the *bhadoi* and 3½ annas for the *kharif*, the outturn of these crops in Champaran will be 36,66,000 maunds and 15,31,000 maunds, respectively, as against a normal outturn of 67,52,000 maunds of *bhadoi* and 84,63,000 maunds of *kharif*. The totals are 51,97,000 and 1,52,15,000, which give an outturn of only 34·15 per cent. on the normal food-crop. If, as has been done elsewhere in the report, we assume that the *rabi* crop will be much what it was in 1874, viz., 8 annas, then the whole outturn will be 73,77,000 maunds against an average of 1,92,66,000, or only 37·48 of the ordinary outturn of the district.

60. Moreover, the Collector reports that prices are high, as elsewhere, and that the non-agricultural population and those who are not paid in grain, or who have no stocks of their own, are already beginning to feel the effect of

the rise. Mr Macpherson reports that in Champaran the daily labourers are beginning to be in want. The failure of the rain means that the area sown with *rabi* will be contracted, and therefore the demand for field labour: in other districts the active irrigation which is going on makes up for this want, but, as has been stated above, over the greater part of Champaran irrigation is not in vogue and the labourers have little or nothing to do. He also adds that two-

	1896	Average
Common rice	10	17
Wheat	9	13½
Barley	12½	21½
Maize	12½	24½
Gram	12	18½

thirds of the raiyati holdings in representative villages prove to be less than 3 acres in extent, so that most of the cultivators are little better off than the daily labourers. The figures in the margin show the present actual price of the common food-grains at Motihari as compared with

their average price in an ordinary year.

Grain has been largely exported from the district of late, but this is believed to have ceased as the holders of grain have now parted with their surplus stock. Prices will probably now remain steady or fluctuate but slowly. The subject will be mentioned again below.

61. *Area and population likely to be affected.*—Obviously all parts of the district are not inconvenienced to the same extent, and the Collector has been at great pains to work out in detail of areas the extent to which each is likely to be distressed; and he has illustrated his report with a map which I will submit with next report. He has based his forecast on the supposition that no rain will fall before the end of the present month to help the *rabi*, and as there seems little hope of that, the scheme of his forecast may be accepted whatever may be said of the anticipated degrees of distress. There are two tracts in which in his opinion relief, whether in the form of work or gratuitous distribution, will be wanted at once. The first of these is a tract of about 430 square miles and a population of 75,850, lying in the north of the Bettiah subdivision, and comprising parts of the thanas of Bagaha and Huidi or Shikarpur). The second is a smaller tract of about 36 square miles in area with a population of 22,400, and it lies to the south of the Sikrana river, about 10 miles to the north-east of Bettiah. The first tract is purely rice land, and both the *bhadoi* and the winter rice have been a failure, except where the latter has been irrigated from hill streams. The second tract grows all kinds of crops; but the *bhadoi* was a 5-anna crop only, the *kharif* has been a total failure, and there is no moisture for the *rabi*. In both these tracts Mr. Macpherson proposes to start test relief works forthwith. The rest of the district he has divided into areas in which he anticipates that relief will be required in three further stages, viz., in December, in February and in April. In some parts relief will not be

Month in which relief will be wanted	Area in square miles	Population.
1	2	3
November 1896	467	177,506
December "	1,385	883,217
February 1897	439	261,665
April "	301	146,904
Not at all "	641	390,157

required at all. I give in the margin a synopsis of his distribution of areas, including that in which relief is wanted at once. The difference between the total area and that mentioned in paragraph 57 above is said to be hill and jungle. He explains further that at the periods mentioned distress will not be acute among all the population in each case,

and it would be perhaps fair to say that 10 per cent. is a reasonable percentage.

62. This estimate I venture to think is somewhat too gloomy. As I understand Mr. Macpherson, he has based it on the assumption that the *rabi* will be a total failure, or nearly so; but for reasons which have been explained elsewhere in this report, I consider that such an event is most unlikely, and I confidently anticipate rainfall and crops similar to those which were recorded in 1874. If I am right in my interpretation of Mr. Macpherson's meaning, he is working on the belief that (as shown in Appendix D below) the crop outturn of the year will be that of the *bhadoi* and *kharif* alone, viz., 51,97,000 maunds, while I anticipate that it will be 72,22,000, including an 8-anna crop of *rabi*. In other words, he has I think considerably over-estimated the probable distress, for not only will the harvesting of the *rabi* employ large numbers in March, but the crop then reaped will feed many of those who, according to his present estimate, will come on our hands during February and April,

and will take off many of the November and December folk. I purposely do not go into his calculations for the future, as they depend upon a contingency which I do not think likely to occur. At present we are immediately concerned with those who, in Mr. Macpherson's opinion, will come on our hands at once in November and December: these amount to 177,506 for nine months (till the end of August) and 883,243 for eight months. Add to these the urban population, which at 2.9 per cent. of the whole district population comes to 53,924. The total is 231,430 for November onwards and 1,114,673 from December onwards. Taking the proportion of 5 per cent. stated in paragraph 8 above, this will give us 12,571 for whom employment is required every day in the present month, and 55,733 in December. The average daily attendance on relief works in 1873 was 561 in November and 4,589 in December. Even if we double these figures to include those on charitable relief, the figures are much smaller than those now estimated.

63. *Communications.*—Champaran is not so well off in this respect as other districts in Bihar, though the Bengal and North-Western Railway runs for about 55 miles through the district from south-east to north-west. The road mileage is 1,359, but the roads are not all in good order. The District Fund is a poor one, and most of the roads being unmetalled they have in so dry a season become very much worn. The northernmost of the two tracts where distress is first anticipated is at a considerable distance from the railway, Ramnagar, the centre of the tract, being 28 miles from Bettiah. The western and north-eastern portions of this area are also decidedly badly off for roads. The other tract is close to Bettiah. However, until the rain falls carts and pack-bullocks can make their way all over both areas.

64. *Grain stocks*—Mr. Macpherson reports that it is extremely difficult to estimate the grain still held in the district, but he judges that the zamindars, banias and larger cultivators have sufficient everywhere to keep them till the next *bhados* is harvested; while the petty cultivators and landless men have enough to keep them till a little beyond the date at which he believes distress will be declared in the various areas he has noted. But he reports that owing to

Periods	Exports Mds	Imports Mds.
From April to August 31st ..	95,379	4,937
September 1st to October 4th ..	19,399	2,882
October 5th to October 31st ..	30,277	997
Total ..	1,45,055	8,816

heavy exports there cannot be much surplus. The figures in the margin give the operations by rail, showing a nett total export of 136,739 maunds. The Collector also reports that during the last two

months grain has been exported largely to Saran and Gorakhpur by road, but he has omitted to notice the imports from Nepal, which from all I can learn were large till they were stopped by order of the authorities. Mr. Macpherson reports that he has been recommending zamindars and planters to buy grain to supply the deficiencies of their tenants and labourers. If possible these purchases will be made elsewhere; but if this cannot be done at a cheaper rate, Mr. Macpherson argues that their purchase locally will prevent the grain from being exported. If there is still a margin, the argument is sound enough; but if all the surplus grain has already been exported, large local operations will have no effect but to raise prices.

65. *Sources of food-supply.*—The railway and the river Gandak will enable food-grain to be landed in the district from other parts of India and from abroad when they are once landed in Calcutta. Mr. Macpherson suggests that Calcutta merchants should be informed of the character and prospects of the crops in Bihar, and of its probable requirements. I believe that this question is now occupying the attention of Government.

66. *Proposed measures of relief.*—The programme of relief works prepared under section 5 of the Code provides for local agency works to employ 175,835 people for 90 days, and there are also works to be carried out by professional agency, to employ 4,434 persons for the same time. The total is 180,269 for three months. Mr. Macpherson has given an elaborate abstract of these works thanna by thana, which it is unnecessary to reproduce here. A proposal has been made also to the District Board by Sir William Hudson, to arrange for the construction of a line from Bairagnia on the extreme north-west corner of Muzaffarpur to Balhar and Bagaha in the Champaran district. The matter is being separately dealt with. If the scheme is sanctioned, the second

length from Balthar to Bagaha would run through the south of the Ramnagar tract mentioned above, but the first length would run through a tract marked as quite safe. It would nevertheless probably attract large numbers of labourers from less favoured tracts. Further than this, Mr. Macpherson has a proposal that the silted up channels which once formed a connection between the Gandak river and the Dhanauti, should be re-excavated and some of the loops in the tortuous course of the latter cut through. This is largely a sanitary and an engineering question, and might perhaps be taken up under the Sanitary Drainage Act hereafter. At present it requires much further consideration before an opinion can be expressed upon it. Lastly, Mr. Macpherson is busy with his District Engineer in looking into the feasibility of introducing into Champaran the Gaya system of *ahars* and *pynes*.

In the sanctioned scheme, work on tanks all over the district is entered as capable of supplying work for 100,000 people for 90 days. Work will at once be started as an experiment on such of these as lie within the two affected areas.

67. *Estimate of expenditure.*—The Collector propounds some alternative calculations, but admits that at this moment they are purely hypothetical, and I do not reproduce them. For the present he has only been able to provide Rs. 50,000 in all: this seems insufficient if distress is so imminent as Mr. Macpherson believes, and I will address him again on the subject. He rightly says that large contributions cannot be expected from the zamindars of the district, as their funds will be fully occupied in protecting their own tenantry; but the Bettiah Raj may be expected to take its proper share in relieving distress, if not with cash, at any rate with grain and employment on works of improvement.

68. *Conclusion.*—Mr. Macpherson asks that the settlement operations may be suspended, and that the officers at present employed in them may be placed at his disposal for relief work. Orders on this subject will no doubt be passed by Government in due course. The collection of land revenue and cesses need not be suspended. This report, though very thorough and careful, has been received so late that I have not had time to examine fully Mr. Macpherson's estimates of area and population affected, or to compare them with the figures of 1873-74. On the whole I think the Collector's view is somewhat too gloomy, but the figures in paragraph 102 and in Appendices C and D show that Champaran has little to expect from its *rabi*, and that even with an 8-anna crop it will have much less than half its usual food-crop. An additional cause of concern is that the raiyats of the district, especially those of the north and west, are inert and wanting in energy and resource, so that they will do little to help themselves.

69. MUZAFFARPUR.—[Area 3,005 square miles, population 2,712,857]. The Muzaffarpur district is bounded on the south by the Ganges, on the north by the Nepal Terai, on the west partly by the rivers Bagmati and Gandak and partly by an imaginary line. On the east such a line is its only boundary. It is an alluvial tract of great fertility, particularly the southern subdivision of Hajipur; it is well watered, and possesses large expanses of swamp and jhil. The chief crop is the *kharif* owing to the great extent of rice cultivation in the Sitamarhi subdivision. Out of the total cultivated area 35·2 per cent. is devoted to *bhadoi*, 36·5 per cent. to *kharif*, and 28·1 per cent. to *rabi*. Of the outturn in an ordinary year the *kharif* represents 45·65 per cent., the *rabi* 30·21 per cent., and the *bhadoi* 24·11 per cent. In respect of the relative proportions of the crops it is not unlike Saran, but one of its weak points is that the rice cultivation is concentrated so much in one part of the district to the exclusion of other crops, that the loss of the *kharif* crop is a heavy calamity over a considerable tract of country, and there are no compensations there to fall back upon.

70. *Reasons for apprehending scarcity.*—The rainfall of the present year was marked in Muzaffarpur by the same general characteristics as are found in the other districts of the Division, but with some special incidents. Rain commenced here not so late as elsewhere, as there was a good fall of 2·09 inches in May. June gave 6·07 inches against a normal fall of 7·42, and this was followed early in July by a heavy fall of 13·61, which caused some floods and filled the swamps at an unusually early date, thus preventing the cultivation of much land from which a crop is usually obtained. Up to the end of July,

Muzaffarpur had a total fall which was only one-tenth of an inch below normal. This heavy rain was followed by a long drought in August, and another in September, and the rainfall of those two months was only 12·41 inches against a normal fall of 19 07. No rain has fallen since the 18th of September, and by the end of October the deficiency amounted to 10·16 inches, leaving a rainfall of only 77·12 per cent. of the average. These facts imply damage to the *bhadoi* from floods, a short area of *bhadoi* and rice from the same cause, some loss of rice from the two periods of prolonged droughts, and very poor prospects of the *rabi*. The Collector's estimate is only 5 annas for the *bhadoi* and 3 annas for the *kharif*. These figures seem to me to be unduly low, but I do not propose to alter them without further reference to him. This impression of mine is strengthened by the fact that in 1873-74, when meteorological conditions were almost exactly the same, except that rain was not so heavy in July, the outturn was estimated at 11½ annas for the *bhadoi* and 4½ for the *kharif*. Moreover, prices in this district

	1895	1896
Common rice	15	8
Wheat	15	8
Barley	15	13
Makka	27	12
Gram	27	10
Manna	27	15

are higher than elsewhere, and are much above the rates of last year, as the figures in the margin (which are for Muzaffarpur) will show. For these reasons the Collector reports that scarcity is present, and that unless the *rabi* is a good crop distress will probably grow in intensity till next rainy season. His report is confessedly incomplete, but he has been making arrangements for careful enquiries through the police, and when these are completed we may expect more exact information.

71. *Area and population likely to be affected.*—Mr Hare reports that if prospects do not improve the whole district will be affected, except perhaps the Hajipur subdivision with its *petite culture* and its well irrigation. Further than this he does not go, but promises fuller information in his next report. There can be no doubt, however, that whatever may happen to the centre and south of the district, Sitamarhi, with its predominant rice crop, must suffer, and I should be inclined without further delay to assume, as a first estimate, that half its area and population may be accepted as particularly affected, together with the urban population all over the district. The total population of the Sitamarhi subdivision is 924,396, of which the half is 462,198, and half the area is 507 square miles. If we accept the usual calculation for North Bihar and take 2·9 per cent. of the population of the district as its urban population, we get a non-agricultural total of 81,672, and a grand total of 543,870, who will be the first to be affected. Five per cent. of this sum is equivalent to 27,193 persons who may request relief during the next few months.

72. *Communications*—The means of communication throughout the district are extremely good. From Muzaffarpur itself radiate lines of railway north-west to Motihari, south-east to Darbhanga, and south to Hajipur, while the Darbhanga-Bairagnia branch traverses the centre of the Sitamarhi subdivision. The road system is good and sufficient, especially in the Sadar and the Hajipur subdivisions, though some of the most important roads are unbridged at the great rivers. The total mileage of the district is 1,600. In Sitamarhi there need be no difficulty in procuring carts and pack-bullocks to carry grain off the main roads if need be. The Gandak could be utilised, if necessary, to bring supplies to the railway at Hajipur and to the marts along the southern boundary of the district.

73. *Grain-stocks.*—In regard to this question Mr. Hare admits his inability to give precise information, and the result of enquiries made from many planters and from the Secretary of the Bihar Indigo Planters' Association is a collection of the most discrepant estimates. It is admitted that the most experienced planters themselves can form no idea of the stocks in their own *dehats*. The estimates are too vague to be worth reproduction, but the general opinion is that some of the zamindars have large stocks and all but the daily labourers and the non-agricultural class have grain in reserve which will feed them for from two to six months. Detailed enquiries are being made through the police, but I am not sanguine as to the result either here or anywhere else.

74. *Sources of food-supply.*—No special report need be submitted on the subject since with such excellent railway communication as the district enjoys the markets of the world are open to its inhabitants. The district imports

annually between 7,00,000 and 8,00,000 maunds of food-grain from Nepal, but this has probably been stopped for the present, as in Darbhanga, although the Collector does not refer to the matter.

75. *Proposed measures of relief.*—Mr. Hare reports that the schedule of famine works is being revised and added to: for the present, three experimental relief works are to be opened at once and I have ascertained from Mr. Mills, Inspector of Local Works, who has just returned from the spot, that they are located on (1) the Sheohar Road (No. 45), (2) the Purihar Road (No. 54), (3) the Nanpur-Pipri Road (No. 20). The construction of the branch line from Hajipur through the Darbhanga District to Katihar will provide employment for thousands of able bodied labourers in the south of the district, and labourers from relief works in other parts of the district will be drafted to it as opportunity offers. The Collector has asked for a further large additional grant for advances under both the Land Improvement and Agriculturists Loans' Act. this matter is being separately dealt with.

76. *Estimate of Expenditure.*—The District Board budget is being revised, and it is reported that funds will be saved wherever possible. This should have been done some time ago, and I will see that no time is lost in arriving at some reasonably exact figures. Mr. Hare says generally that heavy expenditure will be required, and talks of 10 lakhs, but no details of the estimate are given.

77. *Misellaneous.*—Two other points require to be noticed, though they are not referred to in the Collector's report. The first is that at an extraordinary meeting of the Planters' Association held at Muzaffarpur on the 24th October, which was largely attended, a resolution was passed by which the members present determined to offer to Government their services and those of their assistants without remuneration for employment in relief work. It was also announced that a fund was being formed for purchasing grain for distribution or sale on easy terms to villagers. Orders were registered for the purchase of 37,500 maunds for factories in Saran, Champaran and Muzaffarpur, and many other orders are expected. The matter has been reported to me demi-officially only, and I have in the same manner thanked the Secretary and pointed out to him the paramount importance of making purchases from some distant mart so as not to disturb the local market, he is in communication with Chittagong and other places. No doubt when I can report the proceedings officially the public spirit of the planting community will be suitably acknowledged by Government. Another point of interest in the Sitamarhi subdivision is the very general damming of hill streams and rivers issuing from Nepal. A considerable area of land has been irrigated in this manner, and although there has been some quarrelling, the operations on the whole have been conducted with amity and good feeling. The Inspector of Works, Bihar Division, on return from leave, proceeded at once to Sitamarhi with the new District Engineer in order to view the work, and if possible to evolve some schemes by which some permanency may be given to this irrigation. His report is awaited.

78. *Conclusion.*—It will be seen that the information available about Muzaffarpur is a good deal less than is the case with most other districts, and I hesitate to accept the Collector's views. I think myself that more complete information will induce a modification of his present opinions, and I await the submission of his next report, which will doubtless be complete: if his prognostications are correct, the situation is serious.

79. *DARBHANGA.*—Area 3,335 square miles, population 2,801,955. The district of Darbhanga is in many respects the counterpart of that of Muzaffarpur. It is bounded on the south by the river Ganges and the Monghyr district, and on the north by the Nepal Terai. Numerous streams descend from the Nepal hills, and south of the boundary stretches a broad belt of rice land, across the north of the Madhubani subdivision. The centre and south of the district partake of the general character of the districts north of the Ganges, but it contains a larger proportion of rice land than Muzaffarpur or Champaran. The main crop of the district is the *kharif*. Out of the whole cultivated area, it is calculated that in an ordinary year 49·6 per cent. is in *kharif*, 27·2 per cent. in *bhadai* and only 22·9 in *rabi*. Turning to outturn, it is estimated that 57·71 per cent. of the whole is contributed by the *kharif*, 21·05 per cent. by the *rabi* and 21·23 per cent. by the *bhadai*.

80. *Reasons for apprehending scarcity.*—The rainfall in this district during the present year has been unsuitable, not so much on account of deficiency as on account of its capricious character and unseasonable advent. Up till the

end of July the deficiency was only an inch and a quarter, but the district suffered from two long periods of drought in August and September, and much damage was thus caused to the rice. In August the rainfall was nearly up to the average, but in September it was 3 inches short, and no rain has fallen since the middle of that month, though a fall of about 3 inches is expected in October. The net result is a deficiency up to the end of October of about 17 per cent.

81. Weather such as that just described is necessarily fatal to a full crop, either of *bhadoi* or *kharif*, and supplies very little hope for the *rabi*. Accordingly the Collector estimates for the *bhadoi* an 8-anna crop, and for the *kharif* one of 5 annas. He has made no guess at all for the *rabi*. Treating these figures as correct, the outturn in maunds will be *bhadoi* 5,485,000, *kharif* 4,219,000 and *rabi* 2,719,000, total 9,543,000, as against an ~~one-third~~ ^{average} total of 25,813,000 maunds, distributed as follows: *bhadoi* 5,485,000, *kharif* 14,68,000, and *rabi* 5,437,000. The result is therefore only 36·94 per cent. of the average.

82 These figures, however, are confessedly only a first guess, and Mr. Carlyle's report generally is wanting in fulness. The reasons are, first, that information he has called for has not all been supplied, and, secondly, that he has been away from head-quarters a great deal during the last month, employed in making a personal examination of the whole district, which will in the end be well worth the time and trouble expended, as he will be able to check the reports of subordinates and to supplement them from personal knowledge. Mr. Carlyle also notices the high prices of grain, and points out that the price of the commonest rice in Darbhanga is now higher than 9 seers to the rupee, a rate not touched in 1874 till the month of March.

83 *Area and population likely to be affected.*—The Collector rightly reports that as time passes, the whole of the district must be affected, more or less, by the high price of grain, and he thinks that the only exception will be the south of the Somastipur subdivision and a few oases elsewhere. For the present we may assume as liable to distress in the first instance, the urban population and half that of the Madhubani subdivision. At 29 of the district total, the urban population amounts to 81,256, while half the population of the Madhubani subdivision is 507,350. The grand total is 588,606, and the area of the subdivision 1,349 square miles. Five per cent. on this total gives 29,430 persons as those likely to require relief in the next few months.

84. *Communications*—The communications in the Darbhanga district leave little to be desired. The Bengal and North-Western Railway runs into the centre of the district from Muzaffarpur in the north west, and thence nearly due east towards Purnea, while another branch runs south to Dulsing Sarai and Mokameh. At present two portions of the district are rather remote from the railway, viz., the north of Madhubani and the south and east of the sadar subdivision. The defect in both cases will soon be cured however, as the Sakri-Madhubani line will bisect the Madhubani subdivision, while that from Hajipore to Katihar will run through the south of the Somastipur and sadar subdivisions. Roads are numerous, the mileage being 2,331 on the 31st March 1896.

85. *Grain Stocks.*—Mr. Carlyle has no definite information, but he points out that according to local opinion some of the zamindars have immense stores of grain, and he adds that it is believed that this year these are larger than ever, because alarms of scarcity began early, and much has been held back which would otherwise have been sold.

86. *Sources of supply*—The railways, as in other districts, keep Darbhanga in touch with the wheat markets of the world. It has, moreover, in ordinary years a considerable import trade in food-grains with Nepal, the net imports, as the Divisional Administration Reports show, having been 374,000 maunds in 1894-95 and 387,000 in 1895-96. This exportation from Nepal has now been entirely stopped by the Nepalese authorities until further orders.

87. *Proposed measures of relief.*—Mr. Carlyle reports that so far he has started only one test relief work, viz., at Phulparas, in the extreme east of the Madhubani subdivision. No official report has been received so far of the result. As necessity arises, the Collector will open more test works in the Madhubani subdivision, but he does not expect to have relief works in full swing before February. The Sakri-Madhubani feeder line, which I believe has not yet been finally sanctioned, will provide employment for thousands of the professional labourer class for many months. I have addressed Government separately with a request that all preliminaries may be pushed on, so that earthwork may be started without delay.

88. Mr. Carlyle reports that so far he has given no advances for wells. He writes:—

"I have consulted a large number of gentlemen, European and Biharis, long resident in this district, and they are all agreed that advances for *lutcha* wells would be useless in this district owing to the nature of the soil, &c., nor can they recommend any other form of agricultural advances. Several months hence probably liberal advances will have to be given for seed for next year's sowings, but I do not propose at present to advance money, except where I am certain that it will be spent on some definite agricultural improvement, such as irrigation channels and tanks."

I have further discussed the matter personally with Mr. Carlyle, and agree that he is right.

89. A public meeting has been called for an early date in November to raise subscriptions and organise private relief. Raja Rameehwar Singh Bahadur was to preside.

90. *Estimate of expenditure.*—The Collector reports that at this stage he is quite unable to frame any estimate of expenditure. About Rs. 25,000 can be diverted from the sanctioned allotments under civil works, and there is also the estimated closing balance of Rs. 20,000, upon which the Collector can draw. Next year about a lakh of rupees could be provided. For the present this may suffice, but it is hardly necessary to remind Government that Darbhanga is usually the first district in the Division to require relief works, and that its resources are never equal to its expenditure on these occasions. In 1888-89, between January and October, the District Board spent Rs. 94,849, and Government Rs. 1,17,344. In 1892, relief operations were commenced in May and ended in July, the total expenditure was Rs. 2,69,816, of which the District Board contributed Rs. 69,816 from its own resources, and borrowed a lakh from Government, while Government contributed another lakh. For next year if relief has to be undertaken on a large scale, the Collector will have to ask for an advance from Government, and also for the suspension of repayment of the loan made in 1892-93. All this, however, is a matter for future consideration.

91. *Conclusion.*—I have also to notice that I hear semi-officially that the Maharaja of Darbhanga desires to help his raiyats to the fullest extent. He is reported to be endeavouring to buy a lakh and-a-half of maunds of grain for distribution and sale at easy rates. I have warned the Collector that such large operations as these must be conducted with special prudence lest they dislocate the local market and discourage private trade. Mr. Bell, the Manager, has just returned to India, and is ready to give every assistance.

92. The evidence before me is not sufficient to enable me to form a definite opinion on the state of Darbhanga. At present much distress need not be apprehended; but, if the Collector's estimates of the *bhadoi* and *khurif* crops are correct, severe scarcity must follow even if we get a fair *rahi* crop, because at the best of times the latter provides for the district only one-fifth of its food crop. The assistance and support of the Darbhanga Raj will be of great value.

PART III.

GENERAL REMARKS.

93. Having now examined the condition of each district, chiefly upon the basis of the reports submitted by the Collectors, I turn to make some observations on the state of affairs in the Division as a whole, and upon certain points which are not touched upon in the preceding paragraphs. I follow in general the list of subjects mentioned in paragraph 9 of the Famine Code.

94. *Grounds for apprehending scarcity.*—These have been set forth in detail in the account for each district, and need not be referred to again at any length. There has been all over the Division a deficiency of rainfall as shown in the margin. But as is well known, this does not necessarily give rise to scarcity, provided that the rain is well distributed. This year, however, that element of disaster also was forthcoming, and the characteristics of the rainy season of 1896 have been everywhere a late commencement of the monsoon in June, and heavy rain early in July: then followed two long periods of drought till the middle of August and the middle of September respectively, since which time no rain has fallen at all. The universal result

DISTRICT.	Deficiency.	Percentage on normal.
1	2	3
Patna	10 53	25 53

Muzaffarpur	10 16	22 57
Darbhanga	7 95	17 53

has been damage to the *bhados* from floods first in some places, and afterwards from drought, a withering of the rice seedlings, and late transplantation, and then the dying out of much of the crop: for the *rabi* crop the preliminary

moisture, which is so essential in September and October, has been entirely absent, and thus great fears are entertained for it also. In these circumstances, the estimates of the *bhados* and *kharif* crops, framed by the District Officers, are, as given in the margin, expressed in annas of an ordinary average crop. Naturally, the mind turns to a comparison of these figures of rainfall and outturn with those recorded in 1873-74. In Appendix B I have given figures comparing the rainfall month by month in every district together with the normal fall. An extraordinary similarity is visible in the meteorological history of the two years in every district; but, in spite of that, the estimated outturn of the two crops, as given in the margin, varies a good deal from that of the present year. It will be seen that, except in Saran and Muzaffarpur, the estimates of the present year are higher than those of the District Officers in 1873; and if the estimates in both years are right, then the people have far better crops now than they had in 1873.

95. Moreover, it is fair to assume, I think, that the people are now in better case than they were at the previous period. The year 1873 was the last of a series of years which were marked by abnormal rainfall, and generally unusual weather. The year 1871 was an unusually wet year, the following year was unusually dry, while in 1873 the rainfall was deficient, almost beyond precedent. In spite of the unusual weather, fair crops were reaped, and it may be assumed that at the beginning of 1873 the condition of the people was not much below its usual standard. The distress of 1873-74 was entirely due to the failure of the rains of 1873, and chiefly to their deficiency during the three latter rainy months. In 1896 the situation is much better. The crops of 1893-94 and 1894-95 were excellent, the Commissioner reporting that the year 1894-95 had been "a decidedly prosperous one for agriculturists north of the Ganges, and a good average one for those in the south, except in Shahabad, where it was below the average." In 1895-96 agricultural affairs were not so prosperous, but on a review of the whole year, it appears that there was a crop estimated at ⅓rds of the usual outturn. I infer therefore that, so far as we have gone, not only are the people in better condition than they were in 1873-74, but that the two crops, of which we have fairly certain knowledge, are better, except in Muzaffarpur and Saran. In Champanan they are about the same.

96. Before leaving this part of the subject, it is necessary to say a word or two as to the *rabi* crop, though any estimate of its outturn must for the present be purely speculative. We are justified, I think, in the expectation that as the weather of 1896-97 has so far been extremely similar to that of 1873-74, the parallel may be continued, and that for the remaining months of the year 1896-97 we may have the same rainfall that was recorded during the last five months of 1873-74 and similar harvests. If this prove to be so, there is further reason to take courage, for the crops reaped in the spring of 1874 afford the most convincing evidence of the vitality of the *rabi*. It is usually stated, and with perfect truth, that in order to obtain a good *rabi* crop heavy rain is essential in September and October, but the statement takes no account of the efforts to irrigate which are made in a bad year, nor of the extent to which lands usually too wet for *rabi* are sown at such a time. In

Patna	...	12
Gaya	...	16

Darbhanga	...	8½

1873-74, after a great deficiency of the rains in September, and an entire absence of rain in October and November, the showers which fell in December, January and February and even in March did so much to revive the crop that the recorded outturn in annas was as in the margin. A similar

experience in 1896-97 will go far to rehabilitate the people. I shall return to the subject again below.

97. But though the estimated outturn of the *bhadoi* and *kharij* crops is so much better this year than it was in 1873, prices are vastly higher, and it is on this account that pressure is already beginning to make itself felt. This question must be regarded from two points of view. So far as the general agricultural population is concerned, who form the great bulk of the inhabitants of the Patna Division, it is a commonplace to say that high prices do not necessarily imply distress. The fact has often been stated, and in particular I would draw attention to the statistics of the famine in Bijour at page 247 of Mr. Geddes' "Administrative Experience of former Famines." What really brings general distress is the cessation of employment. The *zamindar* and the ordinary agriculturist have everywhere their own stores of grain, and, so long as work is available, the daily labourers and landless men are paid in kind sufficient for their daily food, and have little or no concern with the price of grain in the bazar. It should never be forgotten that thousands of these daily labourers are practically permanent servants of a particular master who takes care to feed and assist them. On this subject of employment Mr. Stevenson-Moore has supplied me with a note which I give as appendix E, after adding a calendar of agricultural operations, Appendix F.

98. On the other hand, there is a considerable class whose income is not paid in grain, and who have to pay with cash for their daily food. This includes all persons with fixed incomes, many of the artisans, the majority of the dwellers in towns, and the great body of widows and other dependants together with the beggars and the very poor. It is upon these people that the stress of high prices first falls, and it is a feature of the present scarcity that this class will be inconvenienced at a much earlier period than is usual. At the same time it is to be remembered that their numbers are comparatively small; there must of necessity be many such who dwell in small villages of whom it is impossible to make any estimate, while on the other hand not all the people who live in towns will be immediately affected by the high price of grain. For the sake of convenience, however, I have assumed that the whole urban population of each district will be seriously straitened, and may require relief at an early date. They are estimated in Mr. O'Donnell's Census Report at 2.9 per cent. of the whole in North Bihar, and at 6.5 per cent. of the whole in South Bihar. The figures for each district have been mentioned in the district accounts. The especial attention of District Officers will again be called to this matter, which is at the present time one of the first moment.

99. The next step after ascertaining how prices range and what is the estimated outturn of the different crops in each district is to ascertain what those figures represent when reduced to maunds of grain. I have prepared, in Appendices C and D, two statements to which I would now invite attention. The first shows for each district the normal outturn, in an ordinary year, of each crop, and the ratio which such outturn bears to the total food-crop of the district. It is expressed in thousands of maunds. It is also accompanied by a chart which gives the same information in graphic form. The second statement shows side by side the normal outturn of each district together with the estimated outturn this year.

100. The first statement in Appendix C is full of information. It shows in the clearest manner how the different crops are in each district of widely different importance, and, read with the second statement, it shows why at the present moment there is much greater apprehension in some districts than others. In Patna, for instance, where the *bhadoi* and *kharij* crops are equivalent to nearly 64 per cent. of the total, the *rabi* is of minor importance. In Gaya almost everything depends on the rice crop, and with its admirable irrigation system the district is nearly always safe. In Shahabad the *bhadoi* is of little consequence, and the *kharij* and *rabi* are of about equal importance. This explains at once why the failure of the rice and the expected failure of the *rabi* make the outlook there so grave. Saran is most fortunately placed, as all its crops are of fairly equal value, and whatever happens it is pretty certain always to have one-third of its food crop safe. In Champaran the *rabi* crop is of comparatively little value, and it is this consideration which lends additional gravity to the situation: two crops of the year have passed, one with half an average outturn and the other with only a fourth. Darbhanga is in somewhat similar case, but the outlook is worse, because its rice is most important and the *bhadoi*

and *kharif* have failed to a greater extent. In Muzaffarpur the proportions are much the same as in Patna, but it has not so much to expect from its *rabi*, and the failure of its *bhadai* and *kharif* has been much greater.

101. The next statement (D) enables me to determine to what extent the crops up to date have in each district fallen short of the normal outturn, and to forecast what the total result may be. Taking first the *bhadai* and *kharif* crops, for which we have now a fairly substantial estimate, it will be seen that the outturn of those crops in a normal year and in the present season compare as follows (thousands of maunds being omitted) —

DISTRICT.	Normal outturn of <i>bhadai</i> and <i>kharif</i>	Estimated outturn of <i>bhadai</i> and <i>kharif</i> in 1896-97	Deficiency.	Percentage of column 3 on column 2.	REMARKS.
1	2	3	4	5	6
Patna	8,181	4,664	3,517	57	
Gaya	18,429	9,910	8,519	53 77	
Shahabad	16,448	3,335	12,113	31 58	
Saran	11,040	3,191	7,849	28 59	
Champaran	15,215	5,197	10,018	34 57	
Muzaffarpur	13,794	3,182	10,612	23 06	
Darbhanga	20,391	6,824	13,567	33 46	

Those figures again confirm what has been said above in regard to the relative position of the different districts. We know from the above statement what the percentage of outturn is for the *bhadai* and *kharif* crops in each district, and we know what proportion to the whole food-crop of the district is borne by those crops in an ordinary year. From these two factors, it is easy to calculate what percentage of their usual food crop for the year each district

Patna 42 86
Gaya 40 62
Shahabad 11 19
Saran 17 94
Champaran 27 29
Muzaffarpur 16 08
Darbhanga 26 41

has already secured, and what remains to be filled up by the *rabi* crop or by other means. The figures are given in the margin. They must be read with those which show the proportion of the *rabi* to the whole food-crop of the district which are these: Patna 36·01, Gaya 24·47, Shahabad 48·11, Saran 38·38, Champaran 21·02, Muzaffarpur 30·21, Darbhanga 21·05. It is manifest once more that with an ordinary *rabi* crop Patna and Gaya are both safe. For Shahabad everything depends on its *rabi*. Saran, with a larger *rabi* crop to look forward to, is a good deal better off than Champaran, while Muzaffarpur and Darbhanga are both in an equally perilous position.

102. It will be interesting to carry this calculation a little further and to speculate what will be the result of the year's crop if, as suggested in paragraph 96 above, we take for granted that the *rabi* crop of 1874 will on the whole be repeated in 1897, and I take the *rabi* outturn as follows:—Patna, Gaya, and Shahabad 12 annas each, Saran, Champaran, and Darbhanga 8 annas each, and Muzaffarpur 10 annas. I assume that the normal area will be sown with *rabi* because I set off against the land in which it has not been sown the empty rice lands in which winter crops will certainly be sown this year. The figures are given in columns 3, 5, &c., of the lower line in the statement shown as Appendix D. The result is as follows:—

DISTRICT.	Normal outturn.	Estimated outturn in 1896-97.	Deficiency	Percentage of column 3 on column 2	REMARKS.
1	2	3	4	5	6
Patna	12,786	7,868	4,918	61·53	
Gaya	24,401	14,389	10,012	58·96	
Shahabad	29,773	14,078	15,695	47 28	
Saran	17,918	6,680	11,238	37	
Champaran	19,266	7,222	12,044	37 48	
Muzaffarpur	19,767	6,915	12,852	34 98	
Darbhanga	25,828	9,543	16,285	36·94	
Total	149,739	66,445	83,094	

If the estimates suggested above are fulfilled, the outlook in all four northern districts will be gloomy, but at present we need not adopt them, and may await the development of events.

103. Before leaving this part of the subject, I desire to add that everywhere it is reported that *rahar* and sugarcane are doing remarkably well, and it is anticipated that opium will again be a good crop. Little can be expected from indigo, but my information is that in much of the land which is not commanded by irrigation planters will sow maize and other food-crops, which will yield an early return, and give them time to prepare the ground for the sowings of 1898. Similar steps were taken in 1866 and 1874.

104. *The area and population likely to be affected*—These have been given in detail in the examination of districts, but the following synopsis will be useful:—

District.	Area	Population		Total.
		Urban	Agricultural.	
1	2	3	4	5
Patna	250	115,263	600,000	715,263
Gaya	610	139,291	207,000	330,291
Shahabad	1,301	134,165	344,902	479,067
Saran	523	11,515	430,335	501,850
Champaran	467	54,924	177,500	231,424
Muzaffarpur	507	41,572	462,198	543,870
Darbhanga	674	81,256	507,350	588,606
Total	4,822	677,076	2,722,291	3,399,367

105. *Communications*.—Full details have been given under this head in treating of the different districts, but it is as well to bring into prominence the entire revolution which has been wrought in all the conditions of famine relief in this Division by the immense development of communications since 1873-74. In

Patna	115	that year there was only one railway in Bihar—
Gaya	49	the East Indian Railway, and it ran through two
Shahabad	58	districts only—Patna and Shahabad, the total
Saran	84	length of rail in the Division thus amounting
Champaran	52	to 147 miles only. At the present moment there
Muzaffarpur	75	is at least a line of rail in every district, and the
Darbhanga	166	mileage of open line is as in the margin.
Total	549	

In 1873-74 the Sone Canals had not been opened, now they supply water communication for many miles. In the same year there were, I believe, no steam ferries in the Division, and the cost of importing steamers from England was a large item in the cost of the famine. Now there is a steam ferry at every railway crossing, many ferry farmers use steam, and the India General Steam Navigation Company has a bi-weekly service running up the Ganges, and steamers ply up and down both branches of the Sone Canals. Lastly, in 1873-74 the number of roads were a mere fraction of what they are now, while the miles of road open on the 31st March 1896 were as follow—Patna 1,212, Gaya 1,403, Shahabad 1,805, Saran 2,664, Champaran 1,359, Muzaffarpur 1,630, Darbhanga 2,331—total 12,454. These are changes which must immensely facilitate, and render vastly less expensive, the supply of grain and the execution of all operations connected with the relief of distress.

106. *Grain-stocks*.—On this subject I can speak with little certainty, for it will be seen from a perusal of what has been said above in dealing with the Collectors' reports that accurate information on the point does not exist, while mere opinions vary widely. I believe personally that there is everywhere at least a three months' supply, and that in many instances this is a low estimate. From all that I can learn the development of communications and the multiplication of railways has not induced the Bihari raiyat to encroach upon his food reserve or sell out his stocks: he is before all things cautious, prudent, and the slave of custom in all agricultural matters, and I am confident that as in 1874, when Sir A. P. MacDonnell wrote his Report on Food grains in Bihar, so now his first care is to lay by enough for himself and his dependants, and that it is only the surplus with which he pays his rent, and

which he sells to provide himself with homely luxuries. In a subsequent report I hope to be able to give more information and to examine also the consumption of each district in connection with its imports and exports and its capacity for self support.

107. *Sources of food-supply.*—In a Division so amply provided with means of communication the markets of the world are open to its demands, provided that communication with them is opened by steam from Calcutta. On this point more information is urgently needed, and any intelligence of a reassuring character, which could be published with the *imprimatur* of Government, would have the most beneficial effect, not only on the minds of the people, but also on the prices of grain.

108. *Proposed measures of relief.*—These have been fully described above district by district, and I need only summarise them here for convenience sake. Test relief works have actually been commenced only in Patna, Shahabad, and Darbhanga; but before the next report falls due, others will be started in all the remaining districts. It is the unanimous opinion of all persons that, so far, the population are in good case, and no emaciation or actual distress has yet appeared, and that there is still sufficient field work. Advances are being given freely everywhere except in Darbhanga, and almost all officers have asked for a large addition to their allotments. Considering the urgency of the case, I have taken the responsibility of allowing District Officers to spend large additional sums in anticipation of formal sanction. Public meetings have been called in some districts, and it is time that they should be called everywhere in order to organise charitable relief.

109. It is a most providential circumstance that just at this time of stress new railway works should be opened in every district of the Division except Patna, and even here the Gaya-Lakhiserai line will run so close to the eastern boundary of the Bihar subdivision that it will certainly attract labourers thence. These works will be of incalculable value in providing profitable employments for thousands of the labouring class for the next eight months.

110. Lastly, I think it would be most desirable if, in the present circumstances, the operations of the Survey-Settlement Department could be interrupted for a year. These operations, for reasons which it is unnecessary to enumerate, are a heavy burden on the villagers, and in such a season as the present I should be glad to save them every pice that it is possible. In order to avoid breaking up the survey parties, they might perhaps be allowed to continue in selected localities.

111. *Estimate of Expenditure.*—The District Boards everywhere have been revising their budgets and allotting funds for relief works. The following is a synopsis of their operations—

DISTRICT	Amount available in 1896-97.	Amount available in 1897-98.
1	2	3
	Rs	Ra.
Patna	25,000	25,000
Gaya	51,850	60,000
Shahabad	40,000	55,000
Saran	78,000	80,000
Champaran	25,000	25,000
Muzaffarpur	Not stated.	Not stated.
Darbhanga	45,000	1,00,000

These sums will suffice for the present, and will enable all District Officers to make a beginning with relief. Nothing but experience can show what further sums will be required and what the limits of our operations will be.

112. *Conclusion*—I have now to bring this long report to a close. After a careful consideration of all the circumstances of the case, I am convinced that for the present there is no occasion for panic. We are in all respects but two in a better position than we were in 1873-75. The people start with better years behind them, and the material prosperity of the Division must

have increased during the last quarter of a century ; the *bhadoi* and *kharif* crops have been better than they were in 1873 ; our statistical information is much more full than it was in that year ; and, lastly, our communications have developed to a marvellous extent. On the other hand, prices are extraordinarily high, and the scarcity extends over a far wider area, so that not only are our usual markets closed to us, but all markets are filled with competitors. Much depends on the result of the *rabi*. If we have a total failure, distress will be very severe, if we have a full crop, it will be moderate but assuming that we have such crops as were reaped in 1874, we shall win through, with difficulty certainly, but still I believe without loss of life, and at a much less cost, provided that a steady supply of grain is available at rates which are not prohibitive. The note of the day is the opening of test relief works in the areas first to be affected, and the immediate organization of charitable relief for the non-agricultural population.

APPENDIX E.

Note on the occupation of the labouring classes, Bihar, by MR. C. STEVENSON-MOORE, C.S.

Bhadoi.—The *tumri* or preparation of bhadoi fields begin in Jeth or about the end of May, and is finished in the Rohini Nichatra, i.e., in June. The first operation is called *tokni*, i.e., breaking up the soil of these fields where weeds have grown, and requires four labourers per acre. Towards the end of June ploughing begins, requiring five labourers per acre, and immediately after 20 labourers per acre are required to transplant marua seedlings and six per acre to replough the paddy, kodo and makai lands and sow the seeds. In Sawan (end of June and beginning of July), weeding requires 15 labourers per acre. Thus the proportion of marua to other bhadoi crops being in North Bihar as one is to two, the labour of 35 men between the middle of May and the 5th July is required in one acre; i.e., 1½ acres of bhadoi land affords continuous daily employment to one labourer for 50 days. I estimate, therefore, that North Bihar can supply nearly 2,000,000 men with daily work on bhadoi lands for that period. Marua is the first crop reaped, viz., in August, and eight labourers per acre being required, three labourers per acre are employed in cutting makai towards the end of September.

Kharif or aghani paddy is the only important crop. Cultivation begins in February on lands liable to early inundation and in other lands in Rohini Nichatra (June). Jhil lands are prepared and sown in April. The first ploughing requires four labourers, after this one of two processes may be adopted—viz., broadcast sowing or transplantation. For broadcast sowing another ploughing is required in February or June, as the case may be, and sowing requires three labourers. The land is sometimes weeded in Sawan (June-July), requiring fifteen labourers. For transplantation six labourers are required at the beginning of August to prepare the land, and twenty-six labourers per acre are then required to transplant the seedlings. About ⅓rd of the aghani lands are sown broadcast. Thus an acre of paddy land affords employment to about thirty labourers, mainly from May to August. Paddy is cut in December, requiring about ten labourers per acre.

Rabi—Little or no *tumri* is required, as bhadoi crops have already been grown on most of the rabi land. A small portion only of the rabi land is kept *chaumas* (viz. in furrows) during the rains, and in it wheat only is sown. The chief rabi crops are barley, wheat, khesari and arhar. Khesari is sown broadcast in paddy lands without any further preparation. Arhar is always sown with some bhadoi crops and requires no separate labour. Wheat and barley employ 20 labourers per acre for ploughing and sowing in October. The exact time depends on the rainfall. Rabi crops are reaped in March and April, requiring about ten labourers per acre.

To summarise—The preparation and cultivation of bhadoi, aghani, and rabi crops afford almost continuous work to labourers from about the end of May until the end of October, and during this period they work in their own bhadoi fields when not required by their masters. From the beginning of November to the middle of March is the slack season for labour; during November-December labourers live on the produce of their own bhadoi fields and on their earnings from working in those of their masters. During the next 2½ months they live on their earnings from paddy-cutting, and even, though exchanging the paddy they receive for yams and cheap food of that sort, they often have difficulty in getting along. This year paddy has to a large extent failed, and the yam crop is very scanty, so the labouring classes will begin to feel the scarcity severely from about the beginning of January. If the rabi crops fail too, mahajans will stop advances, and from March to May labourers will be well nigh destitute. Then, if we get rain, they will begin to recover, but it will not be until they reap their marua in August that they will again be independent of help.

The cold-weather months are not altogether unproductive to the labouring classes. From October to the beginning of March they are largely employed in the preparation and sowing of indigo lands. The employment forms a valuable supplement to their scanty earnings, but their individual wages are small, and, in a year like the present, would be more valuable if paid in food-grain. The total number of labourers, however, who find employment in indigo factories throughout Bihar must be very large. *Tumri* in August to November employs 22 men per acre. Ploughing in October-November employs 3½ men per acre. *Ustani* (clod breaking) from end of October to November, 19 women and children. Ploughing in December employs 3½ men per acre. Second *ustani* requires 11 women and children in the same month.

Harrowing, August to January, employs 1 man per acre, and weeding in February 6 women and children. Hence an acre of indigo land gives employment to 30 men and 36 women and children. In Muzaffarpur and Champaran together there are nearly 5 lakhs of acres sown with indigo.

APPENDIX F.

A — Calendar of agricultural operations in North and West Bihar.

Month	Operations.
January ...	Cutting of sugarcane, indigo preparation, weeding of poppy.
February ...	Preparation of lands for early rice, indigo preparation, weeding of poppy.
March ..	Reaping of rabi crops, indigo preparations, weeding and lancing of the poppy.
April ...	Reaping of rabi crops including rahar, sowing of early rice
May .	Preparation for bhadoi, ploughing of early rice.
June ..	Preparation for bhadoi, ploughing and transplanting ditto, sowing of late rice, weeding of early rice, cutting and carting indigo.
July	Weeding of bhadoi, cutting and carting indigo
August ..	Reaping of marua and of early rice, preparation of lands for late rice and transplanting ditto, indigo preparations, cutting and carting ditto
September .	Reaping of makai and other bhadoi crops, indigo preparations.
October ...	Ploughing and sowing of wheat and barley, indigo preparations
November .	Indigo preparations.
December ...	Reaping of late rice, indigo preparations

GRAPHIC CHART TO ACCOMPANY APPENDIX C.

[The light curved rules represent *bha* lot, the straight thick rules *khars*, and the heavy curved rules *rabi*.]

No 4567, dated Calcutta, the 19th November 1896.

From—E M KONSTAM, Esq., Under-Secy. to the Govt. of Bengal, Revenue Dept.,
To—The Commissioner of the Chota Nagpur Division.

I AM directed to acknowledge the receipt of your letter No. 666M R., dated the 12th November 1896, on the prospects of crops and the likelihood of distress in the Chota Nagpur Division, and in reply to say that the Lieutenant-Governor approves generally of the instructions issued by you. I am at the same time to convey the following remarks.

2. *Lohardaga*.—You should see that the wages to be offered on test relief works in Lohardaga, and wherever else it may be found desirable to open such works, are fixed strictly in accordance with the provisions of Chapter VII of the Famine Code.

3. *Hazaribagh*.—The outturn of the rice crop is reported to be not likely more than 5 to 6 annas; but the *bhadoi*, according to the returns furnished to the Director of the Department of Land Records and Agriculture, was a 16-anna harvest. Some funds for the purpose of providing charitable relief will, it is hoped, be supplied soon from those now in the hands of the Bengal Distress Relief Committee. Meanwhile the action ordered by you appears to the Lieutenant-Governor to be suitable and sufficient.

4. No immediate distress is apprehended in the other districts, but prices are high in all, and the situation requires careful watching. I am to invite your attention to the instructions given to the Commissioner of Patna in the letters noted on the margin, which were published in the *Calcutta Gazette*. The Forest Department is being addressed on the question of allowing the people to pick the *mahua* in the reserved forests. A further communication on the subject will be made to you at an early date.

(1) Government order No 94.
T R., dated 15th October 1896
(2) Government order No 1010.
T R., dated 30th October 1896

No 666M.R, dated Ranchi, the 12th November 1896.

From—C. R. MARINDIN, Esq., c s, Offg Commissioner of the Chota Nagpur Division,

To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to forward, for the information of Government, a review of the situation in this division in respect to the prospects of the crops and the likelihood of the occurrence of any distress among the people owing to scarcity and high prices calling for relief measures, which I have drawn up upon demi-official reports received from District Officers.

2. It will be seen that Hazaribagh is the only district which gives any cause for anxiety in the immediate future, and I trust that the instructions I have given to the Deputy Commissioner of Hazaribagh on the subject will be approved.

In Lohardaga and Singhbhum the prospects are best, and it may be hoped that the population will in these districts tide over till next season without the necessity of any relief measures, but it is too soon yet to prophesy this with certainty, especially with regard to Lohardaga.

In Manbhum and Palamau, and more particularly in the latter, it seems likely that relief measures will be wanted later on. I beg to bring the suggestion of the Deputy Commissioner of Palamau to allow the people to pick the mahua in the reserved forests to the special notice of Government, and to recommend that orders allowing this be issued to the Forest Department. The mahua in this district is an important addition to the food supply, and in a season of scarcity like the present the concession asked for would no doubt be of substantial assistance to the people who can avail themselves of it.

3. The situation in this division may be affected by an influx of people from the surrounding native states, where there has been failure of crops, and I shall be in possession of more accurate information of the condition of things there as soon as I receive the reports which I have called for from the Chiefs.

Memorandum on the state of the crops and prospects of distress from scarcity in the Chota Nagpur Division.

1. On the 23th October, I called upon all District Officers to report demi-officially on the state of crops and prices of grain and the prospect of any distress from scarcity in their respective districts.

The following is the substance of the reports received.

2 *Lohardaga*.—The outturn of the high land or *gora* paddy was 10 annas. The outturn of the winter or low land paddy is expected to be about 8 annas.

Prices were 6 seers the rupee for old rice and 9½ to 10 seers for new rice.

There is plenty of grain in the district, and most of the raiyats hold certain stocks and are expected to benefit rather than otherwise from the high prices.

The labouring classes will no doubt be pinched by the high prices and emigration to Assam will increase, but this class is not numerous.

The only indication of any scarcity so far is the increase to a certain extent of the number of beggars in the town of Ranchi.

The Deputy Commissioner does not at present anticipate any distress in his district requiring relief or action under the Famine Code. If any does occur it will be in the Panch Parganas which the Deputy Commissioner proposes to visit shortly, and where he will try and induce the zamindars to start embankment works which will serve as tests of the extent of the distress if any.

The Deputy Commissioner should fix the rates of wages on these works if he intends them to be test works.

There is evidently no immediate cause for anxiety in Lohardaga, but the situation should be watched and any change for the worse reported at once.

3. *From Hazaribagh, dated 30th October 1896*.—Regarding the outturn of the crops the Deputy Commissioner, who has just been over an area of about 700 square miles in the Sadar subdivision, reports that there will be in the worst villages in that division of the district an outturn of from 2 to 4 annas on the 12 months' crops of marna, makai and rice. These villages are destitute of any means of irrigation and depend entirely on the surface rainfall. They number about ¼th to ⅓th of the total number of villages. In the next class where there are lowlying lands which get moisture from the higher lands by percolation by cutting bunds or lifting water, there will be a 4 to 6 annas' outturn. These villages amount to about ¼rd of the whole. The Deputy Commissioner estimates that a 4 to 6 annas' yield will be enough for the people to live on, but not enough for next year's sowings.

In the third and best class of villages where there are *ahars* and a good deal of moisture from the high lands appearing on the surface of the low lands, the greater portion of the high land paddy will be lost, but there will be a good crop on the low lands. The outturn for these villages is estimated to be 6 to 10 annas; very much the same as last year.

The average outturn of the winter rice crop for the district would appear to be between 5 and 6 annas.

4. *Prices*.—The prices of rice have for some time been 8 to 10 seers per rupee and in the town and bazars have occasionally gone down for a day or two to 6 seers. There has been some "demonstrating" in the town of Hazaribagh during the last week in October, and the Deputy Commissioner was asked to fix prices, but he confined himself to making police arrangements to meet any emergency. Apparently there was no want of work but merely an agitation against the high price of rice. There is a large population in Hazaribagh town who will eat nothing but rice, although in the villages the same class will eat marna, makai and mahua in time of scarcity, and the Deputy Commissioner observes that until the coolie class in the town reach the stage of eating these coarser grains, they cannot be said to be in real distress.

The mahajans are said to be buying up all the local stocks available and to be holding them for a further rise in prices.

The last crop and weather reports from this district of the 9th November says that prices of rice range from 7 to 9 seers per rupee, and that public feeling is greater.

The Deputy Commissioner does not say what stocks there are in the district, but presumably most raiyats have some.

5. In the Giridih subdivision the situation is said to be more favourable than the above owing to the drainage which that part of the district receives from the higher plateau to the large area under poppy cultivation, and to the sources of employment for labour in the coal mines and the new railway close at hand in the Sonthal Parganas, and the Deputy Commissioner considers that the state of Giridih can hardly be called pressing at the present moment.

6. As to the necessity of relief measures, Mr Herald thinks that it will be necessary to start some sources of relief in a month or six weeks in specially selected tracts. His road funds will have a probable surplus of Rs. 13,000 on the 31st March and Rs. 7,000 more could be saved by diversion from impending works, if the rule about keeping three months' funds in hand were suspended; and Rs. 20,000 thus available would be nearly sufficient, the Deputy Commissioner thinks, for the relief works likely to be required, though more might be wanted if food becomes dearer.

The most pressing want he considers is money for loans to small cultivators, and he asks for credit up to Rs. 10,000 to distribute on such loans in the Sadar. He also wishes Rs. 1,000

to be placed at his disposal for charitable relief as a fund for purchasing cotton to give employment to women, and he proposes to set private sources of charitable relief to work at once. A further grant may be wanted for loans to cultivators in Girdih, and the Subdivisional Officer proposes to start kitchens for the lame and blind, which the Deputy Commissioner considers premature.

7. The situation in Hazaribagh is worse than in other districts in the Division. There is apparently no immediate need for any relief measure by Government; and any relief that is wanted now should be obtained from sources of private charity which Mr. Herald proposes to organize. He is requested to report what action has been taken in this direction.

He is also requested to revise his District Road Committee budget at once, so as to save and keep as much money in hand as possible for the relief works which may hereafter be required. The revised budget should be forwarded along with an application to suspend the rule requiring a working balance of three months' income. He should also apply officially for a grant for loans to small cultivators explaining the terms on which he means to distribute it.

I hardly think it necessary to ask Government yet for an allotment of Rs 1,000 for charitable relief. All that seems likely to be wanted in this direction either at the Sadar or Girdih at present should be done by private charity, and even to this extent I would caution Mr. Herald not to be too premature in the distribution of charitable relief and to control the action of any committees that may be started for the purpose carefully.

In the worst tracts where there are any signs of distress among the labouring classes test relief works should be opened to gauge to reality of the distress, and any action of this sort taken should be at once reported with a statement of the rates of wages fixed and the food which it will buy. The Deputy Commissioner is requested to report weekly on the situation in his district.

8. *From Manbhum*—This report is dated the 2nd November, but owing to a change of officers it was not received till the 8th. Mr. Morshead estimates the outturn of the rice crop at from 5 to 8 annas. Pulses and oil seeds 4 to 8 annas. Sugarcane 8-16 annas.

The price of common rice at the Sadar and Gobindpur was 10 seers to the rupee, and in the crop report of 9th November it was the same in the Sadar, but had fallen to 8½ seers in Gobindpur.

There are believed to be considerable stocks of rice in the district, but they are irregularly distributed.

Mr. Morshead does not think any relief will be required till February, and possibly not then. The eastern portion of the district is likely to suffer most.

9. Mr. Lusson, the present Deputy Commissioner, is requested to watch the situation carefully. There does not appear to be any immediate cause for anxiety, and the reaping of the rice harvest should give work for the present. Possibly the smaller cultivators may require loans to tide them over till next season, and if any sign of distress appear on any locality, test relief works should be started. The Deputy Commissioner should, in view of the possible necessity of relief measures in February, see at once what savings he can effect in his road fund budget. Charitable relief is not likely to be wanted for some time, and when any necessity for it arises, the sources of private charity should be first indented on. The rate at which emigration to Assam increases should afford a means of gauging the extent to which any distress is being felt.

10. *From Singhbhum reports, dated 30th October*—The gora or aus crop in September was a full average one, but the winter rice is not estimated to yield more than a six or seven annas' outturn.

Prices were low in August and the beginning of September about 20 seers for the rupee, but when scarcity declared itself elsewhere, the mahajans began to export, and they rose to 14 seers at Chaibassa; and along the railway the price is now as high as eight seers.

The crop report from this district of the 31st October gives the outturn of the aman dhan at 10 annas and the price of rice at 10 seers the rupee.

Mr. Bompas says that the agricultural classes are unwilling to part with their stocks, but otherwise seem free from anxiety about their prospects, and that with the work of supplying sleepers on the railway going on in the district, he does not expect to have to start any relief work, though the people may be pinched next summer and loans to cultivators may be wanted. Here, as in Lohardaga, it seems only necessary for the situation to be watched.

11. *Palamau, reports dated 31st October and 9th November*—The September rice or aus dhan yielded a 12-anna crop. The prospects of the winter rice were excellent to begin with, but the yield is not expected now to be more than 6 annas. The rabi crop will entirely fail, except in the beds of the ahars. Mr. Cargill has lately been over a good portion of his district, and the above is the result of his enquiries.

The following prices are given in Mr. Cargill's subsequent report of the 9th—

Per rupee.			
Wheat	9 seers.
Barley	10 "
Common rice	7 "
Best rice	6 " 12 chittacks
Marua	12 " 6 "
Indian corn	12 " 6 "

In the interior rice is selling somewhat cheaper at 9 and 10 seers, which is a favourable sign. The present very high prices seem to date from about the middle of October, and rose partly on account of the assured failure of the rice and bad prospects of the *ab* and the sympathy with other districts.

12. As to the prospects of any distress calling for relief, Mr. Cargill thinks that there is no likelihood of anything of the sort happening till February or March next. The people have still some of the bhadoi rice in hand. The *lae* crop in November has been good and prices fair, and if there is a second good crop in April it will be a great help. The winter rice will yield 6 annas and there is the work of harvesting it. Part of the population are in the habit of living on jungly roots and fruits, and in the south of the district the jungle is heavy, cultivation scarce, the population sparse and cattle numerous. The mahua crop is also an important item in the food supply of the people, and Mr. Cargill suggests that Government might allow the mahua to be plucked this year by the people in the reserved forest. This suggestion will be recommended to Government. It is a hopeful sign in Palamau that the cultivators in the Government estate although, owing to the want of tahsil centres, they had to come long distances to Daltonganj to pay their rents, and though the management is in a transition state from a *ticadars* to a *khass* system, have already paid about 86 per cent of the October kist.

No special action is required, I think, in this district, but it would be as well to see what savings can be effected in the District Road Committee budget, and the condition of the people should be carefully watched and any symptoms of distress reported as soon as they occur.

C. R. MARINDIN,
Offg Commissioner, Chota Nagpur.

No 1J T., dated Camp Jajpur, the 5th November 1896.

From—R. C. DUTT, Esq, C.I.E., Officiating Commissioner of the Orissa Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to bring to the notice of Government that the prospects of crops throughout this Division are considerably worse now than they were a month ago, and that the early cessation of rains has done more harm, and gives us more grounds for anxiety, than the floods of this year which were reported in September last.

CUTTACK

2 The Collector of Cuttack, writing on the 26th ultimo, reports that the price of common rice had risen more than 20 per cent. over the normal price, as shown below.—

Marts.	Seers per rupee (last market day of July).			Seers per rupee (last market day of October).	
	Srs.	ch.		Srs.	ch.
Cuttack	...	16 2	} 80 tolas to the seer	12 8	} 80 tolas to the seer
Kendrapara	..	17 3		12 0	
Jajpur	...	17 9		14 7	

The Collector adds that the high price is not due to depletion of the market, as the stocks in the district are still believed to be considerable, but to the general apprehension of failure of rice crop owing to the want of rain and the damage done by insects. If there be no rain very shortly, a serious failure of crops is anticipated, and scarcity is apprehended in many parts of the district.

3 Writing later, on the 30th October, from the interior of his district Mr. Growse says that the result of the early cessation of the rains is that the winter rice, which was replanted after the severe floods of July and August, and much of which promised a good return, is withering for want of moisture, and a great deal of it has already been spoilt. There is time yet, if there be rain within a week, to save some of the crops, but the sky shows no sign of rain. The *beah* crop in the area not protected by canals was destroyed by the floods of July and August, the *laghu sarah* or early-winter rice in the same parts has been much damaged or destroyed by an insect-pest; and the regular winter rice too is likely to fail on account of want of the late rains. Some scarcity in these parts seems therefore to be inevitable.

4 On the other hand, the crops in the area under irrigation from canals are said to be in good condition. The Collector reports the irrigated area to be 148,187 acres, but it does not

appear if he has included the large area which has been brought under irrigation within the last fortnight. There is a rush for canal water, and the Canal Revenue Deputy Collector informs me that within the last half of October leases have been executed for irrigating something like 40,000 acres, over and above the area which was under irrigation before. But even if the total irrigated area comes up to one hundred and seventy or eighty thousand acres, that represents less than one-fifth of the whole area of the district under rice cultivation.

5 The Collector believes there are still considerable stocks of rice in the district, though the exportation since the last cold season has been continuous and almost phenomenal. But the mahajans and big zamindars are now chary in parting with it, and hence there is difficulty sometimes in getting rice in the market and the prices are high. The prices of rice given by the Collector in his report of the ^{30th October} and November are these:—

				Seers per rupee.		
				Mrs. ch.		
Cuttack	11	3	} 80 tolas to the seer.
Kondrapara	15	2	
Jampur	13	2	

There would seem some mistake in the figures for Kendrapara unless prices there have gone down since the previous week, which is unlikely. A further reference will be made to the Collector on this point.

6 I have also consulted Raja Baidya Nath Pandit, Babu Lakhi Narain Rai Chaudhri, Babu Juggo Mohun Lal and other intelligent zamindars of Cuttack district as to the prospect of the crops, and the information which they give me is in substance the same as is supplied by the Collector. The rice within the irrigated area is practically safe, and we may expect to get there a crop not very much below the average. Outside the irrigated area the outturn is expected to be 6 annas, or even 4 annas only, 16 annas representing the average crop. Raja Baidya Nath estimates it at 6 annas, Babu Lakhi Narain at even less. Babu Juggo Mohun Lal thinks there will be some scarcity in parts of the district, but not a regular famine.

7. With regard to stocks of rice, both Raja Baidya Nath and Babu Juggo Mohun Lal assure me that there are still considerable stocks of rice in the district, but it is not coming to the market. In the first place, the larger zamindars keep considerable stores of paddy for being advanced to their rayats, and the Raja himself has paddy in store worth about Rs 25,000. But this rice is not meant for sale in the market, and is therefore not brought to the market. In the second place, the mahajans too have large stores yet, but are holding back in view of the impending scarcity and in order to keep up the price, and hence the difficulty sometimes felt in getting a sufficient supply in markets.

8 Since coming to Jajpur subdivision, I have made enquiries from the Subdivisional Officer as well as from Mr Webster employed on settlement work. A large part of this subdivision being under irrigation, the state of things here is considerably better than in the eastern subdivision of Kendrapara. The high prices of rice are a gain to those cultivators who have got rice. Rice sells here now at 9 seers (of 105 tolas the seer) per rupee, but Mr Webster informs me that one benevolent mahajan persists in selling at 11 seers the rupee for the benefit of the common people, much to the disgust of his brother mahajans. The Subdivisional Officer thinks that in the irrigated tracts the outturn may be expected to be 12 annas, but that outside that area the crop can scarcely be over 4 or 6 annas. This may be taken to be generally correct for the whole of the Cuttack district, and scarcity is apprehended in those parts which have little or no lands under irrigation.

BALASORE.

9. The Collector of Balasore, writing on the 27th October, reports that the prospects of crops in his district are extremely unsatisfactory and precarious. There was some local rainfall in a part of Bhadrak subdivision and in some parts of Bahupal thana, but elsewhere the crops on high lands are withering. They are being irrigated from tanks, *nalas* and water channels, wherever possible, but the area which can be so watered is very small compared with the total area under the rice crop. A kind of insect-pest has also made its appearance in some localities and has done much damage. Writing later, on the 31st October, Mr. Dé states that the crops on low lands are being irrigated from rivers, khals and tanks, but those on high lands are withering. Mr. Dé does not hope for more than a four-anna crop for the whole district.

10 The prospects in Bhadrak subdivision would seem to be somewhat better than in the rest of the Balasore district. Babu Sriram Chunder Bose, late Subdivisional Officer of Bhadrak, now employed on settlement duty, informs me that a six-anna crop may be expected for the whole of that subdivision. He apprehends some scarcity and distress, but not a general famine. The worst portions of the subdivision are parganas Bhera, Ankura, Byang and Kalma, and it is very likely that there will be some distress in those parganas. But people go in large numbers from these places to Calcutta for employment, and many will find employment in railway works in the district.

Babu Sriram Chunder Bose thinks that some relief operations may be necessary in February or March next for the support of those who are unable to work or fail to find work.

11 Rai Hari Ballabh Bose Bahadur has estates in Balasore district, and has lately visited portions of that district and of Cuttack. He informs me that many raiyats who were averse to taking canal water for irrigation so long are coming forward in large numbers and executing leases for five years to save their crops this year. He says the disinclination on the part of cultivators to use canal water in ordinary years is due to the fact that the irrigation rate is comparatively high. In Burdwan district, where the rental of rice lands is about 5 or 6 rupees the acre, a sum of only 12 annas the acre used to be charged, if I remember rightly, for irrigation from the Eden Canal. In Orissa, where the rental of rice lands is about 2 or 3 rupees the acre, the irrigation rate is Re 1-8 the acre. Rai Hari Ballabh rightly observes that in some places the irrigation rate equals or exceeds the rental. Considering the comparatively low rental in Orissa, the irrigation rate would seem to require revision, especially when it appears, as it does in the present year, that the area under irrigation can be considerably increased. The subject is one which requires some enquiry and careful consideration.

PURI.

12. The Collector of Puri, in his reports of the 26th and 28th October, writes that the prospects of winter rice are bad, that the crops on high lands are withering, and that the insect-pest has done considerable harm, but is now diminishing. Mr. Bell estimates a general outturn of 7 to 8 annas, and I shall be glad if he does not find reasons to reduce even this low estimate after further enquiry.

13. As in Cuttack, the Nakodas or Bombay merchants are still buying up rice for export, and this proceeding is looked upon with indignation and alarm by the people. Mr. Bell thinks that most of the rice exported by sea from Puri district at present goes to Ceylon.

14. As in Cuttack, the stores of rice are believed to be still large in Puri district. Mahajans and zamindars are in the habit of storing surplus paddy for years together, and they are holding back now in view of the impending scarcity. Prices are fluctuating, but Mr. Bell expects they will in a few weeks settle down at fairly steady though high rates.

15. Rai Hari Ballabh Bose Bahadur and Chowdhri Krittibas Das inform me that as in Cuttack there is sometimes difficulty in getting a sufficient supply of rice in the market in Puri. Chowdhri Krittibas takes a very gloomy view of things, specially with reference to Kotdesh pargana. Floods in that pargana and in some other parts of Puri are annual, and the stocks of grain are therefore poorer than elsewhere. The Chowdhri even expects a widespread famine as in 1866, but the information which I have detailed in the preceding paragraphs does not justify us in taking a view quite so gloomy.

ANGUL.

16. The Deputy Commissioner of Angul writes in his report dated 26th October that the *beali* and *laghu* (autumn rice and early winter rice) have yielded half the average outturn in spite of the damage done by the insect-pest. These crops are roughly estimated to grow on 30 per cent of the entire area under rice.

17. *Saradh* or regular winter rice grows on the remaining 70 per cent. of the rice area, and about one-half of this area which grows *saradh* is irrigable from tanks, reservoirs, &c. Mr. Wyllie thinks that the rice in the irrigable area will be fully saved, while that in the other half, which is not irrigable, will utterly fail. It will seem therefore that the people of Angul have got a half yield of the early rice and expect a half yield of the winter rice, and they are better off therefore than the people in the regulation districts of Orissa.

18. With respect to miscellaneous crops Mr. Wyllie reports that the *burhi* has been seriously damaged for want of rain and will not yield over 6 annas; the *raani* is more seriously damaged and will not yield over 4 annas, but the sugarcane and *arhar* are doing well. The areas on which these last crops are grown are, however, small.

19. In the Khondmal subdivision there was some rainfall, and the Subdivisional Officer has no anxiety as to any serious failure in crops when he wrote last.

20. You will observe that I have not compiled this report under the Bengal Famine Code. There is no actual scarcity or distress in our midst yet, and I do not apprehend any serious distress for a few months yet. We are attempting in the meantime to obtain the most reliable information from all available sources and to find out exactly how we stand. The information which has been obtained so far is decidedly unfavourable. All over the Division outside the irrigated area the outturn of rice will be very poor, and some scarcity and distress may be expected. On the other hand, there are two circumstances in our favour, as I stated six weeks ago in my report on the floods of July and August last. There is yet some stock of rice in the country in the hands of mahajans and zamindars; and there is an exceptionally large field for labour in the railway works which are now under construction. My latest information, however, is that the distress in Bihar has driven numbers of Bihar labourers to these works, and they are preferred to the Uriya their steady work.

No 618Met, dated Darjeeling, the 18th September 1896.

From—P NOLAN, Esq., C.S., Commissioner of the Rajshahi Division,
To—The Secretary to the Government of Bengal, Revenue Department.

THE Lieutenant-Governor will have observed that there has been in this Division a deficiency in the rainfall of the present monsoon season, followed by a remarkable rise in the price of rice.

The following table brings together the relevant facts:—

DISTRICT.	RAINFALL FROM 16TH MAY TO 16TH SEPTEMBER.			Price of common rice on 31st August, seers per rupee	Proportion borne by <i>bhados</i> to total rice crop of district	Estimated outturn of <i>bhados</i> in annas	REMARKS
	Actual	Average	Deficiency				
1	2	3	4	5	6	7	8
Rajshahi ..	31 30	41 06	—9 76	8. CH 9 0	13 6	8	
Dinajpur	30 37	53 78	—22 79	9 10	8 9	8	
Jalpaiguri ..	55 49	100 92	—45 03	11 0	28 3	6	
Darjeeling	92 33	96 32	—3 99	11 0	32 3	6 in the hills 4 in the Terai	
Rangpur ..	46 03	61 11	—15 09	9 0	22 0	12 5	Kurigram .. 16 Nilphamari ... 10 Gaibanda ... 12 Sadar .. 12
Bogra	37 26	49 56	—12 30	9 12	38 3	12	
Pabna	38 02	43 28	—4 66	10 8	16 2	10	

2. The following remarks by the District Officers in answering enquiries made by me on the subject are of interest:—

Rajshahi —“The yield of the *aus* paddy is not expected to be more than 8 annas of an average crop. The prospects of the *aman* paddy are becoming less and less certain. The Padma has risen, and the flood water is entering the *bils*. This will save the crops in the low lands, but unless we get good rain soon, the *aman* crop in the Barind will be jeopardized. The price of rice has risen, but the prospects are not such as to cause very great anxiety, although they require to be keenly watched.”

Dinajpur —“In Thakurgaon and the west of the district jute and sugarcane are the principal crops. The outturn is distinctly better than last year. The only circumstances which will prevent the outturn from reaching the estimate will be want of water to steep the jute. Thakurgaon, however, has had over 8 inches of rain last week, and prospects in that subdivision are distinctly better. In the extreme south and east of the district the crop consists chiefly of rice, both *bhados* and *aman*. There was heavy rain in the beginning of July, and no complaints have reached about the *aman*. In the immediate neighbourhood of Dinajpur itself, that is, a radius of 10 miles, prospects are bad. There is no water to steep the jute, and the winter rice seedlings after having been transplanted have dried up. If there is any distress, it will be in this tract.”

On September 3rd Mr. Mullick reported that “there has been over 3 inches of rain since Monday, and prospects have greatly improved.”

Jalpaiguri —“The present price of rice in Jalpaiguri is 10 seers, Alipore 10 seers, Malakata 8 seers, Mynaguri 9 seers, and Boda 9 seers per rupee. If there are favourable rains for the *aman* crop, I do not anticipate that the prices will rise much higher.”

Darjeeling —“In the hills the Manager of Government Estates reports the outturn of *aus dhan* cultivated by the Lepchas and Bhutias to be 6 annas, owing to want of timely rains. He estimates the outturn of *aman dhan* at 8 annas, owing to a similar cause. The Deputy Collector of Siliguri reports that the actual outturn of *aus* crop has fallen considerably short of expectations, owing to the insufficiency of rain. The expected outturn in the Terai is quoted at 4 annas.”

Bogra —“Excepting in a few isolated localities in the northern and western parts of the district we had plenty of rain in June and July to enable the cultivators to finish the winter rice. The winter rice is grown to be 16 annas, transplanting has been finished in about 1/2 land. But for the cessation of the rains in August the winter rice by this

time would have been in the most flourishing condition. As it is some lands on higher levels are still remaining to be cultivated, and although no injury to the standing crops has been done yet, rain is very urgently wanted, and if we do not get a copious shower of rain within the next fortnight, prospects of the *aman* crop will be gloomy."

Pabna.—"The *aus* crop has to a great extent suffered, owing to the insufficient and irregular rainfall during the sowing and flowering time. In February and March last there was .25 and .45 inches of rainfall respectively, consequently the sowing could not be carried on at the proper time. Again, the excessive and incessant fall of rain in June last retarded the progress of harrowing and weeding operations. In July 1896 the want of flood-water has seriously injured the crop on the high land, during its flowering time, the plants having withered away to a great extent. About one half of the cropped area is high land, and as such is more affected by the low flood and deficient rainfall. The outturn, as far as I have ascertained on local enquiry, has been 10 annas on the average."

"*Aman dhan* is extensively cultivated in the district. The *aman* crop is in a critical condition. The floods are the lowest known within living memory, and rainfall has been very scanty. If we get heavy rainfall now, the *aman* crop may be a 6 anna crop, if we get no rain, it may be only a 2 to 4 anna crop."

3. The adequacy of the food-supply for the year will depend on the result of the *aman* rice harvest, and its prospects are still uncertain. The only precautionary measure I have thought it expedient to take is the revision of the programmes of famine works, with a view to obtain professional sanction to the larger projects.

NOTE.

From a return received to-day, I learn that on the 5th instant common rice sold in Sirajganj at the rate of seven seers the rupee. This is the highest price on record, I find nothing in the tables, published with Sir Antony Macdonnell's volume on the Bihar famine, beyond eight seers a rupee, the figure attained at Muzaffarpur, and there only in May 1874. In October 1873 the price at Sirajganj was 17 seers the rupee, its highest range during the following season was 11 seers. Last *Calcutta Gazette* showed 8 seers as the limit, this was attained in four districts, Rangpur, Mymensingh, Tippera and Hooghly. I have information later than the Gazette only as to Bogra (8½) and the Dajeeeling Terai (8 to 10). There is a report in the bazar here, I do not know whether it has any prevalence, that the price this season is to reach four seers the rupee. Wheat has risen in proportion, and barley where it is much sold.

2. These extraordinary rates lead me to refer to the estimate of the outturn of the *aus* harvest, and the prospect in regard to the *aman* crop. Combining the information given, I find that the whole yield of rice in the Division is calculated for the year as follows:—Jalpaiguri, 6 annas, Dajeeeling, 7 annas, Rajshahi, 9 annas, Dinajpur, 10 annas, Pabna, 10 annas; Bogra and Rangpur, 12 annas. The degree of failure represented by these figures, though large in itself, is small when compared with that experienced by the worst districts in 1873. Referring to the returns for a few districts, I find that in Shahabad the *aus* was half an average crop, the *aman* a fourth, in Saran the *aus* two-thirds, the *aman* one-tenth, in Dinajpur, where the *aus* is insignificant, the winter harvest was in places three-eighths, in others a quarter, and in some localities nothing was obtained. The Collector of Bogra attributes the high prices to failure elsewhere, and in this I agree, so far as his district is concerned, and Sirajganj. In Jalpaiguri and the Terai the local failure will account for the state of the market. The claim is not to Calcutta for Bihar and the north-west, but to Mymensingh and the east. A very moderate demand for export will produce a great effect, as there is no surplus. The failure has been general throughout India, and when one district, in the course of trade, relieves greater necessities of another, it is out of stocks which in ordinary years would be consumed at home. Thus Bogra requires, to feed its own population properly, more than the three-quarter crop it is likely to get, and prices there must rise high indeed before they can attract away what can be dispensed with only by a reduction in consumption.

3. At this stage there is not much to be done by way of preparation. I have impressed on Collectors the importance of accuracy in the price returns, and of judgment in the estimate of crop outturns, particularly in regard to *aman*. I went over the estimates for relief works on the spot during the rains in all districts, except Dinajpur and Bogra, which are the first I will visit in the winter, and in regard to these two last, I am in correspondence with the local officers. They understand the importance of getting the "huge" works, as defined in the Famine Code "sanctioned" in time, and of being ready to start the small works as a test. There has been no complaint as yet, nor do I anticipate any until February; the jute has been a tolerable crop, and the high prices it has fetched have put a great part of the population in funds. But we must remember that the abundance of money in some quarters only tends to raise prices, and if this rise does not attract imports, as this year it will not, the effect is rather to concentrate than to relieve the suffering incident to an insufficient supply of food.

P. NOLAN

10th October 1896.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS FROM
JANUARY TO OCTOBER 1895, COMPARED WITH THE FIGURES FOR THE
CORRESPONDING PERIOD IN 1896.

THE following memorandum and statements are published for general information.

STATISTICAL DEPT.,
The 23rd November 1896.

M. FINUCANE,
Offg. Secy. to the Govt of Bengal.

THE only articles under food-grains on which export duties are charged are—rice, paddy, and rice flour (cheera). The rate is 3 annas per Indian maund (82½ lbs.). There is no import duty on food-grains of any sort.

The imports of food-grains into Calcutta from foreign ports are small. During the first 10 months of the years 1895 and 1896, the total imports were as follows.—

		Owts.
January to October	1895	789
	1896	138

Hong-Kong supplied only 72 owts. in the 10 months of 1895, against 120 owts during the same period in 1896.

From the coast ports the only imports are rice and paddy, the quantities received in Calcutta from January to October 1895 and 1896, being—

	1895.	1896.
	Owts.	Owts.
Rice	651,331	1,100,604
Paddy	27,715	501,345
Total	679,046	1,601,949

These figures show a remarkable increase of 922,903 owts., or 135·91 per cent. Compared with these, the imports of rice from Burma are inconsiderable, as shown below :—

	1895.	1896.
	Owts.	Owts.
From Rangoon	10,635	2,382
„ Moulmein	3,152	6
„ Akyab	...	305
Total	13,787	2,693

Burma rice goes for the most part to foreign countries, the chief importers being the United Kingdom, Egypt, the Straits Settlements, and South America. The total quantities of rice and paddy exported from Burma during 1894-95 and 1895-96 were as follows—

	1894-95.	1895-96.
	Tons.	Tons.
Husked rice—		
To Foreign ports	1,139,028	1,230,609
„ Indian „	274,181	137,560
Total	1,413,209	1,368,169
Paddy—		
To Foreign ports	5,964	1,140
„ Indian „
Total	5,964	1,140

Out of the above supply, only 1,182 tons of rice were sent to Bengal during 1895-96, against 38,057 tons in 1894-95.

Balasore and Chandbali are the ports which ship the largest quantities of food-stuffs to Calcutta, as the following figures will show :—

		Rice Cwts.	Paddy. Cwts.	Total. Cwts.
Balasore ...	Jan to Oct 1895	156,453	7,516	163,969
	Ditto 1896	229,149	100,196	329,345
Chandbali...	Jan to Oct. 1895	474,259	20,199	494,458
	Ditto 1896	855,887	385,471	1,241,358

In the case of Balasore, the increase in the trade of the current year is 100·86 per cent, and in that of Chandbali 151·05 per cent.

The following figures show the total exports of food-grains from January to October 1895 and 1896, both months inclusive—

	1895 Cwts	1896. Cwts
To Foreign ports ...	8,213,733	5,315,786
„ Indian „ ...	2,421,727	1,438,269
Total ...	10,635,460	6,754,055

The total decrease during the past 10 months amounts to 36·49 per cent. The falling off in the exports to Foreign ports is 35·28 per cent, and to Indian ports, 40·61 per cent.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

M. FINUCANE,

Offg. Secy to the Govt. of Bengal

COMPARATIVE STATEMENTS OF THE PRICES OF FOOD-GRAINS.

RETAIL prices of common rice and other food-grains in the several districts of Bengal and in the neighbouring districts of the North-Western Provinces during the first and second fortnights of October and the first fortnight of November 1896, as compared with the corresponding periods of 1895, are published for general information.

M. FINUCANE,

Offg. Secy. to the Govt of Bengal.

REVENUE DEPARTMENT, the 24th November 1896.

From the above figures it will be seen that the price of common rice is between 80 and 100 per cent. higher, and in some districts, especially in those of Orissa, more than 100 per cent. higher than at the corresponding time of last year. This is due to a great extent to exports from Orissa, which have increased very considerably this year.

RAINFALL AND MOISTURE IN THE SURFACE SOIL.

Memorandum by the Meteorological Reporter to the Government of Bengal on the rainfall in Bengal for the present year to the end of October, and a somewhat more extended consideration of the prevailing lack of moisture in the surface soil.

THE following tables, giving the average rainfall for the larger divisions of Bengal month by month, show an almost entire absence of rain during the first three months. Such small amounts of rain as fell have produced little permanent improvement, being usually a few tenths of an inch, sufficient to moisten the surface only. The drought continued till the middle of April, from which time thunderstorms with rainfall became more frequent in Bengal, and afterwards, that is, towards the end of April, in Bihar, Chota Nagpur and Orissa. From the middle of April till the commencement of the monsoon, rainfall was more frequent and copious in North and East Bengal than in normal years, about normal in South-West Bengal and Bihar, and considerably below the normal in Orissa and Chota Nagpur, especially the latter. This rainfall being due to thunderstorms was irregular in its occurrence, but never very heavy in amount.

With the setting in of the monsoon a marked change appeared. A low pressure area formed over the north of the Bay, and within this one cyclonic storm after another developed. They followed almost the same track westward across Orissa and part of Chota Nagpur, and caused much heavier rainfall in the southern districts than in the north of the province.

In June South-West Bengal, Orissa and Chota Nagpur received from 28 to 62 per cent, and in July Orissa and Chota Nagpur from 12 to 31 per cent in excess of the normal. During these weeks from the middle of June to the end of July the northern districts received less than usual. North Bengal had only 49 per cent of the normal in June, with practically the usual amount in July, and Bihar rather over 80 per cent. throughout. The effect therefore of the continued low pressure in the north of the Bay was to deprive North Bengal and Bihar of a considerable portion of the rainfall in perhaps the most important part of the monsoon season.

From the beginning of August there was a decided weakness in the monsoon current, except in Orissa where the average rainfall was 28 per cent. in excess. The total fall in North Bengal was only 39 per cent, in East Bengal 46 per cent, and in South-West Bengal and Bihar from 70 to 75 per cent. of the normal. The rainfall occurred during the passage of shallow depressions, and it was not well distributed, especially in Bihar, where a large proportion of the rain was received in heavy falls on the 21st, 22nd and 23rd. Thunderstorms were more frequent than usual, and being followed by brighter sunshine, an appreciable part of the rainfall was probably soon lost in vapour.

There would have been very little rain in September but for a shallow depression which formed in the north of the Bay about the middle of the month, and followed zig-zag path, first north into the Sundarbans, then west across Lower Bengal into Chota Nagpur, and afterwards north-east into North Bengal, where it filled up. This irregular course brought every part of the province under its influence, except the extreme west of Bihar, where very little rain fell throughout the month. There were several days of general rain, moderate in amount in Lower Bengal, Orissa and Chota Nagpur, but excessive in the east of Bihar and north of Bengal during the two last days of the existence of the depression. The average fall during these two days must have been about 8 inches, a large portion of which must have been carried away by surface drainage. From the middle of the month rainfall became more scattered, and in Bihar almost entirely ceased. The greater part of the rainfall in the last week was in East and North Bengal, but at times it spread westwards, though in no great quantity, to South-West Bengal and Orissa. In consequence of the heavy fall in the middle of September in North Bengal and the continued showery weather throughout in East Bengal, these were the only divisions that received excess falls. In the west and centre of the province amounts were from 12 to 35 per cent in defect—the latter in Chota Nagpur.

From the beginning of October rainfall all but entirely ceased, except in North Bengal, where light showers fell at the beginning and towards the end of the month. The average fall was practically nil, except in East Bengal, where it was 9 per cent, and North Bengal, where it was 26 per cent of the normal fall. In addition to the absence of rainfall, day temperatures were steadily several degrees above the normal, and the hot dry westerly winds which blew across a great part of the province must have quickly dried up whatever moisture was near the surface.

In discussing the connection of rainfall with crops whose roots may be assumed to pass only a few inches below the surface of the ground, a consideration of great importance, I think, is the depth of the sub-soil water. My reason for attaching importance to this is that moisture at a considerable depth below the surface may be raised through the pores of the soil by capillary action, and in ordinary years, when the sub-soil water is at its normal depth or higher, this action gives an adequate supply of moisture even if there should be scanty rainfall. If the sub-soil water be taken into account, a consideration of the rainfall during 1896 is not sufficient to account for the present condition of the soil, and it is doubtful if even that of 1895 will satisfactorily explain the present want of moisture. Starting, however, with the assumption that the depth of the sub-soil water was normal at the beginning of 1895, the rainfall of that year was so unsatisfactory that there must have been a greater loss than usual, partly by drainage and partly by evaporation.

The following tables give the rainfall during 1895 month by month for the various divisions, the second as percentages of the normal, the first in inches, and they both show the difference from the amounts usually received during the respective months. In the early part of the year there was unusually little rain, except during April, when every division received more than the normal amount. On the whole it may be taken that there was during the first six months a greater loss of moisture than usual in the soil, not only near the surface, but at greater depths, and that the surface of the subsoil water was depressed below its normal level.

During the monsoon months from July to October rainfall was considerably in excess in parts of the province, but those divisions which show more than the usual amount one month had less the following month; for example, in July excess rainfall was confined to North Bengal and the east of Bihar, and in August to Orissa and the west of Bihar. At other times all divisions received less than the usual amount, and the average fall for the monsoon season was below the normal over the whole province. The loss of moisture which had been going on from the beginning of the year must therefore have continued till the end of September. The crops in that year would undoubtedly have suffered from the shrinkage of the subsoil water if timely rain had not fallen at the beginning and towards the end of October. During November and December there was very little rain except in East Bengal, where more than an inch fell during the passage of a depression unusually late in the season. Taking the average for the whole year, the rainfall in every division of the province except Orissa received from 11 to 29 per cent less than the usual amount of rain in 1895, and on the assumption that the soil had an average amount of moisture at the beginning of the year, there must have been considerably less than the average at the end.

This condition was probably intensified by the character of the rainfall during the monsoon season of that year, the peculiarity being even more marked in 1896. This was the comparative absence of cyclonic storms, which cause cloudy weather with moderate general rainfall over a wide area, and the more frequent occurrence of local disturbances or thunderstorms attended by a short but heavy downpour, a large portion of which would fail to penetrate the surface, being carried off by surface drainage. Whether the surface were drained or not, the period of rainfall being shorter than usual, and the sunshine greater, there would under these circumstances be greater evaporation and a further loss of moisture. This loss would, no doubt, be of importance when withdrawn from a soil already deprived of a portion of its normal amount of moisture.

Without referring to the depth of water in tanks, which I have no doubt would support my conclusion in most parts of the province and certainly in the neighbourhood of Calcutta, I think it safe to assume that the sub-soil water was much lower than usual at the beginning of 1896, and that the upper layers of the soil were in consequence drier, though it might not have been to a very marked degree.

The information regarding the rainfall of 1896 given in the early part of this memorandum, shows that the deficiency of moisture with which the year began has never been made up, but has at times greatly increased. In the early part, that is, up to the middle of April, there was not only unusually scanty rainfall, but temperature was month by month several degrees above the normal and occasionally higher than has been recorded at corresponding dates since the present system of meteorological observation began. The double loss of moisture in the soil must, therefore, have continued, owing to the scanty rainfall and the evaporation of such water as reached the surface from below.

Rainfall became more general from the middle of April, and more than the usual amount fell till the early part of the monsoon season was over, that is, till the end of July. From that time till now not a single cyclonic storm formed in the Bay, but one or two shallow depression passed over the province in August and one in the middle of September. Except during the existence of these shallow depressions, much of the rain that fell was caused by local thunderstorms and was less efficacious than the same amount would have been if it had been allowed time to penetrate to a distance below the surface. The monsoon rainfall of the present year has not, therefore, added much to the supply of subsoil water, and the disastrous effects on the crops which have followed the almost entire absence of rainfall since the middle of September must be partly due to that fact.

The absence of reserve moisture below the surface must remain for months to come a serious danger to all crops, as they will require more than usually favourable rainfall for their support. There is no immediate prospect that rainfall will be either more plentiful or more frequent, and the next chance will come with the season for cold weather rainfall in January.

I have attempted to show that—

- (1) the subsoil water has been falling more rapidly than usual during the past two years in the drier months
- (2) the monsoon rainfall in both 1895 and 1896 was not sufficient to supply even what is lost in ordinary years, so that when the rain ceased in the middle of September, the subsoil was inadequately charged with moisture
- (3) the hot westerly winds during October rapidly dried the surface layers of the soil, and the moisture necessary for the support of the crops was restored neither by occasional rainfall nor by capillary action from the subsoil.

C LITTLE,

Meteorological Reporter to the Govt. of Bengal

FAMINE AND SCARCITY.

1874

Cause.—The winter rice crop of 1872 was only half an average crop. The rainfall of 1873 was very unseasonable as in other districts. The *aus* rice crop, however, escaped injury except in places where it was damaged by floods, and the winter rice crop, though seriously injured, was well over half an average crop. The prevalence of epidemic fever for the past ten years had materially added to the troubles of this district.

Private trade.—Private trade in food-grains was reported to have been active in this district throughout the period of distress, but from a consideration of the returns of trade during the year, Mr MacDonnell did not believe that the district derived much help from outside. Prices were throughout cheaper in Burdwan than in many other districts, and consequently exportation from the district never ceased.

Relief given.—The expenditure of cash and grain in relief was as follows:—

			Grain. Tons.	Cash. Rs.
Charitable relief	6,812	5,46,723
Wages of labour	1,495	62,277
Loans	3,002	70,559
Grain sold for cash	4
Total			11,313	6,79,559

The number of persons charitably relieved averaged in each fortnight as follows:—

In fortnight ending	9th March	1874	115
Ditto	23rd "	"	142
Ditto	6th April	"	6,987
Ditto	20th "	"	13,370
Ditto	4th May	"	10,625
Ditto	18th "	"	10,939
Ditto	18th June	"	11,351
Ditto	15th "	"	12,182
Ditto	29th "	"	26,000
Ditto	13th July	"	55,046
Ditto	27th "	"	58,932
Ditto	10th August	"	69,551
Ditto	24th "	"	61,196
Ditto	7th September	"	67,869
Ditto	21st "	"	60,828
Ditto	5th October	"	68,492
Ditto	18th "	"	5,600
Ditto	2nd November	"	5,663
Ditto	16th "	"	4,761
Ditto	30th "	"	3,475

The numbers so relieved were equivalent to 250,989 individuals relieved for the period of one month. It will be noticed that gratuitous relief was given in this district up to a much later period than was found necessary in other districts.

The average daily attendance on the relief works in each month was as follows —

January 1874	...	1,168	June 1874	...	11,574
February "	...	3,513	July "	...	7,571
March "	...	3,359	August "	...	5,252
April "	...	6,430	September "	...	2,206
May "	...	9,613			

This was equivalent to 50,686 persons relieved by wages for the period of one month.

Since 1874, the district has been free from scarcity and famine.

* Separate estimates of outturn are not available for each subdivision.

FAMINE AND SCARCITY.

1874.

Cause.—The winter rice crop of 1872 was a short one, except towards the east. The rainfall of 1873 was very irregularly distributed. It was scanty in May and June, excessive in July and August, and quite insufficient in September and October. The outturn of *aus* rice was estimated at 9 annas, and that of winter rice at only 6 annas, the failure of the crops being greatest in the central parts of the district. The distress of the people consequent on the short harvest was further aggravated by epidemic fever of a virulent type which had been prevailing for some time, and by a serious outbreak of cholera in March and April 1874, which spread over the entire district and caused much mortality.

Private trade.—It was a noteworthy fact that the exports of food-grains from the district during the 12 months ending with September 1874 exceeded the imports by nearly 1,400 tons, the import including some 3,900 tons despatched by Government for purposes of relief.

Relief given.—The actual expenditure of cash and grain incurred by Government in relief was as follows:—

	Grain Tons	Cash. Rs.
Charitable relief	1,725	49,456
Wages of labour	1,004	64,809
Loans	800	61,615
Total	3,529	1,75,880

The average number of persons charitably relieved was as follows:—

In fortnight ending	9th March	1874	149
Ditto	23rd "	"	680
Ditto	4th April	"	63
Ditto	18th "	"	1,796
Ditto	2nd May	"	3,600
Ditto	16th "	"	5,475
Ditto	30th "	"	9,801
Ditto	13th June	"	10,913
Ditto	27th "	"	18,014
Ditto	11th July	"	20,254
Ditto	25th "	"	24,615
Ditto	8th August	"	31,395
Ditto	22nd "	"	38,321
Ditto	5th September	"	37,439
Ditto	19th "	"	31,243
Ditto	3rd October	"	21,957

These were equivalent to 120,157 individuals charitably relieved for a period of one month.

The average number employed on relief works was as follows:—

February 1874	652	June 1874	10,352
March "	2,107	July "	6,655
April "	3,846	August "	7,826
May "	8,054	September "	5,194

These were equivalent to 44,486 persons relieved by wages for one month.

Since 1874, the district has been free from scarcity and famine

† The Collector estimated the outturn of *bhadoi* rice as 14 annas, and that of winter rice at 6 annas. The figure given is taken from Mr. MacDonnell's "Food-grain Supply," and includes *bhadoi* and winter rice both.

* Separate subdivisional figures are not available.

FAMINE AND SCARCITY.

1874.

Cause.—The year 1873 was ushered in by a short winter rice crop in 1872, estimated at only one-half of the average. The rainfall of 1873 was unseasonably distributed, as in Birbhūm, with the result that the rice crop (including both *aus* and *ahant*), which is practically the only source of food-grains in the district, gave a little over seven-sixteenths of the average outturn.

Private trade.—Importation of food-grains seem to have been steadily carried on, but up to March 1874, they were nearly balanced by the exports *via* Raniganj. Since March, however, there was very little export, but food-grains continued to be imported from Midnapore and Chota Nagpur, though in an intermittent manner.

Relief given.—The expenditure of cash and grain is exhibited below —

	Grain Tons	Cash Rs
Charitable relief	930	1,02,659
Wages of labour	797	96,850
Loans	1,290	56,005
Grain sold for cash	87	
Total ..	3,104	2,55,514

The number of persons charitably relieved was as follows —

In fortnight ending 22nd March	1874	489
Ditto 6th April	"	1,432
Ditto 20th "	"	3,513
Ditto 4th May	"	6,852
Ditto 18th "	"	8,130
Ditto 1st June	"	10,909
Ditto 15th "	"	14,446
Ditto 29th "	"	21,635
Ditto 13th July	"	36,899
Ditto 27th "	"	39,398
Ditto 10th August	"	32,802
Ditto 24th "	"	17,645
Ditto 7th September	"	15,354
Ditto 21st "	"	11,240
Ditto 5th October	"	7,319

These were equivalent to 107,828 individuals gratuitously relieved for a period of one month.

The average attendance in the relief work was as follows.—

March 1874	2,291
April "	1,890
May "	2,639
June "	3,492
July "	3,651
August "	4,103
September "	3,002

These were equivalent to 21,368 persons relieved by wages for a period of one month.

Since 1874 the district has been free from scarcity and famine

FAMINE AND SCARCITY

1874

In 1874 the district of Midnapore was entirely free from any suffering arising out of scarcity or failure of the crops, although, in consequence of the prevalence of the epidemic fever in the north-east part of the district, some relief was found to be necessary

1888 AND 1889.

Some relief was given in the Contai subdivision of Midnapore in 1888 and 1889, but the distress was solely due to the heavy floods of 1888, and not to failure of the rains

There was no distress in 1892.

• FAMINE AND SCARCITY
1874.

Mr. MacDonnell does not give a detailed account of the famine relief operations in this district. The winter rice crop of 1873 was a partial failure, and was about half an average crop. The following statement of the expenditure of cash and grain incurred by Government in relieving distress in Hooghly is reproduced from a table appended to Mr. MacDonnell's "Report on Food-grain Supply and Famine Relief" —

			Grain Tons.	Cash, Rs
Charitable relief	2,368	2,20,000
Wages of labour	502	1,81,020
Loans	44	58,611
Total			2,814	4,09,631

The distress was mostly confined to the northern parts of the district. Out of the 2,814 maunds of grain, only 18 maunds were distributed in charitable relief in the Howrah subdistrict. The whole of the cash expenditure was incurred in the district of Hooghly proper.

The following statement of the average daily number of persons gratuitously relieved and in receipt of wages on relief works are reproduced from the Divisional Administration Report for 1874-75 —

			Charitable relief and light labour No.	Relief works, No.
November 1873	396
December "	1,172
January 1874	1,394
February "	1,665
March "	1,268	1,550
April "	.	..	6,100	1,911
May "	14,236	1,428
June "	16,710	1,977
July "	16,968	1,685
August "	20,493	1,356
September "	50,234	998
October "	26,716	26
November "	19,954	87
December "	7,338	85

The total expenditure incurred by Government, inclusive of the value of grain imported by Government into the district, amounted to nearly Rs 5,16,000.

Since 1874, the district has been free from scarcity and famine.

FAMINE AND SCARCITY

1874

The following extract from the Collector's Annual Report for 1874-75 will give an idea of the condition of the district in 1874 —

"The scarcity of the year (1874-75) has but little affected the excise revenue .. When one remembers the widespread havoc caused by the inundation of 1871, and considers that the following season was of no special prosperity, it seems truly astonishing that the loss of half the crops of 1873 can be endured so easily ... We passed through the whole period of scarcity and distress without being compelled to do anything whatever. The administration of relief (except in the shape of work on tanks and roads) was confined to a corner of the district "

We gather from the statements of cash and grain expenditure appended to Mr Mac-Donnell's " Food-grain Supply and Famine Relief " that 43 tons of grain was distributed in the district in charitable relief, and Rs 80,466 spent in wages to labourers employed on relief works, and Rs 8,294 was advanced on loan.

1888

The Diamond Harbour subdivision and small areas in the Barrackpore and Dumdum subdivision suffered from more or less severe inundations in 1888 The distress caused thereby was unconnected with failure of the rains, and, need not therefore, be related in this note

Outturn of food-crops.

FAMINE AND SCARCITY.

1874.

Cause.—The year 1871-72 was marked by exceptionally heavy rainfall and unprecedented inundations, resulting in great injury to the standing crops and to life and property over a large portion of the district. The year 1872-73 was on the whole a prosperous year, but there was a partial failure of the crops in some places, and nowhere were the crops so good as to repair the losses caused by the disastrous season which had preceded it. The rainfall of 1873 was again unseasonable and deficient, being heavy in July and August, and scanty in May and June, and again in September and October. The result was that the *aghani* or *aman* crop did not yield more than an ordinary crop; the *aus* rice was much below the average in some places, though first rate in others.

[It is to be remembered that Nadia is perhaps the only district where the *aus* rice crop is of greater importance than the *aman* crop. According to the latest estimates it occupies nearly twice as much area as the latter. The Nadia district of 1874 included the Bongong subdivision, which has since been transferred to the Jessore district.]

Private trade.—Was reported to have been more or less active throughout the year. The district possessed a great advantage in its numerous rivers and its propinquity to the Eastern districts which were unaffected by drought in 1873.

Area specially affected.—Severe distress never prevailed in Nadia during 1874. The part of the country which suffered most was in the Meherpur subdivision, adjoining the distressed districts of Murshidabad and Rajshahi. The difficulties of this tract were enhanced by the want of drinking water, which ultimately induced a severe outbreak of cholera. Large advances in cash had, therefore, to be made for the re-excavation of village tanks.

Relief given.—The expenditure of grain and cash in relief operations during 1874 is shown below —

		Grain.	Cash.
		Tons.	Rs.
Charitable relief	...	264	54,000
Wages of labour	...	478	1,30,712
Loans	...	115	1,30,662
Grain sold for cash	...	6	...
Total	...	863	3,15,374

The numbers of people gratuitously relieved are not known; but taking two-thirds of a seer of grain or one anna in cash as the daily allowance per head, the quantity of grain and amount of cash expended in charitable relief were calculated to support 43,160 individuals for the period of one month.

The average daily attendance on the relief works was as follows:—

February 1874	...	1,662	June 1874	...	4,054
March "	...	2,409	July "	...	5,006
April "	...	1,850	August "	...	4,848
May "	...	2,348	September "	...	2,037

These were equivalent to 24,314 persons relieved for a period of one month.

Since 1874 there has been no scarcity or famine in this district arising from failure of the rains.

FAMINE AND SCARCITY.

1874.

Cause—At the opening of the year 1873, the poorer classes were suffering from antecedent losses caused by a great inundation in 1871, and by the partial failure of the winter rice crop of 1872. The unseasonable and greatly deficient rainfall of 1873 resulted in a poor outturn of the *aman* rice crop, which was estimated at about 6 annas. The *aus* crop, however, escaped injury, and gave an almost average outturn. The *rabi* crop was estimated to have yielded three-fourths of an average outturn.

Private trade—Neither the exports nor the imports of food-grains were considerable. On the whole, the exports exceeded the imports, owing to the higher range of prices which prevailed in districts more distressed than Murshidabad.

Relief given.—The expenditure of cash and grain during 1874 was as follows:—

			Tons	Rs
* Charitable relief	2 642	2,88,000
Wages of labour	707	70,795
Loans	710	26,031
Grain sold for cash	36	...
		Total	4,095	3,34,826

The average number of persons charitably relieved in 1874 was as follows:—

In fortnight ending—		In fortnight ending—	
21st March	367	11th July	13,853
4th April	379	25th "	18 465
18th "	661	8th August	19,787
2nd May	2,739	22nd "	23,397
16th "	2,154	5th September	9,847
30th "	3,237	19th "	14,077
13th June	5,906	3rd October	14,639
27th "	9,815		

These numbers were equivalent to 65,000 persons relieved for a period of one month.

The average daily attendance of labourers on relief works was as follows:—

December 1873	...	737
January 1874	...	1,892
February "	...	2,338
March "	...	2,834
April "	...	3,134
May "	...	3,103
June "	...	3,347
July "	...	2,765
August "	...	6,171
September "	...	1,967

These were equivalent to 28,288 individuals relieved for one month.

The partial distress which existed in some riparian tracts in this district in 1889 was caused by floods, and does not therefore fall within the scope of this note.

‡ Special report called for.

FAMINE AND SCARCITY.

1874.

Causes.—The deficient and unseasonable rainfall of 1873 caused an extensive failure of the rice crops. Generally speaking, the *aus* crop was one-half and the *aman* three-eighths of an average crop all over the district.

Private trade.—Private trade was fairly active, but failed to reduce high prices, and did not seem to have extended to the large trade centres. In June, the Collector reported that the price of rice had in places reached the famine rate of $7\frac{1}{2}$ seers for the rupee.

Relief given.—The expenditure of cash and grain incurred by Government is shown below:—

			Grain Tons	Cash. Rs.
Charitable relief	2,080	46,998
Wages of labour	209	51,841
Loans	380	1,83,872
Grain sold for cash	176
		Total	2,825	2,82,711

The average daily number of persons in receipt of gratuitous relief was as follows:—

In fortnight ending	4th April	1874	282
Ditto	18th "	"	1,558
Ditto	3rd May	"	4,202
Ditto	17th "	"	6,642
Ditto	31st "	"	11,457
Ditto	14th June	"	14,674
Ditto	27th "	"	21,773
Ditto	11th July	"	34,298
Ditto	25th "	"	58,830
Ditto	8th August	"	50,747
Ditto	22nd "	"	39,819
Ditto	5th September	"	23,518
Ditto	19th "	"	7,691
Ditto	3rd October	"	1,488

These were equivalent to 138,488 people relieved for the period of one month. This includes the people who were employed on light labour, such as spinning, weaving, &c., and who numbered a little more than those in receipt of pure gratuitous relief.

The average daily number employed on the relief works was as follows:—

November 1873	...	619	April 1874	...	2,971
December "	...	713	May "	...	2,162
January 1874	...	557	June "	...	1,914
February "	...	451	July "	...	979
March "	...	3,816	August "	...	878
	September 1874	...	395		

These numbers were equivalent to 14,955 people relieved for one month.

The relief detailed here is exclusive of that afforded by the labour employed on the Northern Bengal State Railway.

Since 1874 the district has been free from scarcity and famine.

DINAJPUR.

THE FAMINE OF 1873-74.

Cause.—The rainfall of 1873 was deficient by 43½ inches, that is, by more than half the normal quantity, and the September and October rains were almost wholly wanting. The result was a very poor *bhādai* crop, estimated at about one-eighth of the average, and a nearly equally poor winter rice crop, of which not more than 4 annas was saved in the whole district. The rice crop was completely lost wherever recourse could not be had to artificial irrigation, or wherever the natural basins which stud the country did not retain moisture from the early rains.

The *rabi* gave an average outturn, but in Dinajpur the *rabi* harvest is of no importance as a source of food-supply.

Private trade.—The district derived but little help from private trade, and it owed its immunity from great distress mainly to the efforts of Government.

Relief given.—The Government expenditure in money and grain is shown below:—

		Grain.	Cash.
		Tons	Rs.
Charitable relief	...	2,732	87,633
Wages of labour	...	2,981	11,61,492
Loans	...	12,531	23,800
Grain sold for cash	...	13,516	...
Total	...	31,713	12,72,425

The average daily attendance at the relief works was as follows:—

November 1873 ..	1,808	May 1874	94,797
December ..	6,055	June "	53,259
January 1874 ...	21,179	July "	25,742
February ..	29,666	August "	8,653
March ..	60,516	September "	2,543
April ..	98,208		

These were equivalent to 397,456 persons relieved by wages for a period of one month.

The numbers charitably relieved were:—

In fortnight ending on 6th April 1874	...	1,791
Ditto on 20th "	...	7,175
Ditto on 4th May "	...	12,678
Ditto on 18th "	...	19,869
Ditto on 1st June "	...	19,112
Ditto on 15th "	...	27,149
Ditto on 29th "	...	54,693
Ditto on 13th July "	...	82,512
Ditto on 27th "	...	84,307
Ditto on 10th August "	...	53,841
Ditto on 24th "	...	34,845
Ditto on 7th September "	...	26,147
Ditto on 21st "	...	17,190
Ditto on 5th October "	...	9,831

These were equivalent to 225,590 people relieved for a period of one month

The scarcity of 1892

The failure of the winter rice crop of 1891 affected a large tract of country, extending over 1,030 square miles, with a population of nearly half a million souls. The tract lay to the north of the Dinajpur branch of the Northern Bengal State Railway, and comprised Western Thakurgaon, Ranisankol thana, and a part of the Pirganj thana in the Thakurgaon subdivision, the Hemtabad thana, excluding Itiganj outpost, and a part of the Birganj thana in the Sadar subdivision. Relief works were opened in January 1892, but there were no large numbers at work till about the middle of February, when the *rabi* had perished. Heavy rain began to fall on the 16th March, and changed the whole situation. The highest daily average number of labourers employed was 2,406 in the week ending 7th May. The number then gradually diminished until the works were closed on the 2nd July.

Rupees 5,838 was advanced as loans to cultivators under the Agriculturist Loans Act.

The total cost to Government was as follows:—

	Rs.	A.	P.
Relief works	23,075	14	3
Gratuitous relief	3	15	0
Advanced under the Agriculturists' Loans Act	5,838	0	0
Total	28,917	13	3

FAMINE AND SCARCITY.
1874.

Cause —In the year 1873 there was a deficient rainfall all over the district; the deficiency was more markedly injurious in pargana Boda, in the south of the district, belonging to the then minor Maharaja of Cooch Behar, less so in the central tracts, and still less so in the north (the Duars). In the Duars the rice harvest (including both the autumn and winter rice crops) was 13 annas, in the central region 10 annas, and in Boda only 7 annas. The failure was greatest in South Boda, along the Dinajpur and Rangpur borders. Taking the district as a whole, the failure of the harvest was not such that, had stocks not been depleted by exports, any assistance from outside would have been necessary.

Private trade —Early in the year 1874, very large exports of rice took place from this district to Poonea, Dinajpur, Rangpur and Darjeeling. The activity of the export trade was something beyond precedent. It forced up prices gradually till the beginning of May, when a sudden rise took place, and by the middle of the month, the price of rice had reached the famine rate of 8 seers the rupee, and put a temporary check on the export trade. So far local stocks had been only partially depleted by exportation, the prohibitive prices reached being, it is believed, due to holders of grain keeping back their stocks in anticipation of still higher prices. The appearance of Government grain in the market, and its sale at a fixed price, put a stop to such exportations, and induced the grain-holders to part with their stocks. The export trade sprung up afresh and as vigorous as ever.

Affected area.—Severe or continuous pressure was felt only in pargana Boda, where the failure in the harvest had been greatest. The expenditure for relief in this pargana was entirely borne by the Cooch Behar State, to which the property belonged.

Relief given —The expenditure incurred by the Cooch Behar State in Boda and by Government in the rest of the district is exhibited below :—

	GRAIN			CASH		
	Government	Cooch Behar State	Total.	Government.	Cooch Behar State	Total
1	2	3	4	5	6	7
	Tons	Tons.	Tons	Rs	Rs	Rs
Charitable relief	40	120	160		1,841	1,841
Wages of labour	80	"	40	17,696	20,000	37,765
Loans	1,316	700	780	55,110		55,110
Grain sold for cash		876	2,192			
Total	1,440	1,696	3,142	72,806	21,610	94,416

Mr. MacDonnell was unable, for want of materials, to present actual figures for those relieved by the expenditure tabulated above, but estimated that the total expenditure incurred was sufficient to support 226,307 individuals for a month.

SINCE 1874 the district has been free from serious scarcity.

FAMINE AND SCARCITY.

1873-74

THE Darjeeling district was included in the partially distressed tracts in the famine of 1874. The records at hand do not furnish materials for a detailed account of the relief given in this district. The following statement of the expenditure of cash and grain incurred by Government is taken from Mr. MacDonnell's "Food-grain Supply"—

			Grain Tons.	Cash Rs.
Charitable relief	...		89	.
Wages of labour	3,495
Loans	6,000
Grain sold for cost	13
		Total	102	9,495

The district mainly depends for its food-supply on imports from the plains; its material condition has, therefore, little relation to the crops locally grown

NEITHER in 1888-89 nor in 1891-92 was any pressure due to scarcity felt in Darjeeling

FAMINE AND SCARCITY.

1874.

Cause—The rainfall of 1873 fell short of the normal by nearly 30 inches; the deficiency was very marked in May, July, September, and October. The rains came to a sudden stop in September, when a copious downpour was necessary to develop and mature the winter rice crop, and in October there was little or no rain. The outturn of the autumn rice crop was one-half of an average crop, but the winter rice crop was lost more or less everywhere. Along the Brahmaputra to the east and in the north the outturn of winter rice was about eight annas, but towards the south and west the failure was more pronounced, and in the central tract most of all. On the whole, the outturn of the winter crop in 1873 averaged about 3 annas (one-fifth of an average crop) in the whole district. The effects of the serious failure of the rice crop were mitigated by the bumper rice harvest of 1872.

Private trade—Mr MacDonnell suggested that the large exportation of rice from Dinajpur in 1873 was mainly derived from Rangpur, and helped to drain the latter of much of its food stock. During the first quarter of 1874, considerable importations of food-grains were made from Cooch Behar, from Assam and from the districts of the Dacca Division, but it is likely that much of the grain so imported passed through the district into Dinajpur. The import trade collapsed in April, causing a general failure of supplies throughout the district, and a sudden increase in the prices of food-grains. It was at this stage that Government interfered by throwing grain into the market; and although the quantity sold by Government was inconsiderable, it broke up the monopoly of the traders, and by restoring confidence, exercised a powerful and beneficial moral influence on the people.

Private relief—In no other district, equally distressed, did the people owe so little to Government and so much to private charity as in Rangpur. The relief operations in this district, therefore, cost comparatively little to Government.

Relief given—The expenditure of grain and cash incurred by Government in the administration of relief was as follows:—

			Grain. Tons.	Cash. Rs.
Charitable relief	1,517	1,54,970
Wages of labour		..	922	4,50,909
Loans	1,828	1,75,934
Grain sold for cash	5,763	.
Total			10,030	7,18,818

The number of individuals charitably relieved averaged in each fortnight as below —

In fortnight ending	27th January	1874	50
Ditto	7th February	"	567
Ditto	21st "	"	1,532
Ditto	7th March	"	.	.	3,075
Ditto	21st "	"	4,625
Ditto	4th April	"	8,968
Ditto	18th "	"	14,623
Ditto	2nd May	"	.	.	18,985
Ditto	16th "	"	21,735

Ditto	25th "	"	16,136
Ditto	8th August	"	10,997
Ditto	22nd "	"	5,306
Ditto	2nd September	"	570

These were equivalent to 116,107 individuals relieved for one month.

The average daily attendance of labourers on the relief works was as follows:—

December 1873	...	59	May 1874	...	53,308
January 1874	...	722	June "	...	22,747
February "	...	1,705	July "	.	5,830
March "	...	8,988	August "	...	93
April "	...	31,696	September "	.	7

These were equivalent to 125,155 individuals relieved for the period of one month.

SINCE 1874 the district has been free from scarcity and famine.

	1896-97	12	12	...	

FAMINE AND SCARCITY.

1874

Cause—The deficiency of rain in 1873 resulted in great loss to the rice crop, of which the outturn (including *aus* and *aman* both) was estimated at $\frac{2}{3}$ ths of an average crop.

Private trade.—Grain was exported from the district to Dinajpur and Rangpur in the early part of 1874, but later on, the high prices (which reached the prohibitive rate of 7½ to 9 seers the rupee in June) induced by depleted stock, caused an influx of grain from the eastern districts.

Relief given—The Government expenditure of cash and grain is shown below.—

	Grain. Tons	Cash Rs
Charitable relief	2,549	56,440
Wages of labour	813	2,58,111
Loans	2,386	53,998
Grain sold for cash	1,834	..
Total	7,582	3,68,549

The average daily number gratuitously relieved, including the number employed on light labour, was as follows.—

For fortnight ending 23rd March	...	660	} * The majority of these persons were labourers who were aided with small gifts of grain when leaving the relief works. Later information than the 10th August is not available.
Ditto 6th April	..	583	
Ditto 14th "	
Ditto 4th May	...	8,199	
Ditto 16th "	..	9,150	
Ditto 16th June	..	42,398	
Ditto 13th "	..	23,124	
Ditto 27th "	...	15,943	
Ditto 13th July	...	24,677*	
Ditto 27th "	..	47,822*	
Ditto 10th August	..	68,413*	

These were equivalent to 120,485 individuals relieved for one month.

The average daily attendance of labourers on the relief works was as follows—

December 1873	.. 45	April 1874	29,285
January 1874	.. 587	May "	.. 45,451
February "	.. 1,546	June "	.. 17,521
March "	.. 8,000	July "	.. 8,060

These were equivalent to 110,518 individuals relieved for the period of one month.

These figures take no account of the aid afforded to the district by the labour employed on the Northern Bengal State Railway.

1888

Some distress was caused in this district by partial failure of the crops in 1888, but it was not serious enough to call for special measures of relief.

FAMINE AND SCARCITY.

1874.

Cause.—The failure of the rice crop, due to the deficient and unseasonable rainfall of 1873, was not so great in this district as in the other districts of the Rajshahi Division. The autumn or *aus* crop gave an outturn of 8 annas in the Sadar and 5 annas in the Serajganj subdivision, and that of winter rice was at least 9 annas in the Sadar and 6 annas in Serajganj, that is, not less than one-half of the average in the whole district. Had it not been for the depletion of food-stocks and consequent high prices caused by exportation to other districts, there would have been no necessity for the adoption of any relief measures in this district. As it was, the expenditure of grain and cash incurred for relief in Pabna was inconsiderable. It is shown below :—

			Grain. Tons.	Cash. Rs.
Charitable relief	70	12,911
Wages of labour	100	22,456
Loans	268	66,519
Grain sold for cash	144
Total	512	1,01,186

The average daily number of persons gratuitously relieved was as follows :—

In the fortnight ending 20th April	335
Ditto 5th May	245
Ditto 15th "	270
Ditto 28th "	282
Ditto 10th June	6,713
Ditto 24th "	3,737
Ditto 8th July	10,276
Ditto 22nd "	7,615
Ditto 5th August	4,919
Ditto 19th "	6,274
Ditto 2nd September	8,390
Ditto 16th "	7,967
Ditto 30th "	2,601

These were equivalent to 28,440 individuals relieved for a period of one month.

The average daily number of labourers employed on the relief works was as follows :—

December 1873	111
January 1874	229
February "	621
March "	1,635
April "	863
May "	2,598
June "	2,214
July "	1,118
August "	252
September "	40

These were equivalent to 9,681 persons aided by wages for one month.

SINCE 1874 the district has been free from famine and scarcity.

FAMINE RELIEF.

During 1874 the district of Patna was not included in the distressed area; neither during this famine, nor, during the subsequent scarcities in 1889 and 1892 was relief afforded in any shape in this district.

GAYA.

THE FAMINE OF 1873-74.*

Cause.—The monsoon rainfall of 1873, though not much below the average, was very deficient in September, and failed altogether in October. The rice crop was consequently poor, being estimated at 3/4ths of an average crop. The *bhados* was not less than half of an average crop, and the *rabi* gave an average outturn.

Relief given.—The aid given by Government in this district was inconsiderable. The actual expenditure of grain and cash was as follows.—

	GRAIN Tons.	CASH. Rs.
Charitable relief	220	11,522
Wages of labour	117	40,648
Loans	85	40,503
Grain sold for cash	2,438
Total	2,865	92,673

The average daily attendance of labourers on relief works was as follows:—

January 1874	142	June 1874	2,756
February "	454	July "	1,192
March "	764	August "	377
April "	1,384	September "	383
May "	2,486		

The average daily number of persons charitably relieved gradually rose from 162 in the beginning of March 1874 to 2,120 in the fortnight ending on the 8th August, and then dwindled down to 542 in the fortnight ending on the 3rd October. The average daily number in receipt of charitable relief was 977 for a period of 7½ months.

THE SCARCITY OF 1888-89.

The rains of 1888, though plentiful, were badly distributed. The fall was excessive in August, and caused serious floods, which swept away embankments and reservoirs, and nearly the whole of the *bhados* crop in the flooded area. All the three harvests (*bhados*, *aghani* and *rabi*) were poor. But only one tract of country near Sherghati was affected to such an extent as to necessitate the opening of relief works. *

The actual expenditure in the administration of relief incurred by Government and the District Board is shown below:—

	Government. Rs.	District Board Rs.	Total Rs.
Relief work	4,268	26	4,294
Charitable relief	6	...	6
Loans under the Land Improvement Act	56,125	...	56,125
Loans under the Agriculturists' Loans Act	15,857	...	15,857
Total	76,256	26	76,282

The average daily attendance on relief works was as follows:—

January 1889	155	April 1889	1,212
February "	424	May "	2,379
March "	541	June "	4,500
July 1889	4,000

Gratuitous relief was also afforded to many persons by the Mohunt of Bodh Gaya and other local zamindars.

THE SCARCITY OF 1891-92

The deficiency of rainfall in September and October 1891 caused great loss to the winter rice crop. The *rabi* was also poor owing to insufficient moisture. Apprehensions of distress were felt with regard to Gaya and several other districts of Bihar, but in Gaya the distress was not sufficiently serious to call for the intervention of Government.

SHAHABAD.

Baynsfall.

SHAHABAD

THE FAMINE OF 1873-74.

Cause—The summer and autumn rains of 1873 were deficient by $14\frac{1}{2}$ inches, and this deficient fall, unlike the almost equally deficient fall in the preceding year, was unhappily distributed. The rains commenced late, were concentrated in July and August, and ceased altogether at that most important period in September and October, when the rice plant shooting into ears requires abundant moisture to fill out and develop the grain. The result was that the *bhadoi* crops of 1873 yielded only one-fourth of an average crop, while of the great winter rice crop only one-eighth was saved. The *rahi* proved an average crop.—The Sone Canals, which were then in course of construction, were the means of saving the *aghani* and *rahi* crops on some 90,000 acres of land.

Private import trade—Besides the actual relief given in the shape of cash and grain, the wide publicity given by Government at the earliest date to the state of the country and the condition of the local markets, coupled with the reduction in railway freight, caused an uninterrupted influx of private grain, chiefly from the North-Western Provinces, and to this fact Shahabad, like the rest of South Bihar, mainly owed its immunity from serious hardship.

Relief given.—The actual expenditure of grain and cash was as follows—

		Grain Tons.	Cash, Rs.
Charitable relief	...	287	33,566
Wages of labour	...	545	1,89,373
Loan	...	158	17,437
Grain sold for cash (inclusive of 2,773 tons sold to labourers on the Sone Canals)		3,153
Total	..	4,143	2,40,376

The number of labourers relieved by wages in cash and grain was as follows—

November 1873	...	950
December "	...	2,286
January 1874	...	2,227
February "	...	2,582
March "	...	3,033
April "	...	6,290
May "	...	10,074
June "	...	6,451
July "	...	4,407
August "	...	4,493
September "	...	2,996

These were equivalent to 45,792 persons relieved for a period of one month.

The number of persons charitably relieved was as follows—

In fortnight ending 21st March 1874	...	135
Ditto 4th April	...	239
Ditto 18th "	...	413
Ditto 2nd May	...	2,361
Ditto 16th "	...	2,827
Ditto 30th "	...	3,166
Ditto 15th June	...	647
Ditto 27th "	...	1,224
Ditto 14th July	...	2,965
Ditto 30th "	...	2,559
Ditto 12th August	...	2,997
Ditto 5th September	...	2,497
Ditto 22nd "	...	2,890
Ditto 5th October	...	613

These were equivalent to 12,516 persons charitably relieved for one month.

The relief afforded by the sale of grain and by loans of grain and cash was estimated to be sufficient for the support of 170,531 individuals for a month.

The total number thus directly or indirectly relieved by Government was equivalent to 216,323 individuals relieved for a period of 30 days.

The relief operations during the famine of 1873-74 were commenced in November 1873, and brought to a close in October 1894, and thus extended over a period of 12 months.

THE SCARCITIES OF 1888-89 AND 1891-92

The harvests of 1888 and 1891 were poor in Shahabad as in the rest of Bihar, but the distress caused thereby was not sufficiently serious to require the intervention of Government.

SARAN.

THE FAMINE OF 1873-74.

Cause—The year 1872 was a year of short and badly distributed rainfall. The outturn of the *bhadoi* crop of that year was fairly good, but that of winter rice was estimated at 8 to 10 annas. The *rabi* was a little short of the average. The stock of food-grains was in consequence rather low at the opening of the year 1873-74.

The rainfall of 1873 was still more deficient and even more unfavourably distributed than that of 1872. It came late, was excessive in July, deficient in August, while in September, when most rain was needed, only one inch of rain (instead of $7\frac{1}{2}$ inches, the normal) was received. The result was that the *bhadoi* was only two-thirds of an average crop, while of the winter rice crop, only one-tenth of the average could be saved. The *rabi* crop (which in Saran is next in order of importance to the *bhadoi* crops, and supplies 50 per cent more food than the winter rice crop) also gave a poor outturn, estimated at about 7 annas.

Area affected—The entire district was affected, and no part of it is mentioned as being more seriously affected than others.

Private import trade—This showed an unexampled activity in throwing supplies of food-grains into the district. The imports were chiefly drawn from the North-Western Provinces. Added to the free importation of food-grains by private traders, a large quantity of grain was imported by Government. Prices were thus prevented from reaching prohibitive rates.

Relief given—The actual expenditure of cash and grain is shown below:—

			Grain, Tons	Cash Rs
Charitable relief	610	2,92,663
Wages of labour	11,487	15,06,412
Loans	17,894	6,41,477
Grain sold for cash	6,410
Total	36,401	24,40,552

The average daily number of persons employed on relief works was as follows:—

January 1874	20,180
February "	87,181
March "	106,850
April "	166,683
May "	197,442
June "	223,991
July "	140,765
August "	110,262
September "	101,111

The distribution of charitable relief was commenced in February 1874. The average daily number for the first fortnight ending 7th March was only 14, it rose to 1,016 in the fortnight ending on the 4th April, and then steadily rose (with slight fluctuations) to the maximum of 9,568 in the fortnight ending on the 22nd August, after which it gradually declined till the beginning of October when all gratuitous relief was stopped.

During 1889 and 1892 no relief was administered in the district of Saran.

The figures of relief in 1873-74 are very serious, and we have little ground for anticipating a better season this year.

CHAMPARAN

THE FAMINE OF 1873-74.

Cause—The rains of 1873 were deficient all over the district, the deficiency being much more marked in Bettiah than in the Sadar subdivision. The rainfall during June, July and August was rather capricious, and injuriously affected the *bhadoi* crops. The outturn of maize, the most important *bhadoi* food crop, was estimated at 10 annas, and that of millets and early rice at 12 annas. It is to be remembered that in Champaran the *bhadoi* food crops are more important than the winter rice and the *rabi* crops, and yield, in an average year, almost as much food stuff as the two latter combined.

The rains practically failed altogether in September, thus entailing the almost complete destruction of the winter rice crop, and it is doubtful if even a 2-anna outturn was realized. The *rabi* gave a variable outturn, estimated at 8 annas for the whole district; it was worst in the tract of Rannagar, which, being a rice-producing tract, had already suffered most severely.

Private trade—Towards supplementing the deficiency of food stocks, private trade seems to have done much more in Champaran than it did in either northern Muzaffarpur or Darbhanga. The great Gandak river, on which the district is situated, afforded an easy and cheap means of communication with Patna, the trade depôt of Bihar. The importations of grain by private traders were, however, on a small scale, and were not sufficient to prevent prices from reaching prohibitive rates. Throughout the famine, the prices of staple articles of food were double, and often more than double, the normal rates.

Relief given.—The expenditure of grain and cash incurred in relief was as follows:—

		Grain. Tons.	Cash. Rs.
Charitable relief	...	1,190	36,950
Wages of labour	...	7,294	6,43,808
Loans	...	8,012	8,00,430*
Grain sold for cash	...	11,081
Total	...	27,577	9,81,188

The average daily attendance on the relief works was as follows:—

November 1873	..	561	April 1874	...	83,917
December "	...	4,589	May "	...	159,668
January 1874	.	11,631	June "	..	79,752
February "	.	25,361	July "	..	73,007
March "	.	52,758	August "	...	8,938
September 1874	...	1,849			

The number in receipt of gratuitous relief could not be ascertained owing to confusion in the official records, but Mr. MacDonnell estimated that the gratuitous relief afforded was sufficient to help 77,219 individuals for a period of one month at the rate of one anna per day in cash, or three-fourths of a seer per day of grain.

THE SCARCITY OF 1888-89

Owing to the deficiency of rainfall in 1888 and the consequent injury to the winter rice crop, there was scarcity in a tract of country in the north of the district, forming part of a belt of country about 90 miles wide and stretching from east to west along the Nepal frontier through the districts of Champaran, Muzaffarpur and Darbhanga, and extending to the north of Bhagalpur. The tract affected in Champaran comprised the Dhaka thana, and parts of the Motihari thana and Madhubani outpost.

Relief operations were commenced in December, and the symptoms of distress became acute in March, owing to the partial loss of the *rabi* harvest. Relief works were closed at the end of June owing to the fall of abundant rain, which ensured full employment for the people in agricultural labour. The unusually heavy rain which fell in the latter part of July caused floods, and thus added to the sufferings of the poorer classes, about 2,000 of whom were in receipt of gratuitous relief during the months from July to September.

The average daily attendance on the relief works was as follows:—

December 1888	...	5,000	April 1889	...	9,000
January 1889	...	6,200	May "	...	11,000
February "	...	5,000	June "	...	4,000
March "	...	8,000	July "	..	300

The expenditure incurred by Government and the District Board in different shapes is shown below:—

		Government. Rs.	District Board. Rs.
Relief work	...	78,024	15,261
Gratuitous relief	...	3,480
Loans under the Land Improvement Act	...	10,307
Ditto Agriculturists' Loans Act	...	91,930
Total	...	1,83,741	15,261

THE SCARCITY OF 1891-92.

The deficiency of rainfall in 1891 and the consequent injury to the winter rice crop gave rise to apprehensions with regard to the Champaran district (as well as several other districts of Bihar and North Bengal), but the distress was not sufficiently serious to require relief from Government.

MUZAFFARPUR.

THE FAMINE OF 1873-74.

Cause.—The rains of 1873 were capricious all over the district. In June, July and August, when the *bhados* crops are in the ground, the rainfall was heavy, particularly in Hajipur, but the previous year (1872) having been comparatively dry, this did not cause any serious injury to the *bhados* crops, except in Sitamarhi, where the outturn of *bhados* was only one-half of the average. Great deficiency of rain during September, and its cessation in October, led to a more or less complete failure of the winter rice crop, of which the outturn was estimated at 6 annas in the Sadar, 4 annas in Sitamarhi and only 2 annas in Hajipur. The outturn of the *sals* crops varied from 8 annas in the Sadar to 10 annas in Hajipur and 12 annas in Sitamarhi.

Area affected.—Although the failure of the winter rice crop was general over the entire district the two subdivisions of Sitamarhi and Muzaffarpur (Sadar) stood in much greater need of relief than the riparian subdivision of Hajipur, which, being situated in the immediate vicinity of Patna, the great grain mart of Bihar, was effectively served by private traders. The Sadar subdivision was the least jeopardized by the failure of the crops, but being situated in the very heart of the famine-stricken country, the stocks in the subdivision were drained from all quarters and soon reduced to a low pitch. Neither in this subdivision nor in Sitamarhi was private import trade equal to the task of replenishing the exhausted stocks, and a large section of the inhabitants was thus thrown upon the hands of Government for subsistence. In Hajipur, Government was relieved of all anxiety by the importation of food-grains by private traders.

Relief given.—The expenditure in grain and cash is shown in the following statement:—

KIND OF RELIEF	GRAIN			CASH			Total grain.	Total cash
	Sadar	Hajipur	Sitamarhi	Sadar.	Hajipur	Sitamarhi		
1	2	3	4	5	6	7	8	9
	Tons	Tons	Tons	Rs	Rs	Rs	Tons	Rs.
Charitable relief	1,003	123	2,394	20,000	5,000	1,15,711	3,348	1,41,711
Wages of labour	5,810	300	3,400	5,68,783	32,248	4,90,690	2,500	11,00,683
Loans	6,912	000	7,555	1,00,000	10,000	1,11,255	15,067	2,21,255
Grain sold for cash	6,030	164	12,360				19,064	
Total	19,804	1,186	26,079	6,68,783	47,248	7,27,026	47,080	14,63,661

The number of labourers relieved by wages in grain and cash in each subdivision was as follows.—

	Sadar.	Hajipur.	Sitamarhi.	Total.
December 1873	851	851
January 1874	973	973
February "	.. 2,890	10,802	13,692
March "	... 25,126	...	39,715	64,841
April "	... 93,475	3,194	80,569	177,238
May "	... 174,925	7,447	144,876	327,248
June "	.. 1,8,172	8,343	102,662	269,177
July "	... 101,068	4,440	23,270	123,778
August "	... 84,242	2,736	15,205	102,183
September "	... 34,381	279	4,976	39,634

Relief works were commenced earliest in Sitamarhi (i.e., in December); in the Sadar they were opened in February, and in Hajipur not before April 1874. The highest numbers reached were 327,248 in May for the district as a whole; 174,925 in May in the Sadar, 144,876 in the same month in Sitamarhi, and 8,348 in June in Hajipur.

The distribution of charitable relief was commenced in the Sadar and Sitamarhi subdivisions at the end of March, and in the Hajipur subdivision about the end of April. It was closed in the beginning of October. The average number daily relieved was as follows:—

	Sadar.	Hajipur	Sitamarhi.	Total.
For the fortnight ending 8th April	... 250	5,300	5,550
Ditto 21st "	... 424	5,050	5,474

Ditto 13th July	... 18,902	2,964	21,256	43,122
Ditto 27th "	... 20,592	3,632	20,200	44,424
Ditto 10th August	... 18,295	3,342	24,017	45,754
Ditto 24th "	... 13,789	3,034	16,232	33,055
Ditto 7th September	10,101	1,800	6,194	18,095
Ditto 22nd "	... 5,459	1,367	1,893	8,719
Ditto 6th October	... 2,115	2,115

The highest average daily number reached was in the fortnight ending 29th June 1874 for the district as a whole, and 20,592 in July in the Sadar, 45,135 in June in Sitamarhi, and 3,921 in May in Hajipur.

The relief afforded by Government in different shapes was estimated by Mr. MacDonnell to be sufficient for the support of 3,078,546 individuals for a period of one month.

The relief given throughout this period of scarcity was on an enormous scale, and the above figures should receive careful attention.

THE SCARCITY OF 1875-76.

The rice crop of 1875 was a total failure in many places in North Bihar. The subdivision of Sitamarhi (in common with the Madhubani subdivision of Darbhanga) appears to have been specially affected, but no relief was actually required. "The Assistant Magistrate of Sitamarhi had, with praiseworthy activity, turned out the labouring population along the banks of streams, and by banking up the water had irrigated large areas of land, on which the villagers were not slow in sowing cold-weather crops. A little later on and the holders of Indian corn in Nepal began to sell freely, and poured a large quantity of grain into the market; prices went down, the bazars became amply stocked with cheap grain, and the partial scarcity in the subdivision was relieved." (*Bengal Administration Report, 1875-76.*)

THE SCARCITY OF 1888-89.

As in Darbhanga, the failure of the winter rice crop of 1891 affected a tract of country running along the Nepal frontier, and including parts of the Baragnia, Majorganj, Sonbarsa, Bela and Sursand outposts, and a small part of the Pupri thana.

The scarcity of 1888-89 was aggravated by heavy floods in the latter part of July 1889. The average daily attendance on the relief works is shown below:—

January 1889	... 6,000	June 1889	.. 10,000
February "	... 4,000	July "	... 3,500
March "	... 10,000	August "	... 4,000
April "	... 8,000	September "	.. 5,000
May "	... 15,000	October "	... 3,000

About 2,000 persons were in receipt of gratuitous relief from February to May. The numbers increased to 3,000 in June, 5,000 in July and 8,000 in August, in consequence of the distress caused by the floods; but they fell again to 5,000 in September and 4,000 in October, when all relief was gradually withdrawn. Much relief was also given during these months gratuitously and on private works by the Maharaja of Darbhanga and other local zamindars.

The total expenditure incurred in the relief operations was as follows:—

	Government.	District Board.	Total
	Rs.	Rs.	Rs.
Relief work	38,339	89,885	1,28,224
Gratuitous relief	23,815	23,815
Loans under the Land Improvement Act	1,090	1,090
Ditto Agriculturists' Loans Act	86,854	86,854
Total	1,50,098	89,885	2,39,983

THE SCARCITY OF 1891-92.

The rains of 1891-92 being very deficient, the winter rice crop of 1891 and the succeeding *rab* were both equally poor. The tracts which suffered most were the Lalganj thana in Hajipur, and the Belsand and Shunhar thanas in Sitamarhi. Considerable distress also existed in a tract to the west of Muzaffarpur, near Paru and Sahibganj, and in parts of the Katra and Muzaffarpur thanas in the Sadar subdivision. The total area affected comprised 1,300 square miles, with a population of 1,173,785 persons. About 1,50,000 maunds of food-grains were imported by private traders into the district by rail during the period from April to July 1892.

Relief works were opened in the first week of March 1892, and were closed on the 11th July, when field-work became abundant. The average daily attendance during the relief operations amounted to close upon 5,000 for a period of 19 weeks. The highest daily average number (14,147 persons) was reached in the week ending 4th June. The total cost of relief inclusive of establishment and contingent charges amounted to Rs. 67,584.

No gratuitous relief was given at the expense of Government. Several indigo-planters rendered valuable assistance in supervising relief works, and also in distributing loans.

During the period of distress, Rs. 25,616 were distributed as loans under the Agriculturists' Loans Act, and Rs. 200 under the Land Improvement Act.

DARBHANGA

THE FAMINE OF 1873-74.

Cause.—The rains of 1873 commenced late, were insufficient for the requirements of the *bhadoi* crops, or to permit of the usual rice area being sown down, and ceased in September with a deficiency varying from 11 inches below the normal in Tajpur to 23 inches in Madhubani, and 28 inches in the Sadar subdivision. The recorded outturn of the *bhadoi* crops was 8 annas in Madhubani and Tajpur, and 5 annas in the Sadar, and that of the winter rice crop was 3 annas, 4 annas and 2 annas, respectively. The drought also prevented much of the *rabi* area from being sown. The outturn of the *rabi* harvest was insignificant in the two northern subdivisions (Sadar and Madhubani), in Tajpur, however, which contains a large area of *dena* land, the *rabi* crop gave a fair outturn, estimated at 10 to 12 annas.

Area affected.—The distress was most acute in the two northern subdivisions, Madhubani and Darbhanga (Sadar). Unlike South Bihar and Saran, the importation of food-grains showed but a flickering vitality in the Sadar subdivision, and did not show any signs of activity in Madhubani from first to last. On the contrary, the latter subdivision had to spare some of its stocks to Nepal and the Sadar subdivision of Darbhanga. Tajpur, on the other hand, had the advantage of a fairly good *rabi* harvest, and enjoyed throughout the benefit of an active private import trade. It was in Tajpur, therefore, that the least help was required from Government.

Relief given.—The following statement exhibits the expenditure in grain and cash during the famine of 1873-74.—

	GRAIN.			CASH.			Total grain	Total cash
	Sadar	Madhubani	Tajpur	Sadar	Madhubani	Tajpur		
1	2	3	4	5	6	7	8	9
	Tons	Tons	Tons	Rs.	Rs.	Rs.	Tons	Rs.
Charitable relief	4,476	4,518	357	10,08,000	20,19,129	70,716	14,351	1,73,350
Wages of labour	3,690	5,478	1,071	72,350	38,900	10,400	10,700	81,08,829
Loans	5,064	8,413	1,098				14,512	1,17,250
Grain sold for cash	13,571	23,029	260				37,700	
Total	31,881	43,737	3,714				77,363	94,79,329

The number of labourers relieved by wages in grain and cash was in each subdivision as follows.—

	Sadar	Madhubani	Tajpur	Total.
January 1874	1,500	1,000	2,500
February "	25,000	20,000	..	45,000
March "	107,053	140,547	3,802	251,402
April "	220,289	309,212	2,077	531,578
May "	192,168	369,207	8,017	569,392
June "	76,183	190,398	13,362	279,943
July "	24,688	41,164	11,763	77,615
August "	21,628	36,026	8,754	66,408
September "	3,996	15,004	2,682	21,682

The highest numbers reached were 220,289 in April in the Sadar, 309,207 in May in Madhubani, and 13,362 in June in Tajpur.

The distribution of charitable relief was commenced in the beginning of April 1874, and closed early in October of the same year.

The average daily number gratuitously relieved in each subdivision is shown in the following statement:—

	Sadar	Madhubani	Tajpur.	Total

Average daily number relieved during continuance of scarcity .. 81,110 38,154 4,787 124,051

The highest daily number for the three subdivisions was 133,941 in July in the Sadar, 71,561 in August in Madhubani, and 7,463 in July in Tajpur.

The relief given by Government in various shapes was estimated by Mr. MacDonnell to be sufficient for the support of 1,954,732 individuals in the Sadar, 2,925,146 in Madhubani, and 138,638 in Tajpur for a period of one month. Allowance should, however, be made for a portion of the grain sold in Madhubani having found its way into Nepal, and for a large portion of the cash wages and loans having come back into the Treasury in the shape of sale proceeds of grain.

THE SCARCITY OF 1875-76.

Owing to the failure of the winter rice crop of 1875, some suffering was caused in the north-east parts of Darbhanga included in the parganas of Alapur and Naridigar. The administration of relief was commenced early in February 1876. The relief offered was principally in the form of village charity to the sickly and weak, and to a small extent employment was afforded on relief works, such as village roads, tanks and the like. The expenditure in relief was estimated at Rs 30,000. Extensive relief was also afforded by the Maharaja of Darbhanga.

THE SCARCITY OF 1888-89.

The chief seat of distress was a tract of land stretching through Champaran, Muzaffarpur and Darbhanga, about 90 miles long from east to west along the Nepal frontier, and extending into the north of the Bhagalpur district. The tract included the Jali and Khajauli thanas of Darbhanga. In this area the rainfall was much lighter than elsewhere, and ceased prematurely, with the result that the winter rice crop, which is the mainstay of the people, was entirely lost, while the *bhados* also failed in parts, and the *sabi* was sown under unfavourable conditions.

Relief operations were commenced in January 1889. The symptoms of distress became very acute in the last fortnight of May. Besides the excavation of tanks, the construction of the Darbhanga-Sitamarhi Railway was taken in hand as a relief work. The number on relief works appears to have gradually risen until the last fortnight of June, when abundant rain having fallen, many people were induced to return to their ordinary occupations. The number of persons employed on relief works, therefore, fell from 14,656 in the first-half of June to 6,270 in the last fortnight of June, and 5,726 at the end of July. It again rose to 19,570 at the end of August, when some light work in turfing and dressing the new roads was provided, and then began to decline. It fell to 9,158 by the 15th September, and to 6,213 by the 22nd idem. Finally, the relief works were closed in the first week of October.

A large number of persons were in receipt of gratuitous and other relief throughout the year from the Maharaja of Darbhanga, the Raja of Bachour, and other local zamindars. The cost of this relief was estimated at Rs 76,000.

The total expenditure incurred in relief by Government and the District Board was as follows.—

	Government Rs	District Board, Rs.	Total Rs.
Relief works	1,15,440	1,10,031	2,25,471
Loans under the Land Improvement Act	2,395	2,395
Loans under the Agriculturists' Loans Act	8,500	8,500
Total	1,26,335	1,10,031	2,36,366

1892

The great deficiency of the rains of 1891 caused a total failure of the winter rice crop on the high lands and great injury to the *bhados* crops. The outturn of the *bhados* was estimated at not more than 6 annas, and that of winter rice at about the same. The affected tracts were the Roshara and Bahora thanas, and a small portion of the Darbhanga thana to the east of the Darbhanga town, in the Sadar subdivision, and the Benipati and Khajauli thanas, the northern half of the Madhubani thana, and parts of the Phulparas thana, in the Madhubani subdivision.

The distressed tract was divided into seven circles. The relief works carried out consisted of the excavation of tanks and the construction of roads. Altogether 67 tanks were dug at a cost of Rs. 94,310; and 994 miles of road were taken in hand, of which 582½ miles were completed at a cost of Rs. 1,00,902. The cost in each case was exclusive of establishment and other charges. The relief operations were commenced in the beginning of March 1892, and finally closed on the 19th of July. The average daily attendance was about 19,200 for a period of 19 weeks. The highest number of persons daily employed (47,452) was reached on the 11th June. The rate of Rs. 1-6-6 per 1,000 cubic feet of earthwork then allowed was suspected to have attracted a large number of professional diggers, and was therefore reduced to Re 1. This reduction, combined with the rain which fell about this time and enabled the people to return to their ordinary occupations, led to a speedy decrease in the numbers employed. The number of labourers fell to 25,815 on the 18th June, and to 12,899 on the 2nd July, and continued to decrease until the relief operations were closed at the end of that month.

The administration of charitable relief was commenced at the end of April and brought to a close on the 23rd July. The number of persons thus relieved averaged 536 daily for a period of 14 weeks. The maximum daily average was 1,550 in the week ending the 28th May.

There was a great demand for agricultural loans, but of 2,186 applications received all except 349 were rejected, and the loans issued were restricted to the affected area and limited ordinarily to Rs. 2 per bigha. The advances made amounted to Rs. 11,880 in the Sadar, and Rs. 19,992 in the Madhubani subdivision.

The total cost of relief was as follows.—

	Rs.	A.	P.
Relief works	2,08,514	0	2
Gratuitous relief	1,541	6	4
Advances under the Land Improvement Act ...	1,700	0	0

MONGHYR.

THE FAMINE OF 1873-74.

Cause—The years 1871 and 1872 were not as prosperous in Monghyr as they were in the rest of Bihar. The pressure on food-stocks consequent thereon had an exhausting effect on the resources of the district, and the year 1873 opened with prices ranging from 10 to 20 per cent. higher than the normal.

The rainfall of 1873 in Monghyr was excessive in July and August, deficient in September, and entirely absent in October. The consequence of the unseasonable excess in the earlier months was that the *bhadoi* crop yielded only a 6-anna crop, and owing to the abnormal deficiency in September and October, the winter rice crop was only 2 annas in the Sadar and Begusarai subdivisions, and 4 annas in Jamui.

The *rabi* gave a favourable outturn, estimated at three-fourths of the average, all over the district. The district also derived much support from a large crop, which was sown over nearly 10 per cent of the cultivated area with a view to make up for the loss of previous crops.

Private trade—In spite of the deficiency of local stocks, there was considerable exportation of food-grains both by river and by railway, side by side with the heavy importations necessary to meet the local demand. The balance on the whole was in favour of imports. The interference of Government was not so pronounced in Monghyr as in districts which had not the advantage of both railway and river communication, and which were not, therefore, so readily open to the operations of private trade. The attitude of Government as a holder of large reserves, and its readiness to do all that the crisis might demand, rendered much material expenditure unnecessary.

Relief given.—The Government expenditure in grain and cash incurred in relief was as follows—

			Grain. Tons.	Cash. Rs
Charitable relief	300	83,865
Wages of labour	486	1,32,993
Loans	5,009	1,86,464
Grain sold for cash...	1,900
Total	7,695	4,03,322

The average daily attendance of labourers in receipt of wages was as follows—

December 1873	4,210
January 1874	5,227
February "	4,240
March "	4,460
April "	4,631
May "	10,596
June "	11,148
July "	3,912
August "	1,972
September "	332

These were equivalent to 50,753 individuals relieved for a period of 30 days.

The daily average number of persons charitably relieved was follows:—

In fortnight ending 30th May 1874	3,402
Ditto 13th June "	3,744
Ditto 27th " "	4,824
Ditto 11th July "	3,775
Ditto 24th " "	4,650
Ditto 8th August "	5,150
Ditto 22nd " "	2,125
Ditto 5th September "	2,084
Ditto 19th " "	100

These were equivalent to 25,587 persons relieved for a period of one month.

1888-89.

There was some pressure among small cultivators and day-labourers, but no relief measures were found necessary.

1892.

The scanty outturn of the winter rice crop of 1891, preceded by a short crop in 1890, was the cause of this scarcity. Anxiety was felt chiefly for a low tract of country in the Sadar subdivision, on the north of the Ganges, and extending to the boundaries of Darbhanga and

Bhagalpur. Relief operations were found necessary only in the extreme north of the belt, within the jurisdiction of the Bakhtiarpur outpost of the Gogri thana.

Relief works were first started in February 1892, but the attendance was very low till the latter part of May, when the excavation of some tanks in the extreme north of the district resulted in a sudden rush of labourers.

The highest average daily attendance on relief works (1,815 persons) was reached in the week ending the 2nd July. After the middle of July, the situation was so far relieved by the prospect of a good *bhadon* crop that the number of labourers rapidly dwindled away until the relief works were closed on the 23rd July.

Gratuitous relief was commenced in the latter part of February, and continued till the 20th of August, *i.e.*, a month longer than the relief works. The average daily number so relieved was 235 for a period of 24 weeks, the daily number seldom falling below 200 and never exceeding 300.

A sum of Rs. 19,088 was distributed in loans to cultivators holding from 10 to 20 bighas of land.

The total cost to Government in the relief operations during 1892 was as follows:—

			Rs	£	p.
Relief works	4,152	13 11
Gratuitous relief	1,166	10 9
Advances under the Agriculturists' Loans Act	.	.	.	19,088	13 0

admitted of the completion of the *bhados* sowings and the preparation of late rice seed beds. The total expenditure incurred by Government was as follows.—

	Rs.
Relief work	1,397
Gratuitous relief	37
Advances under the Land Improvement Act .	Nil
Advances under the Agriculturists' Loans Act .	17,458
Total .	18,892

The expenditure incurred by the Local Board in this district is shown (in the Bengal Administration Report, 1899 90) in the aggregate with that incurred in the Sonthal Parganas, and cannot be separated

The scarcity of 1892

The deficiency in the rains of 1891 caused all the three harvests to fail more or less in this district. The condition of the people was never, however, very bad, or justified excessive anxiety.

Three tracts were especially affected. The first was a small area on the northern frontier, lying west of the Burbandh, the second lay immediately round Supaul. But even in these two tracts, extending each over 20 square miles, the distress was never acute. The third, which was the largest and the most affected area, was 400 square miles in extent, and extended from the Daibhanga boundary through the Bangaon thana of Supaul and the *sadar* thana of Madhupura. The worst parts were those west of the Dimra, along the Daibhanga boundary, and in the corner between Darbhanga and Monghyr.

The prices of food-grains never reached a famine point, and it was remarkable that the exports by railway considerably exceeded the imports, thus showing that the general stock of food-grains was sufficient for local requirements, although the poorer classes stood in need of help.

Relief works were started in January. The average attendance rose to 3,194 at the end of March. It was highest (12,370) in the second week of June. The numbers then gradually declined until the 20th August, when the works were finally closed. The distribution of gratuitous relief was not commenced till the end of April, and was closed in the third week of August. The highest number of persons so relieved was 1,527 in the week ending 23rd June.

Rs. 37,180 were advanced as loans in April, May and June.

The total cost to Government was as follows —

	Rs.	A.	P.
Relief works	62,066	15	8
Gratuitous relief	5,441	3	9
Advances under the Land Improvement Act	700	0	0
Advances under the Agriculturists' Loans Act .	36,480	0	0
Total ...	1,04,688	3	5

Private relief played an important part in this district. The total sum thus contributed by private individuals amounted to Rs. 47,000.

BHAGALPUR.

THE FAMINE OF 1873-74

Cause—The rains of 1873 were not only deficient, but also unseasonably distributed. The result was a poor *bhadon* crop, and a more or less complete failure of the winter rice crop. The outturn of the *bhadon* was 6 annas in South Bhagalpur, 10 annas in Supaul, and 11 annas in Madhipura. The winter rice crop did not yield more than $\frac{1}{4}$ th of an average crop in Supaul, and half an average crop in the rest of the district. The failure of the crop was thus most complete in Supaul. The *rabi* crop, however, gave an average outturn all over the district.

Area affected—The subdivision of Supaul was most affected by the famine, but Mr MacDonnell was unable to give a separate account of the relief afforded in each subdivision, as he did with regard to Darbhanga and Muzaffarpur. He states, however, that by far the largest portion of the expenditure incurred in the relief operations was incurred in Supaul, and in limited parts of Madhipura, bordering on Supaul, and that the assistance given by Government out of Supaul was inconsiderable.

Private trade—Private import trade was always active in South Bhagalpur, and in the riverain tracts of Madhipura, but it never extended to Supaul. It was remarkable that the surplus produce of Madhipura, instead of being attracted to Supaul, where prices reached almost prohibitive rates, found its way out of the district by the accustomed trade channels.

Relief given—The expenditure in grain and cash on account of the relief operations was as follows—

			Grain. Tons.	Cash Rs.
Charitable relief	4,232	1,28,064
Wages of labour	1,474	1,85,498
Loans		...	4,276	1,47,050
Grain sold for cash	10,118
Total		...	20,100	4,60,612

The number of labourers employed during the relief operations daily averaged in each month as follows—

November 1873	...	1,351	May 1874	...	32,637
December "	...	4,166	June "	...	27,528
January 1874	..	7,145	July "	..	29,556
February "	...	3,639	August "	..	29,124
March "	..	7,956	September "	...	12,002
April "	...	22,234			

These were equivalent to 177,847 persons relieved for a period of 30 days.

The daily average number of persons in receipt of gratuitous relief was as follows.—

In fortnight ending on 24th March	1,340
Ditto 7th April	1,633
Ditto 21st "	1,143
Ditto 5th May	1,565
Ditto 21st "	12,261
Ditto 3rd June	12,783
Ditto 18th "	44,148
Ditto 15th July	50,714
Ditto 17th "	55,959
Ditto 30th "	18,475
Ditto 13th August	31,305
Ditto 20th "	44,156
Ditto 9th September	60,296
Ditto 22nd "	38,469
Ditto 7th October	19,658

These were equivalent to 194,085 persons relieved for one month.

The scarcity of 1889.

In a portion of the Supaul subdivision the loss of the rice crop, owing to the deficiency of the rains of 1888, was as great as in the adjoining parts of North Bihar. Up to May 1889, the distress was not acute, and employment was found for people requiring it in the excavation of tanks (of which 27 were finished) at the expense of private persons and of the Court of Wards. One road was under construction, but only 31 persons sought employment on it. In June distress deepened, and considerable works were opened in the affected tract at the expense of zamindars and of the Local Board. The situation, however, soon changed for the better with the more favourable rains which succeeded, and

PURNEA.

THE FAMINE OF 1873-74

Cause.—The deficient and unseasonable rainfall of 1873 reduced the *bhados* crop to one-half the average, and the winter rice crop to 3, or at the most 4 annas. The failure of the winter rice crop was severest all down the east of the district, in the lands usually flooded by the Mahanadi and the Panar.

The *rabi* crop gave a fair outturn.

Private trade.—The district appears to have enjoyed the advantage of an active private import trade throughout the famine.

Relief given.—The expenditure incurred by Government in money and grain was as follows—

		Grain Tons.	Cash. Rs
Charitable relief	...	1,897	1,92,000
Wages of labour	...	5,366	2,17,584 (including in part
Loans	...	4,583	1,13,125 the value of
Grain sold for cash	...	10,762*	.. grain given
			away as wages)
Total	...	22,608	5,22,709

* Part of this was sold after the famine was over.

The average daily attendance at the relief works was as follows—

December 1873	...	356	May 1874	...	31,029
January 1874	...	945	June	...	28,763
February	...	3,610	July	...	21,746
March	...	10,281	August	...	9,626
April	...	20,264	September	...	1,011

These were equivalent to 127,614 individuals relieved for a period of one month.

The average number of persons in receipt of gratuitous relief was as follows—

In the month ending 24th February	...	7
Ditto 24th March	...	797
Ditto 24th April	...	3,814
Ditto 24th May	...	8,233
Ditto 24th June	...	16,538
Ditto 24th July	...	36,180
Ditto 24th August	...	33,331
Ditto 24th September	...	3,572

These were equivalent to 102,502 persons relieved for a period of one month.

1889

The distress which existed in the district in 1889 arose from floods, and was unconnected with failure of the rains.

The scarcity of 1892.

During the scarcity of 1892, consequent on the failure of the winter rice crop of 1891 and of the *rabi* of 1891-92, actual distress was confined to 365 square miles of country in the Kadwa thana, and to 285 square miles in the Amur thana. The winter rice crop in these areas was estimated at about 2 annas, and the *rabi* at 5 to 6 annas.

Relief works were started on the 27th of January 1892 and closed on the 28th May. The attendance was largest in March and the first half of April, when about 3,200 persons found employment on the relief works. The total amount expended on the operations was Rs 20,578.

The distribution of gratuitous relief was commenced on the 30th January, and was continued till the 17th June. The highest number of persons so relieved was 1,360 in the week ending the 9th April. The total amount spent on gratuitous relief was Rs 3,410, of which Rs 2,380 were defrayed from private subscriptions, and the remainder devolved upon Government.

Advances to the extent of Rs 22,561 were given to cultivators under the Agriculturalists' Loans Act, and Rs. 140 were granted under the Land Improvement Act. This form of relief was not, however, confined to the Kadwa and Amur thanas, but was extended to parts of the Sodar and Grandwara thanas, and to the khas mahal of Belwa in Mamhari.

FAMINE AND SCARCITY

1873-74.

Cause—The rainfall of 1873 was only about half the normal and was deficient in every month of the year. The consequence was a short *aus* rice crop, estimated at only a 6-anna crop, and a still poorer *aghani*, which did not yield more than $\frac{1}{3}$ th to $\frac{1}{4}$ th of an average crop. The *boro* or spring rice and the other cold-weather crops of 1873-74 proved, however, to be average crops, this fact, as well as the good harvest of 1872, enabled the district to bear up better against the pressure which afterwards supervened than some of the Bihar districts.

Private trade—Private importations of grain from Dinajpur never entirely ceased during the period of distress. Prices of food-grains appear to have been comparatively easy in this district, the retail price of common rice generally standing below 11 seers per rupee, except in April and May, when it rose to 10 $\frac{1}{2}$ and 9 seers for the rupee respectively.

Relief given.—The expenditure incurred by Government in relief measures is exhibited below—

	Grain Tons.	Cash. Rs.
Charitable relief . .	1,315	26,951
Wages of labour . .	243	1,06,762
Loans . .	907	48,450
Grain sold for cash . .	1,253	.
	<u>3,718</u>	<u>1,82,163</u>

The average daily numbers of persons charitably relieved were as follow—

	7th February 1874 . .	81
	21st " " . .	357
	7th March " " . .	209
	21st " " " " . .	280
	4th April " " . .	684
	18th " " " " . .	1,036
	2nd May " " . .	3,382
	16th " " " " . .	6,340
	30th " " " " . .	9,947
in fortnight ending	13th June " " . .	9,566
	27th " " " " . .	12,648
	10th July " " . .	13,009
	24th " " " " . .	10,698
	7th August " " . .	9,315
	22nd " " " " . .	6,890
	4th September " " . .	4,458
	18th " " " " . .	3,352
	5th October " " . .	469

These were equivalent to 46,359 individuals relieved for the period of one month.

The average daily number of labourers employed on relief works was as under:—

December 1873 . .	426	May 1874 . .	7,374
January 1874 . .	260	June " " . .	5,442
February " " . .	1,816	July " " . .	3,650
March " " . .	3,366	August " " . .	2,441
April " " . .	5,154	September " " . .	762

These were equivalent to 30,691 people relieved for 30 days.

Since 1874 the district has been free from scarcity or famine.

FAMINE AND SCARCITY

1874.

Cause.—The rainfall in the district during 1873 was most unequally distributed, varying from a little under the average in the *Sadar* subdivision to about half the average in Rajmahal. The *bhadoi* crop, including autumn rice, maize and millets, yielded a 12-anna outturn. The outturn of winter rice varied greatly, from 6 annas to 9 annas, in different parts of the district. The *rabi* crop of 1873-74 afforded no material help to the people. It could not be sown on more than one-fourth of the entire area usually devoted to cold weather crops, and on that even the yield was poor. The district, however, derived much help from a plentiful crop of *mahua* and *mangoes*, as well as from jungle produce, to which the native population of the district is well accustomed.

Area affected—The failure of the rice crop was greatest in the flat country of Rajmahal. To judge by the numbers of labourers employed on relief works, it would seem that very little or no distress existed in the Deoghur subdivision: it was keenest in Rajmahal, and next in Godda and Dumka.

Private trade—Large exportations of maize and other *bhadoi* food-grains from the district were made in the closing months of 1873 and the opening months of 1874. Food-grains continued to be exported throughout the year 1874. The undulating country in the south and south-west of the district was believed at first to be out of danger, and consequently no preparations were made by the authorities to meet distress in those parts. Famine, however, suddenly declared itself there about the middle of May, and energetic measures had to be taken to avert the calamity. Mr MacDonnell cites this episode as an illustration of the inefficacy of private trade in times of famine, in spite of such advantages of railway communication as this tract of country possessed.

Relief given — The actual expenditure of grain and cash incurred by Government in relief operations in this district is shown below —

		Grain. Tons.	Cash. Rs
Charitable relief	...	121	224
Wages of labour	...	1,970	1,79,959
Loans	..	3,834	7,800
Grain sold for cash	...	643
Total	..	6,068	1,87,983

The average daily numbers gratuitously relieved were as under —

In fortnight ending 31st May	1874	116
Ditto 14th June	"	1,007
Ditto 28th "	"	1,007
Ditto 12th July	"	912
Ditto 26th "	"	3,203
Ditto 9th August	"	3,365
Ditto 23rd "	"	3,511
Ditto 6th September	"	2,944
Ditto 21st "	"	1,845
Ditto 4th October	"	908

These were equivalent to 9,420 individuals relieved for the period of 30 days

The average daily attendance on the relief works was as below in each of the four subdivisions in which the district was then divided —

	Dumka	Deo ar	mahal	Goddia	Total
January	400	400
February	540	..	540
March	20	54	2,501	2,575
April	1,559	35	10,896	..	12,490
May	4,389	82	13,771	6,141	24,383
June	8,010	75	8,455	10,499	27,039
July	4,537	37	5,036	8,616	18,226
August	3,864	154	2,923	4,870	11,811
September	2,837	85	2,036	1,172	6,130
Total	2,216	522	46,558	31,298	1,03,594

These were equivalent to 103,594 individuals relieved for the period of one month

1889

In 1889, there was partial distress in this district, which necessitated some expenditure in relief. A sum of Rs 4,366 was spent by Government in relief works. The District Board incurred some expenditure in gratuitous relief and in relief works.

FAMINE AND SCARCITY.

Since 1866 the district has been free from famine or any serious scarcity due to the failure of the rains. There was temporary and partial distress in 1899 due to failure of the winter rice crop through short rainfall in a tract some 300 square miles in extent. Some relief had to be given, but the amount spent was very small.

FAMINE AND SCARCITY.

1889.

THERE was some distress in Angul and the Khondmals in 1889. It was partly due to the short harvests of 1887 and 1888, partly to the failure of the mango and *matwa* crops in 1889, and partly to the effect of a long drought which prevailed from October 1888 to the end of May 1889. The total cost of relief measures in Angul amounted to Rs. 36,430-0-2, including agricultural loans to the extent of Rs. 12,590, but excluding the ordinary salaries of the Government Officers employed on relief work, and the establishment charges.

The measures taken in the Khondmals consisted chiefly in giving agricultural loans, making advances, which after the field season were to be repaid, not in cash, but in labour; providing work for those willing to work on roads and tanks; making advances to weavers; and opening centres for gratuitous relief on a small scale. The total expenditure amounted to only Rs 7,620.

FAMINE AND SCARCITY.

1889.

In 1888-89 there was serious distress in the Khurda subdivision and a small tract of country between the Chilka Lake and the Sea. The autumn rice crop was destroyed or injured by floods, and the yield of the winter rice crop was greatly diminished.

HAZARIBAGH.

FAMINE AND SCARCITY.

1874.

The reports and records at hand do not furnish sufficient materials for an account of the famine of 1874 as it affected this district. The following statement of expenditure of grain and cash incurred by Government in this district in 1874 is taken from a statement appended to Mr. MacDonnell's "Food-grain Supply" —

Statement of expenditure for relief in 1874

		Grain Tons.	Cash Rs
Charitable relief		..	25,381
Wages of labours	..	504	70,835
Loans	...	603	72,994
Grain sold for cash	...	154	
Total	..	1,261	1,69,210

Neither in 1889 nor in 1892 was there any serious distress in this district requiring relief from Government.

FAMINE AND SCARCITY.

1873-74

In 1873-74, two tracts of country, known as *pargana* Tori, and the Five Parganas, both lying below the central tableland and adjoining the districts of Hazaribagh and Manbhum, respectively were affected to a slight degree. The highest price of common rice reached in the Five Parganas was 10 seers for the rupee, but it lasted only for a fortnight. The distress consequent on the high prices was only local, and not serious enough to warrant the undertaking of any special or extensive measures of relief. The opening of a few roads under local management was all that was deemed necessary, and Rs. 2,360 was given as advances under the Land Improvement Act to enable the construction of petty irrigation works. A bumper harvest of *mahua* and an abundant supply of jungle produce soon put an end to all fears of an impending famine.

There was no distress in this district in 1889 or in 1892.

FAMINE AND SCARCITY

1874

Cause.—The year 1873-74 opened with a comparatively short food-supply owing to deficient harvests in the preceding year, and a very poor *mahua* crop in the spring of 1873. The *bhadoi* crops, maize and *marua* failed almost completely in 1873, and the *agham* paddy was equally a failure. The outturn of the latter was estimated at 2 to 4 annas in parganas Japla, Belanngah, Mitoni, Deogan and Pundag, and at from 5 to 7 annas elsewhere. The *mahua* crop of 1874 was, however, a bumper one, and the cold weather gave a much better outturn than was anticipated in the beginning.

Areas specially affected.—Pressure was most felt in Mitoni in the extreme north-western corner of the district, and next to this in the north and north-east of the district, and in Japla.

Private trade.—At no time during the distress was any actual scarcity of food felt in the district, then a subdivision of Lohardaga. When the authorities saw that a famine was fast invading the country, they invited the assistance of the zamindars, and encouraged grain-dealers to import food-grains, and even the ordinary cultivators were moved to utilize their plough cattle for importing grain on their own account. Large quantities of grain were thus kept continually pouring into the district from Lohardaga, and to a great extent from the tributary states of Sarguja, Gangpur and Jashpur. The country was in fact soon overstocked with food. Over and above this, *mahua* became so abundant that in August it was reported to be selling at 5 maunds for the rupee and to be unsaleable in many places.

Relief given.—The expenditure of cash and grain incurred by Government in relief operation in this district was as follows:—

			Grain, Tons.	Cash Rs
Charitable relief
Wages of labour	46	1,49,300
Loans	721	54,115
Grain sold for cash	170
Total	937	2,03,415

N. B.—The above is taken from the District Fortnightly Narratives. The expenditure shown is exclusive of contingent expenses and charges of establishment and amount expended in charitable relief. The figures given in the statement of grain and cash expenditure appended to Mr MacDonnell's "Food grain Supply" relate to the whole Lohardaga district which then included Palamau.

Charitable relief was commenced to be given in the last half of March, and was continued till the 8th August following. During this period 375 persons roughly on the average daily received relief in their own homes, generally in the shape of grain.

The average daily number of labourers employed on relief works was as follows —

In fortnight ending 21st February	1874	5,377
Ditto 7th March	"	12,025
Ditto 21st "	"	7,936
Ditto 4th April	"	8,868
Ditto 18th "	"	.	..	13,610
Ditto 2nd May	"	.	..	17,222
Ditto 16th "	"	24,012
Ditto 30th "	"	25,040
Ditto 13th June	"	1,493
Ditto 22nd "	"	1,067
Ditto 11th July	"	653

The condition of the district did not justify the extent to which relief works were under taken in 1874, nor the liberal wages paid to the people employed on the relief works. The prescribed rates of wages (1½ annas for an able-bodied man doing full work, and smaller amounts for women and children) proved to be too attractive at a time when there was very little field work available. On this discovery being made, orders were given for the enforcement of task work and for payment of wages in grain, with the unexpected result that the number of labourers fell at once from 25,040 to 1,493 in the beginning of June; and even of this small number, 822 were professional *Numahs* employed on special work. The relief operations in Palamau during 1874 is one of the many instances in which relief was overdone in that year.

1889

*Owing to the failure of the crops in the previous year, there were scarcity and high prices of food-grains in 1889 till the harvesting of the *bhadoi* crop which was a good one. No special relief measures were called for in that year or in 1892.

FAMINE AND SCARCITY.

1874.

Cause.—The year 1873 was preceded by one of a short rice crop, the yield of which was estimated at not more than five-eighths of a full crop. The rainfall during 1873 was extremely irregular and very unevenly distributed over the district. The winter rice crop gave about half the average outturn in the district as a whole; in the western paganas a 9 to 10 anna crop was realized, in the centre the outturn was about 6 to 8 annas, and in the east only 4 to 6 annas, while in some villages where facilities for irrigation were wanting, only one-eighth of an average crop could be saved. The pulse and oil-seed crops were fairly good (about 12 annas) in the west, half the average in Govindpur, but entirely failed elsewhere. The *rab* could not be sown, except on a limited area, for want of moisture in the soil, and gave, on the area sown, between one-third and one-half of an average crop; but its yield in the district was quite insignificant. The *mahua* crop and, to a small extent, the mango crop of 1874 came in as a timely relief to the poorer classes, and the spring crop of *lac* also afforded much material aid to the people.

Private trade.—Food-grains were exported from the district all through the period of scarcity. The export trade was very active in the early months of 1874. No importation of food-grains appears to have been made except that on account of Government.

Relief given.—The expenditure of grain and cash incurred by Government was as follows.—

			Grain. Tons.	Cash. Rs
Charitable relief	706	84,857*
Wages of labour	1,691	88,122
Loans	5,892	99,062
Grain sold for cash	12
Total			8,301	2,67,641

The average daily numbers in receipt of gratuitous relief were as follow:—

In fortnight ending	4th April	1874	600
Ditto	2nd May	"	5,776*
Ditto	16th "	"	5,976
Ditto	30th "	"	8,569
Ditto	13th June	"	10,496
Ditto	27th "	"	11,226
Ditto	11th July	"	20,065
Ditto	25th "	"	16,214
Ditto	9th August	"	21,948
Ditto	22nd "	"	13,576
Ditto	5th September	"	12,508
Ditto	20th "	"	9,332
Ditto	3rd October	"	8,355

These were equivalent to 68,633 individuals ir relived for one month.

The numbers employed on relief works were as follow:—

February	1874	1,371
March	"	3,215
April	"	10,002
May	"	13,917
June	"	14,259
July	"	8,211
August	"	794
September	"	127

These were equivalent to 51,896 persons relieved for 30 days.

Since 1874, the district has been free from scarcity due to failure of crops.

* Figures for the fortnight ending 18th April are wanting.

SINGILBHAM.

FAMINE AND SCARCITY

1874.

The reports and records at hand do not furnish sufficient materials for an account of the famine of 1874 as it affected this district. The following statement of expenditure of grain and cash incurred by Government in the district in 1874 is taken from a statement appended to Mr. MacDonnell's "Food-grain Supply."

Statement of Expenditure for relief in 1874.

	Grain Tons.	Cash. Rs
Charitable relief ...	291	...
Wages of labour	16,735
Loans ...	95	1,450
Grain sold for cash
Total ...	386	18,185

Since 1874, the district has not suffered from scarcity due to failure of crops.

B. C. BASU,

Assistant Director of the Department of Land
Records and Agriculture, Bengal

Countersigned.

P. C. LYON,

Offg. Director of the Department of Land
Records and Agriculture, Bengal.

ANNEXURE A TO NOTES OF DIRECTOR, DATED 17TH NOVEMBER.

Provisional return showing the approximate yield to the acre of some of the principal crops of each district of the Lower Provinces of Bengal.

W. C. MACPHERSON,
Offg. Director of the Department of Land
Records and Agriculture, Bengal.

Memorandum stating for each crop shown in the "Provisional Return" the data on which the averages have been computed.

RICE.

General remarks—Rice is a ' principal crop ' in every district of these Provinces.

1. Mr. MacDonnell's "Food-Grain Supply and Famine Relief of Bihar and Bengal" published in 1876
2. Lieutenant Otley's "Note on Rice Statistics," written in the year 1878
3. Report on the Tenancy Bill, 1887, Volume II
4. Irrigation Reports of the Public Works Department
5. Mr. Luson's Note on Experiments made in Bihar, written in 1888-89
6. Board's Return 418 of the year 1868-69 (But this return does not distinguish between husked and unhusked rice, and some of the figures given in it are obviously incorrect)
7. Hunter's Statistical Account of Districts
8. Journals of the Agri-Horticultural Society of India

In the absence of any single authoritative source of information as to the average outturn of clean rice to the acre in each district of Bengal, the statistics and estimates given in the reports noted in the margin have been consulted, and averages computed from those which are considered most trustworthy. As has been pointed out in the forwarding letter, accuracy is not claimed for these figures,

or for the figures given in the accompanying return, with regard to other crops. In some cases the figures may be approximations to the truth, but in other cases they are altogether doubtful.

2. Estimates of rice outturn per acre for Bankura, Birbhum, Murshidabad, Dinajpur, Rangpur, Patna, Gaya, Shahabad, Daibhanga, Muzaffarpur, Saran, Champaran, Monghyr and Bhagalpur have been obtained from Mr. MacDonnell's "Food-Grain Supply." The averages given by Mr. MacDonnell were arrived at from a consideration of figures specially obtained from Collectors, from enquiries made in specimen areas, from the figures given by Lieutenant Otley in his "Note on Rice Statistics," and from a consultation of all available sources of information. Mr. MacDonnell's averages may be regarded, therefore, as being up to the present date the most trustworthy figures available as to rice outturn, excepting those districts where, for test purposes, actual weighments have since been made with due care and attention.

3. In consideration of the average yield of rice entered against each district, it must be remembered that in all districts two main kinds of rice are grown, viz, winter or *aman* and *aus* or *bhadoi*; and that in some districts a third kind, viz, *boro*, is grown. The average yield to the acre for a district depends, first, upon the average yield of each kind of rice, and, secondly, upon the proportion which each kind of rice crop bears to the whole rice crop of the district. It has been usual in this Department to assume, for the whole of these Provinces, an average yield to the acre of 15 maunds of clean rice from the *aman* crop and 10 maunds from the *aus* or *bhadoi* crop.

Remarks on outturn of rice per acre shown against particular districts.

Burdwan.—Mr. Otley gives 15 to 24 maunds of paddy as the average outturn per acre. This is equivalent to 9½ to 15 maunds of rice, or (if the difference be halved), say, 1,000lbs. to the acre. Mr. A. C. Son, c.s., on page xl of his Report on the Agriculture of Burdwan, gives higher figures. Considering the figures estimated for adjoining districts, it has been thought proper to take 13 maunds, or 1,066lbs.

Bankura.—See page 318 of Mr. MacDonnell's "Food-grain Supply."

Birbhum.—See page 305 read with pages 317 and 318 of Mr. MacDonnell's "Food-Grain Supply."

Midnapore.—The average for Midnapore is based on consideration of the average outturns assigned to other districts, and on results reported in the Agri-Horticultural Society's journals. In the Board's selections of the Jellamutha and Majnamutha records, 1,555lbs. were reported as the average outturn, but this figure was rejected as being too high. Mr. Otley put the average outturn at from 21 to 36 maunds of paddy.

Hooghly.—Mr. Otley says "average 24 to 30 maunds of paddy," say, 27 maunds of paddy, or 17 maunds of clean rice, or 1,494lbs, which seems to be high considering the averages of adjoining districts, even after allowing for the alleged exceptional fertility of Hooghly. Mr. B. O. Basu says that the practice of manuring paddy land with oil-cake is found only in Hooghly.

24-Parganas.—Mr. Otley says "average 15 to 27 maunds of paddy," say, 21 maunds of paddy, or 13 maunds of rice, or 1,066lbs.

Khulna.—1,066lbs. entered, the district being similar to the 24-Parganas.

Nadia.—Mr. Otley says "20 maunds of paddy." This would give 12½ maunds of rice, or 1,025lbs.

Jessore.—1,066lbs. The same average is taken as for the 24-Parganas and Khulna.

Murshidabad.—1,230lbs. See page 262 of Mr. MacDonnell's "Food-Grain Supply." This appears to be high in comparison with neighbouring districts. The average of 20 experiments made by Babu Parbati Charan Nag in this district gave 4 maunds 30 seers to the standard bigha or, say, 1,168lbs. to the acre. See page 603 of Volume II of Bengal Government Report on Tenancy Bill.

Dinajpur.—See page 216 of Mr. MacDonnell's "Food-Grain Supply."

Rajshahi.—Mr Otley says "27 to 33 maunds of paddy." This seems to be too high. Board's Return No. XLI for 1868-69 says 1,200lbs, and this estimate has been entered.

Rangpur.—See page 233 of Mr. MacDonnell's "Food-Grain Supply."

Bogra.—14½ maunds, or 1,189lbs of rice, taken as representing the estimate of 4 maunds 34 seers shown on page 603 of Volume II of the Report on the Bengal Tenancy Bill. This estimate was made by Mr D. J Macpherson, c s, on information gathered chiefly in the Government estate of Jaipur.

Pabna.—960lbs. taken from Board's Return No XLI for 1868-69.

Darjeeling.—943lbs given in Board's Return No XLIB for 1868-69.

Jalpaiguri.—No trustworthy information available

Dacca.—11½ maunds of rice is estimated in the Agri-Horticultural Society's journal Board's Return No XLI for 1868-69 shows 450lbs to 880lbs. On page 31 of Mr. Ambica Charan Sen's Report on the Dacca District, the yield for the various kinds of paddy is stated as 3 to 12 maunds a higha, say, 9 to 36 maunds an acre, but this is of unhusked grain. It is difficult to strike an average on this. The estimate of 934lbs. is offered with much caution.

Faridpur.—960lbs. taken from Board's Return No. XLI of 1868-69.

Backergunge.—1,280lbs taken from Board's Return No XLI of 1868-69. No reason is known why the Backergunge estimate should be so much higher than that of adjoining districts.

Mymensingh.—Board's Return No XLI of 1868-69 gives 800lbs. The Agri Horticultural Society's journals give 9 to 11 maunds. Ten maunds, or 820lbs, have been taken therefore.

Tipperr.—The Agri-Horticultural Society's journals give 9 to 15 maunds. Twelve maunds, or 984lbs, have been taken therefore.

Noakhali.—Board's Return No XLI of 1868-69 gives 1,600lbs, but it is uncertain whether this means rice or paddy. As no other information is available, it is thought best to enter "not known."

Chittagong.—The Agri-Horticultural Society's journals give 18 to 21 maunds of paddy, or 11 to 13 maunds of rice. Twelve maunds, or 984lbs, have been taken.

Patna.—In default of other information as to the average for the whole district, 984lbs has been taken, being the same outturn as reckoned by Mr. MacDonnell for Gaya and Shahabad. For irrigated lands in the Patna, Gaya and Shahabad districts, the figures given are taken from Mr. Luson's note, dated 4th February 1889, giving the result of weighments made of first class crops on lands regularly irrigated from canals in the Patna, Gaya, and Shahabad districts. In 222 experiments made with transplanted *aghani dhan*, a yield averaging about 33 maunds of paddy was got. Thirty-three maunds of paddy are equivalent to about 21½ maunds of rice, or 1,763lbs, which has been entered against the heading '1st class irrigated lands for those three districts. Against the head "Average for irrigated lands" for these three districts, Mr. Luson's estimate of 12½ maunds, or 1,022lbs, for the average irrigated crop of 1888-89, shown on page 34 of the Public Works Department Irrigation Report for 1888-89, has been accepted. But it is observed that the average of experiments from 1880-81 to 1887-88 gives 16½ maunds of paddy, or only 833lbs. of rice.

Gaya.—See page 116 of Mr MacDonnell's "Food-Grain Supply." See also above under "Patna."

Shahabad.—See page 7 of Mr MacDonnell's "Food-Grain Supply." See also above under "Patna."

Darbhanga.—1,066lbs have been taken, or 13½ maunds, on consideration of the figures on page 47 of Mr MacDonnell's "Food-Grain Supply."

Muzaffarpur.—934lbs, or 12 maunds, have been taken on consideration of the figures on pages 81-82 of Mr. MacDonnell's "Food-Grains."

Saran.—See page 32 of Mr MacDonnell's "Food-Grain Supply."

Chumpanan.—See page 100 of Mr MacDonnell's "Food-Grain Supply."

Monghyr.—See page 170 of Mr MacDonnell's "Food-Grain Supply."

Bhaga'pur.—See pages 150 to 151 of Mr. MacDonnell's "Food-Grain Supply."

Purnea.—No information available on which an average for the district can be struck.

Mulda.—Mr Otley says—"The ordinary outturn of paddy per acre is 36 to 39 maunds." This would be equal to over 23 maunds of rice, which is clearly too much. The outturn for this district is therefore left blank.

Sonthal Parganas.—No trustworthy information available.

Cuttack.—902lbs is the estimate made by Mr. N. N. Banerji, Assistant to the Director in his Agricultural Report on Cuttack, which is now passing through the Press. Mr. Otley gave 15 maunds of paddy, i.e., about 9½ maunds. The average outturn of irrigated crops in the three Orissa districts shown in the Provisional Return is based upon the figures given on page 31 of the Orissa Canals, Appendix to the Public Works Department Irrigation Report for 1885-86. The averages for the five years, 1880-85, there shown give a quinquennial average of 20.40 maunds of paddy to the acre of irrigated land, equivalent to 12½ maunds of rice, or 1,045lbs. The figures returned for the same years for unirrigated land give an average of 16.66 maunds of paddy, or 10½ maunds, i.e., 854lbs. of rice.

Balasore.—902lbs estimated, as it is likely that the yield approximates to that of Cuttack. Board's Return No XLI of 1868-69 gives 800lbs.

Puri.—902lbs, on page 206 of Volume II of the Selections from the correspondence relating to the settlement of Khurda. The Settlement Officer, in his letter, dated January

1883, gives 12 maunds as the average outturn in Khurda; but Khurda is probably on the whole more fertile than the rest of the district, and 11 maunds, or 902lbs., have accordingly been taken as the district average.

Masariabagh.—Not known.

Lohardaga.—In his Report on the Agriculture of Lohardaga, written in 1890, Mr. B. C. Dasu says (page 60) that 10 maunds of paddy is the average yield. This represents 6½ maunds of clean rice, or 512lbs. This is practically the same outturn as was reported by Mr. F. A. Slack, c s, in his report written in 1888 on the settlement of the estate of the Maharaja of Chota Nagpur (see page 36 of the report).

Palamau.—The Lohardaga estimate has been taken.

Manbhum and Singhbhum.—No trustworthy information available.

WHEAT

Average yields of wheat to the acre have been shown in the Provisional Return in the case of districts in which the area cultivated nearly comes up to or exceeds 10,000 acres. On a consideration of the figures given in Mr. Finucane's Report on Wheat, No. 391T., dated 7th July 1886, and the figures given in the Report on the Wheat Production and Trade of India, published by the Government of India in 1883, an estimate of 10½ maunds, or 861lbs to the acre, has been taken for the five Bengal districts, viz., Nadia, Murshidabad, Dinajpur, Rajshahi and Pabna, under which wheat is shown as a principal crop, and 12 maunds to the acre for the Bihar districts. The average outturn depends very much on the extent to which this crop is irrigated and manured. On page 36 of his Settlement Report for Chota Nagpur, Mr. F. A. Slack shows 5½ maunds (nearly), or 451lbs, as the average yield of wheat to the acre, and this estimate has accordingly been entered under Lohardaga.

OTHER FOOD-GRAINS, INCLUDING PULSES

Every district in these Provinces has a large area of cultivation coming under the statistical head of "Other food-grains, including pulses." The most important crops under this head are barley, Indian corn, millets and gram. Some information with regard to the outturn of these crops in certain districts is contained in various agricultural reports and settlement reports which can be tabulated when the next return of the kind now submitted is prepared.

OILSEEDS.

Nearly every district in these Provinces has a considerable area under oilseeds. From the estimates given by Collectors in the forecast of the oilseed crops, it would seem that six maunds to the acre is about the average yield. In a future return, it may be possible to give estimates of yield under the three main heads of linseed, rape and mustard.

SUGARCANE.

Sugarcane also is an important crop in nearly every district of these Provinces. The existing statistics of sugar cultivation and production were considered in correspondence which passed between the Government of India and the Government of Bengal in 1888-89. A reference to that correspondence will show that the district estimates of outturn of sugar are open to much doubt. Thirty maunds or 22cwt (equivalent to 2,684lbs) of *gur*, or unrefined sugar, has been taken as the average outturn in Bengal (paragraph 11 of Statistical Department note, dated 25th July 1888). The Government of India estimated 20cwt or 1 ton as the outturn of coarse sugar per acre (paragraph 2 of Revenue and Agricultural Department Resolution of 20th March 1889), but this estimate included sugar plants of all kinds. For particular districts of these Provinces the most trustworthy statistics which are known to me are those shown on page 607 of Volume II of the Bengal Government Report on the Tenancy Bill of 1883. In his letter No 111, dated 31st March 1883, there printed, Mr. D. J. Macpherson, c s, reported that he had obtained an average outturn of 33cwt to the acre on the Jaipur Estate in Bogra, and he compares this result with a yield of 26cwt obtained by Messrs Thomson and Mylne in Shahabad.

COTTON.

Manapore.—147lbs to an acre. So shown in a statement submitted to the Government of India by the Bengal Government in the Financial Department in 1875.

All the other figures entered against cotton are taken from the Appendix to Bengal Government letter No 3573, dated 13th November 1876.

JUTE.

On page 36 of Babu Hem Chandra Kerr's report on the cultivation and trade in jute, published in 1877, six maunds per bigha is taken as the average outturn for the large jute-growing districts. This is equivalent to about 18 maunds, or, say 1,500lbs. to the acre. This estimate has been taken for all the Bengal districts. With reference to the estimate shown against Manbhum on the same page of the report cited, 750lbs. has been roughly estimated as the outturn in Manbhum.

INDIGO.

On page 23 of his Pamphlet on Indigo, Dr. Watt takes the outturn of indigo as 10 to 12lb an acre in Bengal, and 40 lb an acre in Bihar 12lb and 20lb have been taken respectively for all the Bengal districts, and for all the Bihar districts in which indigo is an important crop.

TEA.

The district outturns are those shown in the Appendix to Revenue Department letter No 304Agri., dated 7th August 1891, which agree with those published on page 132 of the Bengal General Administration Report for 1890-91

TOBACCO

In the report on cultivation and curing of tobacco in Bengal submitted to the Government of India, with Bengal Government letter No 3725, dated 29th December 1874, it was stated (paragraph 4 of the Report) that while under ordinary cultivation the yield per acre varies from 2 or 3 maunds to 6 or 7 maunds, the return under high cultivation may be from 10 to 30 or even 40 maunds. For districts in which tobacco is a principal crop, as returned in the agricultural statistics published in 1891, the outturns shown in Appendix A to the Report of 1874 above quoted have been shown.

CINCHONA.

The estimate of 158lb per acre has been kindly supplied by Dr. Prain.

OPIMUM.

The figures entered for opium show the average outturn per standard acre of opium for the ten years (1881-82 to 1890-91). They have been compiled from the Opium Administration Report for 1890-91. As no separate figure is given for Darbhanga, the outturn for Muzaffarpur has been entered under it.

GANJA.

The estimate of 824lb is obtained by taking the average of the estimated yield for the six years 1885—1891 shown on page 34 of the Excise Administration Report for 1890-91.

W. C. MACPHERSON,

*Offg. Director of the Dept. of Land Records and
Agriculture, Bengal.*

DARJEELING,

The 14th June 1892.

ANNEXURE B TO DIRECTOR'S NOTES DATED 17TH NOVEMBER.

Statement showing roughly the average outturn per acre, in maunds, of bhadoi, kharif and rabi crops in Bihar.

Name of crop	Average outturn per acre in maunds.	REMARKS
1	2	3
Winter rice	12 to 13 maunds per acre, of rice	For purposes of the winter rice forecast 15 maunds per acre is taken as the average outturn of winter rice in these Provinces. In a return published by the Agricultural Department in 1892, showing the average outturn per acre of the principal crops of these Provinces 9-4 lbs or 12½ maunds was accepted as the average outturn of rice per acre in Bihar. The winter rice crop in Bihar yields a smaller outturn than that in Lower Bengal. Twelve to 13 maunds may be, therefore, taken as a fair average rough estimate.
Bhadoi rice	10 maunds of rice	In estimating the rate of outturn per acre of clean rice for the bhadoi crop, 10 maunds has been provisionally assumed to be the average outturn. This figure may be accepted for Bihar.
Wheat	12 maunds	In Agricultural Department return previously referred to the average outturn, after consulting different reports, was taken as 8-4 lbs per acre, or 12½ maunds per acre. About 12 maunds per acre or 4 maunds per Bengal bigha may be accepted as an approximately correct average for Bihar.
Barley	13 maunds	
Gram	14 maunds	The outturn of gram is very much the same as that of barley, if anything, a little more, and 14 maunds may be well accepted as the approximate average outturn per acre.
Maize	13½ maunds	
Marua	10 maunds	
Bajra	10 ditto	
Jowar	12 ditto	

N N BANERJEE,

Assistant Director of Land Records and Agriculture.

CALCUTTA,
The 3rd November 1896.

The following is published for general information.

Offg Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 24th November 1896.

WEATHER AND CROP REPORT.

For the week ending the 23rd November, 1896.

Burdwan.—Rainfall nil. Weather warm by day, cold at night. Rain threatening. *Aman* being harvested everywhere, probable outturn as follows—Sadar 4 to 10 annas, Kalna 5 to 8 annas, Katwa 12 annas, and Raniganj 4 to 6 annas; the crop varying greatly in different parts of the districts. Sugarcane doing well. Fodder and water sufficient. Common rice selling as follows:—

			Srs.	
Sadar	9 to 11	0
Kalna	.	..	9½ to 10	0
Katwa	10	10
Raniganj	10	4

} per rupee.

Birbhum.—No rain, but cloudy. *Aman* being cut, outturn 9 to 10 annas. New rice sells at 10½ to 11 seers per rupee.

Bankura.—No rain except for a slight shower to-day (23rd). Weather fair in the beginning of the week, but latterly cloudy. No improvement in the condition of the crops. Fodder and water sufficient for the present. Sporadic cases of cow-pox continue to occur. Common rice selling at Bankura 11 seers per rupee and at Vishnupur 12 seers.

Midnapore.—No rain this week, but to-day (23rd) cloudy. Paddy being cut, crop on high lands damaged. Locusts have appeared, but no serious damage has been done to the *rabi* crops. *Rabi* still being sown. Sugarcane and indigo doing fairly well. Cattle-disease reported from Salboni, Garhibeta, and Keshiary. Fodder and water sufficient. Common rice selling as follows:—

			Srs.	
Sadar	10	
Contai	11 to 15	
Tamluk	10	
Ghatal	10	

} per rupee

Hooghly.—No rain throughout the district. Weather very cloudy to-day (23rd). *Aman* is withering in places. Rain required urgently. *Rabi* cultivation going on. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Sowing of *rabi* almost over. Cutting of *aman* rice on high lands commenced. Rain badly wanted for *aman* rice. Fodder and water sufficient. Common rice sells from 9 to 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather hot in the day, cool at night. In south of the district winter rice is estimated to yield 10 to 12 annas, elsewhere 8 annas. *Rabi* sowings going on slowly owing to want of rain. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

			Srs.	
Sadar	8½ to 10	
Barasat	8½	
Basirhat	9	
Diamond Harbour	10	

} per rupee.

Nadia.—Sky cloudy. No rain. Standing crops getting worse day by day for want of rain in thana Tehatta of Meherpur subdivision. *Rabi* crops also affected in places by a kind of insect-pest called *jara*. Fodder sufficient. Wells and tanks are drying up. Common rice sells at 8 to 10 seers per rupee. Started test earth-works at task-work rates on the incomplete famine road from Meherpur to Kaliganj from the 15th November. The number attended daily as follows:—

15th November	972
16th	584
17th	552
18th	586
19th	704
20th	769
21st	1,009
22nd	839

Murshidabad.—No rain. Weather seasonable. *Aman* and *rabi* suffering for want of rain. Prospect of *kharif* not favourable. State of sugarcane, mulberry, and indigo appears good. Fodder sufficient. Common rice sells as follows:—

	Srs.	
Sudar	9½	} per rupee.
Kandi	10½	
Jangipur	12	

Jessore.—Weather hot during day; cool at night. Rain badly wanted for *rabi* crops and *boro* seedlings. *Rabi* crops in low lands and *aman* in low beds in Narail subdivision are good, but those in high lands are bad. Cattle-disease reported from thana Muhamadpur in Magura subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	8 to 10	} per rupee.
Jharkhanda	9	
Magnia	8 to 8½	
Narail	9	
Bongaon	9	

Khulna.—Rainfall nil. Weather fine and cool. *Aman* paddy and other crops suffering from want of rain. In south-west of the district there will be a total failure of *aman* paddy, the only crop grown there. Test relief works are about to be opened. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Khulna	8 to 10	} per rupee.
Bagerhat	8½	
Satkhira	8	

Rajshahi.—No rain, but sky overcast. Harvesting of *aman* paddy progressing; outturn is bad to middling. *Rabi* sowings proceeding, rain wanted for proper germination. Fodder and water available. Price of rice continues very high, but stationary.

Dinajpur.—Average rainfall 01. Crops on low lands doing well, but on high lands bad. *Rabi* crops doing well. No cattle-disease. Fodder and drinking-water sufficient. Common rice sells at 8 to 9½ seers per rupee.

Jalpaiguri.—Rainfall nil. Weather getting cold; cloudy since yesterday (22nd). Prospect of *hamanti* paddy continues unfavourable. Sowing of *rabi* crops going on. Fodder and water sufficient. Average price of common rice 8½ seers per rupee.

Darjeeling.—Rainfall nil. Weather seasonable. Hills—*agham dhan* and *bara marua* being harvested; wheat, barley, and *phaphur* progressing favourably, *kala* and *bhutma* will soon be harvested. Terai—*Hamanti* paddy coming to maturity, prospects not unfavourable, mustard and *kala* being sown. Coarse rice selling as follows:—

	Srs.	
Hills	6 to 8	} per rupee.
Terai	7½ to 8	

Bhutta sells at 13½ seers per rupee.

Rangpur.—No rain. Early *aman* being harvested in places. *Rabi* crops being sown. Prospects fair. To-day (23rd) is cloudy with a slight drizzle. Clouds and fog without rain may do harm by causing insects to appear. Common rice selling from 7 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather clear; cloudy sometimes. Reaping of winter rice and *rabi* sowings in progress. No cattle-disease. Fodder and water sufficient. Common rice (new) at head-quarters 9 seers per rupee and in the interior from 8½ to 11½ seers per rupee.

Pabna.—Cloudy and drizzling weather to-day (23rd); rain probable. Winter rice is being harvested; a 4 to 6-anna crop expected. *Rabi* crops drying up for want of rain. Water becoming scarce. Rain urgently required. Fodder available. Rice selling at 8 to 8½ seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy going on. Prospects show no improvement. *Rabi* crops being sown. No cattle-disease. Price of common rice 8 to 10 seers per rupee.

Mymensingh.—Rainfall nil. Mornings and evenings cool. Cloudy to-day (23rd). Winter rice being reaped. Condition of cattle good except at Jamalpur. Fodder and water available. Common rice sells at 7 seers 6 chutaks to 8 seers per rupee; new rice 10 seers per rupee.

Faridpur.—Weather seasonable Prospects of crops unfavourable. No rain hitherto, but sky is now cloudy, and there is likelihood of rain. No cattle-disease Common rice sells from 8 to 9 seers per rupee.

Backergunge.—Rainfall nil. Weather seasonable Prospects of standing crops poor on high land and average on low land Cattle-disease reported from some places in station Backergunge Price of common rice—*aman* 6 to 10 seers per rupee, and *aus* 7½ to 13½ seers per rupee.

Tippera.—Weather cloudy No rain Reaping of *aman* paddy commenced. Fodder and water available Price of rice has fallen slightly, and is sold at 8 to 11½ seers per rupee.

Noakhali.—Rainfall nil Weather seasonable Prospects of winter rice crop bad for want of rain. No cattle-disease Fodder and water available. Price of rice ranges from 8 to 10 seers per rupee.

Chittagong.—Rainfall nil Weather dry. *Aman* crop suffering and *rabi* sowings retarded for want of rain. Prospects poor Water and fodder sufficient. Rice sells at 8 to 10 seers per rupee.

Patna.—Rainfall 72 Paddy being reaped *Rabi* and opium doing well Light showers of rain which fell almost throughout the district last night (22nd) will do much good to standing crops Prices expected to fall Common rice selling in Patna at 10 seers per rupee. Test works opened but not largely attended Fodder and water for cattle sufficient

Gaya.—Paddy harvesting going on Sowings of poppy and *rabi* continue. Prospects fair

Shahabad.—Rainfall at Sadar 45 and at Buxar 15. Weather cloudy There was rain on 22nd, which will be beneficial to *rabi* Winter rice in irrigated tracts doing fairly well Number on relief works on Saturday (21st)—men 133, women 133 and children 73 Common rice selling at 8½ seers per rupee.

Siwan.—Rainfall on Sunday (22nd) 19. *Rabi* sowing still continues, crop germinating well Sowing of poppy going on Sugarcane-pressing commenced in Siwan subdivision A few cases of cattle-disease in Gopalganj subdivision Fodder and water sufficient Prices are—common rice 9 seers, wheat 8½ seers, barley 10½ seers, *mahan* 12 seers, gram 10½ seers *arhar* 11½ seers, *munna* 14½ seers per rupee

Champaran.—Slight rain at Sadar yesterday (22nd) 03 Sky overcast for the last, two days *Rabi* sowings making little progress Common rice sells at 9½ seers per rupee, against 9 seers (last week) and average 17½ seers Fodder and water sufficient Two test relief works at Sadar and two in Bettiah opened Number employed on Saturday (21st)—men 1,138, women 425 and children 431 Gratuitous relief nil

Muzaffarpur.—Rainfall on Sunday (22nd) evening 19. Prospects continue gloomy Prices of food-grains are as follow —Common rice 8 seers, wheat 8 seers, *mahan* 12 seers, barley 10 seers, gram 11 seers, *arhar* 13 seers, *munna* 15 seers per rupee.

Darbhanga.—Paddy ripening Rain on 23rd instant (32) will do immense good to *rabi* Sky thickly cloudy. *Rahar* promising Common rice selling at 11 seers per rupee

Monghyr.—Rainfall at Sadar 11, Begusarai 16, Jamui 1 Weather cloudy. *Rabi* sowings still continue, prospects not good of those already sown for want of moisture Paddy harvesting commenced Bad outturn of other crops except that of *rahar* Cattle-disease still reported from Begusarai Sufficient fodder and water Common rice sells as follows:—

				Srs	
Sadar		8 to 9	} per rupee.
Begusarai		8	
Jamui		Aghani 10	

Bhagalpur.—Rainfall at Sadar 03 Sky cloudy. From want of moisture in the soil the outlook for *rabi* crops is bad. *Aghani* rice is being harvested No complaint as regards drinking-water or fodder. Common rice sells as below.—

				Srs.	
Sadar	10	} per rupee
Banka	11½	
Madhipura	10	
Supaul	11	

Purnea.—Rainfall 08 *Aghani* paddy ripening, and harvesting has begun. Tobacco and other *rabi* crops being sown, but progress retarded by drought Cattle-disease reported from Araria and Raniganj thanas. Fodder and water sufficient. Common rice sells as follows:—

				Srs	
Sadar	10	} per rupee
Araria	11	
Kishanganj	8	

Malda.—Drizzling rain last night (22nd). Sky cloudy. Winter rice is being harvested; expected outturn not more than six annas. Locusts have destroyed about 8 annas mustard in Kharba thana. *Kalmi* ripening. Ordinary rice selling at 11 seers a rupee. No want of fodder. Supply of drinking-water is not sufficient in certain places in Barindra tract.

Sonthal Parganas.—Weather cloudy still. Some rain at head-quarters this morning (23rd), none reported from subdivisions. Dews rather better. Prices are—new rice 10 to 16 seers, old rice 8 to 10 seers, maize 13 to 20 seers per rupee.

Cuttack.—Rainfall nil. Weather warm and cloudy. *Sarad* and *rabi* crops withering in unirrigated tracts for want of moisture. *Laghu* rice being harvested. *Guru* rice in ear. Insects still exist in Banki. Condition of cattle good. Fodder sufficient. Common rice sells as follows.—

				Srs. c	
Cuttack	11 13	} per rupee
Jajpur	14 7	
Kendrapara	14 7	
Banki	15 12	

Balasore.—Weather seasonable. Sky occasionally cloudy. Early *sarad* rice being harvested; outturn expected from 4 to 12 annas. Late *sarad* in ear will prove a failure, except where irrigated. *Rabi* crops suffering and sowing retarded for want of rain. Fodder and water sufficient. Common rice sells at 12 and 15 seers per rupee at Sadar and Bhadrak respectively.

Angul.—No rain. Average paddy outturn in Angul will not be less than 8 annas, *rabi* not more than 4 annas. In Khondmals much the same results expected. Coarse rice selling at 16 seers per rupee in Angul and 18 seers in Khondmals.

Puri.—No rain. Weather fairly cool, occasionally cloudy. Crops withering for want of moisture. Prospects as before. Fodder sufficient. Condition of cattle good. Price of common rice 9 seers 5 chitaks per rupee in the Chilka tracts, and 11 seers 8 chitaks to 15 seers 12 chitaks elsewhere.

Hazaribagh.—Little rain to-day (23rd). More rain expected. Rainfall at Sadar 19. Prospects of paddy 2 to 8 annas. Rice sells from 7 to 9 seers per rupee.

Lohardaga.—Rainfall (30) will do good to *rabi*. Reaping of *don dhan* continues. Rice sells at 9 to 10 seers per rupee. Fodder and water sufficient.

Palamau.—No rain. Prospect of *rabi* gloomy. Fodder and water-supply sufficient except in thana Mohudar. Cattle-disease prevailing in Leshganj outpost. Coarse rice selling at about 8 seers per rupee.

Manbhum.—No rain. Weather somewhat warm. Prospects of crops on ground remain unchanged. Paddy on high lands still being cut for fodder. Reaping on lower lands commenced in places. Cattle-disease still exists in a few villages in head-quarters subdivision, but appears to be gradually decreasing. Fodder ample. Drinking-water sufficient at present. Common rice sells at 8 to 11 seers per rupee at Sadar and 8½ seers at Gobindpur. No general distress expected at present. A little rain fell here this morning. The weather is now cloudy.

Singhbhum.—Raining since last night. *Rabi* prospects will now improve. Old rice selling at 10 seers and new rice at 12 seers per rupee.

General Summary.—Some rain has fallen in Bihar and Chota Nagpur, but there has been practically none elsewhere in the Lower Provinces. Patna has had a fall of 72 inch. The light rainfall is reported to have improved the prospects of the *rabi* crops in Patna, Gaya, Shahabad, Saran, Darbhanga, Lohardaga and Singhbhum. Except in these districts and in Northern Bengal, the sowing of the *rabi* crops and the germination of what has been sown are still retarded for want of rain. The harvesting of winter rice has begun. As previously reported, this crop has seriously suffered on high lands, but on low lands it is expected to yield a fair outturn. The insects which had been infesting the rice crop in Orissa are said to still exist in Banki. Locusts and insects have appeared in places in Midnapore, Nadia, and Malda. No cattle-disease is reported except from a few localities. Prices have shown a slight tendency to fall in a few districts. The numbers employed on relief-works on Saturday, the 21st, were—Nadia 1,009; Champaran—1,994 (men 1,138, women 425 and children 431); Shahabad 359 (men 153, women 133 and children 73). In Patna, it is said, the works have not been largely attended.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,

The 24th November, 1896.

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

The mean pressure of the seven days Inches.
29.595

The average pressure of the corresponding period for 24 years, Surveyor-General's Office 29.988

The total number of hours of bright sunshine Hours.
62.4

The maximum possible number of hours of sunshine 76.8

The mean temperature of the seven days 71.5

The average temperature of the corresponding period for 24 years, Surveyor-General's Office 74.3

The extreme variation of temperature 24.4

The maximum temperature 83.8

The highest velocity of the wind in one hour Miles.
8

The mean relative humidity %
72

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office 71

The total fall of rain from 15th to 21st November 1896 Inches.
Nil.

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.03

The total fall from 1st January to 21st November 1896 53.17

The average fall of the corresponding period for 24 years, Surveyor-General's Office 65.14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

 dew; = fog.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 23rd November 1896.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 6895A.

GENERAL.—No. 6266A.—The 27th November 1896—Mr. S. O. Roberts, Deputy Magistrate and Deputy Collector, Champaran, whose services have been placed at the disposal of the Public Works Department of this Government for employment on the work of acquiring lands required for Segowhie-Baxaul Railway, is vested with the powers of a Collector under Act I of 1894 in that district.

No. 6279A.—The 28th November 1896—Babu Suresh Chunder Sinha, Deputy Magistrate and Deputy Collector, Noakhali, is allowed leave for one month and fifteen days, under article 291 of the Civil Service Regulations, with effect from the date on which he may be allowed to avail himself of it.

No. 6297A.—The 30th November 1896—Mr. Egbert Laurie Lucas Hammond, who has recently been appointed to be a member of the Indian Civil Service, is appointed to be an Assistant Magistrate and Collector in the Bhagalpur Division, and is posted to the headquarters station of the Bhagalpur district.

No. 6313A.—The 1st December 1896.—Babu Iswar Chunder Nandi, Officiating Personal Assistant to the Commissioner of Chittagong, is allowed leave up to the 27th November 1896, under article 291 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 17th September 1896

No. 6317 A.—The 1st December 1896.—The following officers acted in the first grade of Magistrates and Collectors for the periods mentioned opposite their names:—

Mr. T. Inglis, Magistrate and Collector, Patna, from the 15th July to the 23rd November 1896, both days inclusive.

Mr. R. W. Carlyle, Magistrate and Collector, Darbhanga, from the 31st October to the 10th November 1896, both days inclusive.

No. 6321 A.—The 1st December 1896.—The following officers are appointed to act, until further orders, in the first grade of Magistrates and Collectors from the dates mentioned opposite their names:—

Mr. J. D. Anderson, Magistrate and Collector, Chittagong, from the 11th November 1896.

Mr. W. O. Macpherson, Director of Land Records and Agriculture, Bengal, from the 24th November 1896

No. 6348 A.—The 1st December 1896.—Mr. W. Maxwell is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, and is posted to the head-quarters station of the district of Nadia, on being relieved of his present appointment as Officiating Magistrate and Collector of that district.

No. 6353 A.—The 1st December 1896.—Babu Jagadis Chunder Sen, Officiating Deputy Collector, Backergunge, is vested with the powers of a Collector under Act I of 1894 in that district.

No. 6356 A.—The 1st December 1896.—Mr. F. R. S. Collier, Magistrate and Collector, on furlough, is appointed to be Magistrate and Collector of Birbhum.

No. 6358 A.—The 1st December 1896.—Mr. E. G. Drake-Brockman, Joint-Magistrate and Deputy Collector, is posted to the head-quarters station of the district of Bhagalpur, on being relieved of his present appointment as Officiating Magistrate and Collector of Birbhum.

LEGISLATIVE.—*No. 6293 A.—The 30th November 1896.*—The Lieutenant-Governor accepts the resignation tendered by Mr. James Pratt. of his seat in the Council of the Lieutenant-Governor of Bengal for making Laws and Regulations.

ECCLESIASTICAL.—*No. 6236 A.—The 25th November 1896.*—The Revd. V. W. Kinsman is appointed to be Chaplain of Dinapore, with effect from the date on which he may assume charge of his duties.

The Revd. Mr. Kinsman is also appointed to act, until further orders, as Chaplain of Bankipore.

No. 6350 A.—The 1st December 1896.—The Revd. W. P. G. Field, Chaplain of Cuttack, is allowed furlough for one year, under article 648 (a) of the Civil Service Regulations, with effect from the 27th October 1896.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT—(OPIUM).

NOTIFICATION—No. 4900-O.

The 30th November 1896.—Mr. W. B. Talbot, Probationer substantive *pro tempore* in the 4th grade of Assistant Sub-deputy Opium Agents, is transferred from the Bihar to the Benares Opium Agency, and Mr. W. S. Dawe, Probationer substantive *pro tempore* in the 4th grade of Assistant Sub-deputy Opium Agents, is transferred from the Benares to the Bihar Opium Agency.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,—(LAND REVENUE).

NOTIFICATION—No. 4876L R

The 30th November 1896.—In modification of rule 10 of the Rules framed by Government under section 55 of the Land Acquisition Act I of 1894, published under Notification No. 29T.R., dated the 24th April 1895, at pages 401-402, Part I of the *Calcutta Gazette* of the 1st May 1895, the Lieutenant-Governor, with the previous sanction of the Governor-General in Council, is pleased to make the following revised rule:—

10. "In giving notice of the award under section 12 (2) and tendering payment under section 31 (1) to such of the persons interested as were not present personally or by their representatives when the award was made, the officer shall require them to appear personally or by representatives by a certain date, to receive payment of the compensation awarded to them, intimating also that no interest will be allowed to them if they fail to appear.

NOTIFICATION—No. 4887L R.

The 30th November 1896—Under the powers conferred upon him by section 101 (2) (a) of the Bengal Tenancy Act VIII of 1885, His Honour the Lieutenant-Governor is pleased to order that a survey shall be made and a record of rights prepared in respect of all lands included in taluk Krishna Ram Sen, No. 1744, comprised within the boundaries of mauzas Dakna, Aikhal, Chandrai Chorata, Kulkhal, Hoglabania and Krishna, in thana Golachipa, and mauzas Chirapara and Dariker, in thana Sarupkati, in the district of Backergunge

The particulars to be recorded in the survey and record of rights shall be the following—

- (a) The name of each tenant.
- (b) The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat, or under-raiyat, and if he is a tenure-holder, whether his rent is liable to enhancement during the continuance of his tenure.
- (c) The situation, quantity and boundaries of the land held by him.
- (d) The name of his landlord.
- (e) The money-rent payable, or if a produce-rent, the fact that a produce rent is paid.
- (f) The mode in which that rent has been fixed, whether by contract or order of a Court or otherwise.
- (g) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.
- (h) The special conditions and incidents, if any, of the tenancy.
- (i) The name of each proprietor (including rent-free owner) with the character and extent of his interest, and the situation, quantity and boundaries of the lands held by the proprietor.
- (j) The name of each rent-free occupant, the situation, quantity and boundaries of the land held by him, and whether he holds rent-free by the permission of the proprietor of the land, or of his predecessor in title, or independently of such permission.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4932L R

The 30th November 1896.—Under the powers conferred upon him by section 101(2) (a) of the Bengal Tenancy Act, VIII of 1885, the Lieutenant Governor is pleased to order that a survey shall be made and a record-of-rights prepared in respect of all lands included within the boundaries of Government Estate Salimpur Dimodar and Mahenderpore, bearing tauzi No 180, in the district of Patna

The particulars to be recorded in the survey and record-of-rights shall be the following—

- (a) The name of each tenant.
- (b) The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy-raiyat, non-occupancy raiyat or under-raiyat, and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.
- (c) The situation, quantity and boundaries of the land held by him.
- (d) The name of his landlord.
- (e) The money-rent payable, or if a produce-rent, the fact that a produce rent is paid.
- (f) The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise.
- (g) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.
- (h) The special conditions and incidents, if any, of the tenancy.
- (i) The situation, quantity and boundaries of the proprietor's private lands, as defined in Chapter XI of the Act.
- (j) The name of each rent-free occupant, if any, the situation, quantity and boundaries of the land held by him, and whether he holds rent-free by the permission of the proprietor of the land, or of his predecessor in title, or independently of such permission.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal

NOTIFICATION—No. 4804L.R.

The 1st December 1896.—Under the powers conferred upon him by section 101, sub-section 2 (a) of the Bengal Tenancy Act VIII of 1885, the Lieutenant-Governor is pleased to order that a survey shall be made and a record of rights prepared in respect of all lands included within the boundaries of the Government Estates in the district of Tippera, mentioned below.

The particulars to be recorded in the survey and record of rights shall be the following:—

- (a) The name of each tenant.
- (b) The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat, or under-raiyat, and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.
- (c) The situation, quantity and boundaries of the land held by him.
- (d) The name of his landlord.
- (e) The money-rent payable, or if a produce-rent, the fact that a produce-rent is paid.
- (f) The mode in which the rent has been fixed, whether by contract, by order of a Court, or otherwise.
- (g) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.
- (h) The special conditions and incidents, if any, of the tenancy.
- (i) The situation, quantity and boundaries of the proprietor's private lands as defined in Chapter XI of the Act.
- (j) The name of each rent-free occupant, if any, the situation, quantity, and boundaries of the land held by him, and whether he holds rent-free by permission of the proprietor of the land or his predecessor in title or independently of such permission.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal

NOTIFICATION—No. 4906L.R.

The 1st December 1896.—Babu Bhupendra Nath Gupta, Officiating Deputy Magistrate and Deputy Collector, is appointed to be the Settlement Officer of the Government and other estates in the district of Noakhali, with effect from the date on which he joins that appointment.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4906L.R.

The 1st December 1896.—Babu Bhupendra Nath Gupta, Officiating Deputy Magistrate and Deputy Collector, is authorised, under section 3 (17) of the Bengal Tenancy Act, VIII of 1885, to discharge the functions of a Revenue Officer in the district of Noakhali, under the provisions of that Act so far as they relate to Revenue Officers. He is also vested with the powers of a Settlement Officer under Rule 1, Chapter VI of the Rules under the Bengal Tenancy Act.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4907L.R.

The 1st December 1896.—Babu Sarat Chandra Bose, Kanungo, is appointed to be an Assistant Settlement Officer of the Government and other estates in the district of Noakhali, with effect from the date on which he joins that appointment.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4908L.R.

The 1st December 1896.—Babu Sarat Chandra Bose, Kanungo, is authorised, under section 3 (17) of the Bengal Tenancy Act, VIII of 1885, to discharge the functions of a Revenue Officer in the district of Noakhali, under the provisions of that Act so far as they relate to Revenue Officers. He is also vested with the powers of a Settlement Officer under Rule 1, Chapter VI of the Rules under the Bengal Tenancy Act.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

GENERAL DEPARTMENT.—(EDUCATION).

NOTIFICATION—No. 3937.

The 26th November 1896.—It is hereby notified that the Lieutenant-Governor of Bengal, in exercise of the powers conferred by sections 4 and 5 of the Charitable Endowments Act, 1890, and upon the application, with will annexed, of George Burgh McNair, the Administrator to the estate and effects of Ebenezer Johnstone Barton, deceased, late a member of the Bengal Civil Service, doth hereby order and direct that the sum of Rs. 5,097-5-6, being the equivalent at the exchange of the day of £300 sterling, shall, as from the date of the first publication of this notification, vest, and be thenceforth vested, in the Treasurer of Charitable Endowments for the territories subject to the Government of Bengal, to be held by him and his successors (subject to the provisions of the Charitable Endowments Act, 1890, and any rules from time to time framed thereunder by the Governor-General in Council), upon trust to apply the said sum of Rs. 5,097-5-6, or the income thereof, to the endowment and maintenance of a permanent fund, to be called the "Barton Fund," in accordance with the provisions made in that behalf in a scheme settled by the Local Government for the administration thereof, the particulars of which scheme are contained in the schedule annexed hereto, and it is hereby further notified that the said scheme, the particulars of which are contained in the schedule hereto, shall come into operation on the vesting of the said sum of Rs. 5,097-5-6 in the Treasurer of Charitable Endowments for the territories subject to the Government of Bengal.

THE SCHEDULE.

1. The endowment hereby created shall be called, in memory of the late Ebenezer Johnstone Barton, of the Bengal Civil Service, the "Barton Fund," and its object is and shall be the establishment and maintenance of a scholarship of Rs. 7 a month, tenable for two years, to be awarded every year to the student from the Jessore Zilla School who passes the Entrance Examination of the Calcutta University highest in each year, and who has not gained any Government or other scholarship. In the event of there being no student eligible in any year to receive such scholarship, the amount of such scholarship shall be added to the balance at credit of the said "Barton Fund." When the balance at credit of the fund shall have amounted to a sufficient sum, the same shall be invested upon securities of the Government of India, and the income thereof applied for the purpose of increasing the value of the said scholarship to Rs. 10 a month.

2. The Trustee to be appointed under section 5 (1) of the Charitable Endowments Act, 1890, to administer the property vested by the foregoing notification shall be the Magistrate, for the time being, of Jessore.

3. The scholarship as and when it shall become available shall be awarded by the Director of Public Instruction.

4. The income to be derived from the property mentioned in the foregoing notification and from any subsequent investment to be made as provided in clause 1 hereof shall be paid by the Treasurer of Charitable Endowments, in whom such property is vested, to the Magistrate, for the time being, of Jessore as such Trustee as aforesaid, and on receipt thereof the Trustee shall pay thereout the sum of Rs. 7, or (in the event of the scholarship being increased as heretofore mentioned) the sum of Rs. 10 monthly to the holders for the time being of the aforesaid scholarship, who shall at the date of each such payment have complied with the conditions upon which such scholarship shall have been awarded as aforesaid.

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 3932.

The 1st November 1896.—In supersession of all previous orders, the following gentlemen are appointed to be members of the District Committee of Public Instruction in the district of the Sonthal Parganas:—

- | | | |
|---|-----|----------------------|

NOTIFICATION.

The following draft of certain rules which it is proposed to make in exercise of the powers conferred by sections 5 and 7 of the Indian Explosives Act (IV of 1884) is published, as required by section 18 of the said Act and Government of India, Home Department, Notification No. 1964, dated 2nd September 1887, for the information of persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Lieutenant-Governor after the 1st day of February 1897.

2. Any objection or suggestion which may be received from any person with respect to the draft before that date will be considered by the Lieutenant-Governor.

NOTE.—All changes proposed in the existing rules are indicated in italics.

DRAFT.

In exercise of the powers conferred by sections 5 and 7 of the Indian Explosives Act (IV of 1884), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules to regulate the manufacture, possession and sale of explosives in the Lower Provinces of Bengal.

Nothing in these rules relating to the possession of explosives shall apply in any port, as defined in the Indian Ports Act, 1889, for which the Local Government may have made, or may make, special rules under the Indian Explosives Act (IV of 1884) to regulate the possession of explosives.

Nothing in these rules shall apply to the manufacture, possession or sale of any explosive—

- (a) *by order of the Government, or*
- (b) *by any person employed under the Government in the execution of the Indian Explosives Act (IV of 1884), or as a keeper of a magazine, artisan, soldier, sailor, policeman, or otherwise, or enrolled as a Volunteer under the Indian Volunteers Act (XX of 1869), in the course of his employment or duty as such.*

RULES UNDER THE EXPLOSIVES ACT, 1884, FOR THE MANUFACTURE, POSSESSION AND SALE OF EXPLOSIVES IN THE LOWER PROVINCES OF BENGAL.

PRELIMINARY.

1. For the purposes of these rules, explosives shall be classified as follows namely,—

Class 1	Gunpowder.
Class 2	Nitrate-mixture.
Class 3	Nitro-compound
Class 4	Chlorate-mixture.
Class 5	Fulminate.
Class 6	Ammunition.
Class 7	Firework.

And when an explosive falls within the description of more than one class, it shall be deemed to belong exclusively to the latest of the classes within the description of which it falls.

CLASS 1.—*Gunpowder Class.*

The term “gunpowder” means exclusively gunpowder ordinarily so called.

CLASS 2.—*Nitrate-mixture Class.*
